The **FEDERAL REGISTER** is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see http://www.nara.gov/fedreg.

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and it includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

GPO Access users can choose to retrieve online **Federal Register** documents as TEXT (ASCII text, graphics omitted), PDF (Adobe Portable Document Format, including full text and all graphics), or SUMMARY (abbreviated text) files. Users should carefully check retrieved material to ensure that documents were properly downloaded.

On the World Wide Web, connect to the **Federal Register** at http://www.access.gpo.gov/nara. Those without World Wide Web access can also connect with a local WAIS client, by Telnet to swais.access.gpo.gov, or by dialing (202) 512–1661 with a computer and modem. When using Telnet or modem, type swais, then log in as guest with no password.

For more information about GPO Access, contact the GPO Access User Support Team by E-mail at gpoaccess@gpo.gov; by fax at (202) 512–1262; or call (202) 512–1530 or 1–888–293–6498 (toll free) between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $699, or $764 for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $264. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $10.00 for each issue, or $10.00 for each group of pages as actually bound; or $2.00 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 67 FR 12345.

Printed on recycled paper.

Rules and Regulations

Federal Register
Vol. 67, No. 50
Thursday, March 14, 2002

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 75

[Docket Number LS–01–07]

Increase in Fees for Voluntary Federal Seed Testing and Certification Services and Establishment of a Fee for Preliminary Test Reports

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Agricultural Marketing Service (AMS) is increasing the hourly fee rate charged for voluntary Federal seed testing and certification services and establishing a fee for issuing preliminary test reports. The fee rate is increased to cover increases in salaries of Federal employees, rent, supplies, replacement equipment, and other increased Agency costs. A new fee is established to recover the cost of providing preliminary test reports.

EFFECTIVE DATE: April 15, 2002.

FOR FURTHER INFORMATION CONTACT: Richard C. Payne, Chief, Seed Regulatory and Testing Branch, Livestock and Seed Program, AMS, USDA, Room 209, Building 306, BARC–East, Beltsville, Maryland 20725–2325; Telephone: (301) 504–9430, Fax: (301) 504–8098; e-mail: *Richard.Payne2@usda.gov*.

SUPPLEMENTARY INFORMATION:

A. Executive Order 12866

This rule has been received by the Office of Management and Budget and has been determined to be not significant for purposes of Executive Order 12866.

B. Regulatory Flexibility Act

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), the AMS has considered the economic impact of this action on small entities. It has determined that its provisions will not have a significant economic impact on a substantial number of small entities.

The AMS provides, under the authority of the Agricultural Marketing Act (AMA) of 1946, a voluntary, user-fee funded seed testing and certification service to approximately 65 businesses per year. Many of the users of the testing and certification services would be considered small businesses under the criteria established by the Small Business Administration (13 CFR 121.201). Over ninety-five percent of the samples tested in this program represent seed and grain scheduled for export. Grain is examined for the presence of specified weed and crop seeds upon request of the USDA's Grain Inspection, Packers and Stockyards Administration. A Federal Seed Analysis Certificate, containing purity, germination, noxious-weed seed examination, and other test results is issued upon completion of the testing. The Federal Seed Analysis Certificate is required documentation for shipments of seed and grain from the United States entering certain countries.

The AMS regularly reviews its user fee financed programs to determine if the fees are adequate. The most recent review determined that the existing fee schedule will not generate sufficient revenues to cover program costs while maintaining an adequate reserve balance. Without a fee increase, FY 2002 revenues for seed testing and certification services are projected at $137,000, costs are projected at $172,000, and the trust fund balance is projected to be $47,000 or 3.28 months of operating reserve. With a fee increase, FY 2002 revenues are projected at $160,000, costs are projected at $174,000, and the trust fund balance is projected to be $68,000 or 4.69 months of operating reserve.

This action will raise the hourly rate charged to users of the seed testing and certification services. This fee increase is necessary to offset increased program operating costs resulting from: (1) Salary increases for all Federal employees in 2001 and 2002, (2) increases in rent, (3) increases in costs of supplies needed for testing samples, and (4) purchases of replacement equipment needed to provide the service.

The AMS estimates that this rule will yield an additional $22,000 during FY 2002. The hourly rate for seed testing and certification services will increase by approximately 17 percent. The costs to entities will be proportional to their use of the service, so that costs are shared equitably by all users. The increase in costs to individual firms will be, on average, approximately $13.00 per Federal Seed Analysis Certificate issued. There will also be an increase of $1.90 for each duplicate certificate issued. In addition, this action will establish a fee of $13.00 to recover the cost of issuing preliminary test reports.

C. Civil Justice Reform

This action has been reviewed under Executive Order 12988, Civil Justice Reform. This action is not intended to have retroactive effect. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule. There are no administrative procedures that must be exhausted prior to any judicial challenge to the provisions of this rule.

D. Paperwork Reduction Act

The information collection requirements that appear in part 75 of the regulations have been previously approved by OMB and assigned OMB Control Number 0581–0140 under the Paperwork Reduction Act (44 U.S.C. chapter 35).

Background and Changes

The USDA is authorized by the AMA of 1946, as amended, 7 U.S.C. 1621 *et seq.*, to provide voluntary Federal seed testing and certification services to facilitate the orderly marketing of seed and grain and to enable consumers to obtain the quality of seed and grain they desire. The AMA provides that reasonable fees be collected from users of the program services to cover, as nearly as practicable, the costs of services rendered.

The AMS regularly reviews programs to determine if fees are adequate and if costs are reasonable. This action will increase the hourly fee rate and charges for voluntary seed testing and certification services provided to the seed and grain industries to reflect the costs currently associated with providing the services.

A recent review of the current hourly fee rate, effective March 1, 2001,

VOL
67
ISS
50
MR
14
2002
UMI

revealed that anticipated revenue will not cover increased program costs. Without a fee increase, FY 2002 revenues for seed testing and certification services are projected at $137,000, costs are projected at $172,000, and the trust fund balance is projected to be $47,000 or 3.28 months of operating reserve. With a fee increase, FY 2002 revenues are projected at $160,000, costs are projected at $174,000, and the trust fund balance is projected to be $68,000 or 4.69 months of operating reserve.

The hourly fee for service is established by distributing the projected annual program operating costs over the estimated revenue hours of service provided to users of the service. Revenue hours include the time spent conducting tests, keeping sample logs, preparing Federal Seed Analysis Certificates and storing samples. As program operating costs continue to rise, the hourly fees must be adjusted to enable the program to remain financially self-supporting as required by law. Program operating costs include the salaries and fringe benefits of seed analysts, supervision, training, and all administrative costs of operating the program.

Employee salaries and benefits account for approximately 75 percent of the total budget. A general and locality salary increase of 3.81 percent for 2001 and 4.77 percent for 2002 for Federal employees involved in the seed testing and certification service became effective in January 2002 and will affect program costs.

This fee increase is necessary to offset increased program operating costs resulting from: (1) Salary increases for all Federal employees for 2002, (2) increases in rent, (3) increases in costs of supplies needed for testing samples, and (4) purchases of replacement equipment needed to provide the service.

In view of these increases in costs, the Agency is increasing the hourly rate charged to applicants for the service, including the issuance of Federal Seed Analysis Certificates from $44.40 to $52.00. The fee for issuing additional duplicate certificates is increasing from $11.10 to $13.00 and a fee of $13.00 is established for issuing preliminary reports.

This action will recover the costs associated with providing the voluntary testing service to the seed and grain industry. Although the user-fee increase will increase costs to individual firms, the cost for providing the seed testing and certification services will increase by an average of only $13.00 per Federal Seed Analysis Certificate and $1.90 for each duplicate certificate. It is estimated that the total revenue generated will increase by approximately $22,000 annually.

Summary of Public Comment

A notice of proposed rulemaking was published in the **Federal Register** (66 FR 53550) on October 23, 2001. No comments were received.

List of Subjects in 7 CFR Part 75

Administrative practice and procedure, Agricultural commodities, Reporting and recordkeeping requirements, Seeds, Vegetables.

For the reasons set forth in the preamble, 7 CFR part 75 is amended as follows:

PART 75—REGULATIONS FOR INSPECTION AND CERTIFICATION OF QUALITY OF AGRICULTURAL AND VEGETABLE SEEDS

1. The authority citation for part 75 continues to read as follows:

Authority: 7 U.S.C. 1622 and 1624.

§ 75.41 [Amended]

2. In § 75.41, "$44.40" is removed and "$52.00" is added in its place.

3. In § 75.43, a new paragraph (c) is added to read as follows:

§ 75.43 Laboratory testing

* * * * *

(c) The charge for a preliminary report issued prior to completion of testing shall be $13.00 and billed in accordance with paragraph (a) of this section.

§ 75.47 [Amended]

4. In § 75.47, "$11.10" is removed and "$13.00" is added in its place.

Dated: March 11, 2002.

[Docket No. FV01–81–01 FR]

RIN 0581–AC03

Regulations Governing the California Prune/Plum (Tree Removal) Diversion Program

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule establishes procedures for a California Prune/Plum Diversion Program. The program is voluntary and consists wholly of tree removal. The program is being implemented under clause (3) of Section 32 of the Act of August 24, 1935, as amended. The program will help the California dried plum industry address its severe oversupply problems. The tree removal is expected to bring supplies into closer balance with market needs, and provide some relief to growers faced with excess supplies and acreage, and low prices.

EFFECTIVE DATE: January 2, 2002.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW Stop 0237, Washington, D.C. 20250–0237; Telephone: 202–720–2491; Fax: 202–720–8938; or E-mail: *Ronald.Cioffi@usda.gov.*

Small businesses may request information on the diversion program by contacting Jay Guerber at the above address, telephone, fax, or E-mail: *Jay.Guerber@usda.gov.*

SUPPLEMENTARY INFORMATION:

Executive Order 12866

This final rule has been determined to be non-significant for the purposes of Executive Order 12866 by the Office of Management and Budget (OMB).

This final rule is effective January 2, 2002, to reflect the beginning of the application period specified in the proposed rule. Prompt notification of growers concerning their participation in the program and prompt tree removal are needed for the industry to achieve the expected program goals.

Public Law 104–4

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Pub. L. 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State and local governments and the private sector. Under section 202 of the UMRA, the Agricultural Marketing Service (AMS) generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with "Federal mandates" that may result in expenditures by State and local governments, in the aggregate, or by the private sector, of $100 million or more in any one year. When such a statement is needed for a rule, Section 205 of the UMRA generally requires the AMS to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-effective, or least burdensome alternative that achieves the objectives of the rule.

This rule contains no Federal mandates (under the regulatory provisions of Title II of the UMRA) for State and local governments or the private sector of $100 million or more in any one year. Therefore, this rule is not subject to the requirements of Sections 202 and 205 of the UMRA.

Executive Order 12988

This final rule has been reviewed under Executive Order 12988, Civil Justice Reform. The rule is intended to have preemptive effect with respect to any State or local laws, regulations or policies which conflict with its provisions, or which would otherwise impede its full implementation. Prior to any judicial challenge to the provisions of this rule or the application of its provisions, all applicable administrative procedures must be exhausted.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the reporting and recordkeeping provisions generated by this final rule were approved by the Office of Management and Budget (OMB). The Agricultural Marketing Service received emergency approval under OMB No. 0581–0201, California Prune/Plum Tree Removal Program—Section 32 (as amended 7 U.S.C. 612c). The emergency approval expires May 31, 2002. A regular submission will be sent to OMB requesting approval for three years.

Two forms are needed for the administration of the tree removal program. Growers wishing to participate in the program submitted an "Application for Prune Tree Removal Program" (FV–298). The proposed rule estimated that about 200 growers would submit applications. The application period ended January 31, 2002, and a total of 481 program applications have been submitted. It is estimated that each form took about 30 minutes to complete. Thus, the total burden for filing grower applications has increased from 100 to 240.5 hours. A total of 10 hours has been added to cover the recordkeeping burden on growers. Thus, the total burden hours for the program will be 250.5 hours. After removing their trees, growers will then have to sign a statement (FV–299) stating they wish payment. No additional burden has been estimated for this second form which would require only a signature. Finally, participants will be required to retain records pertaining to the tree removal program for two years after the year of removal.

Executive Order 12372

This program is not subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR part 3015, subpart V published at 48 FR 29115 (June 24, 1983).

Executive Order 12612

It has been determined that this rule does not have sufficient Federalism implications to warrant the preparation of a Federalism Assessment. The provisions contained in this rule will not have a substantial direct effect on States or their political subdivisions or on the distribution of power and responsibilities among the various levels of government.

Authority for Tree Removal Program

The program is intended to reestablish prune/plum farmers' purchasing power. Programs to reestablish farmers' purchasing power are authorized by clause (3) of Section 32 of the Act of August 24, 1935, as amended (7 U.S.C. 612c) ("Section 32"). This clause of Section 32 authorizes USDA to "* * * reestablish farmers" purchasing power by making payments in connection with the normal production of any agricultural commodity for domestic consumption." Section 32 also authorizes USDA to use Section 32 funds "* * * at such times, and in such manner, and in such amounts, as USDA finds will effectuate substantial accomplishments of any one or more of the purposes of this section." Furthermore, "Determinations by USDA as to what constitutes * * * normal production for domestic consumption shall be final."

Need for the Tree Removal Program

Production of prune/plums for marketing as dried plums is concentrated in California. Production of dried plums during the 2000 season increased for the second consecutive year, to nearly 219,000 tons (natural condition).

Changes in growing conditions have substantially altered the production outlook for 2001. Production was originally estimated to be 220,000 tons. However, due to a lighter crop-set in major producing areas, as well as freezing temperatures and hail, production for the 2001 crop year is now expected to range between 140,000 and 155,000 tons. This smaller crop somewhat alleviates the oversupply situation, but does not represent a change in the longer-term oversupply situation.

When the crop was estimated at 220,000 tons in the spring of 2001, the industry discussed the use of volume control authorized under the Federal marketing order. In addition, carryin inventories from the 2000 crop year were reported at 100,829 tons. With this level of inventories and crop, the total available supply would have been 320,829 tons.

With this estimated crop size, establishing a 48 percent reserve (52 percent free tonnage) was discussed. The industry does not have a history of establishing reserve percentages, and reserve percentages were last used in the 1970's. The fact that the marketing order committee even considered use of the reserve provisions indicates the gravity with which the industry views the oversupply problem. The use of marketing order reserve provisions is intended to help industries deal with surplus production and facilitate orderly marketing of their crops.

The Prune Bargaining Association (PBA) represents about 40 percent of the independent growers and negotiates a selling price for its members. With the large anticipated crop for the 2001 season and the large carryin inventory, the PBA had difficulty establishing a price with handlers. Even with the smaller crop of 155,000 tons, the PBA could only negotiate a price of $763 per ton. This compares to $845 for the 2000 season, or a decrease of 9.7 percent. Although the price has been set, not all handlers have signed the agreement. Even this lower price may be too high in the eyes of the non-signing handlers, given current supply conditions.

The smaller crop size for 2001 has provided the industry some relief in reducing total available supplies. However, there are still a large number of nonbearing acres (15,000) that will become productive over the next six years. In addition, there are many acres with older, less productive trees which could be replanted in the near future. A tree removal program will assist growers who are facing difficult replanting decisions by allowing them to receive funds for the removal of trees and, at the same time, prohibit those growers from replanting prune/plums in those orchards. Prune/plum growers also tend to be producers of almonds, walnuts, and cling peaches. Plantings of these crops could increase in future years as growers remove prune/plum acreage.

Bearing acreage expanded to a record 86,000 acres during the 2000 season and the average yield increased 19 percent. Yields are anticipated to increase further as more densely planted acres

become productive over the next several years.

Nonbearing acreage, which is an indicator of future production levels, increased to an all-time high of 26,000 acres in 1998. This represented a 22-percent increase in the productive capacity of the industry. The non-bearing acres are more densely planted than in previous years which results in a higher yield per acre.

The dried plum industry faces a long-run surplus situation. For the 2000 crop year, bearing acres were 86,000 and non-bearing acres were 15,000. Bearing acres could exceed 100,000 in the near future. With yields in excess of 2.0 tons per acre, production could be expected to be above 200,000 tons in many crop years.

Total domestic shipments exceeded 100,000 tons for six seasons in the late 1980's and early 1990's, but have declined from a high of 108,085 processed tons in 1996. Per capita consumption has been steadily declining since 1980. Export shipments have been stagnant. As a result of these domestic and export trends, total shipments have never exceeded 190,000 processed tons.

Until recently, export shipments were a source of growth in the dried plum industry. In 2000, exports represented 47 percent of total shipments. However, the strong dollar and the downturn in the economies in Asia and Europe have significantly slowed export sales.

Due to the significant supply-demand imbalance, the industry anticipates several years in which the expected annual carryin inventories will exceed the industry's desirable carryin level of approximately 40,000 tons. If dried plum markets continue to be over-supplied with product, grower prices and grower relations with packers will deteriorate significantly. Even with the lower production estimate for the 2001 crop year, the carryout inventory is expected to exceed 76,000 tons.

High prices from 1992 through 1995, and a more balanced supply and demand situation, helped to stimulate investments in new acreage. This additional acreage came from a variety of sources, mainly rice and pasture land. Intensifying the anticipated surplus situation is the fact that new acres are more productive than existing acres, which causes output to grow more rapidly in proportion to acreage growth.

It takes dried plum trees 6 years to become fully productive. Many of the costs of producing plum trees are "sunk," making it difficult to reverse decisions once those acres are planted. Because supply is slow to adjust to changing market conditions, the industry anticipates many years of production outpacing demand, resulting in continued distressed grower conditions.

From 1980 through 2000, the total cost per ton of producing dried plums exceeded the growers' season-average prices. Similarly, the total cost per acre exceeded revenue per acre.

However, it is also important to consider variable cost. In recent years, the total revenue per ton and per acre has been greater than the total variable cost per ton and per acre. Prices and revenues greater than variable costs provide some indication of why a dried plum producer continues to harvest and process a crop despite losing money.

Tree Removal Diversion Program

The industry is requesting a voluntary tree removal program estimated to cost $17 million. The industry would like to remove a minimum of 20,000 bearing acres of prune/plum trees. With many of the current bearing acres reaching the age where replanting would be considered, the industry is trying to provide an incentive to growers to remove older trees, while ensuring that those orchards are not replanted with prune/plum trees.

To be eligible for the tree removal program, orchards must have a minimum yield of 1.5 tons of dried prune/plums per net-planted acre. With a minimum threshold yield of 1.5 tons of dried prune/plums per net-planted acre, sufficient land would be enrolled in the tree removal program to reduce annual production by approximately 30,000 tons. A net-planted acre is the actual acreage planted with prune/plum trees.

The industry has estimated that it will take $8 to $9 per tree to induce growers to participate in such a program. It is believed that financial institutions that provide growers operating funds would not allow them to participate if the payment per tree is below this level.

This type of one-time decrease in production would more closely align supply with demand, while assuring an adequate supply. This would allow the industry to concentrate their efforts on rebuilding demand for future years.

The industry has already undertaken a smaller-scale tree removal program. However, to finance this grower-initiated tree pull program, grower assessments for promotion were reduced from $50 per ton to $30 per ton. Less money is available for promotion, but growers felt that this re-direction of funds was necessary to help address the oversupply situation.

The tree removal program would be administered through the Agricultural Marketing Service (AMS) and the Prune Marketing Committee (Committee). The Committee is an administrative agency appointed by AMS to locally administer the terms of Federal Marketing Order No. 993.

Any prune/plum producer wishing to participate in the program filed an application with the Committee. The application period began January 2, and ended January 31, 2002.

Each applicant provided information needed by the Committee to operate the program. This included, for example, the number of trees the applicant wished to remove and their location. The applicant also will have to certify that he/she has not contracted to sell the land or otherwise already arranged to have the trees removed for commercial purposes (*e.g.*, shopping centers, housing developments, resorts, etc.). Applicants should note that under the regulations, they bear responsibility for ensuring that prune/plum trees are not replanted, whether by themselves or by successors to the land, until after June 30, 2004, and that if they fail to prevent such replanting, they must refund any USDA payment, with interest, made in connection with the tree removal program. The Committee will review each application for completeness, and make reasonable efforts to contact growers to obtain any missing information.

In order to be eligible to participate in the program, the orchards or blocks of trees being removed from production would have to have a minimum yield of 1.5 dried tons per net-planted acre during either the 1999 or 2000 crop years. A net-planted acre is the actual acreage planted with prune/plum trees. This means that abandoned orchards will not be eligible for participation. USDA considered establishing the minimum qualifying yield at 2.2 tons per acre, but determined that at that level, too many orchards would be ineligible for the program. A lower yield would not reduce production as much as the industry desires.

USDA has allocated $17 million for this program, including administrative costs. Applications would be approved until the level of available funding was reached. Each participating grower will have to then remove trees from production by June 30, 2002. Growers will be paid $8.50 for each eligible tree removed. This level of payment is deemed necessary for a significant number of growers to participate in the tree-removal program. It would cover most of the costs of removing the trees (bulldozing, cutting, etc.), and preparing the land for other uses. The costs vary depending on the number of acres removed. Some cost savings may accrue with larger acreage removals.

Estimated costs for removing, piling, chipping, or other disposal methods range from $142–$225 per acre or from $1.29–$2.05 per tree. Costs for removing the roots and other debris are expected to range from $163–$289 per acre or from $1.48–$2.63 per tree. Leveling of the ground is expected to cost $161–$401 per acre or $1.46–$3.65 per tree. Fumigation of the tree holes is expected to cost $550 per acre or $5.00 per tree. This would amount to $9.23–$13.33 for each tree removed. The $8.50 payment under the program is expected to offset most of the grower's costs, but should be sufficient to encourage growers to participate in the program.

Each grower participating in the program will have to agree not to replant prune/plum trees on land cleared under this program through June 30, 2004. Because it takes new acres at least six years to be productive, acreage participating in the tree-removal program would not return to commercial prune/plum production for at least eight years and possibly nine years because plantings occur in January and February. Alternative crops could be planted. Additionally, the current economic conditions in the industry, specifically weak demand, reduced per capita consumption, stagnant domestic shipments and exports, and declining grower prices and revenues, would appear to limit the incentives for replanting acreage to prune/plum trees.

Final Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities. Accordingly, AMS has prepared this final regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to actions in order that small businesses will not be unduly or disproportionately burdened.

There are approximately 1,250 producers of dried plums in California. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.201) as those having annual receipts of less than $750,000. An estimated 32 producers, or less than 13 percent of the 1,250 total producers, would be considered large producers with annual incomes over $750,000.

This final rule establishes a tree removal diversion program for California dried prune/plums. Authority for the program is provided in clause (3) of Section 32 of the act of August 24, 1935, as amended.

Participation in the diversion program is strictly voluntary, so individual producers, both small and large, can weigh the benefits and costs for their own operations before deciding whether to participate in the program.

Economic Assessment of the Tree Removal Diversion Program

To assess the impact a tree removal program would have on prices growers receive for their product, impacts on grower prices and inventories with a tree removal program and without a tree removal program were estimated. An econometric model was developed for the purpose of estimating nominal season average grower prices under both scenarios.

A tree removal program will directly reduce the number of bearing acres, but there will not be an impact until the 2002 crop year since harvesting of the 2001 crop is completed.

In 2000, there were still 15,000 non-bearing acres. The industry has indicated that no additional plantings of prune/plum trees for acreage expansion are occurring at this time. Therefore, after the 15,000 non-bearing acres come into production, the productive capacity of the industry is assumed to stay constant.

The tree removal analysis assumes that 20,000 acres are removed through the tree removal program, while 3,000 of the non-bearing acres become productive in 2002. This results in bearing acres being reduced from 86,000 in 2001 to 69,000 in 2002. Bearing acres increase by 3,000 acres in each of the subsequent years until 2007, rising to 72,000 in 2003, 75,000 in 2004, 78,000 in 2005, and 81,000 in 2006 and 2007.

At the time the analysis was performed, production for the 2001 crop year was estimated by the Department's National Agricultural Statistics Service (NASS) at 155,000 natural condition tons. Marketable production is generally 93 percent of total production, yielding an estimated 144,500 marketable tons for 2001. Carryin inventory for the 2001 crop year was computed by the marketing order committee at 100,829 tons as of June 30, 2001. These figures are used to derive an estimated total available supply of 244,979 tons for 2001. This level of supply accounts for the fact that a number of voluntary measures have been taken by the industry to reduce the level of production for the 2001 crop year, including crop abandonment and cutbacks on cultural practices.

Shipments are estimated to grow by 1 percent annually, which results in estimated total shipments of 165,932 tons for 2001. The one percent growth in shipments reflects decreased government surplus purchases and possible retail price effects.

For 2002, total shipments are estimated at 167,591 tons and the carryin inventory is estimated at 79,047 tons. With the tree removal diversion program reducing bearing acres to 69,000 for the 2002 crop year, total available supply is estimated at 257,440 tons. It should be noted that through 2001, carryin inventory does not exactly match the prior year's difference between total available supply and total shipments. This is due to shrinkage and other minor adjustments computed by the Federal marketing order committee. However, for this analysis, the estimated carryin from 2002 to 2007 is estimated to be the exact difference between estimated total supply and estimated shipments from the prior year.

The analysis also assumes that yields will fluctuate up and down, in keeping with the known "alternate bearing" tendency of prune/plum trees. Estimated production, computed by multiplying acreage times yield, fluctuates accordingly.

As carryin inventories are reduced, the total available supply moderates for crop years 2003 through 2007, relative to the situation without a tree removal program. This results in season average grower prices ranging from $845 to $1,084 during that same time span. It should be noted that the margin of error for these estimates becomes very large for future crop years.

Even though season-average grower prices per ton rise under the tree removal program, all product produced is not necessarily of marketable quantity. Costs are incurred on all the production, but revenue is received only on product actually marketed. Thus, the economic effect of the tree removal program on a per acre basis is to dramatically reduce losses and bring producer returns closer to a break-even level. With losses still being incurred by producers, there should be only a limited incentive to further expand production as a result of the tree removal program. It will remain for growers to control costs and to expand demand to ensure their longer-term economic stability.

Grower prices are a small component of the finished dried plum product and are not closely associated with movements in retail prices. However, the increases in grower prices estimated for crop years 2003 through 2007 may have an impact on retail prices. The extent of any retail price increases would depend on processor and retailer

VOL 67 ISS 50 MR 14 2002 UMI

margins and the pricing and availability of substitute products, such as raisins or other dried fruits. It should be noted that dried plum prices are estimated to increase with or without a tree removal program, but the magnitude of the grower price increase is greater with the program.

Without a tree removal program, bearing acres are estimated to increase to 89,000 by the 2002 crop year. Production would be in excess of 200,000 tons, resulting in carryout inventories in excess of 100,000 tons in 2002. In addition, under this scenario, 2002 grower prices are estimated at $789 per ton. With high inventories and low grower prices, market forces are assumed to induce growers to remove less productive acres and the number of bearing acres is estimated to decline from 89,000 in 2002 to 84,000 in 2007. Even with the decline in bearing acres, production and inventories remain excessive from 2002 through 2007. However, in 2007, carryout inventories fall to an estimated 6,592 tons.

Under both scenarios, grower prices increase and inventories become more manageable. The difference is that, under a tree removal program, adjustments to inventories and prices occur more rapidly. This would accelerate benefits to growers, who would otherwise be struggling to break even in a depressed market, until market forces brought about a slow correction.

In addition to the direct impact on growers' prices and revenues that a tree removal program would have, there are also indirect impacts. A tree removal program will assist in decreasing burdensome (undesirable) carryout inventories. Without a tree removal program, large quantities of dried plums held in packers' inventories prevent grower pools from being closed, which delays grower payments. Large amounts of undesirable inventory lead to strained grower-packer relations. In an attempt to sell the excessive inventories, packers reduce f.o.b. prices, which in turn leads to market share battles and lower prices being passed back to producers. A more balanced supply and demand situation allows growers and packers to jointly continue developing markets in ways that benefit the entire industry.

Industry Self-Help Initiatives

The California dried plum industry has undertaken an initiative to reduce acreage and production. The industry implemented a pre-harvest tree removal program during the 2001 crop year. The industry collected about $3 million to support this effort by reducing assessments under their California State marketing order from $50 to $30 a ton. The $20 per ton reduced assessment was used to support the industry tree removal program.

The program was successful in removing about 2,500 acres. The effects of this industry self-help diversion are included in the analysis of the Federal program.

The industry also has taken measures to stimulate demand, including: (1) The development of new products and new uses for dried plums; (2) marketing efforts to attract younger customers; and (3) domestic and export market promotion programs under the California State marketing order and the Foreign Agricultural Service's Marketing Assistance Program (MAP). One of the most recent initiatives involved securing approval from the Food and Drug Administration to change the name "dried prunes" to "dried plums." This has allowed the industry to redirect its generic marketing efforts to attract a new generation of consumers.

Benefits of the Program

The economic assessment of the tree removal program indicates that it is expected to benefit producers, particularly small, under-capitalized producers, as well as the entire dried plum industry, including packers. The per ton sales price is projected to increase from 2002–2007, reducing losses and moving producer returns closer to break-even levels. The benefit to producers from reduced losses is projected to total approximately $93 million over the six-year period 2002–2007. The benefits over the six-year period would average nearly $15.5 million annually. The proposed rule incorrectly indicated that the benefit to producers from reduced losses would be about $128 million and that the benefits over the six-year period would average nearly $24 million annually.

Costs of the Program

The major cost of the program would be the payment to producers for removing their prune/plum trees. A total of $17 million, less Committee administrative costs, is available for the tree removal program. Committee administrative costs for reviewing applications and verifying tree removals are expected to be about $125,000. Major expense categories for administration include costs for salaries and benefits; vehicle rental and maintenance; insurance and overhead; and supplies.

Total producer costs associated with filing applications to participate in the program and maintaining records for the period specified after tree removal are expected to be about $2,500. These costs were estimated to be $1,000 in the proposed rule. The increased producer cost estimate is due to the increased number of applications and the addition of 10 hours to cover grower recordkeeping. The number of applications received was estimated to be 200 in the proposed rule and the actual number received was 481.

Overall Assessment

Payments made through this program could help prune/plum producers by addressing the oversupply problem that is adversely affecting the dried plum industry. A tree removal program is expected to allow supply to be adjusted downward more quickly. Market forces will also result in supplies being reduced, but this adjustment may occur more slowly, likely resulting in a number of farm failures. The tree-removal program may be beneficial in reducing the risk of loan default for lenders that financed prune/plum growers. This program will likely help small, under-capitalized producers to stay in business. These producers are often efficient, but do not have adequate resources to continue to operate given the current depressed conditions within their industry.

Reducing the level of unprofitability also should provide opportunities for the industry to engage in additional demand-enhancing activities, especially directed at the domestic market. Even a moderate increase in domestic per capita consumption will have a significant, positive impact on grower returns.

Costs for the program would include the $17 million to be paid growers and to the Committee for administration costs under the Federal tree removal diversion program. Additionally, growers would incur costs totaling about $2,500 to comply with the filing and record-keeping requirements of the program.

Benefits to growers under the tree removal program could total approximately $93 million. The first step in this calculation is to multiply marketable production for each of the six years (2002–2007) times the difference between grower price and variable cost, and to sum those figures. This is done for each of the two scenarios (with and without a tree pull program). The $93 million difference between those figures represents a conservative (low-end) estimate of program benefits resulting from reduced grower losses. This cost calculation assumes that the acreage on which trees are removed remains idle, and that

growers must therefore absorb all fixed costs on that acreage. To the extent that the land is put to other productive uses, growers would not be absorbing all fixed costs of producing prune/plums, and grower benefits would be higher.

If growers are earning more, it follows that processors and/or retailers beyond the farmgate would pay higher raw product costs to obtain the prune/plums from the growers. These higher costs could be passed on to consumers through higher retail prices or could be absorbed as reduced operating margins for other affected sectors of the economy—processors, wholesalers, or retailers. An estimate of these costs is obtained by multiplying the estimated grower price changes over each of the six years (2002–2007) times annual shipments (an average of the prune/plum shipments with the tree pull program and without the tree pull program). That figure, summed over the six years, is approximately $68 million. However, this $68 million cost is likely overstated due to the fact that grower prices are currently less than the cost of production. Adjustments in retail prices, and retailer and processor margins, are anticipated to change with or without a tree removal program.

Another cost of the tree removal program is the reduced economic activity due to the growers purchasing fewer inputs (labor, chemicals, etc.) from the reduction in prune/plum acres managed and harvested. Input producers (laborers and agricultural chemical firms) would see less revenue because of lowered purchases of these inputs. To the extent that acreage removed is replanted in other crops, those costs could be somewhat offset by purchases of inputs to produce the alternative crops. This cost of the tree removal program is difficult to quantify and is not included in this analysis.

Savings over the same period of up to $60 million could be realized through reduced surplus removal purchases of dried plum products for Federal feeding programs. These government savings would be used to purchase other commodities for use in school and other food assistance programs.

Historically, the dried plum industry has not relied heavily on the Federal surplus removal program. Since the 1991 season, the industry has requested and received surplus removal purchases in only 4 of the past 11 seasons. Should supplies be reduced as expected through the tree removal program, it would be unlikely that the dried plum industry would seek government assistance in the form of surplus removal purchases for several years to come.

Conclusion

Based on this information, USDA has determined that there is a surplus of dried plums, and that reestablishment of producers' purchasing power would be encouraged by using Section 32 funds to reduce supplies under a Diversion Program for Dried Plums/Prunes consisting wholly of a tree-removal program. USDA has further determined that this program is expected to be a long-term solution to the oversupply situation that exists in the California dried plum industry, and that it will provide relief to growers.

Notice of this action was published in the **Federal Register** on December 17, 2001. Interested persons were invited to submit comments until January 16, 2002. Eleven comments were received. Most of them supported the tree removal program and expressed appreciation to USDA for proposing to put the program in place. Other commenters requested changes or clarifications to the eligibility, removal, and replanting requirements, and several suggested alternatives to tree removal. One commenter did not support the proposed program.

One commenter suggested that USDA should buy the surplus production and distribute the dried plums to needy persons in the United States and outside the United States. Another suggested that USDA should arrange to have the trees removed and shipped to other countries so they could be replanted and possibly provide food for needy people. USDA generally purchases commodities requested by users in quantities which can be distributed quickly. Available storage space is limited and storage is quite expensive. The tree removal program, on the other hand, is designed to help the California dried plum industry by bringing supplies more closely in line with market needs, and by providing more lasting benefits. Consumers should benefit through a stabilized market and reduced fluctuation in supplies and prices. The idea of shipping trees as a gift to needy countries with compatible climates and growing conditions has merit. However, the cost of removal, packaging of the trees with their roots intact, and the shipment to various countries would be prohibitive and the survival rate of the trees would probably be quite low.

Six comments were received from individuals requesting changes or clarifications to the eligibility, replanting, and tree removal requirements of the program.

Comments from two representatives of the California raisin industry requested USDA to incorporate a provision into the tree removal program specifying that each grower participating in the tree removal program must agree not to replant raisin grape vines on land cleared under the tree removal program through June 30, 2004, to prevent harming the raisin industry. A prune/plum grower from the Santa Clara Valley suggested that the yield requirements be reduced from 1.5 to 1.2 tons per acre to recognize that yields in the Santa Clara Valley are traditionally lower than the yields in the Central Valley of California, where most of the prune/plums are grown.

Adding prohibitions on what could or could not be planted on land cleared under this program goes beyond the intended scope of the program and does not appear justified at this time. The limits placed on producers with respect to the trees involved in this program reflect that at a minimum prune/plum producers should not be allowed to accept the payment and, in the near future, recommit the same ground to prune/plum trees.

The program will assure that removal is not part of the normal process of tree replacement. The program directly affects land identified by the producer as prime prune/plum production land. Market conditions, moreover, would govern what producers will or will not plant. Producers are not likely to plant a crop which can be expected to be in surplus. In the end, USDA's desire was to have this program be as simple as possible.

With respect to changes in the yield per acre limit, the suggestion was not adopted because USDA desires program dollars to be used for removing higher yielding trees. The program is designed to benefit the industry by stabilizing supplies and prices of dried plums.

Two comments were received from the Executive Director of the Prune Marketing Committee. The commenter requested that an exception be made to the eligibility requirements specifying that the trees removed must have yielded at least 1.5 tons per net-planted acre during the 1999 or 2000 crop years. The commenter reported that some producers might not have the required production information because the producers did not harvest, or only harvested a portion of, their crops during the 1999 or 2000 crop years. The commenter indicated that these producers' crops generated little or no revenue because their handlers either pro-rated the quantity of dried plums they purchased or made no purchases of dried plums during 1999 or 2000.

The commenter further indicated that these producers should not be further

VOL
67
ISS
50
MR
14
2002
UMI

disadvantaged by declaring them ineligible to participate because they were not able to sell any of their fruit or only some of their fruit during the 1999 or 2000 crop years. The commenter requested that these producers be allowed to qualify if they sold production during the 2001 or 1998 crop years.

This comment was not adopted because expanding the eligibility base period could result in some growers gaining an advantage over other growers. While some producers could fare better than other producers under a broader base period, the point of the program is to achieve an overall reduction in the level of the commodity available for market. The simplest and most assured manner for achieving this goal is to limit producer eligibility to production from the 1999 or 2000 crop years as was proposed. Moreover, limiting eligibility to these two crop years will provide some measure of assurance of uniform treatment among producers and should help the public's understanding of the program.

This commenter also questioned a statement in the supplementary information section of the proposed rule that appeared on page 64920, first column, last paragraph of the December 17, 2001, issue of the **Federal Register**. The statement specified that the applicant would have to certify that he/she has not contracted to sell the land or otherwise already arranged to have the trees removed. The commenter indicated that the language implies that a grower cannot sell a prune orchard to another grower who agrees not to replant trees until after June 30, 2004, and could also exclude a grower who is in the process of buying a prune orchard.

It was not the intent of USDA to prevent participants from selling their orchards should they so choose after enrollment in the program. However, the owner who accepts the payment, or is the party of record for program purposes, will still be liable for ensuring that the two-year planting prohibition is followed even though the participant no longer owns the land. The non-planting promise is a guarantee by the participant that no one (not just the participant) will plant the property with prune/plum trees during the two-year non-planting period. Further, it was and remained the intent of USDA that only those persons who are the current owners of the property, and have not already contracted to sell the property or destroy the trees could participate. This is to avoid conflict where title to the property is already in transition—and where the new buyer may be expecting the trees to stay.

The certification that producer applicants are required to sign, guarantees that they have not made prior arrangements to sell the land or remove the trees for commercial purposes. That is, they guarantee that the land is not going to be commercially developed for shopping centers, housing developments, vacation resorts, or similar such purposes. It was determined that including such non-agricultural land in the program would not serve the purposes of the program.

The Chairman of the Prune Marketing Committee suggested that the application period be extended for an additional 15 to 30 days to give producers more time to apply. The commenter indicated that this would be extremely helpful to the industry in obtaining as many participants as possible. This commenter subsequently withdrew the request. An extension of the application period was considered but was found not to be necessary in light of producer program interest and the fact that no material changes were found appropriate or needed based on the comments received. Had a need for material change in the program been found warranted and appropriate based on the comments received, an extension or other action would have be taken to allow for the adjustment. Deadlines were set out clearly in the proposed rule and the program was widely publicized in the industry.

Another commenter raised questions regarding the definition of the term "removal" in § 81.3. In the proposed rule, the term was defined to mean that the prune/plum trees are no longer standing and capable of producing a crop. The provision states that the producer can accomplish removal by any means the producer desires. The commenter contends that grafting other fruit stock to a prune/plum tree should be considered removal under the proposed definition. The commenter states that the prune/plum trees would no longer be standing, nor will they be able to produce a crop of prune/plums. In fact, no part of the prune/plum tree would be left.

This procedure would advance the likelihood of the production of other crops, and it is preferred that the program be neutral in that respect. Also, this would add unneeded complication to the program. Given that producer interest in the program is very high without this allowance, there does not appear to be any need to increase the attractiveness of the program. Moreover, the intent of the program is to remove prune/plum trees and the roots of those trees. Grafting is not consistent with the intent of the program. Therefore, the definition of removal has been clarified to exclude grafting as a method of removal and to specify that "removal" means that the prune/plum trees are no longer standing and capable of producing a crop, and that the roots of trees have been removed.

A final commenter indicated that he was opposed to the program. He stated that the industry got itself into the oversupply situation and should not look to the government to get itself out of it. This program is a valid exercise of the authority granted USDA under section 32. USDA is monitoring this program very closely to ensure that program objectives are attained. The majority of the industry supports this program having considered a number of less effective alternatives to balance supplies and demand.

All of the comments received have been thoroughly reviewed. Some adjustments have been made in the rule for clarity and to assure accomplishment of the goals of the program as set out in the proposed rule and as set out in this final rule.

After consideration of all relevant matter presented, including the comments received, and other information, it is found that this final rule, as hereinafter set forth, will tend to effectuate the policy of 7 U.S.C. 612c.

Pursuant to 5 U.S.C. 553, it is also found that no good cause existed for delaying the effective date of this rule. Such delay would be contrary to the public interest because prune/plum producers needed to know immediately whether they would be accepted into the program by February 14, 2002. Eligible producers wanted to begin removing the prune/plum trees. In addition, further delay could have jeopardized the ability of the program to accomplish its goal of reducing the supply of dried plums. As a technical matter, the rule has been made retroactive to January 2, 2002, for the reasons given. In fact, however, no obligations were undertaken until February 14, 2002. If for any reason January 2, 2002, is considered inappropriate as an effective date, then the effective date will be considered February 14, 2002, which was well after the close of the comment period. Program issues were open until that date.

List of Subjects in 7 CFR Part 81

Administrative practice and procedures, Agriculture, Prunes, Reporting and record keeping requirements, Surplus agricultural commodities.

For the reasons set forth in the preamble, Title 7, Subtitle B, Chapter I is amended as follows:

1. In Subtitle B, Chapter I, part 81 is added to read as follows:

PART 81—PRUNE/DRIED PLUM DIVERSION PROGRAM

Sec.
81.1 Applicability.
81.2 Administration.
81.3 Definitions.
81.4 Length of program.
81.5 General requirements.
81.6 Rate of payment; total payments.
81.7 Eligibility for payment.
81.8 Application and approval for participation.
81.9 Inspection and certification of diversion.
81.10 Claim for payment.
81.11 Compliance with program provisions.
81.12 Inspection of premises.
81.13 Records and accounts.
81.14 Offset, assignment, and prompt payment.
81.15 Appeals.
81.16 Refunds; joint and several liability.
81.17 Death, incompetency or disappearance.

Authority: 7 U.S.C. 612c.

§ 81.1 Applicability.

Pursuant to the authority conferred by Section 32 of the Act of August 24, 1935, as amended (7 U.S.C. 612c) (Section 32), the Secretary of Agriculture will make payment to California producers who divert prune/plums by removing trees on which the fruit is produced in accordance with the terms and conditions set forth herein.

§ 81.2 Administration.

The program will be administered under the direction and supervision of the Deputy Administrator, Fruit and Vegetable Programs, Agricultural Marketing Service (AMS), United States Department of Agriculture (USDA), and will be implemented by the Prune Marketing Committee (Committee). The Committee, or its authorized representatives, does not have authority to modify or waive any of the provisions of this subpart. Such power shall rest solely with the Administrator of AMS, or delegatee. The Administator or delegatee, in the Administrator's or delegatee's sole discretion can modify deadlines or other conditions, as needed or appropriate to serve the goals of the program. In all cases, payments under this part are subject to the availability of funds.

§ 81.3 Definitions.

(a) *Administrator* means the Administrator of AMS.

(b) *AMS* means the Agricultural Marketing Service of the U.S. Department of Agriculture.

(c) *Application* means "Application for Prune Tree Removal Program."

(d) *Committee* means the Prune Marketing Committee established by the Secretary of Agriculture to locally administer Federal Marketing Order No. 993 (7 CFR Part 993), regulating the handling of dried prunes produced in California.

(e) *Diversion* means the removal of prune-plum trees after approval of applications by the Committee through June 30, 2002.

(f) *Producer* means an individual, partnership, association, or corporation in the State of California who grows prune/plums that are dehydrated into dried plums for market.

(g) *Removal* means that the prune-plum trees are no longer standing and capable of producing a crop, and the roots of the trees have been removed. The producer can accomplish removal by any means the producer desires. Grafting another type of tree to the rootstock remaining after removing the prune/plum tree would not qualify as removal under this program.

§ 81.4 Length of program.

Producers diverting prune/plums by removing prune-plum trees must complete the diversion no later than June 30, 2002.

§ 81.5 General requirements.

(a) To be eligible for this program, the trees to be removed must have yielded at least 1.5 tons of dried prune/plums per net-planted acre during the 1999 or 2000 crop year. A net-planted acre is the actual acreage planted with prune-plum trees. Abandoned orchards and dead trees will not qualify. In new orchards diverted, qualifying trees must be at least 5 years of age (6th leaf), contain at least two scaffolds, and be capable of producing at least 1.5 tons per net-planted acre. The block of trees for removal must be easily definable by separations from other blocks and contain at least 1,000 eligible trees or comprise an entire orchard.

(b) Any grower participating in this program must agree not to replant prune-plum trees on the land cleared under this program through June 30, 2004. Participants bear responsibility for ensuring that trees are not replanted, whether by themselves, or by successors to the land, or by others, until after June 30, 2004. If trees are replanted before June 30, 2004, by any persons, participants must refund any USDA payment, with interest, made in connection with this tree removal program.

§ 81.6 Rate of payment; total payments.

(a) The rate of payment for each eligible prune-plum tree removed will be $8.50 per tree.

(b) Payment under paragraph (a) of this section will be made after tree removal has been verified by the staff of the Committee.

(c) The $8.50 per tree payment shall be the total payment. USDA will make no other payment with respect to such removals. The producer will be responsible for arranging, requesting, and paying for the tree removal in the specified orchard blocks or orchard(s), as the case may be.

(d) Total payments under this program are limited to no more than $17,000,000. No additional expenditures shall be made, unless the Administrator or delegatee in their sole and exclusive discretion shall, in writing, declare otherwise.

§ 81.7 Eligibility for payment.

(a) If total applications for payment do not exceed $17,000,000, less administration costs, payments will be made under this program to any eligible producer of prune/plums who complies with the requirements in § 81.8 and all other terms and conditions in this part.

(b) If applications for participation in the program authorized by this part exceed $17,000,000, less administration costs, the Committee will approve the applications (subject to the requirements in § 81.8) in the order in which the completed applications are received in the Committee office up to the funding limit of $17,000,000, less administration costs, for the program. Any additional applications will be denied.

(c) The Administrator or his delegatee may set other conditions for payment, in addition to those provided for in this part, to the extent necessary to accomplish the goals of the program.

§ 81.8 Application and approval for participation.

(a) Applications will be reviewed for program compliance and approved or disapproved by Committee office personnel.

(b) Applications for participation in the Prune-Plum Diversion Program can be obtained from the Committee office at 3841 North Freeway Boulevard, Suite 120, Sacramento, California 95834; telephone (916) 565–6235.

(c) Any producer desiring to participate in the prune-plum diversion program must have filed an application with the Committee by January 31,

VOL
67
ISS
50
MR
14
2002
UMI

2002. The application shall be accompanied by a copy of any two of the following four documents: Plat Map from the County Hall of Records; Irrigation Tax Bill; County Property Tax Bill; or any other documents containing an Assessor's Parcel Number. Such application shall include at least the following information:

(1) The name, address, telephone number and tax identification number/social security number of the producer;

(2) The location and size of the production unit to be diverted;

(3) The prune/plum production from the orchard or portion of the orchard to be diverted during the 1999–2000 and 2000–2001 seasons;

(4) A statement that all persons with an equity interest in the prune/plums in the production unit to be diverted consent to the filing of the application. That is, the statement must show that the applicant has clear title to the property in question, and/or as needed, the statement must show an agreement to participate in the tree removal program from all lien or mortgage holders, and/or land owners, lessors, or similar parties with an interest in the property to the extent demanded by AMS or to the extent that such persons could object to the tree removal. However, obtaining such assent shall be the responsibility of the applicant who shall alone bear any responsibilities which may extend to third parties;

(5) A statement that the applicant agrees to comply with all of the regulations established for the prune/plum diversion program;

(6) A certification that the information contained in the application is true and correct;

(7) The year that the unit of prune/plums was planted;

(8) An identification of the handler(s) who received the prune/plums from the producer in the last two years.

(d) After the Committee receives the producer applications, it shall review them to determine whether all the required information has been provided and that the information appears reliable.

(e) As previously indicated, if the number of trees to be removed in such applications, multiplied by $8.50 per tree, exceeds the amount of funds available for the diversion program, each grower's application will be considered in the order in which they are received at the Committee office. AMS may reject any application for any reason, and its decisions are final.

(f) After the application reviews and confirmation of eligible trees are completed, the Committee shall notify the applicant, in writing, as to whether or not the application has been approved and the number of trees approved for payment after removal. If an application is not approved, the notification shall specify the reason(s) for disapproval. AMS shall be the final arbiter of which applications may be approved or rejected, and the final arbiter of any appeal.

§ 81.9 Inspection and certification of diversion.

When the removal of the prune-plum trees is complete, the producer(s) will notify the Committee on a form provided by the Committee. The Committee will certify that the trees approved for removal from the block or orchard, as the case may be, have been removed, and notify AMS.

§ 81.10 Claim for payment.

(a) To obtain payment for the trees removed, the producer must submit to the Committee by June 30, 2002, a completed form provided by the Committee. Such form shall include the Committee's certification that the qualifying trees from the blocks or orchards have been removed. If all other conditions for payment are met, AMS will then issue a check to the producer in the amount of $8.50 per eligible tree removed.

§ 81.11 Compliance with program provisions.

If USDA on its own, or on the advice of the Committee, determines that any provision of this part have not been complied with by the producer, the producer will not be entitled to diversion payments in connection with tree removal. If a producer does not comply with the terms of this part, including the requirement specified in § 81.5(b), the producer must refund, with interest, any USDA payment made in connection with such tree removal, and will also be liable to USDA for any other damages incurred as a result of such failure. The Committee or USDA may deny any producer the right to participate in this program or the right to receive or retain payments in connection with any diversion previously made under this program, or both, if the Committee or USDA determines that:

(a) The producer has failed to properly remove the prune/plum trees from the applicable block or the whole orchard regardless of whether such failure was caused directly by the producer or by any other person or persons;

(b) The producer has not acted in good faith in connection with any activity under this program; or

(c) The producer has failed to discharge fully any obligation assumed by, or charged to, him or her under this program.

§ 81.12 Inspection of premises.

The producer must permit authorized representatives of USDA or the Committee, at any reasonable time, to have access to their premises to inspect and examine the orchard block where trees were removed and records pertaining to the orchard to determine compliance with the provisions of this part.

§ 81.13 Records and accounts.

(a) The producers participating in this program must keep accurate records and accounts showing the details relative to the prune/plum tree removal, including the contract entered into with the firm or person removing the trees, as well as the invoices.

(b) The producers must permit authorized representatives of USDA, the Committee, and the General Accounting Office, or their delegatees, at any reasonable time to inspect, examine, and make copies of such records and accounts to determine compliance with provisions of this part. Such records and accounts must be retained for two years after the date of payment to the producer under the program, or for two years after the date of any audit of records by USDA, whichever is later. Any destruction of records by the producer at any time will be at the risk of the producer when there is reason to know, believe, or suspect that matters may be or could be in dispute or remain in dispute.

§ 81.14 Offset, assignment, and prompt payment.

(a) Any payment or portion thereof due any person under this part shall be allowed without regard to questions of title under State law, and without regard to any claim or lien against the crop proceeds thereof in favor of the producer or any other creditors except agencies of the U.S. Government.

(b) Payments which are earned by a producer under this program may be assigned in the same manner as allowed under the provisions of 7 CFR part 1404.

(c) Prompt payment interest from AMS will not be applicable.

§ 81.15 Appeals.

Any producer who is dissatisfied with a determination made pursuant to this part may make a request for reconsideration or appeal of such determination. The Deputy Administrator of Fruit and Vegetable Programs shall establish the procedure for such appeals.

§ 81.16 Refunds; joint and several liability.

(a) In the event there is a failure to comply with any term, requirement, or condition for payment arising under the application of this part, and if any refund of a payment to AMS shall otherwise become due in connection with the application of this part, all payments made under this part to any producer shall be refunded to AMS together with interest.

(b) All producers signing an application for payment as having an interest in such payment shall be jointly and severally liable for any refund, including related charges, that is determined to be due for any reason under the terms and conditions of the application of this part.

(c) Interest shall be applicable to refunds required of any producer under this part if AMS determines that payments or other assistance were provided to a producer who was not eligible for such assistance. Such interest shall be charged at the rate of interest that the United States Treasury charges the Commodity Credit Corporation (CCC) for funds, as of the date AMS made benefits available. Such interest shall accrue from the date of repayment or the date interest increases as determined in accordance with applicable regulations. AMS may waive the accrual of interest if AMS was at fault for the overpayment.

(d) Interest allowable in favor of AMS in accordance with paragraph (c) of this section may be waived when there was no intentional noncompliance on the part of the producer, as determined by AMS. Such decision to waive or not waive the interest shall be at the discretion of the Administrator or delegatee.

(e) Late payment interest shall be assessed on all refunds in accordance with the provisions of, and subject to the rates prescribed for those claims which are addressed in 7 CFR part 792.

(f) Producers must refund to AMS any excess payments, as determined by AMS, with respect to such application.

(g) In the event that a benefit under this part was provided as the result of erroneous information provided by the producer, or was erroneously or improperly paid for any other reason, the benefit must be repaid with any applicable interest.

§ 81.17 Death, incompetency, or disappearance.

In the case of death, incompetency, disappearance, or dissolution of a prune/plum producer that is eligible to receive benefits in accordance with this part, such person or persons who would, under 7 CFR part 707 be eligible for payments and benefits covered by that part, may receive the tree-removal benefits otherwise due the actual producer.

Dated: March 8, 2002.

A.J. Yates,

Administrator, Agricultural Marketing Service.

[FR Doc. 02–6098 Filed 3–11–02; 3:09 pm]

BILLING CODE 3410–02–P

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 916 and 917

[Docket No. FV01–916–3 FIR]

Nectarines and Peaches Grown in California; Revision of Reporting Requirements for Fresh Nectarines and Peaches

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department of Agriculture (USDA) is adopting, as a final rule, without change, an interim final rule revising the reporting requirements under the marketing orders for California nectarines and peaches by modifying the requirement that all handlers submit a monthly destination report. This rule continues in effect the relaxation of the requirement by establishing an exemption for handlers who ship fewer than 50,000 containers or container equivalents of tree fruit, including nectarines, peaches, and plums. The marketing orders regulate the handling of nectarines and peaches grown in California and are administered locally by the Nectarine Administrative (NAC) and Peach Commodity Committees (PCC) (committees). The handling of plums grown in California is regulated by a California State marketing order.

EFFECTIVE DATE: April 15, 2002.

FOR FURTHER INFORMATION CONTACT: Terry Vawter, Marketing Specialist, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 2202 Monterey Street, suite 102B, Fresno, California, 93721; telephone (559) 487–5901, Fax: (559) 487–5906; or George Kelhart, Technical Advisor, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW STOP 0237, Washington, DC 20090–0237; telephone: (202) 720–2491; Fax: (202) 720–8938.

Small businesses may request information on complying with this regulation by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW STOP 0237, Washington, DC 20090–0237; telephone: (202) 720–2491, Fax: (202) 720–8938, or e-mail: *Jay.Guerber@usda.gov*.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement Nos. 124 and 85, and Marketing Order Nos. 916 and 917 (7 CFR parts 916 and 917) regulating the handling of nectarines and peaches grown in California, respectively, hereinafter referred to as the "orders." The orders are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

USDA is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is not intended to have retroactive effect. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing, USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This rule continues in effect the modification of the reporting requirements under the orders' rules and regulations by establishing an exemption from filing mandatory monthly destination reports for handlers who handle less than 50,000 containers or container equivalents of nectarines, peaches, and plums. While nectarines and peaches are regulated under the Federal marketing orders, plums are regulated under a California state marketing order. Most handlers,

VOL
67
ISS
50
MR
14
2002
UMI

however, handle and report on a combination of these fruit.

Under this modification, handlers who shipped less than 50,000 containers or container equivalents of any combination of nectarines, peaches, and plums in the 2000 season will be exempted from filing monthly destination reports in subsequent seasons, provided their shipments continue to total less than 50,000 containers or container equivalents of these fruit in the previous season.

Handlers who begin operation during or after the 2001 season will also be exempt from filing monthly destination reports during their first year of operation. These handlers will continue to be exempt from such reporting requirements as long as their shipments of these tree fruit total less than 50,000 containers or container equivalents, in the previous season.

Handlers who are not exempt, but in some subsequent year ship less than 50,000 containers or container equivalents, will be exempt the following season and will be exempt in subsequent seasons, provided their shipments continue to total less than 50,000.

Under the orders, reporting requirements are established in §§ 916.60 and 917.50 for fresh shipments of California nectarines and peaches, respectively. Prior to publication of the interim final rule, such reports were to be filed with the committees by all handlers. The information required includes: (1) The name of the shipper and the shipping point; (2) the car or truck license number (or name of the trucker), and identification of the carrier; (3) the date and time of departure; (4) the number and type of containers in the shipment; (5) the quantities shipped, showing separately the variety, grade, and size of the fruit; (6) the destination; and (7) the identification of the inspection certificate or waiver pursuant to which the fruit was handled. Other information may be requested by the committees, with the approval of the Secretary, to enable the committees to carry out their duties.

Sections 916.160 and 917.178 of the orders' rules and regulations specify the reporting procedures for handlers of nectarines and peaches, which include the requirements related to destination reports.

Information from destination reports is utilized by the NAC and PCC to determine the quantities of nectarines and peaches shipped to various markets. Such information permits the committees to target marketing research and promotion efforts more effectively, giving the committees the flexibility to direct their limited marketing funds to open new markets or expand existing markets.

The more accurate the information obtained from handlers, the more precisely the committees can address their marketing research and promotion efforts. However, this information collection comes at a cost to the committees and to handlers, especially smaller handlers who generally lack the staff to prepare such reports.

The NAC and PCC, which are responsible for local administration of the orders, met on May 3, 2001, and unanimously recommended that these reporting requirements be revised, beginning with the 2001 season, which began April 1. However, because the season had already begun, the relaxation in report requirements was implemented as of the effective date of the interim final rule.

At three subcommittee meetings prior to the May 3, 2001 committee meetings, discussions on the merits of the exemption were held. The Management Services Committee met on January 18, 2001, and discussed a request from a small handler to review the destination report requirements. It was reported that destination information from small handlers is not always accurate since the reporting handlers do not necessarily know the final destination of their fruit sold at terminal markets. It was also noted that the burden of filing destination reports is often a complaint of small handlers.

The Management Services Committee then directed the committee staff to review the destination report requirements and procedures, and make recommendations based upon their review at the following Management Services Committee meeting.

The Management Services Committee met again on March 6, 2001, and discussed the destination report information provided by the committee staff. The members also discussed changes to the destination report requirements, as well as the effect of the revision on handlers in the industry and on information gathering conducted by the committees.

A review of destination report records by the staff revealed that approximately 160 handlers shipped less than 50,000 containers of all three tree fruit during the 2000 season. As a percentage of total shipments, these handlers represent approximately 3 percent of all shipments of nectarines, peaches, and plums. The committees' staff spends a portion of their time administering the collection of this relatively small amount of additional information. The committees believe that exempting information from handlers who represent approximately 3 percent of all tree fruit shipments would not have a significant effect on overall destination information, and may actually improve the accuracy of destination information. These handlers are small entities, and such a relaxation will reduce the reporting burden on them. In addition, the committees' administrative costs associated with destination reports may be reduced.

Finally, the Management Services Committee met on April 18, 2001, to review destination report summaries from the 2000 season. Based on all the information considered, the members voted unanimously to recommend to the NAC and PCC that handlers who ship less than 50,000 containers or container equivalents of tree fruit (including nectarines, peaches, and plums) should be exempted from filing monthly destination reports.

Final Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities. Accordingly, AMS has prepared this final regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 300 California nectarine and peach handlers subject to regulation under the orders covering nectarines and peaches grown in California, and about 1,800 producers of these fruits in California. Small agricultural service firms, which includes handlers, are defined by the Small Business Administration [13 CFR 121.201] as those whose annual receipts are less than $5,000,000. Small agricultural producers are defined by the Small Business Administration as those having annual receipts of less than $750,000. A majority of these handlers and producers may be classified as small entities. Since the interim final rule was published, the small business producer standards were changed from $500,000 to $750,000.

The committees' staff has estimated that there are less than 20 handlers of nectarines and peaches in the industry who could be defined as other than small entities. In the 2000 season, the average handler price received was $9.00 per container or container equivalent of nectarines or peaches. A handler would have to ship at least 555,556 containers of nectarines and peaches to have annual receipts of $5,000,000. Given data on shipments maintained by the committees' staff and the average handler price received during the previous season, the committees' staff estimates that small handlers of nectarines and peaches represent approximately 94 percent of the handlers within the industry.

The committees' staff has also estimated that approximately 20 percent of the nectarine and peach producers in the industry could be defined as other than small entities. In the 2000 season, the average producer price received was $5.50 per container or container equivalent for nectarines, and $5.25 per container or container equivalent for peaches. A producer would have to produce at least 136,364 containers of nectarines and 142,858 containers of peaches to have annual receipts of $750,000. Given data maintained by the committees' staff and the average producer price received during the 2000 season, the committees' staff estimates that small producers represent approximately 80 percent of the nectarine and peach producers within the industry.

This rule continues in effect the revision of §§ 916.160 and 917.178 of the orders' administrative rules and regulations to relax the requirement that all handlers file monthly destination reports. Under that revision, handlers who shipped less than 50,000 containers or container equivalents of tree fruit during the 2000 season will be exempted from filing monthly destination reports in subsequent seasons, as long as their shipments total less than 50,000 containers or container equivalents of tree fruit in the previous season.

Handlers who begin operations during or after the 2001 season will also be exempt from filing monthly destination reports during their first season of operation. Such handlers will continue to be exempt in subsequent seasons as long as their shipments total less than 50,000 containers or container equivalents of tree fruit in the previous season.

The NAC and PCC met on May 3, 2001, and unanimously recommended these changes to the reporting requirements for the 2001 season, which began April 1. This action was recommended to the committees by a subcommittee charged with review and discussion of the changes.

The Management Services Committee met on January 18, 2001, to discuss a request from a small handler concerning destination report requirements. At that time, the members reviewed the request and directed the staff to research the destination report requirements and procedures. At the March 6, 2001, meeting, the Management Services Committee reviewed a staff recommendation to relax the destination reporting requirements for small handlers. The members also considered two alternatives to this action at that meeting.

First, the committee considered not establishing any exemption for small handlers. This alternative was rejected because the members felt that small handlers should be provided an exemption from the destination reporting requirements. Second, they considered establishing a filing exemption for handlers who shipped less than 10,000 containers of tree fruit during the 2000 season. The committee estimated that this exemption would affect approximately 100 handlers only and one percent of total shipments. The Management Services Committee rejected that alternative because they believed that more handlers should be exempted from the requirement for filing destination reports. After some discussion, it was determined and recommended by the Management Services Committee that handlers who ship less than 50,000 containers or container equivalents of tree fruit should be exempted from filing monthly destination reports.

At a subsequent Management Services Committee meeting on April 18, 2001, the members reviewed destination report summaries from the 2000 season and voted unanimously to recommend to the NAC and PCC that handlers who ship less than 50,000 containers or container equivalents of tree fruit be exempted from filing monthly destination reports.

The committees make recommendations regarding all the revisions in reporting requirements after considering all available information, including comments of persons at committee and subcommittee meetings, and comments received in writing or verbally by committee staff. Such subcommittees include the Management Services Committee.

At the meetings, the impact of and alternatives to these recommendations are deliberated. These subcommittees, like the committees themselves, frequently consist of individual producers (and handlers, where authorized) with many years' experience in the industry, who are familiar with industry practices. Like all committee meetings, subcommittee meetings are open to the public and comments, both in person and in writing, are widely solicited.

This relaxation is expected to have an impact on small handlers by reducing the time and related costs of filing monthly destination reports. The committees estimate that approximately 160 peach and nectarine handlers would be exempt from filing destination reports. Each handler files an average of four reports each season. The time each handler spends preparing the monthly report has been estimated at 45 minutes. Therefore, in terms of reporting burden time, each qualified respondent handler will save an average of three hours each season as a result of this exemption. In total, this exemption could save the qualified industry respondents approximately 480 hours annually each for peach handlers and nectarine handlers.

This rule is also expected to have an impact on the committees by decreasing hours of staff time currently utilized to collect, reconcile, and assimilate destination report data received from small handlers.

This rule does not impose any additional reporting and recordkeeping requirements on either small or large handlers. In fact, as noted previously, this rule will reduce reporting and recordkeeping requirements on qualified handlers, as well as on the committees themselves. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies, such as effectuated by this rule.

The Department has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule.

In addition, the committees' meetings are widely publicized throughout the nectarine and peach industries and all interested parties are encouraged to attend and participate in committee deliberations on all issues. The committees routinely schedule meetings bi-annually during the last week of November or first week of December, and the last week of April or first week of May. Like all committee meetings, the May 3, 2001, meetings were public meetings, and all entities, large and small, were encouraged to express views on these issues.

In addition, the committees have a number of appointed subcommittees to review certain issues and make

recommendations to the NAC and PCC. For this action, three subcommittee meetings were held prior to the May 3, 2001, meeting at which these regulations were reviewed and discussed.

An interim final rule concerning this action was published in the **Federal Register** on July 31, 2001 (66 FR 39406). Copies of the rule were provided to all committee members and handlers. In addition, the rule was made available through the Internet by the Office of the Federal Register. That rule provided for a 60-day comment period which ended October 1, 2001. No comments were received.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: *http://www.ams.usda.gov/fv/moab.html*. Any questions about the compliance guide should be sent to Jay Guerber at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

After consideration of all relevant matters presented, the information and recommendations submitted by the committees, and other information, it is found that finalizing the interim final rule, without changes, as published in the **Federal Register** (66 FR 39406, July 31, 2001), will tend to effectuate the declared policy of the Act.

List of Subjects

7 CFR Part 916

Marketing agreements, Nectarines, Reporting and recordkeeping requirements.

7 CFR Part 917

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 920

[Docket No. FV02–920–1 FIR]

Kiwifruit Grown in California; Relaxation of Pack Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department of Agriculture (USDA) is adopting, as a final rule, a corrected interim final rule which relaxed pack requirements prescribed under the California kiwifruit marketing order. The marketing order regulates the handling of kiwifruit grown in California and is administered locally by the Kiwifruit Administrative Committee (Committee). This rule continues to allow handlers to pack more individual pieces of fruit per 8-pound sample for seven size designations, continues the elimination of one size designation, and the addition of two new size designations. These changes were unanimously recommended by the Committee and are expected to increase grower returns and enable handlers to compete more effectively in the marketplace.

EFFECTIVE DATE: April 15, 2002.

FOR FURTHER INFORMATION CONTACT: Rose M. Aguayo, Marketing Specialist, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 2202 Monterey Street, suite 102B, Fresno, California 93721; telephone: (559) 487–5901, Fax: (559) 487–5906; or George Kelhart, Technical Advisor, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW STOP 0237, Washington, DC 20250–0237; telephone: (202) 720–2491, Fax: (202) 205–8938.

Small businesses may request information on compliance with this regulation by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW STOP 0237, Washington, DC 20250–0237; telephone: (202) 720–2491, Fax: (202) 205–8938 or E-mail: *Jay.Guerber@usda.gov*.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Order No. 920, as amended (7 CFR part 920), regulating the handling of kiwifruit grown in California, hereinafter referred to as the "order." The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

USDA is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is not intended to have retroactive effect. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review the USDA's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This rule continues to allow handlers to pack more individual pieces of fruit per 8-pound sample for seven size designations, continues the elimination of one size designation, and the addition of two new size designations. These changes were unanimously recommended by the Committee and are expected to increase grower returns and enable handlers to compete more effectively in the marketplace.

Under the terms of the order, fresh market shipments of kiwifruit grown in California are required to be inspected and meet grade, size, maturity, pack, and container requirements. Section 920.52 authorizes the establishment of pack requirements. Section 920.302(a)(4) of the order's administrative rules and regulations outlines pack requirements for fresh shipments of California kiwifruit.

Section 920.302(a)(4)(iii) establishes a maximum number of fruit per 8-pound sample for each numerical count size designation for fruit packed in bags, volume fill, or bulk containers.

The amount of kiwifruit supplied to the domestic market by California handlers has declined 40 percent since the 1992–93 season. In addition, grower prices have steadily declined in spite of

a continuous increase in the U.S. per capita consumption of kiwifruit. When the order was implemented in 1984, the average Free-on-Board (FOB) value was $1.14 per pound. In 1997–1998, the Committee reviewed FOB values and determined that the average FOB value for the 1992–93 season through the 1997–98 season was $0.55 per pound.

The Committee met on July 8, 1998, and decided to address the confusion in the marketplace and the differences in size designations between California kiwifruit and imported kiwifruit, by revising the numerical counts per size designation. Section 920.302(a)(4)(iv) of the order's administrative rules and regulations was revised by an interim final rule issued on September 3, 1998 (63 FR 46861). A final rule published on July 30, 2001, redesignated § 920.302(a)(4)(iv) as (a)(4)(iii)(66 FR 39267).

While this rule increased the number of fruit that could be packed in size designations 30 through 42, experience has shown that further refinement of the California kiwifruit size designations was needed to help California handlers compete more effectively with imported fruit in the marketplace. Handlers want to better meet buyer preferences and buyers generally prefer to purchase containers with a greater number of pieces of fruit in the box. The continued relaxation of pack requirements will permit handlers to pack more individual pieces of fruit in an 8-pound sample for various size designations, and, thus, better meet buyer preferences.

During the spring of 2001, the production area was hit with a severe frost, heavy winds and hail storms. A shortened bloom period in late spring reduced the pollination of the crop and resulted in less fruit development and growth. Unusually hot temperatures during the summer months added further stress to the vines.

On July 11, 2001, the Committee considered the impact of the severe weather conditions, and estimated the 2001–2002 crop would be 6.5 million tray equivalents. During September the Committee staff conducted a pre-harvest check for sizing, quality, and maturity and found the crop was not sizing as expected. Based on the more recent observations, the field staff estimated that the amount of packable fruit would be approximately 5 million tray equivalents, versus the 6.5 million estimated at the July 11, 2001, meeting.

Because of these factors, the Committee called an emergency meeting on September 19, 2001, to discuss the marketing of the short crop and smaller-sized fruit. As previously mentioned, the rules and regulations specify a maximum number of fruit per 8-pound sample for each numerical count size designation for kiwifruit packed in bags, volume fill, or bulk containers. To enable the industry to better market the short 2001 crop, the Committee unanimously recommended relaxing the pack regulations under § 920.302(a)(4)(iii) by increasing the maximum number of fruit per 8-pound sample for size designations 42 through 25, eliminating size designation 21, and adding new size designations 20 and 23. These changes are shown in the following chart:

Size designation	Maximum number of fruit per 8-pound sample
20	**27**
23	**29**
25	27 * 32
27/28	30 * 35
30	33 * 38
33	36 * 43
36	42 * 45
39	48 * 49
42	53 * 54
45	55

* Prior number of fruit per 8-pound sample. New size designations are in bold.

This chart is commonly referred to as the "Size Designation Chart" in the industry. Increasing the maximum number of fruit per 8-pound sample will allow some smaller-sized fruit to be packed into a larger-size category. This rule continues to allow one more piece of fruit to be packed per 8-pound sample in size designations 42 and 39, three more pieces of fruit to be packed in size designation 36, seven more pieces of fruit to be packed in size designation 33, and five more pieces of fruit to be packed in size designations 27/28 and 25, respectively.

Additionally, handlers have the option of packing fruit as size designation 23, 20, or 45. This rule continues to reduce the percentage of fruit packed in the 40 series and continues to increase the percentage of fruit packed in the 20 and 30 series. The Committee estimated that increasing the maximum number of fruit per 8-pound sample for size designation 39 would move approximately 600,000 pounds of kiwifruit from the former size designation 42 into the new size 39 designation. Increasing the maximum number of fruit per 8-pound sample for size designation 33 will allow handlers to pack approximately 2,500,000 pounds more kiwifruit into new size designation 33. Thus, handlers will be better able to meet the needs of buyers, because kiwifruit sells by the piece, and buyers desire as much fruit in each container as the container can comfortably hold. This change does not affect the minimum size and will not allow fruit currently considered "undersized" to be shipped. The Committee further believes that increasing the maximum number of fruit in the 8-pound sample will help reduce the sizing differences between California and imported kiwifruit. This should help California handlers compete more effectively in the marketplace.

Final Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities. Accordingly, AMS has prepared this final regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 50 handlers of California kiwifruit subject to regulation under the marketing order and approximately 360 growers in the production area. Small agricultural service firms are defined by the Small Business Administration as those whose annual receipts are less than $5,000,000, and small agricultural growers are defined by the Small Business Administration (13 CFR 121.201) as those whose annual receipts are less than $750,000. None of the 50 handlers subject to regulation have annual kiwifruit sales of at least $5,000,000. In addition, 354 of the 360 growers subject to regulation have annual sales less than $750,000. Therefore, a majority of the kiwifruit handlers and growers may be classified as small entities.

This rule continues to allow handlers to pack more individual pieces of fruit per 8-pound sample for seven size designations, continues the elimination of one size designation, and the addition of two new size designations. These changes were unanimously recommended by the Committee and are expected to increase grower returns and enable handlers to compete more effectively in the marketplace. Authority for this action is provided in § 920.52 of the order.

The Committee unanimously recommended relaxing the pack requirements by increasing the

maximum number of fruit per 8-pound sample for size designations 42 through 25, eliminating size designation 21, and adding size designations 20 and 23 as shown in the following chart:

Size designation	Maximum number of fruit per 8-pound sample
20	**27**
23	**29**
25	27* 32
27/28	30* 35
30	33* 38
33	36* 43
36	42* 45
39	48* 49
42	53* 54
45	55

*Prior number of fruit per 8-pound sample. New size designations are in bold.

This chart is commonly referred to as the "Size Designation Chart" in the industry. Increasing the maximum number of fruit per 8-pound sample will allow some smaller-sized fruit to be packed into a larger-size category. This rule continues to allow one more piece of fruit to be packed per 8-pound sample in size designations 42 and 39, three more pieces of fruit to be packed in size designation 36, seven more pieces of fruit to be packed in size designation 33, and five more pieces of fruit to be packed in size designations 27/28 and 25.

Additionally, handlers have the option of packing fruit as size designation 23, 20, or size designation 45. This rule continues to reduce the percentage of fruit packed in the 40 series and continues to increase the percentage of fruit packed in the 20 and 30 series. The Committee estimated that increasing the maximum number of fruit per 8-pound sample for size designation 39 would move approximately 600,000 pounds of kiwifruit from the former size designation 42 into the new size 39 designation. U.S. retailers prefer size 33 kiwifruit. Increasing the maximum number of fruit per 8-pound sample for size designation 33 will allow handlers to pack approximately 2,500,000 pounds more kiwifruit into new size designation 33. Thus, handlers will be better able to meet the needs of buyers, because kiwifruit sells by the piece, and buyers desire as much fruit in each container as the container can comfortably hold. This change does not affect the minimum size and will not allow fruit currently considered undersized to be shipped. Imports from Europe have increased 1,409 percent since 1992–1993. During the 2000–01 season approximately 3.2 million tray equivalents were imported from Europe.

The Committee further believes that relaxing the pack requirements to permit more individual pieces of fruit in an 8-pound sample for various size designations will reduce the sizing differences between California and imported kiwifruit. Reducing the size differences should help California handlers compete more effectively in the marketplace, as buyers apparently choose to purchase containers with more pieces of fruit per container, and this relaxation permits increases in the number of pieces of fruit in bags, volume-fill, and bulk containers. The Committee has estimated that utilizing the new size designations will yield the California kiwifruit industry $24,407,981 in FOB value versus the $22,442,648 received for the 2000–2001 season. This is an additional $2.0 million in FOB value for the 2001–2002 season.

The Committee wants to maintain the reputation California has established for uniformly packed containers of kiwifruit and believes that these changes will not significantly impact uniformity. The increase in the maximum number of fruit per 8-pound sample is not so significant that consumers or retailers will notice a visual size difference in the fruit being offered. The California Kiwifruit Commission, which administers a State program utilized to promote kiwifruit grown in California, conducted kiwifruit-sizing studies several years ago. These studies show that there is only an average of 3/32-inch to 4/32-inch difference in fruit length between sizes, and 2/32-inch to 3/32-inch difference in fruit width. These differences are indistinguishable to the eye.

These changes continue to address the marketing and shipping needs of the kiwifruit industry and are in the interest of growers, handlers, buyers, and consumers. The impact of these changes is expected to be beneficial to all growers and handlers regardless of size. There is widespread agreement in the industry to relax the pack requirements.

The Committee considered other alternatives to relaxing packing requirements but determined that these suggestions will not adequately address the industry problems.

One suggestion was to change the minimum size. The Committee did not adopt this suggestion because it believes that lowering the minimum size will diminish the quality image of California kiwifruit.

Another suggestion presented was to leave the size designation chart unchanged. The Committee did not adopt this suggestion because it believes that handlers would benefit from the size designation changes.

After considering these alternatives, the Committee recommended relaxing the pack requirements for seven size designations, eliminating one size designation, and adding two new size designations. Small and large growers and handlers are expected to benefit from this relaxation. It is estimated that grower returns will increase by approximately $1.00 per box.

This rule will not impose any additional reporting or recordkeeping requirements on either small or large kiwifruit handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies.

In addition, as noted in the initial regulatory flexibility analysis, USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule.

Further, the Committee's meeting was widely publicized throughout the kiwifruit industry and all interested persons were invited to attend the meeting and participate in Committee deliberations. Like all Committee meetings, the September 19, 2001, meeting was a public meeting and all entities, both large and small, were able to express their views on this issue.

An interim final rule concerning this action was published in the **Federal Register** on October 29, 2001 (66 FR 54411). Copies of the rule were mailed by the Committee staff to all Committee members and kiwifruit handlers. In addition, the rule was made available through the internet by the Office of the Federal Register and USDA. That rule provided a 60-day comment period which ended December 28, 2001. No comments were received. A correction concerning this action was published in the **Federal Register** on January 11, 2002. (67 FR 1413). The interim final rule, as published, contained an error in the amendatory instructions affecting 7 CFR part 920. The amendatory instructions incorrectly indicated that the revised table in § 920.302 appears at the end of paragraph (a)(4)(iv). The revised table actually appears at the end of paragraph (a)(4)(iii) of that section and appropriate corrections were made to the interim final rule.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: *http://www.ams.usda.gov/fv/moab.html*. Any questions about the compliance guide should be sent to Jay Guerber at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

After consideration of all relevant material presented, including the Committee's recommendation, and other information, it is found that finalizing the interim final rule, which was published in the **Federal Register** (66 FR 54411, October 29, 2001) and corrected in the **Federal Register** (67 FR 1413, January 11, 2002) will tend to effectuate the declared policy of the Act.

7 CFR Part 925

[Docket No. FV02–925–1 FR]

Grapes Grown in a Designated Area of Southeastern California; Increased Assessment Rate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This rule increases the assessment rate established for the California Desert Grape Administrative Committee (Committee) for the 2002 and subsequent fiscal periods from $0.01 to $0.015 per 18-pound lug of grapes handled. The Committee locally administers the marketing order which regulates the handling of grapes grown in a designated area of southeastern California. Authorization to assess grape handlers enables the Committee to incur expenses that are reasonable and necessary to administer the program. The fiscal period began January 1 and ends December 31. The assessment rate will remain in effect indefinitely unless modified, suspended, or terminated.

EFFECTIVE DATE: March 15, 2002.

Small businesses may request information on complying with this regulation by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW Stop 0237, Washington, DC 20250–0237; telephone: (202) 720–2491, Fax: (202)720–8938, or E-mail: *Jay.Guerber@usda.gov*.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement and Order No. 925, both as amended (7 CFR part 925), regulating the handling of grapes grown in a designated area of southeastern California, hereinafter referred to as the "order." The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

The Department of Agriculture (USDA) is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. Under the marketing order now in effect, California grape handlers are subject to assessments. Funds to administer the order are derived from such assessments. It is intended that the assessment rate as issued herein will be applicable to all assessable grapes beginning on January 1, 2002, and continue until amended, suspended, or terminated. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This rule increases the assessment rate established for the Committee for the 2002 and subsequent fiscal periods from $0.01 to $0.015 per 18-pound lug of grapes.

The grape marketing order provides authority for the Committee, with the approval of USDA, to formulate an annual budget of expenses and collect assessments from handlers to administer the program. The members of the Committee are producers and handlers of California grapes. They are familiar with the Committee's needs and with the costs for goods and services in their local area and are thus in a position to formulate an appropriate budget and assessment rate. The assessment rate is formulated and discussed in a public meeting. Thus, all directly affected persons have an opportunity to participate and provide input.

For the 1997 and subsequent fiscal periods, the Committee recommended, and USDA approved, an assessment rate that would continue in effect from fiscal period to fiscal period unless modified, suspended, or terminated by USDA upon recommendation and information submitted by the Committee or other information available to USDA.

The Committee met on November 5, 2001, and estimated a January 2002 beginning reserve of approximately $124,800, and unanimously recommended expenditures of $195,215 and an assessment rate of $0.015 per 18-pound lug of grapes for the 2002 fiscal period. In comparison, last year's budgeted expenditures were $186,023. The assessment rate of $0.015 is $0.005 higher than the rate currently in effect. The higher assessment rate is needed to offset increases in salaries and to keep the operating reserve at an adequate level.

The expenditures recommended by the Committee for the 2002 fiscal period include $100,000 for research, $28,200 for compliance activities, $41,000 for salaries, and $26,015 for other expenses. Budgeted expenses for these items in 2001 were $100,000, $35,200, $15,000, and $35,823, respectively.

The assessment rate recommended by the Committee was chosen because it will provide $142,500 in assessment income (9.5 million lugs x $.015 per lug) and, when $2,000 in interest income and $50,715 of its reserves are used for

VOL
67
ISS
50
MR
14
2002
UMI

approved expenses, allow the Committee to end the 2002 fiscal period with a $74,085 reserve. The current rate of $.01 per lug would generate $95,000 in assessment income, and require the Committee to use the $2,000 in interest and $98,215 of its reserves to cover its anticipated expenses. This will result in an ending reserve of $26,585, which was not acceptable to the Committee. The December 2002 ending reserve funds (estimated to be $74,085) with the new assessment rate will be kept within the maximum permitted by the order, approximately one fiscal period's expenses (§ 925.42).

The assessment rate established in this rule will continue in effect indefinitely unless modified, suspended, or terminated by USDA upon recommendation and information submitted by the Committee or other available information.

Although this assessment rate will be in effect for an indefinite period, the Committee will continue to meet prior to or during each fiscal period to recommend a budget of expenses and consider recommendations for modification of the assessment rate. The dates and times of Committee meetings are available from the Committee or USDA. Committee meetings are open to the public and interested persons may express their views at these meetings. USDA will evaluate Committee recommendations and other available information to determine whether modification of the assessment rate is needed. Further rulemaking will be undertaken as necessary. The Committee's 2002 budget and those for subsequent fiscal periods would be reviewed and, as appropriate, approved by USDA.

Final Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities. Accordingly, AMS has prepared this final regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 80 producers of grapes in the production area and approximately 26 handlers subject to regulation under the marketing order. Small agricultural producers are defined by the Small Business Administration (13 CFR 121.201) as those having annual receipts less than $750,000, and small agricultural service firms are defined as those whose annual receipts are less than $5,000,000.

Last year, about 69 percent of the handlers could be considered small businesses under SBA's definition and about 31 percent could be considered large businesses. It is estimated that about 88 percent of the producers have annual receipts less than $750,000. Therefore, the majority of handlers and producers of grapes may be classified as small entities.

This rule increases the assessment rate established for the Committee and collected from handlers for the 2002 and subsequent fiscal periods from $0.01 to $0.015 per 18-pound lug of grapes. The Committee unanimously recommended expenditures of $195,215 and an assessment rate of $0.015 per 18-pound lug of grapes for the 2002 fiscal period. The assessment rate of $0.015 is $0.005 higher than the 2001 rate. The volume of assessable grapes is estimated at 9.5 million 18-pound lugs. Thus, the $0.015 rate should provide $142,500 in assessment income. Income derived from handler assessments, along with interest income and funds from the Committee's authorized reserve should be adequate to cover budgeted expenses.

The expenditures recommended by the Committee for the 2002 fiscal period include $100,000 for research, $28,200 for compliance activities, $41,000 for salaries, and $26,015 for other expenses. Budgeted expenses for these items in 2001 were $100,000, $35,200, $15,000, and $35,823, respectively.

Prior to arriving at this budget the Committee considered alternative expenditure levels, but ultimately decided that the recommended levels were reasonable to properly administer the order. The assessment rate recommended by the Committee was derived by the following formula: Anticipated expenses ($195,215), plus the desired 2002 ending reserve ($74,085), minus the 2002 beginning reserve ($124,800), minus the anticipated interest income ($2,000), divided by the total estimated 2002 shipments (9.5 million 18-pound lugs). This calculation results in the $0.015 assessment rate. This rate will provide sufficient funds in combination with interest and reserve funds to meet the anticipated expenses of $195,215 and results in a December 2002 ending reserve of $74,085, which is acceptable to the Committee. The December 2002 ending reserve funds (estimated to be $74,085) will be kept within the maximum permitted by the order, approximately one fiscal periods' expenses (§ 925.41).

A review of historical information and preliminary information pertaining to the 2002 fiscal period indicates that the on-vine grower price for the 2002 season could range between $5.00 and $9.00 per 18-pound lug of grapes. Therefore, the estimated assessment revenue for the 2002 fiscal period as a percentage of total grower revenue could range between 0.2 and 0.3 percent.

This action increases the assessment obligation imposed on handlers. While assessments impose some additional costs on handlers, the costs are minimal and uniform on all handlers. Some of the additional costs may be passed on to producers. However, these costs are offset by the benefits derived by the operation of the marketing order.

In addition, the Committee's meeting was widely publicized throughout the grape production area and all interested persons were invited to attend the meeting and participate in Committee deliberations on all issues. Like all Committee meetings, the November 5, 2001, meeting was a public meeting and all entities, both large and small, were able to express views on this issue.

This rule imposes no additional reporting or recordkeeping requirements on either small or large production area grape handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies.

USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule.

A proposed rule concerning this action was published in the **Federal Register** on January 10, 2002 (67 FR 1315). Copies of the proposed rule were also mailed or sent via facsimile to all grape handlers. Finally, the proposed rule was made available through the Internet by the Office of the Federal Register and USDA. A 30-day comment period ending February 11, 2002, was provided for interested persons to respond to the proposal. No comments were received. However, the provisions of proposed § 925.215 have been modified in this action to add specific reference to an 18-pound lug for purposes of clarity.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: *http://www.ams.usda.gov/fv/moab.html*. Any questions about the compliance guide should be sent to Jay Guerber at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

After consideration of all relevant material presented, including the information and recommendation submitted by the Committee and other available information, it is hereby found that this rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined that good cause exists for not postponing the effective date of this rule until 30 days after publication in the **Federal Register** because: (1) The 2002 fiscal period began on January 1, 2002, and the marketing order requires that the rate of assessment for each fiscal period apply to all assessable grapes handled during such fiscal period; (2) the Committee needs to have sufficient funds to pay its expenses which are incurred on a continuous basis; and (3) handlers are aware of this action which was unanimously recommended by the Committee at a public meeting and is similar to other assessment rate actions issued in past years; and (4) a 30-day comment period was provided for in the proposed rule, and no comments were received.

List of Subjects in 7 CFR Part 925

Grapes, Marketing agreements, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 925 is amended as follows:

PART 925—GRAPES GROWN IN A DESIGNATED AREA OF SOUTHEASTERN CALIFORNIA

1. The authority citation for 7 CFR part 925 continues to read as follows:

Authority: 7 U.S.C. 601–674.

2. Section 925.215 is revised to read as follows:

925.215 Assessment rate.

On and after January 1, 2002, an assessment rate of $0.015 per 18-pound lug is established for grapes grown in a designated area of southeastern California.

Dated: March 11, 2002.

7 CFR Part 959

[Docket No. FV02–959–1 FR]

Onions Grown in South Texas; Increased Assessment Rate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This rule increases the assessment rate established for the South Texas Onion Committee (Committee) for the 2001–02 and subsequent fiscal periods from $0.03 to $0.05 per 50-pound container or equivalent of onions handled. The Committee locally administers the marketing order which regulates the handling of onions grown in South Texas. Authorization to assess onion handlers enables the Committee to incur expenses that are reasonable and necessary to administer the program. The fiscal period began August 1 and ends July 31. The assessment rate will remain in effect indefinitely unless modified, suspended, or terminated.

EFFECTIVE DATE: March 15, 2002.

FOR FURTHER INFORMATION CONTACT: Belinda G. Garza, Regional Manager, McAllen Marketing Field Office, Fruit and Vegetable Programs, AMS, USDA, 1313 E. Hackberry, McAllen, Texas 78501; telephone (956) 682–2833, Fax: (956) 682–5942; or George Kelhart, Technical Advisor, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW, STOP 0237, Washington, DC 20250–0237; telephone: (202) 720–2491, Fax: (202) 720–8938.

Small businesses may request information on complying with this regulation by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW, STOP 0237, Washington, DC 20250–0237; telephone: (202) 720–2491, Fax: (202) 720–8938, or E-mail: *Jay.Guerber@usda.gov*.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement No. 143 and Order No. 959, both as amended (7 CFR part 959), regulating the handling of onions grown in South Texas, hereinafter referred to as the "order." The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

The Department of Agriculture (USDA) is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. Under the marketing order now in effect, South Texas onion handlers are subject to assessments. Funds to administer the order are derived from such assessments. It is intended that the assessment rate as issued herein will be applicable to all assessable onions beginning August 1, 2001, and continuing until amended, suspended, or terminated. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing, USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This rule increases the assessment rate established for the Committee for the 2001–02 and subsequent fiscal periods from $0.03 to $0.05 per 50-pound container or equivalent of onions handled.

The South Texas onion marketing order provides authority for the Committee, with the approval of USDA, to formulate an annual budget of expenses and collect assessments from handlers to administer the program. The members of the Committee are producers and handlers of South Texas onions. They are familiar with the Committee's needs and with the costs for goods and services in their local area and are thus in a position to formulate an appropriate budget and assessment rate. The assessment rate is formulated and discussed in a public meeting. Thus, all directly affected persons have an opportunity to participate and provide input.

For the 2000–01 and subsequent fiscal periods, the Committee recommended, and USDA approved, an assessment rate that would continue in effect from fiscal

VOL
67
ISS
50
MR
14
2002
UMI

period to fiscal period unless modified, suspended, or terminated by USDA upon recommendation and information submitted by the Committee or other information available to USDA.

The Committee met on June 12, 2001, and unanimously recommended 2001–02 expenses of $115,189.85 for personnel, office, compliance, and partial promotion expenses. The assessment rate and specific funding for research and promotion projects were to be recommended at a later Committee meeting.

The Committee subsequently met on October 10, 2001, and recommended 2001–02 expenditures of $449,189 and an assessment rate of $0.05 per 50-pound container or equivalent of onions. Ten of the 11 Committee members present voted in support of the $0.02 per 50-pound container equivalent increase. One Committee member abstained from voting. In comparison, last year's budgeted expenditures were $306,740. The Committee recommended the increased rate to fund a major market development program to promote the consumption of South Texas onions, without having to draw a large amount from reserves. Without the increase, the Committee's reserve fund would drop to $52,576. The Committee believes that a reserve that low is not adequate for its operations.

The major expenditures recommended by the Committee for the 2001–02 fiscal period include $75,190 for administrative expenses, $30,000 for compliance, $254,000 for promotion, and $90,000 for research projects. Budgeted expenses for these items in 2000–01 were $87,109, $27,498, $39,500, and $122,200, respectively. In addition, $30,435 was expended for a retirement package for the outgoing Committee manager.

The assessment rate recommended by the Committee was derived by dividing anticipated expenses by expected shipments of South Texas onions. Onion shipments for the fiscal period are estimated at 7.5 million 50-pound equivalents, which should provide $375,000 in assessment income. Income derived from handler assessments, along with interest income and funds from the Committee's authorized reserve, should be adequate to cover budgeted expenses. Funds in the reserve (currently $276,705) will be kept within the maximum permitted by the order (approximately two fiscal periods' expenses, § 959.43).

The assessment rate established in this rule will continue in effect indefinitely unless modified, suspended, or terminated by USDA upon recommendation and information submitted by the Committee or other available information.

Although this assessment rate will be in effect for an indefinite period, the Committee will continue to meet prior to or during each fiscal period to recommend a budget of expenses and consider recommendations for modification of the assessment rate. The dates and times of Committee meetings are available from the Committee or USDA. Committee meetings are open to the public and interested persons may express their views at these meetings. USDA will evaluate Committee recommendations and other available information to determine whether modification of the assessment rate is needed. Further rulemaking will be undertaken as necessary. The Committee's 2001–02 budget has been approved and those for subsequent fiscal periods will be reviewed and, as appropriate, approved by USDA.

Final Regulatory Flexibility Analysis

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities. Accordingly, AMS has prepared this final regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 78 producers of onions in the production area and approximately 40 handlers subject to regulation under the marketing order. Small agricultural producers are defined by the Small Business Administration (SBA) (13 CFR 121.201) as those having annual receipts less than $750,000, and small agricultural service firms are defined as those whose annual receipts are less than $5,000,000.

Most of the handlers are vertically integrated corporations involved in producing, shipping, and marketing onions. For the 2000–01 marketing year, the industry's 40 handlers shipped onions produced on 15,166 acres with the average and median volume handled being 208,700 and 177,377 fifty-pound bag equivalents, respectively. In terms of production value, total revenues for the 40 handlers were estimated to be $73,879,800, with average and median revenues being $1,846,995 and $1,569,786, respectively.

The South Texas onion industry is characterized by producers and handlers whose farming operations generally involve more than one commodity, and whose income from farming operations is not exclusively dependent on the production of onions. Alternative crops provide an opportunity to utilize many of the same facilities and equipment not in use when the onion production season is complete. For this reason, typical onion producers and handlers either produce multiple crops or alternate crops within a single year.

Based on the SBA's definition of small entities, the Committee estimates that all of the 40 handlers regulated by the order would be considered small entities if only their spring onion revenues are considered. However, revenues from other production enterprises would likely push a large number of these handlers above the $5,000,000 annual receipt threshold. All of the 78 producers may be classified as small entities based on the SBA definition if only their revenue from spring onions is considered. When revenues from all sources are considered, a majority of the producers would not be considered small entities because receipts would exceed $750,000.

This rule increases the assessment rate established for the Committee and collected from handlers for the 2001–02 and subsequent fiscal periods from $0.03 to $0.05 per 50-pound container equivalent of onions. The Committee recommended 2001–02 expenditures of $449,189 and an assessment rate of $0.05 per 50-pound container or equivalent. The assessment rate of $0.05 is $0.02 higher than the 2000–01 rate. The quantity of assessable onions for the 2001–02 fiscal period is estimated at 7.5 million 50-pound equivalents. Thus, the $0.05 rate should provide $375,000 in assessment income. Income derived from handler assessments, along with interest income and funds from the Committee's authorized reserve, should be adequate to cover budgeted expenses. Funds in the reserve (currently $276,705) will be kept within the maximum permitted by the order (approximately two fiscal periods' expenses, § 959.43).

The major expenditures recommended by the Committee for the 2001–02 fiscal period include $75,190 for administrative expenses, $30,000 for compliance, $254,000 for promotion, and $90,000 for research projects. Budgeted expenses for these items in 2000–01 were $87,109, $27,498, $39,500, and $122,200, respectively. In addition, $30,435 was expended for a retirement package for the outgoing Committee manager.

The Committee recommended the increased rate to fund a major market development program to promote the consumption of South Texas onions, without having to draw a large amount from reserves. Without the increase, the Committee's reserve fund would drop to $52,576. The Committee believes that a reserve that low is not adequate for its operations.

The Committee reviewed and recommended 2001–02 expenditures of $449,189, which included an increase in its promotion program. Prior to arriving at this budget, the Committee considered information from various sources, including the Committee's Executive Committee, the Research Subcommittee, and the Market Development Subcommittee. Alternative expenditure levels were discussed by these groups, based upon the relative value of various research and promotion projects to the onion industry. The assessment rate of $0.05 per 50-pound equivalent of assessable onions was then determined by dividing the total recommended budget by the quantity of assessable onions, estimated at 7.5 million 50-pound equivalents for the 2001–02 fiscal period. This is approximately $74,190 below the anticipated expenses, which the Committee determined to be acceptable.

A review of historical information and preliminary information pertaining to the 2002 shipping season indicates that the grower price for the 2001–02 fiscal period could range between $6 and $11 per 50-pound equivalent of onions. Therefore, the estimated assessment revenue for the 2001–02 fiscal period as a percentage of total grower revenue could range between 0.45 and 0.83 percent.

This action increases the assessment obligation imposed on handlers. While assessments impose some additional costs on handlers, the costs are minimal and uniform on all handlers. Some of the additional costs may be passed on to producers. However, these costs are offset by the benefits derived by the operation of the marketing order. In addition, the Committee's meeting was widely publicized throughout the South Texas onion industry and all interested persons were invited to attend the meeting and participate in Committee deliberations on all issues. Like all Committee meetings, the October 10, 2001, meeting was a public meeting and all entities, both large and small, were able to express views on this issue.

This rule imposes no additional reporting or recordkeeping requirements on either small or large South Texas onion handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies.

USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule.

A proposed rule concerning this action was published in the **Federal Register** on January 10, 2002 (67 FR 1317). Copies of the proposed rule were also mailed or sent via facsimile to all onion handlers. Finally, the proposal was made available through the Internet by the Office of the Federal Register and USDA. A 30-day comment period ending February 11, 2002, was provided for interested persons to respond to the proposal. No comments were received.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: *http://www.ams.usda.gov/fv/moab.html*. Any questions about the compliance guide should be sent to Jay Guerber at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

After consideration of all relevant material presented, including the information and recommendation submitted by the Committee and other available information, it is hereby found that this rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined that good cause exists for not postponing the effective date of this rule until 30 days after publication in the **Federal Register** because the 2001–02 fiscal period began August 1, 2001, and the marketing order requires that the rate of assessment for each fiscal period apply to all assessable onions handled during such fiscal period. In addition, the Committee needs to have sufficient funds to pay its expenses, which are incurred on a continuous basis. Further, handlers are aware of this rule which was recommended by the Committee at a public meeting and is similar to other assessment rate actions issued in past years. Also, a 30-day comment period was provided for in the proposed rule, and no comments were received.

List of Subjects in 7 CFR Part 959

Marketing agreements, Onions, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 959 is amended as follows:

PART 959—ONIONS GROWN IN SOUTH TEXAS

1. The authority citation for 7 CFR part 959 continues to read as follows:

Authority: 7 U.S.C. 601–674.

2. Section 959.237 is revised to read as follows:

§ 959.237 Assessment rate.

On and after August 1, 2001, an assessment rate of $0.05 per 50-pound container or equivalent is established for South Texas onions.

Dated: March 11, 2002.

Independence Avenue, SW. STOP 0237, Washington, DC 20250–0237; telephone: (202) 720–2491, Fax: (202) 720–8938.

Small businesses may request information on complying with this regulation by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW. STOP 0237, Washington, DC 20250–0237; telephone: (202) 720–2491, Fax: (202) 720–8938, or E-mail: *Jay.Guerber@usda.gov*.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement No. 156 and Order No. 979 (7 CFR part 979), regulating the handling of melons grown in South Texas, hereinafter referred to as the "order." The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

The Department of Agriculture (USDA) is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. Under the marketing order now in effect, South Texas melon handlers are subject to assessments. Funds to administer the order are derived from such assessments. It is intended that the assessment rate as issued herein will be applicable to all assessable melons beginning October 1, 2001, and continuing until amended, suspended, or terminated. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing, USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This rule increases the assessment rate established for the Committee for the 2001–02 and subsequent fiscal periods from $0.05 to $0.06 per carton of melons handled.

The South Texas melon marketing order provides authority for the Committee, with the approval of USDA, to formulate an annual budget of expenses and collect assessments from handlers to administer the program. The members of the Committee are growers and handlers of South Texas melons. They are familiar with the Committee's needs and with the costs for goods and services in their local area and are thus in a position to formulate an appropriate budget and assessment rate. The assessment rate is formulated and discussed in a public meeting. Thus, all directly affected persons have an opportunity to participate and provide input.

For the 1999–2000 and subsequent fiscal periods, the Committee recommended, and USDA approved, an assessment rate that would continue in effect from fiscal period to fiscal period unless modified, suspended, or terminated by USDA upon recommendation and information submitted by the Committee or other information available to USDA.

The Committee met on September 25, 2001, and unanimously recommended 2001–02 expenses of $90,888 for personnel, office, compliance, and partial market development expenses. The assessment rate and specific funding for research and promotion projects were to be recommended at a later Committee meeting.

The Committee subsequently met on November 8, 2001, and unanimously recommended 2001–02 expenditures of $314,388 and an assessment rate of $0.06 per carton of melons. In comparison, last year's budgeted expenditures were $241,460. The Committee recommended the increased rate to fund a major market development program to promote the consumption of South Texas melons, without having to draw a large amount from reserves. Without the increase, the Committee's reserve fund would drop to $194,687, which is lower than what the Committee needs for operations. This amount is derived by taking the current reserve ($327,200), adding the $166,875 in assessment income based on the old rate (3,337,500 cartons x $0.05 per carton) and anticipated interest totaling $15,000, and then subtracting the 2001–02 budget of $314,388. With the new rate, $200,250 in assessment income would be generated, and the reserve fund would only drop to $228,062.

The major expenditures recommended by the Committee for the 2001–02 fiscal period include $60,888 for administrative expenses, $20,000 for compliance, $137,000 for market development, and $96,500 for research projects. Budgeted expenses for these items in 2000–01 were $70,351, $21,604, $25,000, and $96,500, respectively.

The assessment rate recommended by the Committee was derived by considering anticipated expenses, expected shipments of South Texas melons, anticipated interest income, and the amount of funds in the Committee's operating reserve. Melon shipments for the fiscal period are estimated at 3,337,500 cartons, which should provide $200,250 in assessment income at the $0.06 per carton rate. Income derived from handler assessments, along with interest income and funds from the Committee's authorized reserve, should be adequate to cover budgeted expenses for the 2001–02 fiscal period. Funds in the reserve (currently $327,200) will be kept within the maximum permitted by the order (approximately two fiscal periods' expenses, § 979.44).

The assessment rate established in this rule will continue in effect indefinitely unless modified, suspended, or terminated by USDA upon recommendation and information submitted by the Committee or other available information.

Although this assessment rate will be in effect for an indefinite period, the Committee will continue to meet prior to or during each fiscal period to recommend a budget of expenses and consider recommendations for modification of the assessment rate. The dates and times of Committee meetings are available from the Committee or USDA. Committee meetings are open to the public and interested persons may express their views at these meetings. USDA will evaluate Committee recommendations and other available information to determine whether modification of the assessment rate is needed. Further rulemaking will be undertaken as necessary. The Committee's 2001–02 budget has been approved and those for subsequent fiscal periods will be reviewed and, as appropriate, approved by USDA.

Final Regulatory Flexibility Analysis

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities. Accordingly, AMS has prepared this final regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order

that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 33 growers of melons in the production area and approximately 22 handlers subject to regulation under the marketing order. Small agricultural growers are defined by the Small Business Administration (SBA)(13 CFR 121.201) as those having annual receipts less than $750,000, and small agricultural service firms are defined as those whose annual receipts are less than $5,000,000.

Most of the handlers are vertically integrated corporations involved in growing, shipping, and marketing melons. For the 2000–01 marketing year, the industry's 22 handlers shipped melons produced on 6,979 acres with the average and median volume handled being 192,450 and 84,532 cartons, respectively. In terms of production value, total revenue for the 22 handlers was estimated to be $37,478,447, with the average and median revenues being $1,703,566 and $748,273, respectively.

The South Texas melon industry is characterized by growers and handlers whose farming operations generally involve more than one commodity, and whose income from farming operations is not exclusively dependent on the production of melons. Alternative crops provide an opportunity to utilize many of the same facilities and equipment not in use when the melon production season is complete. For this reason, typical melon growers and handlers either double-crop melons during other times of the year or produce alternate crops, like onions.

Based on the SBA's definition of small entities, the Committee estimates that half of the 22 handlers regulated by the order would be considered small entities if only their spring melon revenues are considered. However, revenues from other productive enterprises would likely push a large number of these handlers above the $5,000,000 annual receipt threshold. Of the 33 growers within the production area, few have sufficient acreage to generate sales in excess of $750,000; therefore, the majority of growers may be classified as small entities.

This rule increases the assessment rate established for the Committee and collected from handlers for the 2001–02 and subsequent fiscal periods from $0.05 to $0.06 per carton of melons. The Committee unanimously recommended 2001–02 expenditures of $314,388 and an assessment rate of $0.06 per carton of melons. In comparison, last year's budgeted expenditures were $241,460. The assessment rate of $0.06 is $0.01 higher than the rate currently in effect. At the rate of $0.06 per carton and an estimated 2001–02 melon production of 3,337,500 cartons, the projected income derived from handler assessments ($200,250), along with interest and funds from the Committee's authorized reserve, should be adequate to cover budgeted expenses. Funds in the reserve (currently $327,200) will be kept within the maximum permitted by the order (approximately two fiscal periods' expenses; § 979.44).

The major expenditures recommended by the Committee for the 2001–02 fiscal period include $60,888 for administrative expenses, $20,000 for compliance, $137,000 for market development, and $96,500 for research projects. Budgeted expenses for these items in 2000–01 were $70,351, $21,604, $25,000, and $96,500, respectively.

The Committee recommended the increased rate to fund a major market development program to promote the consumption of South Texas melons, without having to draw a large amount from reserves. Without the increase, the Committee's reserve fund would drop to $194,687, which is lower than what the Committee needs for operations. With the increased rate, the reserve fund would drop to $228,062.

The Committee voted to increase its assessment rate because the current rate would reduce the Committee's reserve funds beyond the level acceptable to the Committee. Assessment income, along with interest and funds from the Committee's authorized reserve, will provide the Committee with adequate funds to meet its 2001–02 fiscal period's expenses.

The Committee reviewed and unanimously recommended 2001–02 expenditures of $314,388, which included an increase in its market development program. Prior to arriving at this budget, the Committee considered information from various sources, including the Research and the Market Development Subcommittee. Alternative expenditure levels were discussed by these groups, based upon the relative value of various research and market development projects to the melon industry. The assessment rate of $0.06 per carton of assessable melons was then determined by considering the total recommended budget, the quantity of assessable melons estimated at 3,337,500 cartons for the 2001–02 fiscal period, anticipated interest income, and the funds in the Committee's operating reserve. The recommended rate will generate $200,250, which is $114,138 below the anticipated expenses. The Committee found this acceptable because interest and reserve funds will be used to make up the deficit.

A review of historical information and preliminary information pertaining to the 2002 shipping season indicates that the grower price for the 2001–02 fiscal period could range between $7 and $11 per carton of cantaloupes and between $6 and $10 per carton of honeydew melons. Therefore, the estimated assessment revenue for the 2001–02 fiscal period as a percentage of total grower revenue could range between 0.9 and 0.5 percent for cantaloupes and between 1.0 and 0.6 percent for honeydew melons.

This action increases the assessment obligation imposed on handlers. While assessments impose some additional costs on handlers, the costs are minimal and uniform on all handlers. Some of the additional costs may be passed on to growers. However, these costs are offset by the benefits derived by the operation of the marketing order. In addition, the Committee's meeting was widely publicized throughout the South Texas melon industry and all interested persons were invited to attend the meeting and participate in Committee deliberations on all issues. Like all Committee meetings, the November 8, 2001, meeting was a public meeting and all entities, both large and small, were able to express views on this issue.

This rule imposes no additional reporting or recordkeeping requirements on either small or large South Texas melon handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies.

USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule.

A proposed rule concerning this action was published in the **Federal Register** on January 10, 2002 (67 FR 1319). Copies of the proposed rule were also mailed or sent via facsimile to all melon handlers. Finally, the proposal was made available through the Internet by the Office of the Federal Register and USDA. A 30-day comment period ending February 11, 2002, was provided for interested persons to respond to the proposal. No comments were received.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: *http://www.ams.usda.gov/fv/moab.html*. Any questions about the

compliance guide should be sent to Jay Guerber at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

After consideration of all relevant material presented, including the information and recommendation submitted by the Committee and other available information, it is hereby found that this rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined that good cause exists for not postponing the effective date of this rule until 30 days after publication in the **Federal Register** because the 2001–02 fiscal period began on October 1, 2001, and the marketing order requires that the rate of assessment for each fiscal period apply to all assessable melons handled during such fiscal period. In addition, the Committee needs to have sufficient funds to pay its expenses, which are incurred on a continuous basis. Further, handlers are aware of this rule which was unanimously recommended by the Committee at a public meeting and is similar to other assessment rate actions issued in past years. Also, a 30-day comment period was provided for in the proposed rule, and no comments were received.

List of Subjects in 7 CFR Part 979

Marketing agreements, Melons, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 979 is amended as follows:

PART 979—MELONS GROWN IN SOUTH TEXAS

1. The authority citation for 7 CFR part 979 continues to read as follows:

Authority: 7 U.S.C. 601–674.

2. Section 979.219 is revised to read as follows:

§ 979.219 Assessment rate.

On and after October 1, 2001, an assessment rate of $0.06 per carton is established for South Texas melons.

Dated: March 11, 2002.

A.J. Yates,

Administrator, Agricultural Marketing Service.

7 CFR Part 982

[Docket No. FV02–982–1 IFR]

Hazelnuts Grown in Oregon and Washington; Establishment of Interim Final and Final Free and Restricted Percentages for the 2001–2002 Marketing Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule with request for comments.

SUMMARY: This rule establishes interim final and final free and restricted percentages for domestic inshell hazelnuts for the 2001–2002 marketing year under the Federal marketing order for hazelnuts grown in Oregon and Washington. The interim final free and restricted percentages are 4.9363 and 95.0637 percent, respectively, and the final free and restricted percentages are 6.1048 and 93.8952 percent, respectively. The percentages allocate the quantity of domestically produced hazelnuts which may be marketed in the domestic inshell market. The percentages are intended to stabilize the supply of domestic inshell hazelnuts to meet the limited domestic demand for such hazelnuts and provide reasonable returns to producers. This rule was recommended unanimously by the Hazelnut Marketing Board (Board), which is the agency responsible for local administration of the marketing order.

DATES: This interim final rule is effective March 15, 2002. Comments received by May 13, 2002, will be considered prior to issuance of a final rule.

ADDRESSES: Interested persons are invited to submit written comments concerning this rule. Comments must be sent to the Docket Clerk, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue SW., STOP 0237, Washington, DC 20250–0237; Fax: (202) 720–8938, or E-mail: *moab.docketclerk@usda.gov*. All comments should reference the docket number and the date and page number of this issue of the **Federal Register** and will be available for public inspection in the Office of the Docket Clerk during regular business hours, or can be viewed at: *http://www.ams.usda.gov/fv/moab.html*.

Small businesses may request information on complying with this regulation by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence SW., STOP 0237, Washington, DC 20250–0237; telephone: (202) 720–2491, Fax: (202) 720–8938, or E-mail: *Jay.Guerber@usda.gov*.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement No. 115 and Marketing Order No. 982, both as amended (7 CFR part 982), regulating the handling of hazelnuts grown in Oregon and Washington, hereinafter referred to as the "order." The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

The Department of Agriculture (USDA) is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is intended that this action apply to all merchantable hazelnuts handled during the 2001–2002 marketing year (July 1, 2001, through June 30, 2002). This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing, USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This rule establishes marketing percentages which allocate the quantity of inshell hazelnuts that may be marketed in domestic markets. The Board is required to meet prior to September 20 of each marketing year to compute its marketing policy for that year, and compute and announce an inshell trade demand if it determines that volume regulations would tend to effectuate the declared policy of the Act. The Board also computes and announces preliminary free and restricted percentages for that year.

The inshell trade demand is the amount of inshell hazelnuts that handlers may ship to the domestic market throughout the marketing season. The order specifies that the inshell trade demand be computed by averaging the preceding three "normal" years" trade acquisitions of inshell hazelnuts, rounded to the nearest whole number. The Board may increase the three-year average by up to 25 percent, if market conditions warrant an increase. The Board's authority to recommend volume regulations and the computations used to determine the percentages are specified in § 982.40 of the order.

The quantity to be marketed is broken down into free and restricted percentages to make available hazelnuts which may be marketed in domestic inshell markets (free) and hazelnuts which must be exported, shelled or otherwise disposed of by handlers (restricted). Prior to September 20 of each marketing year, the Board must compute and announce preliminary free and restricted percentages. The preliminary free percentage releases 80 percent of the inshell trade demand to the domestic market. The purpose of releasing only 80 percent of the inshell trade demand under the preliminary percentage is to guard against an underestimate of crop size. The preliminary free percentage is expressed as a percentage of the total supply subject to regulation (supply) and is based on the preliminary crop estimate.

The National Agricultural Statistics Service (NASS) has estimated hazelnut production at 48,000 tons for the Oregon and Washington area. The majority of domestic inshell hazelnuts are marketed in October, November, and December. By November, the marketing season is well under way.

The Board adjusted the crop estimate down to 44,588 tons by taking into consideration the average crop disappearance over the preceding three years (7.12 percent) and the undeclared carry-in (6 tons.) Disappearance is the difference between orchard-run production (crop estimate) and the available supply of merchantable product available for sale by handlers. This difference or disappearance consists of unharvested hazelnuts, cull product that is harvested and delivered to handlers but later discarded, or product used on the farm, sold locally, or otherwise disposed of by producers. The Board computed the adjusted inshell trade demand of 2,201 tons by taking the difference between the average of the past three years' sales (3,473 tons) and the declared carry-in from last year's crop (1,272 tons.)

The Board computed and announced preliminary free and restricted percentages of 3.9495 percent and 96.0505 percent, respectively, at its August 30, 2001, meeting. The Board computed the preliminary free percentage by multiplying the adjusted trade demand by 80 percent and dividing the result by the adjusted crop estimate (2,201 tons x 80 percent/44,588 tons = 3.9495 percent.) The preliminary free percentage thus initially released 1,761 tons of hazelnuts from the 2001 supply for domestic inshell use, and the restricted percentage withheld 42,804 tons for the export and kernel market.

Under the order, the Board must meet again on or before November 15 to recommend interim final and final percentages. The Board uses current crop estimates to calculate interim final and final percentages. The interim final percentages are calculated in the same way as the preliminary percentages and release the remaining 20 percent (to total 100 percent of the inshell trade demand) previously computed by the Board. Final free and restricted percentages may release up to an additional 15 percent of the average of the preceding three years' trade acquisitions to provide an adequate carryover into the following season (i.e., desirable carry-out). The order requires that the final free and restricted percentages shall be effective 30 days prior to the end of the marketing year, or earlier, if recommended by the Board and approved by USDA. Revisions in the marketing policy can be made until February 15 of each marketing year, but the inshell trade demand can only be revised upward, consistent with § 982.40(e).

The Board met on November 15, 2001, and reviewed and approved an amended marketing policy and recommended the establishment of interim final and final free and restricted percentages. The interim final free and restricted percentages were recommended at 4.9363 percent free and 95.0637 percent restricted. Final percentages, which included an additional 15 percent of the average of the preceding three-years' trade acquisitions for desirable carry-out, were recommended at 6.1048 percent free and 93.8952 percent restricted effective May 31, 2002. The final free percentage releases 2,722 tons of inshell hazelnuts from the 2001 supply for domestic use.

The final marketing percentages are based on the Board's final production estimate and the following supply and demand information for the 2001–2002 marketing year:

	Tons
Inshell supply:	
(1) Total production (crop estimate)	48,000
(2) Less substandard, farm use (disappearance; 7.12 percent of Item 1)	3,418
(3) Merchantable production (Board's adjusted crop estimate; Item 1 minus Item 2)	44,582
(4) Plus undeclared carry-in as of July 1, 2001 (subject to regulation)	6
(5) Supply subject to regulation (Item 3 plus Item 4)	44,588
Inshell trade demand:	
(6) Average trade acquisitions of inshell hazelnuts for three prior years	3,473
(7) Less declared carry-in as of July 1, 2001 (not subject to regulation)	1,272
(8) Adjusted Inshell Trade Demand (Item 6 minus Item 7)	2,201
(9) Desirable carry-out on August 31, 2002 (15 percent of Item 6)	521
(10) Adjusted Inshell Trade Demand plus desirable carry-out (Item 8 plus Item 9)	2,722

Percentages	Free	Restricted
(11) Interim final percentages (Item 8 divided by Item 5) × 100	4.9363	95.0637
(12) Interim final free in tons (Item 8)	2,201	
(13) Interim final restricted in tons (Item 5 minus Item 8)		42,387

VOL
67
ISS
50
MR
14
2002
UMI

Percentages	Free	Restricted
(14) Final percentages (Item 10 divided by Item 5) × 100	6.1048	93.8952
(15) Final free in tons (Item 10)	2,722	
(16) Final restricted in tons (Item 5 minus Item 10)		41,866

In addition to complying with the provisions of the order, the Board also considered USDA's 1982 "Guidelines for Fruit, Vegetable, and Specialty Crop Marketing Orders" (Guidelines) when making its computations in the marketing policy. This volume control regulation provides a method to collectively limit the supply of inshell hazelnuts available for sale in domestic markets. The Guidelines provide that the domestic inshell market has available a quantity equal to 110 percent of prior years' shipments before allocating supplies for the export inshell, export kernel, and domestic kernel markets. This provides for plentiful supplies for consumers and for market expansion, while retaining the mechanism for dealing with oversupply situations. The established final percentages will make available an additional 521 tons for desirable carry-out effective May 31, 2002. The total free supply for the 2001–2002 marketing year is 3,994 tons of hazelnuts, which is the sum of the final trade demand of 3,473 tons and the 521 ton desirable carry-out. This amount is 115 percent of prior years' sales and exceeds the goal of the Guidelines.

Initial Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities. Accordingly, AMS has prepared this initial regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

Small agricultural producers are defined by the Small Business Administration (13 CFR 121.201) as those having annual receipts of less than $750,000, and small agricultural service firms are defined as those having annual receipts of less than $5,000,000. There are approximately 800 producers of hazelnuts in the production area and approximately 19 handlers subject to regulation under the order. Average annual hazelnut revenue per producer is approximately $35,700, computed by dividing National Agriculture Statistics Service (NASS) figures for the average value of production for 1999 and 2000 ($28.563 million) by the number of producers. The level of sales of other crops by hazelnut producers is not known. In addition, based on Board records, about 95 percent of the handlers ship under $5,000,000 worth of hazelnuts on an annual basis. In view of the foregoing, it can be concluded that the majority of hazelnut producers and handlers may be classified as small entities.

Board meetings are widely publicized in advance of the meetings and are held in a location central to the production area. The meetings are open to all industry members and other interested persons who are encouraged to participate in the deliberations and voice their opinions on topics under discussion. Thus, Board recommendations can be considered to represent the interests of small business entities in the industry.

Currently, U.S. hazelnut production is allocated among three market outlets: inshell domestic, inshell export, and shelled (kernel) markets. Handlers and growers receive the highest return on inshell domestic, less for inshell export, and the least for kernels (shelled). Based on Board records of average shipments for 1997–2000, the percentage going to each of those markets was 13 percent (domestic inshell), 46 percent (export inshell) and 41 percent (kernels).

The inshell market can be characterized as having limited demand and being prone to oversupply and low grower prices in the absence of supply restrictions. This volume control regulation provides a method for the U.S. hazelnut industry to limit the supply of domestic inshell hazelnuts available for sale in the continental U.S. On average, 76 percent of domestic inshell hazelnut shipments occur between October 1 through November 30, primarily to supply holiday nut demand.

Many years of marketing experience led to the development of the current volume control procedures. These procedures have helped the industry address its marketing problems by keeping inshell hazelnut supplies in balance with domestic needs. Volume controls fully supply the domestic inshell market while preventing an oversupply of that market. The Board's authority to recommend volume regulations and the computations used to determine the percentages are specified in § 982.40 of the order.

This rule implements volume control procedures for the 2001–2002 marketing year by establishing marketing percentages (free and restricted percentages) which determine the quantity of inshell hazelnuts that may be marketed in domestic markets. The free quantity may be marketed in domestic inshell markets and the restricted quantity must be exported, shelled, or otherwise disposed of by handlers. The computations for 2001–2002 are explained herein.

The Board is required to meet prior to September 20 of each marketing year to establish its marketing policy for that year. At its marketing policy meeting, the Board computes and announces its estimate of inshell trade demand, which is the quantity of inshell hazelnuts that handlers typically ship to the domestic market throughout the marketing season. If it determines that volume regulations would tend to effectuate the declared policy of the Act, the Board also computes and announces the preliminary free and restricted percentages for that year. At subsequent meetings, the Board determines interim final percentages and final percentages, which may be the same as, or higher than, the preliminary percentages.

The order specifies that the inshell trade demand be computed by averaging the preceding three "normal" years' trade acquisitions of inshell hazelnuts, rounded to the nearest whole number. If market conditions warrant, the Board may increase the three-year average by up to 25 percent.

Establishing the preliminary free percentage releases 80 percent of the inshell trade demand to the domestic market. The purpose of releasing only 80 percent is to guard against an underestimate of crop size. The preliminary free percentage is expressed as a percentage of the total supply subject to regulation and is based on the preliminary crop estimate. NASS has estimated hazelnut production at 48,000 tons for the Oregon and Washington area.

At its November 2001 meeting, the Board computed the available supply of merchantable product for sale by handlers by subtracting the average crop disappearance over the preceding three years (7.12 percent) from the 48,000-ton hazelnut crop estimate. Disappearance consists of (1) unharvested hazelnuts, (2) culled product (nuts that are harvested and delivered to handlers but later discarded), or (3) product used on the farm, sold locally, or otherwise disposed of by producers. Subtracting an additional 6 tons (the undeclared carryin) yielded the adjusted crop estimate of 44,588 tons.

The Board computed the adjusted inshell trade demand of 2,201 tons by taking the difference between the average of the past three years' sales (3,473 tons) and the declared carry-in from last year's crop (1,272 tons.)

The Board computed and announced preliminary free and restricted percentages of 3.9495 percent and 96.0505 percent, respectively, at its August 30, 2001, meeting. The Board computed the preliminary free percentage by multiplying the adjusted inshell trade demand by 80 percent and dividing the result by the adjusted crop estimate: (2,201 tons × 80 percent)/44,588 tons = 3.9495 percent. Establishing the 3.9495 percent preliminary free percentage allowed the initial release of 1,761 tons of hazelnuts from the 2001 supply for domestic inshell use. Establishing the 96.0505 percent restricted percentage had the effect of allocating 42,804 tons to the export and kernel markets.

Under the order, the Board must meet again on or before November 15 each year to recommend interim final and final percentages, using current crop estimates. The interim final percentages are calculated in the same way as the preliminary percentages. Computing and announcing the interim final percentage allows the release of the remaining 20 percent (to total 100 percent) of the inshell trade demand previously computed by the Board. In establishing final free percentage and restricted percentages, the Board may release up to an additional 15 percent of the average of the preceding three years' trade acquisitions, to provide an adequate carryover into the following season (i.e., desirable carry-out).

The order requires that the final free and restricted percentages shall be effective 30 days prior to the end of the marketing year, or earlier, if recommended by the Board and approved by USDA. Revisions in the marketing policy can be made until February 15 of each marketing year, but the inshell trade demand can only be revised upward, consistent with § 982.40(e).

The Board met on November 15, 2001, and reviewed and approved an amended marketing policy and recommended the establishment of interim final and final free and restricted percentages. The recommended interim final free and restricted percentages were 4.9363 percent free and 95.0637 percent restricted. Recommended final percentages, which included an additional 15 percent of the average of the preceding three-years' trade acquisitions for desirable carry-out, were 6.1048 percent free and 93.8952 percent restricted, effective May 31, 2002. Establishing the final free percentage releases for domestic use the full amount of the adjusted inshell trade demand of inshell hazelnuts from the 2001 supply (2,722 tons).

The final marketing percentages are based on the Board's final production estimate and the following supply and demand information for the 2001–2002 marketing year:

	Tons
Inshell supply:	
(1) Total production (crop estimate)	48,000
(2) Less substandard, farm use (disappearance; 7.12 percent of Item 1)	3,418
(3) Merchantable production (Board's adjusted crop estimate; Item 1 minus Item 2)	44,582
(4) Plus undeclared carry-in as of July 1, 2001 (subject to regulation)	6
(5) Supply subject to regulation (Item 3 plus Item 4)	44,588
Inshell trade demand:	
(6) Average trade acquisitions of inshell hazelnuts for three prior years	3,473
(7) Less declared carry-in as of July 1, 2001 (not subject to regulation)	1,272
(9) Adjusted Inshell Trade Demand (Item 6 minus Item 7)	2,201
(9) Desirable carry-out on August 31, 2002 (15 percent of Item 6)	521
(10) Adjusted Inshell Trade Demand plus desirable carry-out (Item 8 plus Item 9)	2,722

Percentages	Free	Restricted
(11) Interim final percentages (Item 8 divided by Item 5) x 100	4.9363	95.0637
(12) Interim final free in tons (Item 8)	2,201	
(13) Interim final restricted in tons (Item 5 minus Item 8)		42,387
(14) Final percentages (Item 10 divided by Item 5) x 100	6.1048	93.8952
(15) Final free in tons (Item 10)	2,722	
(16) Final restricted in tons (Item 5 minus Item 10)		41,866

In addition to complying with the provisions of the order, the Board also considered USDA's 1982 "Guidelines for Fruit, Vegetable, and Specialty Crop Marketing Orders" (Guidelines) when making its computations in the marketing policy. This volume control regulation provides a method to collectively limit the supply of inshell hazelnuts available for sale in domestic markets. The Guidelines provide that the domestic inshell market has available a quantity equal to at least 110 percent of prior years' shipments before allocating supplies for the export inshell, export kernel, and domestic kernel markets. This provides for plentiful supplies for consumers and for market expansion, while retaining the mechanism for dealing with oversupply situations. The established final percentages will make available an additional 521 tons for desirable carry-out effective May 31, 2002. The total free supply for the 2001–2002 marketing year is 3,994 tons of hazelnuts, which is the sum of the final trade demand of 3,473 tons (average trade acquisitions for three prior years) and the 521 ton desirable carry-out. This amount is 115 percent of prior years' sales and exceeds the 110 percent goal of the Guidelines.

The high level of production and carryin were key market factors leading to the 6.1048 percent final free percentage. Hazelnut production in 2001 is estimated to be an all-time record, 1,000 tons higher than the previous record set in 1997. Even if carryin had been zero, the amount that handlers typically ship into the domestic inshell market (*i.e.*, average trade acquisitions of 3,473 tons) equals about 8 percent of the supply (44,588 tons subject to regulation). However, the

VOL
67
ISS
50
MR
14
2002
UMI

free tonnage carryin level of 1,272 tons was also high (37 percent of the quantity of inshell hazelnuts that handlers typically ship), meaning that even less of the new production was needed to fully supply the 2001–2002 domestic inshell market. Although the domestic inshell market is a relatively small proportion of total sales (13 percent of total shipments), it remains a profitable market segment. The volume control provisions of the marketing order are designed to avoid oversupplying this particular market segment, because that would likely lead to substantially lower grower prices. The other market segments, inshell exports and kernels, are expected to continue to provide good outlets for US hazelnut production.

Since low production years typically follow high production years (a consistent pattern for hazelnuts), lower production is expected in 2002, and burdensome carryin levels will likely be significantly reduced.

Recent production and price data reflect the stabilizing effect of the volume control regulations. Industry statistics show that total hazelnut production has varied widely over the ten year period between 1991 and 2000, from a low of 16,500 tons (inshell) in 1998 to a high of 47,000 tons in 1997. Production in the shortest crop year and the biggest crop year were 55 percent and 157 percent, respectively, of the 10-year average tonnage of 29,880. The coefficient of variation (a standard statistical measure of variability; "CV") for hazelnut production over the ten-year period is 0.35. In contrast, the coefficient of variation for hazelnut grower prices is 0.16, less than half the CV for production. The considerably lower variability of prices versus production provides an illustration of the order's price-stabilizing impacts.

Comparing grower revenue to cost is useful in highlighting the impact on growers of recent product and price levels. A recent hazelnut cost of production study from Oregon State University estimated cost of production per acre to be approximately $1,340 for a typical 100-acre hazelnut enterprise. Average hazelnut grower revenue per bearing acre (based on NASS acreage and value of production data) equaled or exceeded that typical cost level twice between 1995 and 2000. Average grower revenue was below typical costs in the other years. Without the stabilizing impact of the order, growers may have lost more money. The volume regulations contribute to orderly marketing and market stability, and help moderate the variation in returns for all producers and handlers, both large and small.

While the level of benefits of this rulemaking is difficult to quantify, the stabilizing effects of the volume regulations impact both small and large handlers positively by helping them maintain and expand markets even though hazelnut supplies fluctuate widely from season to season. This regulation provides equitable allotment of the most profitable market, the domestic inshell hazelnut market. That market is available to all handlers, regardless of size.

As an alternative to this regulation, the Board discussed not regulating the 2001–2002 hazelnut crop. However, without any regulations in effect, the Board believes that the industry would oversupply the inshell domestic market. Section 982.40 of the order establishes a procedure and computations for the Board to follow in recommending to USDA release of preliminary, interim final, and final quantities of hazelnuts to be released to the free and restricted markets each marketing year. The program results in plentiful supplies for consumers and for market expansion while retaining the mechanism for dealing with oversupply situations.

Hazelnuts produced under the order comprise virtually all of the hazelnuts produced in the U.S. This production represents, on average, less than 5 percent of total U.S. production for other tree nuts, and less than 5 percent of the world's hazelnut production.

Last season, 82 percent of the kernels were marketed in the domestic market and 18 percent were exported. Domestically produced kernels generally command a higher price in the domestic market than imported kernels. The industry is continuing its efforts to develop and expand other markets with emphasis on the domestic kernel market. Small business entities, both producers and handlers, benefit from the expansion efforts resulting from this program.

Inshell hazelnuts produced under the order compete well in export markets because of quality. Europe has historically been the primary export market for U.S. produced inshell hazelnuts, with a ten-year average of 5,452 tons out of total average exports of 10,236 tons. Recent years have seen a significant shift in export destinations. Last season, inshell shipments to Europe totaled 3,986 tons, representing 28 percent of exports, with the largest share going to Germany. Inshell shipments to Southwest Pacific countries, and Hong Kong in particular, have increased dramatically in the past few years, rising to 58 percent of total exports of 14,400 tons in 2000. The industry continues to pursue export opportunities.

There are some reporting, recordkeeping, and other compliance requirements under the order. The reporting and recordkeeping burdens are necessary for compliance purposes and for developing statistical data for maintenance of the program. The information collection requirements have been previously approved by the Office of Management and Budget under OMB No. 0581–0178. The forms require information which is readily available from handler records and which can be provided without data processing equipment or trained statistical staff. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies. This rule does not change those requirements. In addition, USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule.

Further, the Board's meetings were widely publicized throughout the hazelnut industry and all interested persons were invited to attend the meetings and participate in Board deliberations. Like all Board meetings, those held on August 31, and November 15, 2001, were public meetings and all entities, both large and small, were able to express their views on this issue. Finally, interested persons are invited to submit information on the regulatory and informational impacts of this action on small businesses.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: *http://www.ams.usda.gov/fv/moab.html*. Any questions about the compliance guide should be sent to Jay Guerber at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

This rule invites comments on the establishment of interim final and final free and restricted percentages for the 2001–2002 marketing year under the hazelnut marketing order. Any comments received will be considered prior to finalization of this rule.

After consideration of all relevant material presented, including the Board's recommendation, and other information, it is found that this interim final rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined upon good cause that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice prior to putting this rule into effect and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because: (1) The 2001–2002 marketing year began July 1, 2001, and the percentages established herein apply to all merchantable hazelnuts handled from the beginning of the crop year; (2) handlers are aware of this rule, which was recommended at an open Board meeting, and need no additional time to comply with this rule; and (3) interested persons are provided a 60-day comment period in which to respond, and all comments timely received will be considered prior to finalization of this action.

List of Subjects in 7 CFR Part 982

Filberts, Hazelnuts, Marketing agreements, Nuts, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 982 is amended as follows:

PART 982—HAZELNUTS GROWN IN OREGON AND WASHINGTON

1. The authority citation for 7 CFR Part 982 continues to read as follows:

Authority: 7 U.S.C. 601–674.

2. Section 982.249 is added to read as follows:

Note: This section will not be published in the annual Code of Federal Regulations.

§ 982.24 Free and restricted percentages—2001–2002 marketing year.

(a) The interim final free and restricted percentages for merchantable hazelnuts for the 2001–2002 marketing year shall be 4.9363 and 95.0637 percent, respectively.

(b) On May 31, 2002, the final free and restricted percentages for merchantable hazelnuts for the 2001–2002 marketing year shall be 6.1048 and 93.8952 percent, respectively.

Dated: March 11, 2002.

[No. LS–01–05]

Beef Promotion and Research; Reapportionment

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule adjusts representation on the Cattlemen's Beef Promotion and Research Board (Board), established under the Beef Promotion and Research Act (Act) of 1985, to reflect changes in cattle inventories and cattle and beef imports that have occurred since the most recent Board reapportionment rule became effective in 1999. These adjustments are required by the Beef Promotion and Research Order (Order) and will result in a decrease in Board membership from 110 to 108, effective with the Department of Agriculture's (USDA) appointments for terms beginning early in the year 2003.

EFFECTIVE DATE: April 15, 2002.

FOR FURTHER INFORMATION CONTACT: Marlene M. Betts, Acting Chief, Marketing Programs Branch, Room 2627–S; Livestock and Seed Program; Agricultural Marketing Service (AMS), USDA; STOP 0251; 1400 Independence Avenue, SW.; Washington, DC 20250–0251. Telephone number is 202/720–1115.

SUPPLEMENTARY INFORMATION:

Executive Orders 12866 and 12988, the Regulatory Flexibility Act, and the Paperwork Reduction Act

The Office of Management and Budget (OMB) has waived the review process required by Executive Order 12866 for this action.

This final rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is not intended to have retroactive effect. Section 11 of the Act provides that nothing in the Act may be construed to preempt or supersede any other program relating to beef promotion organized and operated under the laws of the United States or any State. There are no administrative proceedings that must be exhausted prior to any judicial challenge to the provisions of this rule.

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA) (5 United States Code (U.S.C.) 601 *et seq.*). The Administrator of AMS has considered the economic effect of this action on small entities and has determined that this final rule will not have a significant economic impact on a substantial number of small entities. The purpose of RFA is to fit regulatory actions to the scale of businesses subject to such actions in order that small businesses will not be unduly burdened.

In the January 26, 2001, issue of "Cattle," USDA's National Agricultural Statistics Service (NASS) estimates that in 2000 the number of cattle operations in the United States totaled about 1.1 million. The majority of these operations subject to the Order, 7 CFR 1260.101 *et seq.*, are considered small businesses under the criteria established by the Small Business Administration.

This final rule imposes no new burden on the industry. It only adjusts representation on the Board to reflect changes in domestic cattle inventory and cattle and beef imports. This action will adjust representation on the Board, established under the Act. The adjustments are required by the Order and will result in a decrease in Board membership from 110 to 108.

Background and Final Action

The Board was initially appointed August 4, 1986, pursuant to the provisions of the Act (7 U.S.C. 2901 *et seq.*) and the Order issued thereunder. Domestic representation on the Board is based on cattle inventory numbers, and importer representation is based on the conversion of the volume of imported cattle, beef, or beef products into live animal equivalencies.

Section 1260.141(b) of the Order provides that the Board shall be composed of cattle producers and importers appointed by USDA from nominations submitted by certified producer organizations. A producer may only be nominated to represent the unit in which that producer is a resident.

Section 1260.141(c) of the Order provides that at least every 3 years and not more than every 2 years, the Board shall review the geographic distribution of cattle inventories throughout the United States and the volume of imported cattle, beef, and beef products and, if warranted, shall reapportion units and/or modify the number of Board members from units in order to reflect the geographic distribution of cattle production volume in the United States and the volume of cattle, beef, or beef products imported into the United States.

Section 1260.141(d) of the Order authorizes the Board to recommend to USDA modifications in the number of cattle per unit necessary for representation on the Board.

Section 1260.141(e)(1) provides that each geographic unit or State that

VOL
67
ISS
50
MR
14
2002
UMI

includes a total cattle inventory equal to or greater than 500,000 head of cattle shall be entitled to one representative on the Board. Section 1260.141(e)(2) provides that States that do not have total cattle inventories equal to or greater than 500,000 head shall be grouped, to the extent practicable, into geographically-contiguous units, each of which have a combined total inventory of not less than 500,000 head. Such grouped units are entitled to at least one representative on the Board. Each unit that has an additional one million head of cattle within a unit qualifies for additional representation on the Board as provided in § 1260.141(e)(4). As provided in § 1260.141(e)(3), importers are represented by a single unit, with the number of Board members based on a conversion of the total volume of imported cattle, beef, or beef products into live animal equivalencies.

The initial Board appointed in 1986 was composed of 113 members. Reapportionment based on a 3-year average of cattle inventory numbers and import data, reduced the Board to 111 members in 1990 and 107 members in 1993 before the Board was increased to 111 members in 1996. The Board was decreased to 110 members in 1999 and will be decreased to 108 members with appointments for terms effective early in 2003.

The current Board representation by States or units has been based on an average of the January 1, 1996, 1997, and 1998 inventory of cattle in the various States as reported by NASS of USDA. Current importer representation has been based on a combined total average of the ~~1995~~, 1996, and 1997 live cattle imports as published by the Foreign Agricultural Service of USDA and the average of the 1995, 1996, and 1997 live animal equivalents for imported beef products.

Recommendations concerning Board reapportionment were approved by the Board at its August 9, 2001, meeting. In considering reapportionment, the Board reviewed cattle inventories as well as cattle, beef, and beef product import data for the period January 1, 1998, to January 1, 2001. The Board recommended that a 3-year average of cattle inventories and import numbers should be continued. The Board determined that an average of the January 1, 1999, 2000, and 2001 USDA cattle inventory numbers will best reflect the number of cattle in each State or unit since publication of the 1999 reapportionment rule.

The Board reviewed the February 28, 2001, USDA's Economic Research Service circular, "Livestock, Dairy and Poultry Situation and Outlook," to determine proper importer representation. The Board recommended the use of a combined total of the average of the 1998, 1999, and 2000 cattle import data and the average of the 1998, 1999, and 2000 live animal equivalents for imported beef products. The method used to calculate the total number of live cattle equivalents was the same as that used in the previous reapportionment of the Board. The recommendation for importer representation is based on the most recent 3-year average of data available to the Board at its August 9, 2001, meeting to be consistent with the procedures used for domestic representation.

On October 19, 2001, AMS published in the **Federal Register** (66 FR 53124) for public comment a proposed rule providing for the adjustment in Board membership. The proposed rule was published with a request for comments to be submitted to USDA by December 18, 2001.

USDA received one comment concerning the proposed rule for Board reapportionment. The comment was from a cattle producer and supported the reapportionment plan.

Thus, the reapportionment of the Board in this final rule is unchanged from the proposed rule. This final rule decreases the number of representatives on the Board from 110 to 108. Five States—Alabama, Illinois, Kentucky, New York, and Wisconsin—lose one member each; two States and one unit—New Mexico, Wyoming, and Importer unit—gain one member each. In addition, because South Carolina no longer has sufficient cattle inventory to qualify for a position on the board independently, South Carolina will be merged with Georgia, a contiguous State that has only one member, to form a Southeast unit. The combined cattle inventory of South Carolina and Georgia will entitle the Southeast unit to two members on the Board, thus enabling both States to be represented. The States and units affected by the reapportionment plan and the current and revised member representation per unit are as follows:

States	Current Representation	Revised Representation
1. Alabama	2	1
2. Illinois	2	1
3. Kentucky	3	2
4. New Mexico	1	2
5. New York	2	1
6. Wisconsin	4	3
7. Wyoming	1	2
8. Importer unit	7	8
9. Southeast unit		2
South Carolina	1	
Georgia	1	

Board representation for the entire 40 units is shown in the revised § 1260.141(a) contained herein.

The 2001 nomination and appointment process was in progress while the Board was developing its recommendations. Thus, the Board reapportionment as provided for under the rulemaking will be effective with 2002 nominations and appointments that will be effective early in the year 2003.

This action makes final the provisions of the proposed rule published at 66 FR 53124 on October 19, 2001.

List of Subjects in 7 CFR Part 1260

Administrative practice and procedure, Advertising, Agricultural research, Imports, Marketing agreement, Meat and meat products, Reporting and recordkeeping requirements.

For reasons set forth in the preamble, 7 CFR part 1260 is amended as follows:

PART 1260—BEEF PROMOTION AND RESEARCH

1. The authority citation for 7 CFR part 1260 continues to read as follows:

Authority: 7 U.S.C. 2901 *et seq.*

2. In § 1260.141, paragraph (a) and the table immediately following it, are revised to read as follows:

§ 1260.141 Membership of Board.

(a) Beginning with the 2002 Board nominations and the associated appointments effective early in the year 2003, the United States shall be divided into 39 geographical units and 1 unit representing importers, and the number of Board members from each unit shall be as follows:

CATTLE AND CALVES [1]

State/unit	(1,000 head)	Directors

Food Safety and Inspection Service

9 CFR Parts 317, 319, and 381

[Docket No.01–016N]

Use of Transglutaminase Enzyme and Pork Collagen as Binders in Certain Meat and Poultry Products

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Affirmation of effective date for direct final rule.

SUMMARY: On October 31, 2001, the Food Safety and Inspection Service (FSIS) published a direct final rule "Use of Transglutaminase Enzyme and Pork Collagen as Binders in Certain Meat and Poultry Products" in the **Federal Register**. This direct final rule notified the public of FSIS's intention to amend the Federal meat and poultry products inspection regulations to permit the use of one or both of these substances, in limited amounts, as binders in certain standardized meat and poultry products. This direct final rule also announced the Agency's intention to prescribe labeling requirements when tranglutaminase enzyme (TG enzyme) is used to fabricate or reform cuts of meat or poultry. FSIS received one comment in response to the direct final rule. However, the comment was not an adverse comment or notice of intent to submit an adverse comment. Therefore, FSIS is affirming the December 31, 2001, effective date for this direct final rule.

EFFECTIVE DATE: December 31, 2001.

FOR FURTHER INFORMATION CONTACT: Robert C. Post, Ph.D., Director, Labeling and Consumer Protection Staff, Office of Policy, Program Development and Evaluation, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250–3700; (202) 205–0279

SUPPLEMENTARY INFORMATION:

Background

On October 31, 2001, FSIS published a direct final rule "Use of Transglutaminase Enzyme and Pork Collagen as Binders in Certain Meat and Poultry Products" (66 FR 54912). This direct final amended the Federal meat inspection regulations to permit the use of pork collagen and TG enzyme, in limited amounts, as binders in certain standardized meat food products and amended the poultry products inspection regulations to permit the use of TG enzyme, in limited amounts, in certain standardized poultry products. This direct final rule also amended the meat and poultry products inspection regulations to require that, when TG enzyme is used to fabricate or reform cuts of meat or poultry, the resulting product bear labeling to indicate that it has been formed from pieces of whole muscle meat, or that it has been reformed from a single cut. This direct final was in response to petitions submitted to the Agency by Ajinomoto, U.S.A., Inc. and AMPC, Corp.

On December 3, 2001, FSIS received a comment from Hogan & Hartson, L.L.P. on behalf of Ajinomoto USA, Inc., in response to the rulemaking. The commenter, also one of the petitioners, requested that FSIS provide clarification on the scope of the direct final rule. Specifically, Ajinomoto requested that FSIS clarify that the Agency intended to allow the use of TG enzyme in cured pork products under 9 CFR 319.104 when it published the direct final rule. The commenter noted that in its petition it had specifically requested that the standard of identity for cured pork products under 9 CFR 319.104 be amended to provide for the use of TG enzyme as a binder and provided data in support of this request. The commenter also expressed full support for the rule and stated that the comment was not intended to be an adverse comment but rather a clarification on the scope of the final rule.

When it began development of the direct final rule, FSIS had determined that, based on the data submitted by Ajinomoto, TG enzyme was suitable for use as a binder in sausages as provided under part 319 of title 9. While the rule was under development, Ajinomoto submitted additional data to support the use of TG enzyme in other standardized products, including cured pork products under 9 CFR 319.140. Upon review of the additional data, FSIS determined that, in addition to sausages as provided under part 319, TG enzyme was suitable for use in restructured meats (9 CFR 319.15(d)), roast beef parboiled and steam roasted (9 CFR 319.104) cooked sausages (9 CFR 319.180) and poultry rolls (9 CFR 381.159), and incorporated these findings into the direct final rule. However, when it incorporated these products in the direct final rule, the Agency was still reviewing the data submitted on the use of TG enzyme in cured pork products defined under 9 CFR 319.104. Thus, the direct final rule does not provide for the use of TG enzyme in these products. FSIS ultimately determined that TG enzyme is suitable for use as a binder in cured pork products under 9 CFR 319.104. In response to the commenter's request to clarify the scope of the direct final rule,

VOL

2002
UMI

the rule, as published, is not intended to provide for the use of TG enzyme in cured pork products under 9 CFR 319.104. However, because FSIS ultimately found that TG enzyme is suitable for use as a binder in these standardized products, the Agency intends to publish another direct final rule to permit such a use.

Because FSIS did not receive any adverse comments or notice of intent to submit adverse comments in response to the direct final rule, the effective date remains as December 31, 2001.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, in an effort to better ensure that minorities, women, and persons with disabilities are aware of this notice, FSIS will announce the meeting and provide copies of this **Federal Register** publication in the FSIS Constituent Update. FSIS provides a weekly FSIS Constituent Update, which is communicated via fax to over 300 organizations and individuals. In addition, the update is available on-line through the FSIS web page located at *http://www.fsis.usda.gov*. The update is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, recalls, and any other types of information that could affect or would be of interest to our constituents/stakeholders. The constituent fax list consists of industry, trade, and farm groups, consumer interest groups, allied health professionals, scientific professionals, and other individuals that have requested to be included. Through these various channels, FSIS is able to provide information to a much broader, more diverse audience. For more information and to be added to the constituent fax list, fax your request to the Congressional and Public Affairs Office, at (202) 720–5704.

Done at Washington, DC, on: March 11, 2002.

Margaret O'K Glavin,

Acting Administrator.

BILLING CODE 3410–OM–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 95

[Docket No. 30299; Amdt. No. 434]

IFR Altitudes; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts miscellaneous amendments to the required IFR (instrument flight rules) altitudes and changeover points for certain Federal airways, jet routes, or direct routes for which a minimum or maximum en route authorized IFR altitude is prescribed. This regulatory action is needed because of changes occurring in the National Airspace System. These changes are designed to provide for the safe and efficient use of the navigable airspace under instrument conditions in the affected areas.

EFFECTIVE DATE: 0901 UTC, April 18, 2002.

FOR FURTHER INFORMATION CONTACT: Donald P. Pate, Flight Procedure Standards Branch (AMCAFS–420), Flight Technologies and Programs Division, Flight Standards Service, Federal Aviation Administration, Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 (Mail Address: P.O. Box 25082, Oklahoma City, OK 73125) telephone: (405) 954–4164.

SUPPLEMENTARY INFORMATION: This amendment to part 95 of the Federal Aviation Regulations (14 CFR part 95) amends, suspends, or revokes IFR altitudes governing the operation of all aircraft in flight over a specified route or any portion of that route, as well as the changeover points (COPs) for Federal airways, jet routes, or direct routes as prescribed in part 95.

The Rule

The specified IFR altitudes, when used in conjunction with the prescribed changeover points for those routes, ensure navigation aid coverage that is adequate for safe flight operations and free of frequency interference. The reasons and circumstances that create the need for this amendment involve matters of flight safety and operational efficiency in the National Airspace System, are related to published aeronautical charts that are essential to the user, and provide for the safe and efficient use of the navigable airspace. In addition, those various reasons or circumstances require making this amendment effective before the next scheduled charting and publication date of the flight information to assure its timely availability to the user. The effective date of this amendment reflects those considerations. In view of the close and immediate relationship between these regulatory changes and safety in air commerce, I find that notice and public procedure before adopting this amendment are impracticable and contrary to the public interest and that good cause exists for making the amendment effective in less than 30 days.

Conclusion

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Airspace, Navigation (air).

Issued in Washington, D.C. on March 8, 2002.

James J. Ballough,

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, part 95 of the Federal Aviation Regulations (14 CFR part 95) is amended as follows effective at 0901 UTC, April 18, 2002.

PART 95—[AMENDED]

1. The authority citation for part 95 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44719, 44721.

2. Part 95 is amended to read as follows:

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 61 and 63

[FRL–7153–2]

Approval of the Clean Air Act Section 111 and 112 Delegation of Authority Updates to the Washington State Department of Ecology, Benton Clean Air Authority, Northwest Air Pollution Authority, Puget Sound Clean Air Agency, and Spokane County Air Pollution Control Authority

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: Environmental Protection Agency, Region 10 (EPA) is providing public notice of actions which are already final. EPA updated delegation of authority for National Emission Standards for Hazardous Air Pollutants (NESHAP) to the Washington State Department of Ecology (Ecology), Benton Clean Air Authority (BCAA), Northwest Air Pollution Authority (NWAPA), Puget Sound Clean Air Agency (PSCAA), and Spokane County Air Pollution Control Authority (SCAPCA). EPA also delegated of authority for the Consolidated Air Rule (CAR) to Ecology, BCAA, and SCAPCA.

EPA is publishing informational tables in the regulations for NESHAPs and NESHAP source categories that show which subparts these agencies now have authority to implement and enforce. EPA is also publishing revisions to the names and addresses of Region 10 air agencies.

DATES: This rule is effective April 15, 2002.

ADDRESSES: Copies of information supporting this action are available for inspection during normal business hours at the following location: EPA, Office of Air Quality (OAQ–107), 1200 Sixth Avenue, Seattle, Washington 98101.

FOR FURTHER INFORMATION CONTACT: Tracy Oliver, Office of Air Quality (OAQ–107), EPA, Seattle, Washington, (206) 553–1172.

I. Background and Purpose

h. What is the NESHAP program?

Hazardous air pollutants are defined in the Clean Air Act (Act) as pollutants that threaten human health through inhalation or other type of exposure. These pollutants are commonly referred to as "air toxics" and are listed in Section 112(b)(1) of the Act.

National Emission Standards for Hazardous Air Pollutants (NESHAPs) control emissions of hazardous air pollutants from specific source categories and implement the requirements of Section 112 of the Act. These standards are found in 40 CFR parts 61 and 63.

Section 112(l) of the Act enables EPA to approve state and local air toxics programs or rules such that these agencies can accept delegation of authority for implementing and enforcing the NESHAPs. Typically, a state or local agency requests delegation based on federal rules adopted unchanged into state or local rules.

Pursuant to the authority of Section 112(l) of the Act, EPA previously delegated authority to Ecology, BCAA, NWAPA, PSCAA, and SCAPCA through a formal rule-making process. At the time of delegation, EPA also approved streamlined procedures for requesting and approving delegation of new or updated NESHAPs.

The streamlined process for updating delegation is as follows: (1) The requesting agency sends a letter to EPA asking for delegation of new and/or revised NESHAPS that have been adopted unchanged into their regulations; (2) EPA sends a letter of response granting this delegation request (or explaining why it cannot be granted); (3) the agency does not need to send a response back to EPA; (4) if EPA does not receive a negative response from the requesting agency within 10 days of the signature date of EPA's letter, then the updated delegation becomes final 10 days after the date of EPA's letter.

i. What is the Consolidated Air Rule (CAR)?

The Consolidated Federal Air Rule (CAR) is a pilot rulemaking originating from President Clinton's March 16, 1995 initiative to reinvent environmental regulations. This rule consolidates major portions of the following New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAP) applicable to storage vessels, process vents, transfer operations, and equipment leaks within the Synthetic Organic Chemical Manufacturing Industry (SOCMI): 40 CFR part 60, subparts A, Ka, Kb, VV, DDD, III, NNN, and RRR; 40 CFR part 61, subparts A, V, Y, and BB; and 40 CFR part 63, subparts A, F, G, and H.

The CAR gathers together applicable Federal SOCMI rules to form one

VOL
67
ISS
50
MR
14
2002
UMI

integrated set of rules. It is an optional compliance alternative for SOCMI sources; sources may choose to comply with the consolidated rule or simply continue to comply with existing applicable rules. The intent of this consolidation is to improve understandability, reduce burden, clarify requirements, and improve implementation and compliance.

The CAR is not a new rule per se, but a repackaging of existing rules. It requires a separate delegation because it consists of new subparts in a new part of the CFR. Because it consolidates and streamlines existing rules—which may already be delegated—EPA can delegate the CAR with no additional burden other than notification. Consequently, EPA approved Ecology, BCAA, and SCAPCA's CAR delegation requests using the same streamlined approval procedures described above.

j. What is the purpose of delegating authority for NESHAPs and the CAR?

One of the goals of the Clean Air Act is to place state and local governments in positions of leadership for air pollution prevention and control. Consistent with the Act, the NESHAP program and the CAR allow EPA to transfer primary implementation and enforcement responsibility to state and local agencies, provided they request delegation and demonstrate adequate resources, procedures, and authority. As with all delegations, EPA retains authority under Section 113 of the Act to implement and enforce any federal air quality standard if needed, including NESHAPs and the CAR.

d. What is the background on delegation to these agencies?

In the past, EPA delegated authority to implement and enforce certain NESHAPs to Ecology, BCAA, NWAPA, PSCAA, and SCAPCA through formal rule-making. (For Ecology, BCAA, and SCAPCA *see* 66 FR 35115 and 66 FR 48221; for NWAPA and PSCAA *see* 63 FR 66054, 63 FR 7793, 64 FR 19719, 65 FR 10391, and 66 FR 14320) These delegations were based on EPA's determination that they have adequate resources and authority to carry-out this responsibility in a manner comparable to EPA.

Recently, all these agencies requested updated delegation of NESHAPs and some requested delegation of the CAR based on implementation of state or local rules that adopt new or more current federal rules by reference. EPA approved these requests because these agencies continue to meet the requirements for delegation.

e. How were these actions taken and why is this action being published?

The purpose of this notice is to notify the public of actions already taken by EPA to delegate new and more current NESHAP standards to Ecology, BCAA, NWAPA, PSCAA, SCAPCA and the CAR to Ecology, BCAA, and SCAPCA. These actions were taken by letter approval as follows:

Ecology—Letter from Ms. Barbara McAllister, Director, EPA, Region 10, Office of Air to Ms. Mary Burg, Program Manager, Air Quality Program, Ecology, signed February 8, 2002, effective February 18, 2002.

BCAA—Letter from Ms. Barbara McAllister, Director, EPA, Region 10, Office of Air to Dr. David Lauer, Executive Director, BCAA, signed February 8, 2002, effective February 18, 2002.

NWAPA—Letter from Ms. Barbara McAllister, Director, EPA, Region 10, Office of Air Quality to Mr. James Randies, Director, NWAPA, signed February 8, 2002, effective February 18, 2002.

PSCAA—Letter from Ms. Barbara McAllister, Director, EPA, Region 10, Office of Air to Mr. Dennis McLerran, Air Pollution Control Officer, PSCAA, signed February 8, 2002, effective February 18, 2002.

SCAPCA—Letter from Ms. Barbara McAllister, Director, EPA, Region 10, Office of Air to Mr. Eric P. Skelton, Director, SCAPCA, signed February 8, 2002, effective February 18, 2002.

These delegations were effective ten days after the signature date. If an agency did not agree to the terms of their delegation, they could submit a written Notice of Objection within 10 days and EPA would withdraw the delegation. No agency submitted a Notice of Objection.

II. Implications

a. What specific subparts were delegated?

Ecology's updated delegation of authority covers standards promulgated and revised as of the dates specified in WAC–173–400–075, amended on August 15, 2001. These are as follows: 40 CFR part 61 and Appendices in affect on February 20, 2001, except Subparts B, H, I, K, Q, R, T, W and M as it applies to nonmajor sources; 40 CFR part 63 and Appendices in effect on February 20, 2001, except Subparts C, E, and M as it applies to nonmajor sources; 40 CFR part 63 subpart MM in effect on March 13, 2001; and 40 CFR part 65 in effect December 14, 2000. New or revised NESHAP and CAR subparts that become effective after the dates cited here are not delegated to Ecology; these remain the responsibility of EPA.

BCAA's updated delegation of authority covers standards promulgated and revised as of the dates specified in WAC–173–400–075, amended on August 15, 2001. These are as follows: 40 CFR part 61 and Appendices in effect on February 20, 2001, except Subparts B, H, I, K, Q, R, T, and W; 40 CFR part 63 and Appendices in effect on February 20, 2001, except Subparts C, E, S, LL and M as it applies to nonmajor sources; 40 CFR part 65 in effect December 14, 2000. New or revised NESHAP and CAR subparts that become effective after the dates cited here are not delegated to BCAA; these remain the responsibility of EPA.

NWAPA's updated delegation of authority covers standards promulgated and revised before July 1, 2000, except as specified in NWAPA's Regulation Section 104.2, amended on June 14, 2001. The delegation excludes: 40 CFR part 61, Subparts B, H, I, K, Q, R, T, and W; and 40 CFR part 63, Subparts LL and S as it applies to Kraft and Sulfite Pulping Mills. New or revised NESHAPs that become effective after July 1, 2001 are not delegated to NWAPA; these remain the responsibility of EPA.

PSCAA's updated delegation of authority covers standards promulgated and revised prior to July 1, 2001 as specified in PSCAA Regulation I, Section 6.11, amended on September 13, 2001. The delegation excludes: 40 CFR part 61, Subparts B, H, I, K, Q, R, T, and W; and 40 CFR part 63, Subparts LL and S as it applies to Kraft and Sulfite Pulping Mills. New or revised NESHAPs that become effective after July 1, 2001 are not delegated to PSCAA; these remain the responsibility of EPA.

SCAPCA's updated delegation of authority covers standards promulgated and revised as of the dates specified in WAC–173–400–075, amended on August 15, 2001. These are as follows: 40 CFR part 61 and Appendices in effect on February 20, 2001, except Subparts B, H, I, K, Q, R, T, and W; 40 CFR part 63 and Appendices in effect on February 20, 2001 except Subparts C, E, LL, M as it applies to nonmajor sources, and S as it applies to Kraft and Sulfite Pulping Mills; 40 CFR part 65 in effect December 14, 2000. New or revised NESHAP and CAR subparts that become effective after the dates cited here are not delegated to SCAPCA; these remain the responsibility of EPA.

b. What are the conditions of these delegations?

These delegations are subject to all federal law, policy, guidance and determinations pursuant to 40 CFR parts 61, 63, and 65. Some authorities cannot be delegated and are retained by EPA. These include: (1) certain authorities in the General Provisions of Parts 61 and 63; (2) specific provisions within some Part 61 and 63 subparts; and (3) for those agencies receiving delegation of the CAR, 40 CFR part 65, § 65.8 and § 65.46 of subpart C, and § 65.102 of subpart F.

In general, EPA does not delegate any authorities that require implementation through formal rulemaking or where Federal overview is the only way to ensure national consistency in the application of the standards or requirements of the Act. Examples of the types of authorities EPA retains are: equivalency determinations, approval of alternative test methods, decisions where federal oversight is needed to ensure national consistency, and decisions that require rulemaking to implement. The authorities listed in the table below are the specific General Provision authorities that cannot be delegated to any state or local agency and are retained by EPA

TABLE 1.—PART 61 AND 63 GENERAL PROVISIONS AUTHORITIES THAT CANNOT BE DELEGATED

Section	Authorities
61.04(b)	Waiver of Recordkeeping.
61.12(d)(1)	Approval of Alternative Means of Emission Limitation.
61.13(h)(1)(ii)	Approval of Major Alternatives to Test Methods.
61.14(g)(1)(ii)	Approval of Major Alternatives to Monitoring.
61.16	Availability of Information.
61.16	Availability of Information.
61.53(c)(4)	List of Approved Design, Maintenance, and Housekeeping Practices for Mercury Chloralki Plants.
63.6(g)	Approval of Alternative Non-Opacity Emission Standards.
63.6(h)(9)	Approval of Alternative Opacity Standard.
63.7(e)(2)(ii) and (f)	Approval of Major Alternative to Test Methods.
63.8(f)	Approval of Major Alternatives to Monitoring.
63.10(f)	Waiver of Recordkeeping—all.

The reader should refer to 40 CFR 63.90 as well as each agency's original delegation for more information about which General Provisions are delegated and which are reserved by EPA. For information about specific exclusions within a particular standard, the reader should refer to that specific subpart in 40 CFR parts 61, 63, and 65.

c. What does updated delegation mean for these agencies?

Ecology, BCAA, NWAPA, PSCAA, and SCAPCA are the primary implementation and enforcement authority for delegated standards. They are the recipient of notifications and reports and the point of contact for most questions and compliance issues. They work directly with owners and operators of affected facilities subject to delegated standards to ensure all required information is submitted to them. EPA ensures that this information is submitted to EPA upon request.

EPA requests that these agencies meet certain reporting requirements. For example, EPA requires submission of source data, compliance information, copies of determinations, copies of notifications pertaining to continuous opacity monitoring use, and copies of information about changes to test methods and monitoring. More detail about these requirements are provided in Ecology, BCAA, NWAPA, PSCAA, and SCAPCA's original delegations.

d. What does updated delegation mean for affected sources?

Sources who are subject to delegated NESHAPs or the CAR will send notifications and reports to their respective agency, except for notifications, reports, and requests that pertain to authorities that are not delegated. The later should be sent to EPA. (see above, "What are the conditions of these delegations?")

III. Summary

This document provides public notice of updates to NESHAP and CAR delegations for Ecology, BCAA, NWAPA, PSCAA, and SCAPCA. These delegations are already final and were granted by letter approval from the Director, Office of Air Quality, EPA, Region 10, to the air program directors at Ecology, BCAA, NWAPA, PSCAA, and SCAPCA. These delegations are subject to all Federal law, policy, guidance and determinations issued pursuant to 40 CFR parts 61, 63, and 65. Copies of delegation letters can be obtained by contacting EPA at the address above.

IV. Administrative Requirements

a. Executive Orders 12866 and 13045

The Office of Management and Budget (OMB) has exempted this regulatory action from review under Executive Order 12866, entitled "Regulatory Planning and Review."

This rule is not subject to Executive Order 13045, entitled, "Protection of Children from Environmental Health Risks and Safety Risks," because it is not an "economically significant" action under Executive Order 12866.

b. Executive Order 13132

Federalism (64 FR 43255, August 10, 1999) revokes and replaces Executive Orders 12612 (Federalism) and 12875 (Enhancing the Intergovernmental Partnership). Executive Order 13132 requires EPA to develop an accountable process to ensure "meaningful and timely input by state and local officials in the development of regulatory policies that have federalism implications." "Policies that have federalism implications" is defined in the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government." Under Executive Order 13132, EPA may not issue a regulation that has federalism implications, that imposes substantial direct compliance costs, and that is not required by statute, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by state and local governments, or EPA consults with state and local officials early in the process of developing the proposed regulation. The EPA also may not issue a regulation that has federalism implications and that preempts state law unless the Agency consults with state and local

VOL
67
ISS
50
MR
14
2002
UMI

officials early in the process of developing the proposed regulation.

This rule does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, because it merely approves a state program and rules implementing a Federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the CAA. Thus, Executive Order 13132 does not apply to this rule.

Although Section 6 of the Executive Order does not apply to this rule, EPA did consult with representatives of state government in developing this rule, and this rule is in response to the State's delegation request.

c. Executive Order 13084

Under Executive Order 13084, EPA may not issue a regulation that is not required by statute, that significantly or uniquely affects the communities of Indian tribal governments, and that imposes substantial direct compliance costs on those communities, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by the tribal governments. If the mandate is unfunded, EPA must provide to the Office of Management and Budget, in a separately identified section of the preamble to the rule, a description of the extent of EPA's prior consultation with representatives of affected tribal governments, a summary of the nature of their concerns, and a statement supporting the need to issue the regulation. In addition, Executive Order 13084 requires EPA to develop an effective process permitting elected and other representatives of Indian tribal governments "to provide meaningful and timely input in the development of regulatory policies on matters that significantly or uniquely affect their communities."

This rule does not significantly or uniquely affect the communities of Indian tribal governments. This action does not involve or impose any requirements that affect Indian Tribes. Accordingly, the requirements of Section 3(b) of Executive Order 13084 do not apply to this rule.

d. Regulatory Flexibility Act

Under the Regulatory Flexibility Act (RFA), 5 U.S.C. 600 *et seq.*, EPA must prepare a regulatory flexibility analysis assessing the impact of any rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and small government entities with jurisdiction over populations of less than 50,000.

Delegation of authority to implement and enforce unchanged federal standards under Section 112(l) of the CAA does not create any new requirements but simply transfers primary implementation authorities to the state (or local) agency. Therefore, because this action does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected.

e. Unfunded Mandates

Under Section 202 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must prepare a budgetary impact statement to accompany any proposed or final rule that includes a Federal mandate that may result in estimated annual costs to state, local, or tribal governments in the aggregate, or to private sector, of $100 million or more. Under Section 205, EPA must select the most cost-effective and least burdensome alternative that achieves the objectives of the rule and is consistent with statutory requirements. Section 203 requires EPA to establish a plan for informing and advising any small governments that may be significantly or uniquely impacted by the rule.

EPA has determined that the delegation action promulgated does not include a Federal mandate that may result in estimated annual costs of $100 million or more to either state, local, or tribal governments in the aggregate, or to the private sector. This Federal action approves pre-existing requirements under state or local law, and imposes no new Federal requirements. Accordingly, no additional costs to state, local, or tribal governments, or to the private sector, result from this action.

f. Submission to Congress and the Comptroller General

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This rule is not a "major" rule as defined by 5 U.S.C. 804(2).

g. Petitions for Judicial Review

Under Section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 13, 2002. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (*see* Section 307(b)(2)).

List of Subjects

40 CFR Part 61

Environmental protection, Air pollution control, Arsenic, Asbestos, Benzene, Beryllium, Hazardous substances, Mercury, Radionuclides, Radon, Reporting and recordkeeping requirements, Uranium, Vinyl chloride.

40 CFR Part 63

Administrative practice and procedure, Air pollution control, Hazardous substances, Intergovernmental relations, Reporting and recordkeeping requirements.

Dated: February 20, 2002.

Ron Kreizenbeck,

Acting Regional Administrator, Region 10.

For the reasons stated in the preamble, the Environmental Protection Agency amends 40 CFR parts 61 and 63 as follows:

PART 61—[AMENDED]

1. The authority citation for Part 61 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart A—General Provisions

2. Section 61.04 is amended by adding paragraph (b)(N); revising paragraphs (b)(C); (b)(MM) introductory text, (b)(MM)(i) through (vii); (b)(WW) and (c)(10) to read as follows:

§ 61.04 Addresses.

* * * * *

(b) * * *

(C) State of Alaska. (i) Alaska Department of Environmental Conservation (ADEC), 410 Willoughby Avenue, Suite 303, Juneau, AK 99801–1795, *http://www.state.ak.us/local/akpages/ENV.CONSERV/home.htm.*

(ii) See paragraph (c)(10) of this section for a table indicating the delegation status of National Emission Standards for Hazardous Air Pollutants for Region 10—Alaska, Idaho, Oregon, and Washington.

* * * * *

(N) State of Idaho. (i) Idaho Department of Environmental Conservation (IDEQ), 1410 N. Hilton, Boise, ID 83706, *http://www2.state.id.us/deq/.*

(ii) See paragraph (c)(10) of this section for a table indicating the delegation status of National Emission Standards for Hazardous Air Pollutants for Region 10—Alaska, Idaho, Oregon, and Washington.

* * * * *

* * * * *

(c) * * *

(10) The following table lists the delegation status of specific Part 61 Subparts that have been delegated unchanged to state and local air pollution control agencies in Region 10. An "X" indicates the subpart has been delegated, subject to all the conditions and limitations set forth in federal law, regulations, policy, guidance, and determinations. Some authorities cannot be delegated and are retained by EPA. These include certain General Provisions authorities and specific parts of some standards. The dates noted at the end of this table indicate the effective dates of federal rules that have been delegated. Any amendments made to these rules after this effective date are not delegated.

VOL 67 ISS 50 MR 14 2002 UMI

DELEGATION STATUS FOR PART 61 STANDARDS—REGION 10 [1]

40 CFR Part 61, Subparts [2]	ADEC [3]	IDEQ [4]	ODEQ [5]	LRAPA [6]	Ecology [7]	BCAA [8]	NWAPA [9]	OAPCA [10]	PSCAA [11]	SCAPCA [12]	SWAPCA [13]	YRCAA [14]

FF Benzene Waste Operations	X				X							

[1] Table last updated on April 15, 2002.

[2] Any authority within any Subpart of this Part that is identified as not delegatable, is not delegated.

[3] Alaska Department of Environmental Conservation (01/18/1997). Note: Alaska received delegation for §61.145 and §61.154 of Subpart M (Asbestos), along with other sections and appendices which are referenced in §61.145, as §61.145 applies to sources required to obtain an operating permit under Alaska's regulations. Alaska has not received delegation for Subpart M for sources not required to obtain an operating permit under Alaska's regulations.

[4] Idaho Department of Environmental Quality (07/01/2000). Note: Delegation of these 40 CFR Part 61, Subparts applies only to those sources in Idaho required to obtain an operating permit under Title V of the Clean Air Act.

[5] Oregon Department of Environmental Quality.

[6] Lane Regional Air Pollution Authority.

[7] Washington Department of Ecology (02/20/2001). Note: Delegation of 40 CFR Part 63, Subpart M applies only to sources required to obtain an operating permit under Title V of the Clean Air Act, including Hanford. (Pursuant to RCW 70.105.240, only Ecology can enforce regulations at Hanford).

[8] Benton Clean Air Authority (02/20/2001). Note: Delegation of 40 CFR Part 63, Subpart M excludes Hanford, see footnote 7.

[9] Northwest Air Pollution Authority (07/01/2000).

[10] Olympic Air Pollution Control Authority (07/01/2000). Note: Delegation of 40 CFR Part 63, Subpart M applies only to sources required to obtain an operating permit under Title V of the Clean Air Act.

[11] Puget Sound Clean Air Agency (07/01/2001).

[12] Spokane County Air Pollution Control Authority (02/20/2001).

[13] Southwest Air Pollution Control Authority (08/01/1998).

[14] Yakima Regional Clean Air Authority (07/01/2000).

[15] General Provisions Authorities which are not delegated include approval of major alternatives to monitoring, and any sections in the subparts pertaining to approval of alternative standards (*i.e.*, alternative means of emission limitations). For definitions of minor, intermediate, and major alternatives to test methods and monitoring, see 40 CFR 63.90.

PART 63—[AMENDED]

1. The authority citation for Part 63 continues to read as follows:

Authority: 42 U.S.C. 7401 *et. seq.*

Subpart E—Approval of State Programs and Delegation of Federal Authorities

2. Section 63.99 is amended by revising (a)(47)(i) to read as follows:

§ 63.99 Delegated Federal authorities.

(a) * * *

(47) Washington. (i) The following table lists the delegation status of specific part 63 Subparts that have been delegated to state and local air pollution control agencies in Washington. An "X" indicates the subpart has been delegated, subject to all the conditions and limitations set forth in Federal law, regulations, policy, guidance, and determinations. Some authorities cannot be delegated and are retained by EPA. These include certain General Provisions authorities and specific parts of some standards. The dates noted at the end of this table indicate the effective dates of Federal rules that have been delegated. Any amendments made to these rules after this effective date are not delegated.

[1] Table last updated on April 15, 2002. See 40 CFR 61.04(b)(WW) for agency addresses.
[2] Any authority within any subpart of this part that is identified as not delegatable, is not delegated.
[3] Washington State Department of Ecology (03/13/2001 for MM, 02/20/2001 for all others). Note: delegation of subpart M applies only to those sources required to obtain an operating permit under Title V of the Clean Air Act.
[4] Benton Clean Air Agency (02/20/2001). Note: delegation of subpart M applies only to those sources required to obtain an operating permit under Title V of the Clean Air Act.
[5] Northwest Air Pollution Control Agency (07/01/2000). Note: delegation of subpart S applies to all applicable facilities and processes except Kraft and Sulfite Pulping Mills (see footnote 12).
[6] Olympic Air Pollution Control Agency (07/01/2000). Note: delegation of subpart M applies only to those sources required to obtain an operating permit under Title V of the Clean Air Act; delegation of subpart S applies to all applicable facilities and processes except Kraft and Sulfite Pulping Mills (see footnote 12).
[7] Puget Sound Clean Air Agency (07/01/2001). Note: delegation of subpart S applies to all applicable facilities and processes exept Kraft and Sulfite Pulping Mills (see footnote 12). For information about delegation of subpart M, see paragraph (a)(47)(ii) of this section.
[8] Spokane County Air Pollution Control Agency (02/20/2001). Note: delegation of subpart M applies only to those sources required to obtain an operating permit under Title V of the Clean Air Act; delegation of subpart S applies to all applicable facilities and processes except Kraft and Sulfite Pulping Mills (see footnote 12).
[9] Southwest Clean Air Agency (08/01/1998). Note: delegation of subpart S applies to all applicable facilities and processes except Kraft and Sulfite Pulping Mills (see footnote 12).
[10] Yakima Regional Clean Air Authority (07/01/2000). Note: delegation of subpart M applies only to those sources required to obtain an operating permit under Title V of the Clean Air Act; delegation of subpart S applies to all applicable facilities and processes except Kraft and Sulfite Pulping Mills (see footnote 12).
[11] General Provisions Authorities which are not delegated include approval of major alternatives to test methods, approval of major alternatives to monitoring, and any sections in the subparts pertaining to approval of alternative standards (i.e., alternative means of emission limitations). For definitions of minor, intermediate, and major alternatives to test methods and monitoring, see § 63.90.
[12] Subpart S of this part as it pertains to Kraft and Sulfite Pulping Mills cannot be delegated to any local agencies in Washington. The Washington State Department of Ecology retains sole authority to regulate Kraft and Sulfite Pulping Mills, pursuant to Washington State Administrative Code 173–405–012 and 173–410–012.
[13] Subpart LL of this part cannot be delegated to any local agencies in Washington because the Washington State Department of Ecology retains sole authority to regulate Primary Aluminum Plants, pursuant to Washington Administrative Code 173–415–010.
[14] Subpart MM of this part cannot be delegated to any local agencies in Washington because the Washington State Department of Ecology retains sole authority to regulate Kraft and Sulfite Pulping Mills, pursuant to Washington State Administrative Code 173–405–012 and 173–410–012.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 300

[FRL–7156–5]

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of deletion for the White Bridge Road property of the Asbestos Dump Superfund site from the National Priorities List; correction.

SUMMARY: The Environmental Protection Agency (EPA) published a document in the **Federal Register** of February 8, 2002 (67 FR 5955), announcing the deletion of the White Bridge Road property of the Asbestos Dump Superfund site from the National Priorities List. The document contained an error regarding a reference to a table of appendix B of 40 CFR part 300. This document corrects the reference to "Table 2" to read "Table 1".

DATES: Effective on March 14, 2002.

FOR FURTHER INFORMATION CONTACT: Kim O'Connell, (212) 637–4399; e-mail: *oconnell.kim@epa.gov*.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of February 8, 2002, in FR Doc. 02–3098, under the "PART 300—[AMENDED]" caption, make the following correction:

PART 300—[CORRECTED]

Appendix B—[Corrected]

On page 5955, in the second column, correct amendatory instruction 2 to read as follows:

2. Table 1 of appendix B to part 300 is amended by adding a "P" in the Notes column in the entry for Asbestos Dump, Millington, New Jersey.

Dated: February 25, 2002.
William J. Muszynski,
Deputy Regional Administrator, Region II.

GENERAL SERVICES ADMINISTRATION

41 CFR Parts 101–3 and 102–84

[FPMR Amendment D–98]

RIN 3090–AG55

Annual Real Property Inventories

AGENCY: Office of Governmentwide Policy, GSA.

ACTION: Final rule.

SUMMARY: The General Services Administration (GSA) is adopting as final without change an interim rule which revised the Federal Property Management Regulations (FPMR) by moving coverage on the annual real property inventories into the Federal Management Regulation (FMR). A cross-reference was added to the FPMR to direct readers to the coverage in the FMR: The FMR coverage was written in plain language to provide agencies with updated regulatory material that is easy to read and understand.

DATES: This final rule becomes effective March 14, 2002.

FOR FURTHER INFORMATION CONTACT: Stanley C. Langfeld, Director, Real Property Policy Division, 202–501–1737.

SUPPLEMENTARY INFORMATION:

A. Background

In furtherance of its leadership role in real property asset management, the Office of Governmentwide Policy, Office of Real Property, conducted a comprehensive review of the policies contained in Federal Property Management Regulations (FPMR) Part 101–3 (41 CFR part 101–3), entitled "Annual Real Property Inventories." This review was based on a collaborative effort with Federal real property holding agencies that utilize the Worldwide Inventory of Federal Real Property.

Representatives from the Department of the Interior, the Department of Energy, and the Army Corps of Engineers participated with GSA in conducting the initial steps of the comprehensive review of the policies in FPMR part 101–3 (41 CFR part 101–3). The review focused on improvements to make the real property inventory program more useful and to enable Federal agencies to more effectively manage their real property inventories. In addition, we have rewritten these regulations in plain language format. These regulations are being transferred from the FPMR to the FMR to enable the Government to better focus on implementing statutory requirements, Executive Orders, and governmentwide policies rather than on detailed operating procedures.

An interim rule was published in the **Federal Register** on November 2, 2001 (66 FR 55593). No comments were received in response to the interim rule.

B. Executive Order 12866

GSA has determined that this final rule is not a significant regulatory action for the purposes of Executive Order 12866 of September 30, 1993.

C. Regulatory Flexibility Act

This final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601–612 because it applies solely to matters concerning agency management and personnel.

D. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because this final rule does not impose recordkeeping or information collection requirements, or the collection of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget (OMB) under 44 U.S.C. 3501, *et seq.*

E. Small Business Regulatory Enforcement Fairness Act

This final rule is exempt from Congressional review prescribed under 5 U.S.C. 801 since it relates solely to agency management and personnel.

List of Subjects in 41 CFR Parts 101–3 and 102–84

Federal buildings and facilities, Government property management.

Interim Rule Adopted as Final Without Change

For the reasons set forth in the preamble and under the authority of 40 U.S.C. 486(c), the interim rule revising 41 CFR part 101–3 and adding 41 CFR part 102–84 which was published in the **Federal Register** at 66 FR 55593 on November 2, 2001, is adopted as a final rule without change.

Dated: February 28, 2002.
Stephen A. Perry,
Administrator of General Services.

BILLING CODE 6820–23–U

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 22

[WT Docket No. 01–32; FCC 02–09]

Implementation of Competitive Bidding Rules to License Certain Rural Service Areas

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Federal Communications Commission ("the Commission"), pursuant to the Balanced Budget Act of 1997, takes action to grant initial licenses for certain areas of the country for cellular service by allowing all eligible parties to apply for initial licenses, licensing markets based on rural service areas (RSAs) under part 22 of its rules, and using its part 1 competitive bidding rules to auction these licenses.

DATES: Effective April 15, 2002.

FOR FURTHER INFORMATION CONTACT: Katherine M. Harris at (202) 418–0609 (Wireless Telecommunications Bureau).

SUPPLEMENTARY INFORMATION: This is a summary of the Report and Order ("R&O") in WT Docket No. 01–32, FCC 02–9, adopted January 16, 2002 and released January 28, 2002. The complete text is available for inspection and copying during normal business hours in the FCC Reference Center, 445 12th Street, SW, Washington, DC and also may be purchased from the Commission's copy contractor, Qualex International, 445 12th Street, SW, Room CY–B402, Washington, DC 20554. The document is also available via the Internet at *http://www.fcc.gov/Bureaus/Wireless/Orders/2001/fcc02-9.pdf*.

Paperwork Reduction Act

1. The R&O contains no proposed information collection.

Synopsis of the Report and Order

2. In the *Notice of Proposed Rule Making* in this proceeding (*NPRM*), 66 FR 14104 (March 9, 2001), the Commission proposed rules for awarding licenses for four cellular Rural Service Areas (RSAs) that remain unlicensed because the initial lottery winner was disqualified or has otherwise withdrawn its application.

3. There are currently four cellular RSA markets that remain unlicensed because the initial lottery winner was disqualified. These markets are: 332A—Polk, AR; 582A—Barnes, ND; 672A—Chambers, TX ; and 727A—Ceiba, PR. Three additional markets (370A—Monroe, FL; 492A—Goodhue, MN; and 615A—Bradford, PA) were the subject of recent Congressional action in which the Commission was directed to reinstate the original lottery winner in each of the three markets to tentative selectee status and proceed with processing the selectee's application for authority to operate. *See* District of Columbia Appropriations Act of FY 2001, Public Law 106–553, Title X, 1007, 114 Stat. 2762, Launching Our Communities' Access to Local Television Act of 2000 (2000) (D.C. Appropriations Act of FY 2001); *Public Notice*, Wireless Telecommunications Bureau Grants Rural Cellular Licenses, 16 FCC Rcd 5601 (2001) (not published in the **Federal Register**), recon. denied, In the Matter of Applications of Great Western Cellular Partners, L.L.C., Monroe Telephone Services, L.L.C., and Futurewave Partners, L.L.C., *Memorandum Opinion and Order*, DA 01–2443 (CWD rel. Oct. 19, 2001) (application for review pending). Under

the Balanced Budget Act of 1997 (1997 Budget Act), the Commission is now required, with certain exceptions not applicable here, to resolve mutually exclusive applications for initial licenses by competitive bidding. *See* Balanced Budget Act of 1997, Public Law 105–33, 3002(a), 111 Stat. 251, 258–60 (1997); 1997 Budget Act, Section 3002(a)(1)(A), *codified* at 47 U.S.C. 309(j)(1), (2); 1997 Budget Act, Section 3002(a)(2)(B), *codified* at 47 U.S.C. 309(i)(5). Based on the record compiled in this proceeding the Commission has decided to implement the proposals put forth in the *NPRM*, namely, to: (1) Allow all eligible parties to apply for these initial licenses; (2) license these markets on an RSA basis under our part 22 rules; and (3) use our part 1 competitive bidding rules to auction these licenses.

Background

4. The Commission has been awarding cellular licenses since 1982. Under the original cellular licensing rules, one of the two cellular channel blocks in each market (the B block) was awarded to a local wireline carrier, while the other block (the A block) was awarded competitively to a carrier other than a local wireline incumbent. After awarding the first thirty Metropolitan Statistical Area (MSA) licenses pursuant to comparative hearing rules, the Commission adopted rules in a 1984 *Report and Order*, 49 FR 23628 (June 7, 1984), and a 1986 *First Report and Order*, 51 FR 26895 (July 28, 1986), to award the remaining cellular MSA and RSA licenses through lotteries. On January 31, 2001, the Commission adopted a *Notice of Proposed Rulemaking*, 66 FR 14101 (March 9, 2001), acknowledging that in four RSA markets no initial licensee had been granted.

5. In the Omnibus Budget Reconciliation Act of 1993 (1993 Budget Act), Congress added Section 309(j) to the Communications Act, authorizing the Commission to resolve mutually exclusive applications for use of the electromagnetic spectrum by auction. Omnibus Budget Reconciliation Act of 1993, Public Law 103–66, Title VI, 6002(a), 107 Stat. 312, 387–92 (1993). In addition, Section 6002(e) of the 1993 Budget Act provided that: "[t]he Federal Communications Commission shall not issue any license or permit [by lottery] after the date of enactment of this Act unless . . . one or more applications for such license were accepted for filing by the Commission before July 26, 1993." This provision left to the Commission's discretion whether to use auctions or lotteries for applications filed before July 26, 1993. Beginning in 1994, the Commission, in a *Memorandum Opinion and Order*, 59 FR 37163 (July 21, 1994), exercised its discretion and used lotteries, rather than auctions, to resolve already-pending mutually exclusive applications for cellular unserved areas filed prior to July 26, 1993.

6. On August 5, 1997, the 1997 Budget Act was signed into law, modifying the Commission's auction authority by amending Section 309(j) of the Communications Act to require that all mutually exclusive applications for initial licenses or construction permits be auctioned, with certain exceptions not applicable here. 1997 Budget Act, Public Law 105–33, 3002(a), 111 Stat. 251, 258–60 (1997) (amending 47 U.S.C. 309(j)). The 1997 Budget Act expressly repealed Section 6002(e) of the 1993 Budget Act, *id.* at 3002(a)(4), and terminated the Commission's authority to award licenses through random selection, even in the case of applications filed prior to July 26, 1993, except for licenses for noncommercial educational and public broadcast stations, *id.* at 3002(a)(2)(B). The Commission had found in the *Competitive Bidding Second Report and Order* that mutually exclusive applications for initial licenses to provide cellular service were auctionable under the auction authority provided by the 1993 Budget Act. Implementation of Section 309(j) of the Communications Act—Competitive Bidding, *Second Report and Order*, 59 FR 22980 (May 4, 1994), (*Competitive Bidding Second Report and Order*). Because the 1997 Budget Act terminated the Commission's remaining lottery authority, the Bureau dismissed all pending RSA lottery applications. *See* In the Matter of Certain Cellular Rural Service Area Applications, *Order*, 14 FCC Rcd 4619 (WTB 1999) (not published in the **Federal Register**) (dismissing applications in RSAs 332A (Polk, AR), 370A (Monroe, FL), 492A (Goodhue, MN), 582A (Barnes, ND), 615A (Bradford, PA), and 727A (Ceiba, PR)); In the Matter of Certain Cellular Rural Service Area Applications in Market Nos. 599A and 672A, *Order*, DA 99–814 (CWD rel. Apr. 29, 1999) (dismissing applications in RSAs 599A (Nowata, OK) and 672A (Chambers, TX)); In the Matter of Certain Rural Service Area Applications in Market Nos. 599A and 672A, *Order on Reconsideration*, DA 99–1426 (CWD rel. July 21, 1999) (reinstating applications of tentative selectees in those markets—Zephyr Tele-Link in RSA 599A and Alee in RSA 672A); In the Matter of Zephyr Tele-Link Application for a Construction Permit to Establish a Cellular System Operating on Frequency Block A in the Domestic Public Cellular Radio Telecommunications Service To Serve the Oklahoma 4-Nowata Rural Service Area, Market No. 599A, *Order* 15 RCC Rcd 4247 (CWD 2000) (granting application of Zephyr Tele-Link); In the Matter of Application of Alee Cellular Communications for Authorization to Construct Nonwireline Cellular System in Texas RSA 21 Market 672, *Memorandum Opinion and Order*, 15 FCC Rcd 2831(2000) (not published in the **Federal Register**) (recon. pending) (dismissing application of Alee) (*Alee Cellular*). Several of the applicants sought reconsideration of the Bureau's dismissal of the RSA applicants, and the Bureau declined to reconsider its actions. In the Matter of Certain Cellular Rural Service Area Applications, *Order*, 16 FCC Rcd 4619 (WTB 2001) (not published in the **Federal Register**) (affirming dismissals) (*March 2, 2001 Order*). Ranger Cellular and Miller Communications, Inc. have sought further reconsideration of the Bureau's dismissal of the applications, and High Tower Communications, Inc. has sought Commission review of the Bureau's action. Consolidated Petition for Reconsideration of Ranger Cellular and Miller Communications, Inc. (filed Mar. 30, 2001); Application for Review of High Tower Communications, Inc. (filed Apr. 2, 2001).

7. In the first dismissal order cited above, the Bureau also dismissed as moot CCPR's Petition requesting that we award licenses for the remaining RSA markets through competitive bidding. CCPR's Petition specifically requested that market 727A—Ceibo, Puerto Rico, be awarded through competitive bidding rather than through a second lottery. However, the CCPR Petition raised certain issues concerning the broader applicability of the use of competitive bidding for all markets where an initial lottery was held and the winner was disqualified. The Commission therefore treated the CCPR Petition as a petition for rulemaking and requested comment on awarding cellular licenses through competitive bidding for all remaining unlicensed RSAs. Although the Commission dismissed CCPR's Petition as moot because we are required by the 1997 Budget Act to award licenses through competitive bidding, we have considered, and are incorporating into the record of this proceeding, all comments and reply comments submitted in response to the CCPR Petition.

8. The four markets for which no initial license has been granted are: 332A—Polk, AR; 582A—Barnes, ND; 727A—Ceiba, PR; and 672A—Chambers, TX. These four markets are the subject of this *Report and Order*.

A. Need for and Objectives of the Report and Order

9. Congress enacted the Balanced Budget Act of 1997, which requires the Commission to resolve mutually exclusive applications for initial licenses through competitive bidding instead of random selection, with certain exceptions not applicable here. Accordingly, the Commission initiated this rulemaking in order to adopt rules for the granting of initial cellular RSA authorizations by means of competitive bidding. The Commission's objective in this rulemaking proceeding is to establish, for cellular RSA markets for which a tentative selectee has been disqualified, the applicable competitive bidding and licensing rules. Such rules are necessary in order to determine the classes of eligible entities as well as determine what policies, if any, should be adopted to promote participation by small business entities, consistent with the Commission's statutory obligation under Section 309 of the Communications Act of 1934, as amended, 47 U.S.C. 309.

B. Summary of Significant Issues Raised by Public Comments in Response to the IRFA

10. No comments were submitted specifically in response to the IRFA. Some of the comments responding to the proposals contained in the *NPRM*, however, discussed issues that could affect small businesses. Two of the three commenters that addressed eligibility for the four cellular RSA licenses at issue generally supported permitting all eligible entities to apply for the licenses. *See Report and Order* at ¶¶ 8–21. The third commenter opposed such open eligibility (which would encompass small businesses), instead arguing that only entities that had filed lottery applications for these licenses in 1988 and 1989 *and* had appealed the dismissal of their lottery applications should be permitted to apply for these licenses (which would mean only three entities would be potentially eligible). *See Report and Order* at ¶¶ 8–21.

11. One commenter supported the proposals contained in the *NPRM* to provide bidding credits to small businesses to encourage them to bid on and win the cellular RSA licenses. *See Report and Order* at ¶¶ 27–33. Another commenter opposed adoption of such bidding credits on the basis that such credits would unfairly and uneconomically skew the auction in favor of smaller entities. *See Report and Order* at ¶¶ 27–33.

12. Regarding eligibility for the four cellular RSA licenses, the Commission determined in the *Report and Order*, that any entity otherwise qualified under the rules would be permitted to apply for any of the four RSA licenses. *See Report and Order* at ¶¶ 8–21. As explained in greater detail in the *Report and Order* and in Section E *infra*, the Commission concluded that permitting broad-based eligibility would best further the public interest as well as facilitate participation by small businesses.

13. Regarding the adoption of bidding credits for certain categories of small businesses, the Commission concluded that including such bidding credits as part of the cellular RSA application and bidding process would help to promote opportunities for small businesses. *See Report and Order* at ¶¶ 27–33. As explained in greater detail in the *Report and Order* and Section E *infra*, implementation of bidding credits facilitates the ability of small businesses to compete against larger entities and promotes economic opportunities for those small businesses.

C. Description and Estimate of the Number of Small Entities To Which the Rules Will Apply

14. The RFA directs agencies to provide a description of, and where feasible, an estimate of the number of small entities that may be affected by the proposed rules, if adopted. *See* 5 U.S.C. 603(b)(3). The RFA defines the term "small entity" as having the same meaning as the terms "small business," "small organization," and "small governmental jurisidiction." *Id.* 601(6). The term "small business" has the same meaning as the term "small business concern" under section 3 of the Small Business Act. *Id.* 601(3) (incorporating by reference the definition of "small business concern" in 15 U.S.C. 632). Pursuant to the RFA, the statutory definition of a small business applies "unless an agency, after consultation with the Office of Advocacy of the Small Business Administration and after opportunity for public comment, establishes one or more definitions of such term which are appropriate to the activities of the agency and publishes such definition(s) in the **Federal Register**." 5 U.S.C. 601(3). A small business concern is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA at 15 U.S.C. 632.

15. A small organization is generally "any not-for-profit enterprise which is independently owned and operated and is not dominant in its field." 5 U.S.C. 601(4). Nationwide, as of 1992, there were approximately 275,801 small organizations. 1992 Economic Census, U.S. Bureau of the Census, Table 6 (special tabulation of data under contract to Office of Advocacy of the U.S. Small Business Administration). "Small governmental jurisdiction" generally means "governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than 50,000." 5 U.S.C. 601(5). As of 1992, there were approximately 85,006 such jurisdictions in the United States. 1992 Census of Governments, U.S. Bureau of the Census, U.S. Department of Commerce. This number includes 38,978 counties, cities, and towns; of these, 37,566, or 96 percent, have populations of fewer than 50,000. The Census Bureau estimates that this ratio is approximately accurate for all governmental entities. Thus, of the 85,006 governmental entities, the Commission estimate that 81,600 (91 percent) are small entities. According to SBA reporting data, there were 4.44 million small business firms nationwide in 1992.

16. According to recent telecommunications industry revenue data, 808 carriers reported that they were engaged in the provision of either cellular service or Personal Communications Services (PCS), which are placed together in that data. Trends in Telephone Service, Table 19.3 (March 2000). This data does not indicate how many of these 808 carriers fall within each of the revenue tiers defined by the Commission for the purpose of receiving bidding credits as some form of small business or entrepreneur. *See Report and Order* at ¶¶ 29–33. As described in the *Report and Order* and Section E *infra*, the Commission defined an "entrepreneur" as an entity with average annual gross revenues not exceeding $40 million for the preceding three years and provided a 15 percent bidding credit; a "small business" as an entity with average annual gross revenues not exceeding $15 million for the preceding three years and provided a 25 percent bidding credit; and a "very small business" as an entity with average annual gross revenues not exceeding $3 million for the preceding three years and provided a 35 percent bidding credit.

17. The Commission is required to estimate in this FRFA the number of small entities to which any new rules would apply, provide a description of such entities, and assess the impact of the rule on such entities. The rules adopted in the *Report and Order* will

VOL
67
ISS
50
MR
14
2002
UMI

apply to all entities that seek to obtain the subject licenses, including small entities. The number of entities that may apply to participate in these future auctions is unknown. Moreover, these entities might already be providers of cellular service or PCS or other wireless services, or they may have no current involvement in the wireless industry. To the extent that existing cellular or PCS operators would apply for the subject authorizations, the applicable NAICS code is 513322. Existing paging carriers, which might also be interested in these authorizations, fall under NAICS code 513321. Resellers of paging and cellular services are identified by NAICS code 51333.

18. The number of small businesses that have participated in prior auctions has varied. Small businesses, as defined under the Commission's rules in the context of various auctions for authorizations in specific services, have accounted for 1,667 out of a total of 2,096 qualified bidders in all prior auctions, not including broadcast auctions. As provided in Section 1.2110(c)(1) of the Commission's rules, and in conformity with the Small Business Act and the regulations of the Small Business Administration, the Commission establishes small business definitions for purposes of its auctions on a service-specific basis. *See* 47 CFR 1.2110(c)(1); 15 U.S.C. 632(c)(2)(c); 13 CFR 121.902(b). Statistics for broadcast license auctions are not available, and would be less relevant to the licenses at issue here. Given these statistics, the Commission expects a large percentage of participants in our auctions program generally to be small businesses in the future, although this may not be the case in this individual auction.

D. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements

19. The Commission imposes no new reporting, recordkeeping, or other compliance requirements in the *Report and Order*. The only projected reporting and recordkeeping requirements that will apply in any auctions for the four cellular RSA authorizations are those that are already established by Commission regulations. Nothing in this rulemaking changes those regulations. The Commission will accept new license applications and use our general Part 1 competitive bidding rules to conduct the auction. These rules require all applicants to electronically submit FCC Form 175 in order to participate in the auction and, at the conclusion of the auction, all high bidders to electronically submit FCC Form 601 to apply for a license. *See* 47 CFR 1.2105(a), 1.2107(a). The purposes of these forms are to ensure that applicants are eligible to participate in the auction and that high bidders are eligible to hold the cellular RSA licenses at issue. The Office of Management and Budget has already approved both of these forms. FCC Form 175, OMB Control No. 3060–0600 (effective until Apr. 30, 2004); FCC Form 601, OMB Control No. 3060–0798 (effective until Mar. 31, 2002). In addition, under our Part 1 rules, any entity wishing to receive a bidding credit for serving qualifying tribal lands must comply with 47 CFR 1.2110(f)(3), an obligation also approved by the Office of Management and Budget. *See* 47 CFR 1.2110(f)(3).

E. Steps Taken To Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered

20. The RFA requires an agency to describe any significant alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): (1) The establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities. 5 U.S.C. 603(c)(1)-(4).

21. In the *Report and Order*, the Commission adopts rules to permit us to grant initial licenses in four cellular RSAs. In adopting these rules, the Commission considered the potential significant economic impact of the rules on small entities. Specifically, the Commission considered the impact of its eligibility definition on the ability of small businesses even to apply for the licenses at issue in this proceeding and to participate in the associated auctions. The Commission also considered the effect of the proposed bidding credits for three categories of small businesses on the ability of small businesses to compete successfully in the auctions and to build out a system should such businesses be awarded any of the licenses. As described in the *Report and Order* and Section E *infra*, the Commission defined an "entrepreneur" as an entity with average annual gross revenues not exceeding $40 million for the preceding three years and provided a 15 percent bidding credit; a "small business" as an entity with average annual gross revenues not exceeding $15 million for the preceding three years and provided a 25 percent bidding credit; and a "very small business" as an entity with average annual gross revenues not exceeding $3 million for the preceding three years and provided a 35 percent bidding credit.

22. Also, in proposing to apply the Commission's existing Part 1 competitive bidding rules to any auctions for these licenses, the Commission took into account their effect on small businesses.

23. The rules adopted by the *Report and Order* will affect all small entities that seek to acquire any of the four cellular RSA licenses discussed herein. The Commission believes that permitting all eligible entities to apply for the four licenses—instead of restricting eligibility to three applicants that filed lottery applications in 1988 and 1989—will promote opportunities for participation by small businesses. A greater number of small businesses will have the chance to seek the authorizations at issue.

24. The Commission has sought to promote small business ownership by defining three tiers of small businesses for the purposes of providing bidding credits to small entities: an "entrepreneur" is an entity with average annual gross revenues not exceeding $40 million for the preceding three years; a "small business" is an entity with average annual gross revenues not exceeding $15 million for the preceding three years; and a "very small business" is an entity with average annual gross revenues not exceeding $3 million for the preceding three years. The Small Business Administration approved these proposed small business definitions on January 30, 2001. *See* Letter from Fred P. Hochberg, Acting Administrator, Small Business Administration, to Margaret W. Wiener, Chief, Auctions and Industry Analysis Division, Wireless Telecommunications Bureau, Federal Communications Commission, dated Jan. 30, 2001 (*SBA Letter*). *See also* Letter from Margaret W. Wiener, Chief, Auctions and Industry Analysis Division, Wireless Telecommunications Bureau, Federal Communications Commission, to Gary M. Jackson, Assistant Administrator, Small Business Administration, dated Sept. 21, 2001. The bidding credits are 15 percent for entrepreneurs, 25 percent for small businesses, and 35 percent for very small businesses. The Commission specifically rejected arguments in opposition to the use of bidding credits for small businesses. As explained in the *Report and Order*, adoption of bidding credits for small businesses provides them with an opportunity to compete successfully against larger, well-financed bidders. *Report and Order* at ¶ 32. The Commission believes the bidding credits it has adopted will benefit a range of small businesses.

25. The Commission will apply its Part 1 competitive bidding rules equally to all applicants for the licenses, including small businesses. Our Part 1 competitive bidding rules have been designed to ensure that small businesses are not placed at a disadvantage and have a full and fair opportunity to compete in fair auction proceedings. While these rules require small businesses to submit application forms in order to participate in the auctions for the subject licenses, the Commission believes that equitably applying the same rules to all entities helps to promote fairness in the process and to ensure that the auction is effective. Fair and effective auction proceedings benefit small businesses as well as all other participants.

I. Discussion

A. Eligibility for Licenses

26. *Background.* In the *NPRM*, the Commission proposed to allow all eligible entities to participate in an auction for the four cellular RSA licenses at issue in this proceeding. The Commission noted that the competitive bidding program seeks to award each license to the applicant that values it most highly and that is, therefore, most likely to offer valued service to the public. The Commission explained that excluding potential applicants that were not previously lottery applicants would be inconsistent with that goal. The Commission also recognized that, because nearly twelve years have passed since the closing of the original RSA filing window, a number of commenters that have expressed interest in participating in RSA auctions would not have had the opportunity to file applications, while some applicants that did file lottery applications may no longer exist. Finally, the Commission reasoned that, to the extent former lottery applicants continue to have an interest in applying for these markets, open eligibility allows them to do so.

27. In each of the four unlicensed RSAs, the Commission has granted interim operating authority to one or more cellular operators to provide cellular service on the Channel A block pending the ultimate permanent licensing of these RSAs. The Commission also specifically proposed to permit cellular operators that have been granted interim operating authority (IOA) in the four unlicensed RSAs to participate in the RSA auction. The Commission noted that although IOAs confer no interest or expectation of receiving a cellular license, IOA holders might have a substantial interest in bidding for permanent authorizations in markets where they may have been providing interim cellular service.

28. *Discussion.* After careful consideration, the Commission concludes that it is in the public interest to allow all entities, including current IOA holders and former lottery applicants, to participate in the RSA auction. In recent years, the Commission has generally favored open eligibility because the Commission believes that maximizing the pool of auction applicants helps to ensure that licenses are awarded to entities that value them most highly and are, therefore, most likely to offer prompt service to the public. *See, e.g., Competitive Bidding Second Report and Order*, 59 FR 22980 (May 4, 1994); Amendment of the Commission's Rules Regarding the 37.0–38.6 GHz and 38.6–40.0 GHz Bands, Implementation of Section 309(j) of the Communications Act—Competitive Bidding, 37.0–38.6 GHz and 38.6–40.0 GHz, *Report and Order and Second Notice of Proposed Rulemaking*, 12 FCC Rcd 18600, 18617–20, ¶¶ 30–35 (1997) (not published in the **Federal Register**); Implementation of Sections 309(j) and 337 of the Communications Act of 1934 as Amended, Promotion of Spectrum Efficient Technologies on Certain Part 90 Frequencies, Establishment of Public Service Radio Pool in the Private Mobile Frequencies Below 800 MHz, *Report and Order*, 15 FCC Rcd 22709, 22736–37, ¶¶ 54–56 (2000) (*BBA Report and Order*) (not published in the **Federal Register**). *But see, e.g., BBA Report and Order*, 15 FCC Rcd at 22737, ¶ 56 (not published in the **Federal Register**) (the Commission has authority to restrict eligibility in particular cases if such restrictions are consistent with our spectrum management responsibilities under Section 309(j)). The Commission has found that this approach to auction participation best fulfills the public interest objectives set forth in Section 309(j)(3) of the Communications Act. 47 U.S.C. 309(j)(3)(A)–(D). Further, the Commission does not believe that there are any compelling reasons to exclude potential participants in the upcoming RSA auction.

29. A number of commenters support open eligibility, particularly current IOA holders and entities that did not previously file lottery applications. With respect to eligibility, two of the four commenters that responded to the *Notice* support open eligibility. In addition, several commenters that responded to the CCPR Petition favored open eligibility. Cingular argues that permitting open eligibility will ensure that licenses are awarded to applicants that value them the most highly. Cingular specifically insists that the Commission allow IOA holders in the subject markets to apply for licenses. ALLTEL also supports the Commission's proposal to permit open eligibility. BANM asserts that open eligibility will expedite cellular service to the RSA markets. WWC urges the Commission to give all interested applicants an opportunity to provide cellular service in the RSAs. Century contends that the number of potential service providers has increased in the years since the closing of the original RSA filing window and that broadening auction participation would permit the best qualified and most highly motivated entities to compete.

30. Several commenters oppose open eligibility. Some of these commenters, such as Ranger and Miller, seek to restrict eligibility to former lottery applicants who continue to contest dismissal of their applications. One commenter responding to the *Notice* contends that the auction should be restricted to former lottery applicants. Commenters in response to the *CCPR Petition* also argue that the Commission should limit the auction to former lottery applicants. Other commenters argue that IOA holders should be barred from participating in the cellular RSA auction. These commenters generally contend that it is the Commission's policy, when it grants a party's application for IOA service, to dismiss that party's pending application for permanent authority for the subject market. AALA claims that an IOA holder would have an advantage over other applicants in an auction because it would have a "unique ability" to calculate the value of the license. In contrast, BANM and CCPR argue that the Commission's policy for excluding IOAs was implemented to avoid unfair advantage in the comparative hearing process and thus is not relevant when licenses are assigned by competitive bidding.

31. Several commenters cite to *Ashbacker Radio Corp. v. FCC*, 326 U.S. 327 (1945). See, e.g., AALA Comments at 14 (to allow one applicant to operate in a market under temporary authority poses a severe threat to the principles set forth in *Ashbacker*). We note that short-form applications to participate in competitive bidding are governed by Section 309(j), and not the procedural requirements of Sections 309(a), 309(b), or 309(e), or the *Ashbacker* doctrine, which requires a comparative hearing when competing applicants file conflicting license or construction

permit applications for the same authorization. See Elleron Oil Co. and WVI Partners, Inc. Petition for Reconsideration of Dismissal of Short-Form Applications for Interactive Video and Data Service Auction, *Order*, 13 FCC Rcd 17246, 17251–52, ¶ 9 (WTB 1998) (not published in the **Federal Register**). Section 309(j) does not require the Commission to use a notice and cut-off procedure or establish "cut-off dates" to invite mutually exclusive applications for a particular license. *See id.* at 17250, ¶ 8.

32. In determining eligibility for auction participation, the Commission is required by Section 309(j)(3) to promote certain public interest objectives. Those objectives include rapid deployment of new technologies and services to the public, promotion of economic opportunity and competition, recovery for the public of a portion of the value of the spectrum, and efficient and intensive use of the spectrum. 47 U.S.C. 309(j)(3)(A)–(D). The Commission believes that a policy of unrestricted eligibility in the RSA auction will best fulfill our public interest goals. Here, open eligibility has a higher probability of promoting the rapid delivery of services to the public than limited eligibility. This is because open eligibility increases the likelihood that all entities who have an interest in putting the license to use will participate in the auction. Among these, the bidder who is willing to pay the most will be highly motivated to rapidly put the license to a use that the public finds valuable because only such a use will make its investment worthwhile. Importantly, no commenter has presented evidence in this case that there are entities with market power whose participation might allow them to limit or reduce competition by their entry. In such a situation, permitting as many qualified bidders as possible allows competition and economic opportunity to flourish by reducing one barrier to market entry, potentially resulting in a more competitive applicant pool. In the absence of evidence of market failure, the market, and not regulation, should determine participation in competitive bidding here, and the Commission should allow the maximum number and types of bidders to participate in the auctions.

33. An important factor in our decision to permit open eligibility is that the licenses at issue in this proceeding will cover rural areas. Under Section 309(j)(4)(B), the Commission is required to encourage the rapid deployment of services specifically to rural areas. 47 U.S.C. 309(j)(4)(B). BANM also highlights the need for the provision of service in rural markets, stating that, "[w]hile many urban markets have enjoyed cellular service for as long as thirteen years, these rural service areas have remained without a permanent nonwireline cellular licensee." The Commission believes that open eligibility will encourage participation in the RSA auction by entities that are most likely to be interested in, and capable of, serving rural areas.

34. Our decision to permit open eligibility in the RSA auction includes the participation of current IOA holders in the four unlicensed RSAs. The Commission's policy to dismiss applications for permanent status filed by IOA holders originated in the context of comparative hearings, based on the concern that the decision to grant a license in a comparative hearing would be biased in favor of an IOA holder because it had incurred substantial expenses in its temporary operations. *See* In re Applications of La Star Cellular Telephone Co. and New Orleans CGSA, Inc, *Memorandum Opinion and Order*, 4 FCC Rcd 3777 (1989) (not published in the **Federal Register**), *aff'd*, 899 F.2d 1233 (D.C. Cir 1990). *See Community Broadcasting Co. v. FCC*, 274 F.2d 753 (D.C. Cir. 1960) (an interim operator's expenditure of sizeable funds on its temporary operation would inevitably influence the Commission's final decision, no matter how much the Commission tried to eliminate this factor). The Commission declines to extend that policy to the competitive bidding process. IOA holders will not have an advantage over other bidders as they once had over other applicants in comparative hearings because, in an auction, licenses are assigned to the highest bidder, regardless of prior operating status. *See* Implementation of Section 309(j) of the Communications Act—Competitive Bidding for Commercial Broadcast and Instructional Television Fixed Service Licenses, *Memorandum Opinion and Order*, 14 FCC Rcd 8724, 8737–39, ¶¶ 23–26 (1999) (not published in the **Federal Register**) (the Commission rejected arguments that holders of interim authority have a comparative advantage in an auction process). As the Commission stated in the *NPRM*, although IOAs confer no entitlement to, or expectation of, receiving a cellular license, IOA holders may have a substantial interest in bidding for permanent authorizations in markets where they have been providing interim cellular service. Given our previously adopted policies and the record in this proceeding, the Commission concludes that current IOA holders should not be excluded from participating in the auction of licenses for the unlicensed RSAs on an equal basis with other applicants.

35. Joint commenters Ranger and Miller raise a variety of statutory and equitable arguments against open eligibility, none of which the Commission find persuasive. First, Ranger and Miller argue that Section 309(l) of the Communications Act of 1934, as amended, restricts eligibility for cellular radio licenses to lottery applicants that filed their applications prior to July 1997 and whose applications allegedly are "unresolved." Section 309(l) provides in pertinent part that, with respect to competing applications for initial licenses for "commercial radio and television stations" that were filed with the Commission before July 1, 1997, the Commission shall treat the persons filing such applications as the only persons eligible to be qualified bidders. Public Law 105–33, 3002(a)(3), 111 Stat. 251, 260 (1997) (codified at 47 U.S.C. 309(l)). Ranger and Miller contend that the Commission's rules define cellular radio as a "commercial mobile radio service" and that, therefore, the reference to "commercial radio" in Section 309(l) includes cellular radio. Cingular disagrees with Ranger and Miller, asserting that the Commission should not view "commercial radio" and "television stations" as distinct, unrelated terms. Cingular maintains that the term "commercial" was intended to exclude *noncommercial educational radio and television* applications from the scope of Section 309(l) and from competitive bidding under Section 309(j)(2)(C).

36. The Commission agrees with Cingular's interpretation of the statutory language, which is plain on its face. The statute does not use "commercial radio" and "television stations" as distinct terms. Rather, the reference in the statute to "commercial radio and television stations" clearly refers to broadcast facilities. Where Congress has referred to wireless services like cellular in other provisions of the Communications Act of 1934, as amended, it has clearly used the term "commercial mobile services." *See, e.g.*, 47 U.S.C. 253(e), 274(i)(2)(B), 332(c)(1), 332(d)(1). As the Supreme Court has explained, "[w]here Congress includes particular language in one section of a statute but omits it in another section of the same Act, it is generally presumed that Congress acts intentionally and purposely in the disparate inclusion or exclusion." *Russello v. United States*, 464 U.S. 16, 23 (1983) (internal quotation marks omitted), citing *United States v. Wong Kim Bo*, 472 F.2d 720, 722 (5th Cir. 1972). The legislative history also confirms that Section 309(l) applies only to commercial broadcast radio and television applications. The Conference Report specifically states that "[n]ew section 309(l) of the Communications Act requires the Commission to use competitive bidding to resolve any mutually exclusive applications for *radio or television broadcast licenses* that were filed with the Commission prior to July 1, 1997." H.R. Conf. Rep. No. 217, 105th Cong., 1st Sess. at 573 (1997) (*Conference Report*) (emphasis added). The Commission has applied Section 309(l) only to pending comparative broadcast licensing cases. *See* Implementation of Section 309(j) of the Communications Act " Competitive Bidding for Commercial Broadcast and Instructional Television Fixed Service Licenses, *First Report and Order*, 63 FR 48615 (Sept. 30, 1998) (*Broadcast First Report and Order*); recon. denied, 14 FCC Rcd 8724 (1999) (not published in the **Federal Register**); modified, 14 FCC Rcd 12541 (1999) (not published in the **Federal Register**); *See* In the Matter of Amendment of Section 73.202(B), FM Table of Allotments, FM Broadcast Stations, *Memorandum Opinion and Order*, 16 FCC Rcd 2272 (2001) (not published in the **Federal Register**).

37. Contrary to the claim of Ranger and Miller, *Bachow Communications, Inc. v. FCC* does not support the notion that Section 309(l) applies to cellular RSA applications as well as broadcast license applications. *Bachow Communications, Inc. v. FCC*, 237 F.3d 683 (D.C. Cir. 2001) (*Bachow*). *Bachow's* central holding instead is that license applications for 39 GHz service filed under a comparative hearing licensing scheme could be dismissed when the Commission shifted to an auction licensing scheme. *Bachow*, 237 F.3d at 686–688 (recognizing the "Commission's authority to change license assignment allocation (*sic*) procedures midstream" even though it disrupts expectations and alters the competitive balance among applicants). Ranger and Miller also cite the D.C. Circuit's opinion in *McElroy* to support their argument that the Commission cannot make the RSA licenses available to new applicants. *McElroy Electronics Corp. v. FCC*, 86 F.3d 248 (D.C. Cir. 1996) (*McElroy*). *McElroy* holds that when the Commission decides to process timely-filed applications, it generally may not also process competing applications filed out of time. *McElroy*, 86 F.3d at 253–259. Because we will permit open eligibility for the subject licenses, and all applications to participate in the auction will be newly filed, the *McElroy* decision is inapposite.

38. Ranger and Miller also offer up a litany of equitable arguments that they contend support artificially limiting eligibility. They argue that the Commission should limit the RSA applicant pool because the number of unresolved lottery applicants is small, the applications have been pending for thirteen years, the service rules for RSA licenses have not changed, and the lottery applicants did not have notice when they filed their applications that competitive bidding, rather than lotteries, might be used to assigned licenses. In addition, Ranger and Miller oppose open eligibility on the grounds that the Commission did not refund their lottery application filing fees, and that open eligibility will lead to delay and litigation.

39. Ranger and Miller fail to show how the public interest would be served by limiting the RSA auction to only three former lottery applicants. In fact, it is well-established that, regardless of when an application is filed, an applicant has no vested right to a continuation of the licensing procedures in effect at the time its application was filed. *See, e.g., Bachow*, 237 F.3d at 687–688; Revision of Part 22 and Part 90 of the Commission's Rules To Facilitate Future Development of Paging Systems, *Memorandum Opinion and Order on Reconsideration and Third Report and Order*, 64 FR 33762 (June 24, 1999); *Broadcast First Report and Order*, 13 FCC Rcd at 15937, ¶ 44 (not published in the **Federal Register**); Rulemaking to Amend Parts 1, 2, 21, and 25 of the Commission's Rules to Redesignate the 27.5–29.5 GHz Frequency Band, *Third Order on Reconsideration*, 13 FCC Rcd 4856, 4941, ¶ 195 (1998) (not published in the **Federal Register**), citing *Chadmoore Communications, Inc. v. FCC*, 113 F.3d 235, 240–41 (D.C. Cir. 1997). Moreover, there is no logical nexus between the length of time the applications were pending and the rationale for restricting eligibility to bid in the RSA auction. Similarly, the claim that the lottery applicants did not have any notice of possible rule changes at the time they filed their applications provides no reasonable rationale for the proposed narrowing of eligibility. The Commission's action declining to refund application filing fees neither gives the applications continued "life" nor justifies restrictions on eligibility. Finally, the Commission necessarily is guided by the public interest objectives set forth in Section 309(j)(3)(A)–(D) in setting application eligibility and not by concerns over the prospects of litigation and appeals. 47 U.S.C. 309(j)(3)(A)–(D).

40. Ranger and Miller Comments at 9, 12–13. Ranger and Miller argue that the Commission should restrict eligibility because Miller helped the Commission determine that a cellular RSA licensee was unqualified to hold a RSA license. Ranger and Miller Comments at 10–12. We disagree. Any action by Miller that may have led the Commission to such a determination is irrelevant to our decision whether we should, as a general rule, adopt open eligibility with respect to the four cellular RSA markets. We are obligated to promote the public interest, not individual applicants.

41. Ranger and Miller totally disregard the equities of other parties potentially interested in seeking the subject authorizations, as well as equitable considerations relevant to the public interest. As the Commission found above, adopting open eligibility—the antithesis of the licensing plan promoted by Ranger and Miller—for these licenses has a greater probability than limited eligibility of resulting in the rapid deployment of new technologies and services to the public, the possibility of competition and economic opportunity, and the efficient and intensive use of the spectrum. Such a result would promote the public interest, and therefore, open eligibility is warranted. In addition, it is important to recognize that there may be parties interested in providing cellular service in these markets, and qualified to do so, that did not even exist at the time the lottery applications were filed.

42. Finally, Ranger and Miller argue that an open eligibility policy in this context must necessarily be based on the potential for increased revenue to the Treasury. Section 309(j)(7)(B) does not preclude the Commission from adopting eligibility rules based on other considerations, even though such rules may also result in increased federal revenues. The purpose of open eligibility is not to maximize the amount of revenues raised in an auction but to ensure that licenses are awarded to those that value them most highly and that, therefore, will be most likely to provide rapid and efficient service to the public. Indeed, by asserting that auction revenues will be greater if they are forced to compete with a larger number of bidders, Ranger and Miller may be suggesting that they value the RSA licenses less highly than their potential competitors. Our determination to permit open eligibility in the RSA auction is based on our statutory obligations to promote

2002
UMI

competition and rapid deployment of services to rural areas, not to enhance the Federal Treasury.

B. Market Areas To Be Auctioned

43. *Background.* In the *NPRM*, the Commission sought comment on whether the markets for which licenses are to be awarded through competitive bidding should be based on RSAs, or whether alternative licensing models should be considered. The Commission received two comments that supported licensing the markets on an RSA basis, and no party expressed opposition to that proposal.

44. *Discussion.* The Commission concludes that the remaining unlicensed cellular RSA markets should be licensed on an RSA basis under our Part 22 rules. As the Commission observed in the *NPRM*, the initial lotteries for the unlicensed markets were for RSAs as defined in 47 CFR 22.909 of our rules. To employ another market model for these RSAs would be potentially disruptive to adjacent cellular operations, as well as possibly impede the cost-effective buildout of facilities to serve the residents of these areas as well as transient users. The Commission also will, pursuant to 47 CFR 22.947, subject licenses awarded for these markets to the same construction and operational rules as licenses granted to prior RSA lottery winners, including the exclusive right of the auction winner to expand its system within that market for a period of five years. After the expiration of the five-year expansion period, any areas within the RSA that remained unserved would be available for licensing pursuant to 47 CFR 22.949 of our rules which governs unserved areas Phase I and Phase II filing procedures.

C. Competitive Bidding Procedures

1. Incorporation by Reference of Part 1 Standardized Auction Rules

45. *Background.* In the *Part 1 Third Report and Order*, the Commission streamlined its auction procedures by adopting general competitive bidding rules set forth in Part 1, Subpart Q, of the Commission's rules applicable to all auctionable services. Amendment of Part 1 of the Commission's Rules—Competitive Bidding Procedures; Allocation of Spectrum Below 5 GHz Transferred from Federal Government Use, *Third Report and Order and Second Further Notice of Proposed Rule Making*, 62 FR 13540 (March 21, 1997) (modified by Erratum, DA 98–419 (rel. March 2, 1998)) *(Part 1 Third Report and Order)*. The Commission clarified and amended these general competitive bidding procedures. Amendment of Part 1 of the Commission's Rules—Competitive Bidding Procedures, *Order on Reconsideration of the Third Report and Order, Fifth Report and Order, and Fourth Further Notice of Proposed Rule Making*, 65 FR 52323 (Aug. 29, 2000) (modified by Erratum, DA 00–2475, 65 FR 52401 (rel. Aug. 29, 2000)) *(Part 1 Order on Reconsideration)* (recons. pending). More recently, the Commission adopted modifications to Section 1.2105(c) of the Commission's rules, the competitive bidding "anti-collusion rule." Amendment of Part 1 of the Commission's Rules—Competitive Bidding Procedures, WT Docket No. 97–82, *Seventh Report and Order*, 66 FR 54447 (Oct. 29, 2001). *See also* 47 CFR 1.2101 *et seq.* In the *NPRM*, the Commission proposed to conduct the auction of cellular RSA licenses in conformity with the general competitive bidding rules, including any amendments adopted in the *Part 1 Order on Reconsideration, Fifth Report and Order, and Fourth FNPRM*, 65 FR 52323 (August 29, 2000) proceeding. Specifically, the Commission proposed to employ the Part 1 rules governing competitive bidding design, designated entities, application and payment procedures, reporting requirements, collusion issues, and unjust enrichment. The Commission further stated that winning bidders would be eligible to obtain a bidding credit for serving qualifying tribal lands. *See* 47 CFR 1.2110(f)(3). A tribal land bidding credit is in addition to, and separate from, any other bidding credit for which a winning bidder may qualify. Unlike other bidding credits that are requested prior to the auction, a winning bidder applies for the tribal land bidding credit after winning the auction when it files its long-form application. In this regard, we note that only one RSA subject to these proposals—RSA 582A-Barnes, ND—contains any federally recognized tribal lands. Finally, the *NPRM* contemplated that auction-related procedural matters such as the appropriate competitive bidding design for the RSA auction, as well as minimum opening bids and reserve prices, would be determined by the Bureau pursuant to its delegated authority prior to the start of the cellular RSA auction. *See* 47 CFR 0.131(c), 0.331, and 0.332; *see also* Amendment of Part 1 of the Commission's Rules—Competitive Bidding Procedures, *Order, Memorandum Opinion and Order, and Notice of Proposed Rule Making*, 62 FR 13540 (March 21, 1997).

46. *Discussion.* The Commission adopts the proposal to conduct the auction for initial licenses in the four cellular RSAs in conformity with the general competitive bidding rules set forth in Part 1, Subpart Q, of the Commission's rules. The Commission believes that this decision to conduct the RSA auction in conformity with the standardized Part 1 rules will increase the efficiency of the competitive bidding process and provide specific guidance to auction participants.

47. Although the Commission received few comments on this issue, none of the commenters opposed the application of the general competitive bidding rules. One commenter, Cingular, favors application of the general competitive bidding rules to the RSA auction. In its comments, Cingular also requests that the bidding design ultimately selected not include combinatorial bidding, (Combinatorial bidding design allows for bids on combinations or packages of licenses.) arguing that it is inappropriate where no "synergies" exist among the markets in question. As indicated in the *NPRM*, the Bureau will seek comment by Public Notice on auction-related procedural issues, including the appropriate competitive bidding design, prior to the start of the cellular RSA auction. This approach will provide the Bureau with an opportunity to weigh the benefits and disadvantages of combinatorial bidding design, among other auction-specific issues.

2. Small Business Definitions and Bidding Credits

48. *Background.* In the *NPRM*, the Commission proposed to adopt special provisions for small businesses that participate in the auction for cellular RSA licenses. The Commission noted that the markets at issue could attract a wide range of entities and the adoption of bidding credits will help us meet our Congressional mandate to promote competition and to disseminate licenses among a wide variety of applicants. Accordingly, the Commission proposed to define an entrepreneur as an entity with average annual gross revenues for the preceding three years not exceeding $40 million, a small business as an entity with average annual gross revenues for the preceding three years not exceeding $15 million, and a very small business as an entity with average annual gross revenues for the preceding three years not exceeding $3 million. The entrepreneur and small business definitions are consistent with the small business definitions we established for the broadband Personal Communications Services C and F blocks. We also proposed the definition of very small business for the RSA auction because smaller businesses may be interested in acquiring licenses to provide service in these markets. The Small Business Administration approved these proposed small business definitions on January 30, 2001. *See SBA Letter.* The Commission further proposed, as provided in Section 1.2110(f)(2) of our rules, to offer entrepreneurs a bidding credit of 15 percent, small businesses a bidding credit of 25 percent, and very small businesses a bidding credit of 35 percent.

49. The Commission sought comment on whether the characteristics and capital requirements of cellular service call for a different approach. The Commission also asked commenters, to the extent that they propose additional provisions to ensure participation by businesses owned by minorities and women, to address how such provisions should be crafted to meet the relevant standards of judicial review.

50. *Discussion.* As the Commission tentatively concluded in the *NPRM*, it will adopt the following small business definitions and bidding credits: (1) An "entrepreneur" with average annual gross revenues for the preceding three years not exceeding $40 million will be eligible for a 15 percent bidding credit; (2) a "small business" with average annual gross revenues for the preceding three years not exceeding $15 million will be eligible for a 25 percent bidding credit; and (3) a "very small business" with average annual gross revenues for the preceding three years not exceeding $3 million will be eligible for a 35 percent bidding credit.

51. The Commission is not persuaded that large carriers are necessarily better suited to provide cellular RSA service. In any case, the Commission does not prescreen applicants' relative qualifications. Further, the Commission believes that competition between large and small entities will benefit subscribers in the rural markets. Also, the Commission is not persuaded that the adoption of bidding credits will, in any way, impede service to these areas. To the extent that, as ALLTEL suggests, cellular service is a national "mature" service dominated by large carriers, our decision to adopt bidding credits should help eliminate barriers to entry for small businesses, consistent with our statutory mandate. *See* 47 U.S.C. 309(j)(3)(B).

52. Finally, ALLTEL contends that the auction will be skewed toward smaller entities that receive an overly generous bidding credit, which will distort market valuation. While the Commission agrees that bidding credits provide small businesses with an advantage, Congress, in Section 309(j), specifically directed the Commission to promote economic opportunities for small businesses. The Commission further notes that bidding credits alone do not guarantee success; rather, they provide small businesses with an opportunity to successfully compete against larger, well-financed bidders. *See* Revision of Part 22 and Part 90 of the Commission's Rules to Facilitate Future Development of Paging Systems, Implementation of Section 309(j) of the Communications Act—Competitive Bidding, *Second Report and Order and Further Notice of Proposed Rulemaking*, 62 FR 11616 (March 12, 1997). Because bidding credits are the best tool the Commission has to promote these opportunities, the Commission concludes that it is appropriate to adopt the special provisions for small businesses.

53. The Commission does adopt special preferences for entities owned by minorities or women. As the Commission did not receive any comments on this issue, the Commission does not have an adequate record to support such special provisions under the current standards of judicial review. *See Adarand Constructors* v. *Peña*, 515 U.S. 200 (1995) (requiring a strict scrutiny standard of review for Congressionally mandated race-conscious measures); *United States* v. *Virginia*, 518 U.S. 515 (1996) (applying an intermediate standard of review to a state program based on gender classification). The Commission believes the bidding credits adopted here for small businesses will further our objective of disseminating licenses among a wide variety of applicants. Furthermore, minority and women-owned entities that qualify as small businesses may take advantage of the special provisions.

D. Disposition of Alee's Argument Concerning Texas 21

54. In its comments, Alee has requested that RSA 672A (Texas 21—Chambers) not be included in any upcoming auction pending the outcome of its petition for reconsideration of an order denying its application in that market. For the reasons stated below, the Commission denies Alee's request and includes the Texas 21 RSA authorization among the markets to be subject to auction rules.

55. Alee requests that, if the Commission includes the Texas 21 authorization in the contemplated auction, the Commission gives notice to any potential bidder that any license won in that market would be subject to Alee's claim. If Alee ultimately prevails in the hearing process, the license will be awarded accordingly. If Alee does not prevail, then the Commission will have the necessary licensing rules and policies in place for the Texas 21 authorization without having to conduct another rulemaking proceeding. The Commission will ensure that interested parties are fully informed to the extent that Alee's claim remains unresolved.

E. IOA Operations

56. *Background.* Under the terms of each of the existing IOAs, the IOA operator must cease operations immediately upon initiation of service by the new licensee, provided that the new licensee gives at least 30 days written notice of its intent to provide service. The IOA condition specifically provides that "[t]he interim operator must fully cooperate with the permanent licensee in effectuating a smooth transition to the provision of service in the market by the permanent licensee without *disruption* of service to the public. The interim operator must cease operations in the market on the date of initiation of permanent service or within 30 days of written notice by the permanent permittee to the interim operator of the day and time that it intends to initiate service, whichever date occurs later." In order to prevent unnecessary interruption of service to existing cellular customers, the Commission proposed in the *NPRM* that, in the event that any of the current IOA holders do not obtain the RSA license for their markets, they should be allowed to continue providing service on a temporary basis subject to these conditions, *i.e.*, until the auction winner provides the required notice and is prepared to commence service. Minimizing such interruptions while the auction winner establishes its service will also help to retain 911 access in the IOA service area. Cingular requests that the Commission clarify its rules to provide that interim operators may continue to operate until the auction winner is prepared to commence service in that particular part of the market where the IOA holder is operating in order to avoid disruption in service to the public.

57. *Discussion.* Because of the nature of these markets and carrier buildout practices, the Commission anticipates the auction winner will not initially provide coverage throughout the entire market. As a result, the auction winner may or may not initiate service in the area where the public currently is receiving service from the IOA holder. The Commission will require the IOA holder to "pull back" its service area boundaries (SAB) to eliminate any overlap with the auction winner's own

SAB, and to terminate service in the RSA upon notice from the auction winner that the latter is extending coverage into the area served under the IOA. The Commission feels that this will best serve the public interest by preventing localized disruptions in service during the transition period.

II. Final Regulatory Flexibility Analysis

A. Procedural Matters

1. Final Regulatory Flexibility Analysis

58. As required by the Regulatory Flexibility Act (RFA), an Initial Regulatory Flexibility Analysis (IRFA) was incorporated in the *Notice of Proposed Rule Making* in this docket. *See* 5 U.S.C. 603. The RFA, *see* 5 U.S.C. 601 *et seq.*, has been amended by the Contract with America Advancement Act of 1996, Public Law 104–121, 110 Stat. 847 (1996) (CWAAA). Title II of the CWAAA is the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA). The Commission sought written public comment on the proposals in the *NPRM*, including comment on the IRFA. The comments received are discussed above. This Final Regulatory Flexibility Analysis (FRFA) conforms to the RFA. *See* 5 U.S.C. 604.

59. Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 603, the Final Regulatory Flexibility Analysis (FRFA) is set forth above. The Commission's Consumer Information Bureau, Reference Information Center, will send a copy of this *Report and Order*, including the Final Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration, in accordance with the Regulatory Flexibility Act.

60. *Report to Congress:* The Commission will include a copy of the *Report and Order*, including this FRFA, in a report to be sent to Congress pursuant to the Congressional Review Act. *See* 5 U.S.C. 801(a)(1)(A). In addition, the Commission will send a copy of the *Report and Order*, including this FRFA, to the Chief Counsel for Advocacy of the Small Business Administration. A copy of the *Report and Order* and FRFA (or summaries thereof) will also be published in the **Federal Register**. *See* 5 U.S.C. 604(b).

B. Ordering Clauses

61. Pursuant to 4(i), 303(r) and 309(j) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 303(r) and 309(j), Part 22, 47 CFR *is Amended* as specified in the rule changes and the auctions for Markets 322A—Polk, AR, 592A—Barnes, ND, 727A—Ceiba, PR, and 672A—Chambers, TX be conducted under Part 1, Subpart Q of the Commission's rules, 47 CFR 1.2101 *et seq.*, and that all eligible parties be permitted to participate in the bidding.

62. The rules and policies adopted in this Report and Order shall become effective April 15, 2002.

63. The Commission's Consumer Information Bureau, Reference Information Center, shall send a copy of this *Report and Order*, including the Final Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.

Acting Secretary.

Rule Changes

For the reasons discussed in the preamble, part 22 of title 47 of the Code of Federal Regulations is amended as follows:

PART 22—PUBLIC MOBILE SERVICES

1. The authority citation for part 22 continues to read as follows:

Authority: 47 U.S.C. 154, 222, 303, 309, and 332.

2. Section 22.228 is added to Subpart B to read as follows:

§ 22.228 Cellular rural service area licenses subject to competitive bidding.

Mutually exclusive initial applications for Cellular Rural Service Area licenses are subject to competitive bidding. The general competitive bidding procedures set forth in Part 1, Subpart Q of this chapter will apply unless otherwise provided in this part.

3. Section 22.229 is added to Subpart B to read as follows:

§ 22.229 Designated entities.

(a) *Eligibility for small business provisions.* (1) A very small business is an entity that, together with its controlling interests and affiliates, has average annual gross revenues not exceeding $3 million for the preceding three years.

(2) A small business is an entity that, together with its controlling interests and affiliates, has average annual gross revenues not exceeding $15 million for the preceding three years.

(3) An entrepreneur is an entity that, together with its controlling interests and affiliates, has average annual gross revenues not exceeding $40 million for the preceding three years.

(4) A consortium of very small businesses is a conglomerate organization formed as a joint venture between or among mutually independent business firms, each of which individually satisfies the definition in paragraph (a)(1) of this section. A consortium of small businesses is a conglomerate organization formed as a joint venture between or among mutually independent business firms, each of which individually satisfies the definition in paragraph (a)(2) of this section. A consortium of entrepreneurs is a conglomerate organization formed as a joint venture between or among mutually independent business firms, each of which individually satisfies the definition in paragraph (a)(3) of this section.

(5) For purposes of determining whether an entity meets any of the definitions set forth in paragraphs (a)(1), (a)(2), (a)(3), or (a)(4) of this section, the gross revenues of the entity, its controlling interests and affiliates shall be considered in the manner set forth in § 1.2110(b) and (c) of this chapter.

(b) *Bidding credits.* A winning bidder that qualifies as a very small business or a consortium of very small businesses as defined in this section may use the bidding credit specified in § 1.2110(f)(2)(i) of this chapter. A winning bidder that qualifies as a small business or a consortium of small businesses as defined in this section may use the bidding credit specified in § 1.2110(f)(2)(ii) of this chapter. A winning bidder that qualifies as an entrepreneur or a consortium of entrepreneurs as defined in this section may use the bidding credit specified in § 1.2110(f)(2)(iii) of this chapter.

4. Section 22.969 is added to Subpart H to read as follows:

§ 22.969 Cellular RSA licenses subject to competitive bidding.

Mutually exclusive applications for initial authorization for the following Cellular Rural Service Areas filed after the effective date of this rule are subject to competitive bidding procedures as prescribed by Sections 22.228 and 22.229: 332A—Polk, AR; 582A—Barnes, ND; 672A—Chambers, TX; and 727A—Ceiba, PR.

[DFARS Case 2001–D006]

Defense Federal Acquisition Regulation Supplement; DoD Pilot Mentor-Protege Program

AGENCY: Department of Defense (DoD).

ACTION: Final rule.

SUMMARY: DoD has adopted as final, without change, an interim rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to implement Section 807 of the National Defense Authorization Act for Fiscal Year 2001. Section 807 adds women-owned small businesses to the types of concerns that may participate as protege firms in the DoD Pilot Mentor-Protege Program.

EFFECTIVE DATE: March 14, 2002.

FOR FURTHER INFORMATION CONTACT: Ms. Angelena Moy, Defense Acquisition Regulations Council, OUSD(AT&L)DP(DAR), IMD 3C132, 3062 Defense Pentagon, Washington, DC 20301–3062. Telephone (703) 602–1302; facsimile (703) 602–0350. Please cite DFARS Case 2001–D006.

SUPPLEMENTARY INFORMATION:

A. Background

This rule implements Section 807 of the National Defense Authorization Act for Fiscal Year 2001 (Public Law 106–398). Section 807 adds women-owned small businesses to the types of concerns that may participate as protege firms in the DoD Pilot Mentor-Protege Program. This rule also clarifies that business concerns owned and controlled by an Indian tribe or a Native Hawaiian organization are eligible to participate as protege firms in the Program.

DoD published an interim rule at 66 FR 47108 on September 11, 2001. DoD received one comment on the interim rule. The comment did not recommend any change to the rule. Therefore, DoD is converting the interim rule to a final rule without change.

This rule was not subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

B. Regulatory Flexibility Act

DoD has prepared a final regulatory flexibility analysis. Interested parties may obtain a copy of the analysis from the point of contact specified herein. The analysis is summarized as follows: This rule permits women-owned small businesses to participate as protege firms in the DoD Pilot Mentor-Protege Program. The objective of the rule is to provide an opportunity for women-owned small businesses to enhance their capabilities and increase their participation in Government and commercial contracts. Presently, there are 3,471 women-owned small business concerns that do business with DoD. Since the inception of the Mentor-Protege Program, 160 mentor firms and 509 protege firms have participated in the Program. Each protege firm must provide annual data to its mentor firm, for submission to the Government, regarding the progress of the protege firm in employment, revenues, and participation in DoD contracts. DoD received no comments in response to the initial regulatory flexibility analysis.

C. Paperwork Reduction Act

The information collection requirements of the DoD Pilot Mentor-Protege Program have been approved by the Office of Management and Budget under Control Number 0704–0332, for use through March 31, 2004.

[DFARS Case 2001–D016]

Defense Federal Acquisition Regulation Supplement; Partnership Agreement Between DoD and the Small Business Administration

AGENCY: Department of Defense (DoD).

ACTION: Interim rule with request for comments.

SUMMARY: DoD has issued an interim rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to implement a partnership agreement between DoD and the Small Business Administration (SBA). The partnership agreement streamlines procedures for contract awards under SBA's 8(a) Program.

DATES: Effective date: March 14, 2002.

Comment date: Comments on the interim rule should be submitted to the address shown below on or before May 13, 2002, to be considered in the formation of the final rule.

ADDRESSES: Respondents may submit comments directly on the World Wide Web at *http://emissary.acq.osd.mil/dar/dfars.nsf/pubcomm*. As an alternative, respondents may e-mail comments to: *dfars@acq.osd.mil*. Please cite DFARS Case 2001–D016 in the subject line of e-mailed comments.

Respondents that cannot submit comments using either of the above methods may submit comments to: Defense Acquisition Regulations Council, Attn: Ms. Angelena Moy, OUSD(AT&L)DP(DAR), IMD 3C132, 3062 Defense Pentagon, Washington, DC 20301–3062; facsimile (703) 602–0350. Please cite DFARS Case 2001–D016.

At the end of the comment period, interested parties may view public comments on the World Wide Web at *http://emissary.acq.osd.mil/dar/dfars.nsf*.

FOR FURTHER INFORMATION CONTACT: Ms. Angelena Moy, (703) 602–1302.

SUPPLEMENTARY INFORMATION:

A. Background

A partnership agreement between DoD and SBA, dated February 1, 2002, permits DoD to award 8(a) contracts directly to 8(a) concerns, on behalf of SBA. The partnership agreement replaced a memorandum of understanding, which also permitted direct award of 8(a) contracts, and which was implemented in DFARS Subpart 219.8. This interim rule amends DFARS Subpart 219.8 to reflect the provisions of the new partnership agreement. The amendments include the following:

1. Emphasis that SBA remains the prime contractor on all 8(a) contracts, continues to determine eligibility of concerns for contract award, and retains appeal rights under Section 19.810 of the Federal Acquisition Regulation. SBA delegates to DoD only the authority to sign contacts on its behalf.

2. For negotiated acquisitions, authorization for the contracting officer to submit a request for an eligibility determination on all firms in the competitive range if discussions are to be conducted, or on all firms with a realistic chance of award if no discussions are to be conducted. Previously, the contracting officer

VOL 67 ISS 50 MR 14 2002 UMI

submitted eligibility determinations on no more than three of the most highly rated offerors.

This rule was not subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

B. Regulatory Flexibility Act

DoD does not expect this rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the rule affects only the administrative procedures used for award of contracts under the 8(a) Program. Therefore, DoD has not performed an initial regulatory flexibility analysis. DoD invites comments from small businesses and other interested parties. DoD also will consider comments from small entities concerning the affected DFARS subparts in accordance with 5 U.S.C. 610. Such comments should be submitted separately and should cite DFARS Case 2001–D016.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the rule does not impose any information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

D. Determination to Issue an Interim Rule

A determination has been made under the authority of the Secretary of Defense that urgent and compelling reasons exist to publish an interim rule prior to affording the public an opportunity to comment. This interim rule implements a partnership agreement between DoD and SBA. The agreement streamlines procedures for awards under SBA's 8(a) Program by authorizing DoD to award contracts directly to 8(a) concerns. The partnership agreement became effective on February 1, 2002. Comments received in response to this interim rule will be considered in the formation of the final rule.

List of Subjects in 48 CFR Parts 219 and 252

Government procurement.

Michele P. Peterson,
Executive Editor, Defense Acquisition Regulations Council.

Therefore, 48 CFR parts 219 and 252 are amended as follows:

1. The authority citation for 48 CFR parts 219 and 252 continues to read as follows:

Authority: 41 U.S.C. 421 and 48 CFR Chapter 1.

PART 219—SMALL BUSINESS PROGRAMS

2. Section 219.800 is revised to read as follows:

219.800 General.

(a) By Partnership Agreement (PA) dated February 1, 2002, between the Small Business Administration (SBA) and the Department of Defense (DoD), the SBA delegated to the Under Secretary of Defense (Acquisition, Technology, and Logistics) its authority under paragraph 8(a)(1)(A) of the Small Business Act (15 U.S.C. 637(a)) to enter into 8(a) prime contracts, and its authority under 8(a)(1)(B) of the Small Business Act to award the performance of those contracts to eligible 8(a) Program participants. However, the SBA remains the prime contractor on all 8(a) contracts, continues to determine eligibility of concerns for contract award, and retains appeal rights under FAR 19.810. The SBA delegates only the authority to sign contracts on its behalf. Consistent with the provisions of this subpart, this authority is hereby redelegated to DoD contracting officers within the United States, its territories and possessions, Puerto Rico, the Trust Territory of the Pacific Islands, and the District of Columbia, to the extent that it is consistent with any dollar or other restrictions established in individual warrants. This authority expires on September 30, 2004.

(b) Contracts awarded under the PA may be awarded directly to the 8(a) participant on either a sole source or competitive basis. An SBA signature on the contract is not required.

(c) Notwithstanding the PA, the contracting officer may elect to award a contract pursuant to the provisions of FAR Subpart 19.8.

3. Section 219.804–2 is revised to read as follows:

219.804–2 Agency offering.

(1) For requirements processed under the PA cited in 219.800 (but see paragraph (2) of this subsection for procedures related to purchase orders that do not exceed the simplified acquisition threshold), the notification to the SBA must clearly indicate that the requirement is being processed under the PA. All notifications should be submitted in writing, using facsimile or electronic mail, when possible, and must specify that—

(i) Under the PA, an SBA acceptance or rejection of the offering is required within 5 working days of receipt of the offering; and

(ii)(A) For sole source requirements, an SBA acceptance must include a size verification and a determination of the 8(a) firm's program eligibility, and, upon acceptance, the contracting officer will solicit a proposal, conduct negotiations, and make award directly to the 8(a) firm; or

(B) For competitive requirements, upon acceptance, the contracting officer will solicit offers, conduct source selection, and, upon receipt of an eligibility verification, award a contract directly to the selected 8(a) firm.

(2) Under the PA cited in 219.800, no separate agency offering or SBA acceptance is needed for requirements that are issued under purchase orders that do not exceed the simplified acquisition threshold. After an 8(a) contractor has been identified, the contracting officer must establish the prices, terms, and conditions with the 8(a) contractor and must prepare a purchase order consistent with the procedures in Part 213 and FAR Part 13, including the applicable clauses required by this subpart. No later than the day that the purchase order is provided to the 8(a) contractor, the contracting officer must provide to the cognizant SBA Business Opportunity Specialist, using facsimile, electronic mail, or any other means acceptable to the SBA district office—

(i) A copy of the signed purchase order; and

(ii) A notice stating that the purchase order is being processed under the PA. The notice also must indicate that the 8(a) contractor will be deemed eligible for award and will automatically begin work under the purchase order unless, within 2 working days after SBA's receipt of the purchase order, the 8(a) contractor and the contracting officer are notified that the 8(a) contractor is ineligible for award.

(3) The notification to SBA must identify any joint venture proposed for performance of the contract. SBA must approve a joint venture before award of an 8(a) contract involving the joint venture.

(4) For competitive requirements for construction to be performed overseas, submit the notification to SBA Headquarters.

219.804–3 [Amended]

4. Section 219.804–3 is amended by removing "MOU" and adding in its place "PA".

5. Section 219.805–2 is amended by revising paragraph (c) introductory text and paragraph (c)(ii) to read as follows:

219.805–2 Procedures.

(c) For requirements processed under the PA cited in 219.800—

* * * * *

(ii) For negotiated acquisitions, the contracting officer may submit a request for an eligibility determination on all firms in the competitive range if discussions are to be conducted, or on all firms with a realistic chance of award if no discussions are to be conducted.

219.806 [Amended]

6. Section 219.806 is amended as follows:

a. In the introductory text, by removing "MOU" and adding in its place "PA";

b. In paragraph (1), by removing "shall" and adding in its place "must"; and

c. In paragraph (2), in the last sentence, by removing "shall" and adding in its place "must".

219.808–1 [Amended]

7. Section 219.808–1 is amended in the introductory text by removing "MOU" and adding in its place "PA".

219.811–1 [Amended]

8. Section 219.811–1 is amended as follows:

a. In paragraph (a), in the first sentence, by removing "MOU" and adding in its place "PA" and by removing "shall" and adding in its place "must";

b. In paragraph (a), in the second and last sentences by removing "shall" and adding in its place "must"; and

c. In paragraph (b) introductory text, by removing "MOU" and adding in its place "PA".

219.811–2 [Amended]

9. Section 219.811–2 is amended by removing "MOU" and adding in its place "PA" and by removing "shall" and adding in its place "must".

219.811–3 [Amended]

10. Section 219.811–3 is amended in paragraphs (1) and (2) by removing "MOU" and adding in its place "PA".

219.812 [Amended]

11. Section 219.812 is amended in paragraph (d), in the first sentence, by removing "MOU" and adding in its place "PA".

PART 252—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

12. Section 252.219–7009 is amended by revising the clause date, paragraph (a), and paragraph (c) introductory text to read as follows:

252.219–7009 Section 8(a) direct award.

As prescribed in 219.811–3(1), use the following clause:

Section 8(a) Direct Award (Mar 2002)

(a) This contract is issued as a direct award between the contracting office and the 8(a) Contractor pursuant to the Partnership Agreement dated February 1, 2002, between the Small Business Administration (SBA) and the Department of Defense. Accordingly, the SBA, even if not identified in Section A of this contract, is the prime contractor and retains responsibility for 8(a) certification, for 8(a) eligibility determinations and related issues, and for providing counseling and assistance to the 8(a) Contractor under the 8(a) Program. The cognizant SBA district office is:

_____

_____

_____

[*To be completed by the Contracting Officer at the time of award*]

DEPARTMENT OF DEFENSE

48 CFR Part 225

[DFARS Case 2002–D006]

Defense Federal Acquisition Regulation Supplement; Restriction on Acquisition of Vessel Propellers

AGENCY: Department of Defense (DoD).

ACTION: Final rule.

SUMMARY: DoD has issued a final rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to clarify that the statutory restriction on acquisition of vessel propellers from foreign sources applies only to DoD contracts that use fiscal year 2000 or 2001 funds.

EFFECTIVE DATE: March 14, 2002.

FOR FURTHER INFORMATION CONTACT: Ms. Amy Williams, Defense Acquisition Regulations Council, OUSD(AT&L)DP(DAR), IMD 3C132, 3062 Defense Pentagon, Washington, DC 20301–3062. Telephone (703) 602–0328; facsimile (703) 602–0350. Please cite DFARS Case 2002-D006.

SUPPLEMENTARY INFORMATION:

A. Background

The restriction on acquisition of vessel propellers at DFARS 225.7020 implements Section 8064 of the DoD Appropriations Act for Fiscal Year 2001 (Public Law 106–259). Section 8064 provides that no funds appropriated in fiscal year 2000 or 2001 may be used for the procurement of vessel propellers other than those produced by a domestic source and of domestic origin. The DoD Appropriations Act for Fiscal Year 2002 (Public Law 107–117) contains no such provision. Therefore, this final rule amends DFARS 225.7020 to clarify that the restriction applies only to DoD contracts that use fiscal year 2000 or 2001 funds.

This rule was not subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

B. Regulatory Flexibility Act

This rule will not have a significant cost or administrative impact on contractors or offerors, or a significant effect beyond the internal operating procedures of DoD. Therefore, publication for public comment is not required. However, DoD will consider comments from small entities concerning the affected DFARS subpart in accordance with 5 U.S.C. 610. Such comments should cite DFARS Case 2002-D006.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the rule does not impose any information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

BILLING CODE 5001–08–P

DEPARTMENT OF DEFENSE

48 CFR Part 226

[DFARS Case 2001–D007]

Defense Federal Acquisition Regulation Supplement; Preference for Local 8(a) Contractors—Base Closure or Realignment

AGENCY: Department of Defense (DoD).

ACTION: Final rule.

SUMMARY: DoD has issued a final rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to clarify policy pertaining to preferences for local businesses in acquisitions that support a base closure or realignment. The rule clarifies that both competitive and noncompetitive acquisitions under the Section 8(a) Program are permitted if an eligible 8(a) contractor is located in the vicinity of the base to be closed or realigned.

EFFECTIVE DATE: March 14, 2002.

FOR FURTHER INFORMATION CONTACT: Ms. Angelena Moy, Defense Acquisition Regulations Council, OUSD(AT&L)DP(DAR), IMD 3C132, 3062 Defense Pentagon, Washington, DC 20301–3062. Telephone (703) 602–1302; facsimile (703) 602–0350. Please cite DFARS Case 2001–D007.

SUPPLEMENTARY INFORMATION:

A. Background

This final rule amends DFARS 226.7103 to clarify policy pertaining to preferences for local businesses in acquisitions that support a base closure or realignment. The present policy permits award under the Section 8(a) Program if "the 8(a) contractor" is located in the vicinity of the base to be closed or realigned. This rule amends the text to permit use of 8(a) procedures if "at least one eligible 8(a) contractor" is located in the vicinity. This change clarifies the intent of the policy, which is to permit both competitive and noncompetitive 8(a) acquisitions in support of a base closure or realignment. A similar clarifying amendment is made to the text pertaining to set-asides for small business concerns.

DoD published a proposed rule at 66 FR 47158 on September 11, 2001. DoD received no comments on the proposed rule. Therefore, DoD is adopting the proposed rule as a final rule without change.

This rule was not subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

B. Regulatory Flexibility Act

DoD certifies that this final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the rule merely clarifies existing policy pertaining to acquisitions made in support of a base closure or realignment.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the rule does not impose any information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 226

Defense Federal Acquisition Regulation Supplement; Performance of Security Functions

AGENCY: Department of Defense (DoD).

ACTION: Interim rule with request for comments.

SUMMARY: DoD has issued an interim rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to implement Section 1010 of the USA Patriot Act. Section 1010 provides an exception to the prohibition on contracting for security functions at a military installation or facility. The exception applies during the period of time that United States armed forces are engaged in Operation Enduring Freedom and 180 days thereafter.

DATES: *Effective date:* March 14, 2002.

Comment date: Comments on the interim rule should be submitted to the address shown below on or before May 13, 2002, to be considered in the formation of the final rule.

ADDRESSES: Respondents may submit comments directly on the World Wide Web at *http://emissary.acq.osd.mil/dar/dfars.nsf/pubcomm*. As an alternative, respondents may e-mail comments to: *dfars@acq.osd.mil*. Please cite DFARS Case 2001–D018 in the subject line of e-mailed comments.

Respondents that cannot submit comments using either of the above methods may submit comments to: Defense Acquisition Regulations Council, Attn: Ms. Sandra Haberlin, OUSD(AT&L)DP(DAR), IMD 3C132, 3062 Defense Pentagon, Washington, DC 20301–3062; facsimile (703) 602–0350. Please cite DFARS Case 2001–D018.

At the end of the comment period, interested parties may view public comments on the World Wide Web at *http://emissary.acq.osd.mil/dar/dfars.nsf*.

FOR FURTHER INFORMATION CONTACT: Ms. Sandra Haberlin, (703) 602–0289.

SUPPLEMENTARY INFORMATION:

A. Background

10 U.S.C. 2465 prohibits DoD from entering into contracts for the performance of firefighting or security-guard functions at military installations or facilities, unless certain exceptions apply. Section 1010 of the USA Patriot Act (Public Law 107–56) adds another exception to this prohibition, to apply during the period of time that United States armed forces are engaged in Operation Enduring Freedom and 180 days thereafter. The exception permits award of contracts for security functions to proximately located local and State governments. This interim rule amends DFARS 237.102–70 to implement Section 1010 of Public Law 107–56.

This rule was not subject to Office of Management and Budget review under

Executive Order 12866, dated September 30, 1993.

B. Regulatory Flexibility Act

DoD does not expect this rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the rule applies only to military installations and facilities and proximately located local and State governments. Therefore, DoD has not performed an initial regulatory flexibility analysis. DoD invites comments from small businesses and other interested parties. DoD also will consider comments from small entities concerning the affected DFARS subpart in accordance with 5 U.S.C. 610. Such comments should be submitted separately and should cite DFARS Case 2001–D018.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the rule does not impose any information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

D. Determination To Issue an Interim Rule

A determination has been made under the authority of the Secretary of Defense that urgent and compelling reasons exist to publish an interim rule prior to affording the public an opportunity to comment. This interim rule implements Section 1010 of the USA Patriot Act (Public Law 107–56). Section 1010 permits DoD to enter into contracts for the performance of security functions at military installations and facilities during the period of time that United States armed forces are engaged in Operation Enduring Freedom and 180 days thereafter. Section 1010 became effective on October 26, 2001. Comments received in response to this interim rule will be considered in the formation of the final rule.

List of Subjects in 48 CFR Part 237

Government procurement.

Michele P. Peterson,

Executive Editor, Defense Acquisition Regulations Council.

Therefore, 48 CFR part 237 is amended as follows:

1. The authority citation for 48 CFR part 237 continues to read as follows:

Authority: 41 U.S.C. 421 and 48 CFR Chapter 1.

PART 237—SERVICE CONTRACTING

2. Section 237.102–70 is amended by adding paragraph (c) to read as follows:

237.102–70 Prohibition on contracting for firefighting or security-guard functions.

* * * * *

(c) Under Section 1010 of Public Law 107–56, this prohibition does not apply to any contract that'

(1) Is entered into during the period of time that United States armed forces are engaged in Operation Enduring Freedom or during the period 180 days thereafter;

(2) Is for the performance of security functions at any military installation or facility in the United States;

(3) Is awarded to a proximately located local or State government, or a combination of such governments, whether or not any such government is obligated to provide such services to the general public without compensation; and

(4) Prescribes standards for the training and other qualifications of local government law enforcement personnel who perform security functions under the contract in accordance with criteria established by the Secretary of the department concerned.

[FR Doc. 02–5953 Filed 3–13–02; 8:45 am]

BILLING CODE 5001–08–U

ENVIRONMENTAL PROTECTION AGENCY

48 CFR Parts 1515, 1533 and 1552

[FRL–7155–7]

Acquisition Regulation: Administrative Changes and Technical Amendments

AGENCY: Environmental Protection Agency.

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) is issuing this rule to amend the EPA Acquisition Regulation (EPAAR) to eliminate two EPAAR requirements in order to streamline the EPA contracting process. The first requirement relates to the detail required in the EPA contracting officer's source selection decision. The second requirement relates to EPA contracting officer duties if there is a contractor appeal of a final decision of the contracting officer. In addition, technical amendments are being made to the EPAAR solicitation provision entitled "Procedures for Participation in the EPA Mentor-Protege Program."

DATES: This rule is effective on June 12, 2002 without further notice, unless EPA receives adverse comments by April 15, 2002. If we receive adverse comments, we will, before the rule's effective date, publish a timely withdrawal in the **Federal Register** informing the public that this rule will not take effect.

ADDRESSES: Comments may be submitted to Larry Wyborski, US Environmental Protection Agency, Office of Acquisition Management (3802R), 1200 Pennsylvania Avenue, NW., Washington, DC 20004, or electronically at: *wyborski.larry@epamail.epa.gov*.

FOR FURTHER INFORMATION CONTACT: Larry Wyborski, U.S. Environmental Protection Agency, Office of Acquisition Management, Mail Code 3802R, 1200 Pennsylvania Avenue, NW, Ariel Rios Building, Washington, DC 20004, (202) 564–4369, *wyborski.larry@epamail.epa.gov*

SUPPLEMENTARY INFORMATION:

A. Background

EPA's Office of Acquisition Management established a Procurement Guidance Work Group to assess EPA acquisition policies and recommend changes where appropriate. Among the recommendations were two changes to the EPAAR to eliminate requirements which either: (1) Duplicate other Federal Regulations, or (2) outline unnecessary procedural requirements for EPA contracting officers. Specifically, EPAAR 1515.308–71 provides procedural requirements for documentation in source selection decisions over and above those required by Federal Acquisition Regulation (FAR) 15.308. The EPA Procurement Guidance Work Group determined these additional procedural requirements are not necessary, and therefore should be removed from the EPAAR. The Procurement Guidance Work Group also determined that EPAAR 1533.212, Contracting Officer's duties upon appeal, essentially duplicate procedures set forth in 43 CFR part 4 (Department of Interior Board of Contract Appeals Regulations) and should therefore be removed from the EPAAR.

In addition, technical amendments are being made to the solicitation provision at EPAAR 1552.219–71, Procedures for Participation in the Mentor-Protege Program, in order to bring the provision into compliance with statutory language. Specifically, since Pub. L. 102–389 (EPA's 1993 Appropriations Act) did not require certain restrictions on the mentor-protege program previously specified in the provision, these restrictions have been eliminated.

B. Executive Order 12866

This is not a significant regulatory action for the purposes of Executive Order 12866; therefore, no review is required by the Office of Information and Regulatory Affairs, within the Office of Management and Budget (OMB).

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because this rule does not contain information collection requirements that require the approval of OMB under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.).

D. Regulatory Flexibility Act (RFA), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), 5 U.S.C. 601 et seq.

The RFA generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act or any other statute unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small organizations, and small governmental jurisdictions.

For purposes of assessing the impact of today's rule on small entities, small entity is defined as: (1) A small business that meets the definition of a small business found in the Small Business Act and codified at 13 CFR 121.201; (2) a small governmental jurisdiction that is a government of a city, county, town, school district or special district with a population of less than 50,000; or (3) a small organization that is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.

After considering the economic impacts of today's rule on small entities, I certify that this action will not have a significant economic impact on a substantial number of small entities. In determining whether a rule has a significant economic impact on a substantial number of small entities, the impact of concern is any significant adverse economic impact on small entities, since the primary purpose of the regulatory flexibility analyses is to identify and address regulatory alternatives "which minimize any significant economic impact of the proposed rule on small entities." 5 U.S.C. 603 and 604. Thus, an agency may certify that a rule will not have a significant economic impact on a substantial number of small entities if the rule relieves regulatory burden, or otherwise has a positive economic effect on all of the small entities subject to the rule. This rule streamlines agency internal operating procedures and will therefore not have a significant economic impact on small entities.

E. Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal agencies to assess their regulatory actions on State, local, and Tribal governments, and the private sector. This rule does not contain a Federal mandate that may result in expenditures of $100 million or more for State, local, and Tribal governments, in the aggregate, or the private sector in one year. Any private sector costs for this action relate to paperwork requirements and associated expenditures that are far below the level established for UMRA applicability. Thus, the rule is not subject to the requirements of sections 202 and 205 of the UMRA.

F. Executive Order 13045

Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks (62 FR 19885, April 23, 1997), applies to any rule that: (1) Is determined to be economically significant as defined under Executive Order 12866, and (2) concerns an environmental health or safety risk that EPA has reason to believe may have a disproportionate effect on children. If the regulatory action meets both criteria, the Agency must evaluate the environmental health or safety effects of the planned rule on children, and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the Agency.

This rule is not subject to Executive Order 13045 because it is not an economically significant rule as defined by Executive Order 12866, and because it does not involve decisions on environmental health or safety risk.

G. Executive Order 13132

Executive Order 13132 entitled "Federalism" (64 FR 43255, August 10, 1999) requires EPA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications." "Policies that have federalism implications" are defined in the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government."

Under Section 6 of Executive Order 13132, EPA may not issue a regulation that has federalism implications, that imposes substantial direct compliance costs, and that is not required by statute, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by State and local governments, or EPA consults with State and local officials early in the process of developing the proposed regulation. EPA also may not issue a regulation that has federalism implications and that preempts State law, unless the Agency consults with State and local officials early in the process of developing the proposed regulation.

This rule does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. Thus, the requirements of section 6 of the Executive Order do not apply to this rule.

H. Executive Order 13175

Executive Order 13175, entitled "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 6, 2000), requires EPA to develop an accountable process to ensure "meaningful and tribal input by tribal officials in the development of regulatory policies that have tribal implications." "Policies that have tribal implications" is defined in the Executive Order to include regulations that have "substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and the Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes."

This direct final rule does not have tribal implications. It will not have substantial direct effects on tribal governments, on the relationship between the Federal government and Indian tribes, as specified in Executive Order 13175. The rule in an acquisition regulation that is technical and administrative in nature. Thus, Executive Order 13175 does not apply to this rule.

I. National Technology Transfer and Advancement Act of 1995

EPA will use voluntary consensus standards, as directed by section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104–113, section 12(d) (15 U.S.C. 272 note), in its procurement activities when applicable. The NTTAA directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. The NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards.

This rulemaking does not involve technical standards. Therefore, EPA is not considering use of any voluntary consensus standards. EPA welcomes comments on this aspect of the rule making, and, specifically, invites the public to identify potentially applicable voluntary consensus standards and to explain why such standards should be used in this regulation.

J. Executive Order 13211

This rule is not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355 (May 22, 2001) because it is not a significant regulatory action under Executive Order 12866.

K. Submission to Congress and the General Accounting Office

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rules report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 48 CFR Parts 1515, 1533 and 1552

Government procurement.

Therefore, 48 CFR chapter 15 is amended as set forth below:

1. The authority citation for parts 1515, 1533 and 1552 is revised to read as follows:

Authority: 5 U.S.C. 301; Sec. 205(c), 63 Stat. 390, as amended, 40 U.S.C. 486(c); and 41 U.S.C. 418b.

1515.308–71 [Removed]

2. 1515.308–71 is removed.

1553.212 [Removed]

3. Section 1533.212 is removed.

4. Section 1552.219–71 is revised to read as follows:

1552.219–71 Procedures for Participation in the EPA Mentor-Protege Program.

As prescribed in 1519.203(b), insert the following provision:

PROCEDURES FOR PARTICIPATION IN THE EPA MENTOR-PROTEGE PROGRAM **(Oct 2000)**

(a) This provision sets forth the procedures for participation in the EPA Mentor-Protege Program (hereafter referred to as the Program). The purpose of the Program is to increase the participation of concerns owned and/or controlled by socially and economically disadvantaged individuals as subcontractors, suppliers, and ultimately as prime contractors; to establish a mutually beneficial relationship between these concerns and EPA's large business prime contractors (although small businesses may participate as Mentors); to develop the technical and corporate administrative expertise of these concerns, which will ultimately lead to greater success in competition for contract opportunities; to promote the economic stability of these concerns; and to aid in the achievement of goals for the use of these concerns in subcontracting activities under EPA contracts. If the successful offeror is accepted into the Program they shall serve as a Mentor to a Protege firm(s), providing developmental assistance in accordance with an agreement with the Protege firm(s).

(b) To participate as a Mentor, the offeror must receive approval in accordance with paragraph (h) of this section.

(c) A Protege must be a concern owned and/or controlled by socially and economically disadvantaged individuals within the meaning of section 8(a)(5) and (6) of the Small Business Act (15 U.S.C. 673(a)(5) and (6)), including historically black colleges and universities. Further, in accordance with Public Law 102–389 (the 1993 Appropriation Act), for EPA's contracting purposes, economically and socially disadvantaged individuals shall be deemed to include women.

(d) Where there may be a concern regarding the Protege firm's eligibility to participate in the program; the protege's eligibility will be determined by the contracting officer after the SBA has completed any formal determinations.

(e) The offeror shall submit an application in accordance with paragraph (k) of this section as part of its proposal which shall include as a minimum the following information.

(1) A statement and supporting documentation that the offeror is currently performing under at least one active Federal contract with an approved subcontracting plan and is eligible for the award of Federal contracts;

(2) A summary of the offeror's historical and recent activities and accomplishments under any disadvantaged subcontracting programs. The offeror is encouraged to include any initiatives or outreach information believed pertinent to approval as a Mentor firm;

(3) The total dollar amount (including the value of all option periods or quantities) of EPA contracts and subcontracts received by the offeror during its two preceding fiscal years. (Show prime contracts and subcontracts separately per year);

(4) The total dollar amount and percentage of subcontract awards made to all concerns owned and/or controlled by disadvantaged individuals under EPA contracts during its two preceding fiscal years. If recently required to submit a SF 295, provide copies of the two preceding year's reports;

(5) The number and total dollar amount of subcontract awards made to the identified Protege firm(s) during the two preceding fiscal years (if any).

(f) In addition to the information required by paragraph (e) of this section, the offeror shall submit as a part of the application the following information for each proposed Mentor-Protege relationship:

(1) Information on the offeror's ability to provide developmental assistance to the identified Protege firm and how the assistance will potentially increase contracting and subcontracting opportunities for the Protege firm.

(2) A letter of intent indicating that both the Mentor firm and the Protege firm intend to enter into a contractual relationship under which the Protege will perform as a subcontractor under the contract resulting from this solicitation and that the firms will negotiate a Mentor-Protege agreement. The letter of intent must be signed by both parties and contain the following information:

(i) The name, address and phone number of both parties;

(ii) The Protege firm's business classification, based upon the NAICS code(s) which represents the contemplated supplies or services to be provided by the Protege firm to the Mentor firm;

(iii) A statement that the Protege firm meets the eligibility criteria;

(iv) A preliminary assessment of the developmental needs of the Protege firm and the proposed developmental assistance the Mentor firm envisions providing the Protege. The offeror shall address those needs and how their assistance will enhance the Protege. The offeror shall develop a schedule to assess the needs of the Protege and establish criteria to evaluate the success in the Program;

(v) A statement that if the offeror or Protege firm is suspended or debarred while performing under an approved Mentor-Protege agreement the offeror shall promptly give notice of the suspension or debarment to the EPA Office of Small Disadvantaged Business Utilization (OSDBU) and the

VOL
67
ISS
50
MR
14
2002
UMI

contracting officer. The statement shall require the Protege firm to notify the Contractor if it is suspended or debarred.

(g) The application will be evaluated on the extent to which the offeror's proposal addresses the items listed in paragraphs (e) and (f) of this section. To the maximum extent possible, the application should be limited to not more than 10 single pages, double spaced. The offeror may identify more than one Protege in its application.

(h) If the offeror is determined to be in the competitive range, or is awarded a contract without discussions, the offeror will be advised by the contracting officer whether their application is approved or rejected. The contracting officer, if necessary, may request additional information in connection with the offeror's submission of its revised or best and final offer. If the successful offeror has submitted an approved application, they shall comply with the clause titled "Mentor-Protege Program."

(i) Subcontracts of $1,000,000 or less awarded to firms approved as Proteges under the Program are exempt from the requirements for competition set forth in FAR 44.202–2(a)(5), and 52.244–5(b). However, price reasonableness must still be determined and the requirements in FAR 44.202–2(a)(8) for cost and price analysis continue to apply.

(j) Costs incurred by the offeror in fulfilling their agreement(s) with a Protege firm(s) are not reimbursable as a direct cost under the contract. Unless EPA is the responsible audit agency under FAR 42.703–1, offerors are encouraged to enter into an advance agreement with their responsible audit agency on the treatment of such costs when determining indirect cost rates. Where EPA is the responsible audit agency, these costs will be considered in determining indirect cost rates.

(k) Submission of Application and Questions Concerning the Program.

The application for the Program for Headquarters and Regional procurements shall be submitted to the contracting officer, and to the EPA OSDBU at the following address: Socioeconomic Business Program Officer, Office of Small and Disadvantaged Business Utilization, U.S. Environmental Protection Agency, Ariel Rios Building (1230A), 1200 Pennsylvania Avenue, NW, Washington, DC 20460, Telephone: (202) 564–4322, *Fax:* (202) 565–2473.

The application for the Program for RTP procurements shall be submitted to the contracting officer, and to the Small Business Specialist at the following address: Small Business Program Officer, RTP Procurement Operations Division (E105–02), U.S. Environmental Protection Agency, Research Triangle Park, NC 27711, *Telephone:* (919) 541–2249, Fax: (919) 541–5539.

The application for the Program for Cincinnati procurements shall be submitted to the contracting officer, and to the Small Business Specialist at the following address: Small and Disadvantaged Business Utilization Officer, Cincinnati Procurement Operations Division (CPOD-Norwood), U.S. Environmental Protection Agency, 26 West Martin Luther King Drive, Cincinnati, OH 45268, Telephone: (513) 487–2024 *Fax:* (513) 487–2004.

(End of provision)

Dated: February 28, 2002.

Judy S. Davis,

Director, Office of Acquisition Management.

[FR Doc. 02–5743 Filed 3–13–02; 8:45 am]

BILLING CODE 6560–50–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018–AI35

Endangered and Threatened Wildlife and Plants: Listing the Desert Yellowhead as Threatened

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: We, the Fish and Wildlife Service (Service), determine *Yermo xanthocephalus* (desert yellowhead) to be threatened under the authority of the Endangered Species Act of 1973, as amended. This plant is a recently described Wyoming endemic known only from the south end of Cedar Rim on the summit of Beaver Rim in southern Fremont County, Wyoming. It is known from a single population with plants found scattered over an area of 20 hectares (50 acres). The total area actually occupied by the population is only 3.37 hectares (8.33 acres) within the 20 hectares. In 2001 this population contained 11,967 plants and existed entirely on Federal lands. Surface disturbances associated with oil and gas development, compaction by vehicles, trampling by livestock, and randomly occurring, catastrophic events threaten the existing population.

EFFECTIVE DATE: April 15, 2002.

ADDRESSES: The complete file for this rule is available for inspection, by appointment, during normal business hours at the U.S. Fish and Wildlife Service, 4000 Airport Parkway, Cheyenne, WY 82001.

FOR FURTHER INFORMATION CONTACT: Mike Long, Field Supervisor, Wyoming Field Office (see **ADDRESSES** section), telephone 307/772–2374; facsimile (307) 772–2358.

SUPPLEMENTARY INFORMATION:

Background

Yermo xanthocephalus was discovered by Wyoming botanist Robert Dorn while conducting field work in the Beaver Rim area of central Wyoming in 1990. Dorn discovered a small population of an unusual species of Composite (Asteraceae). Dorn's closer examination revealed that the species was unknown to science and represented a new genus. Dorn (1991) named his discovery *Y. xanthocephalus*, or literally "desert yellowhead."

Yermo xanthocephalus is a tap-rooted, glabrous (hairless) perennial herb with leafy stems to 30 centimeters (cm) (12 inches (in)) high. The leathery leaves are alternate, lance-shaped to oval, 4 to 25 cm (1.5 to 10 in) long and often folded along the midvein. Leaf edges are smooth or toothed. Flower heads are many (25 to 180) and crowded at the top of the stem. Each head contains four to six yellow disk flowers (ray flowers are absent) surrounded by five yellow, keeled involucre (whorled) bracts (small leaves beneath the flower). The pappus (the outer whorl of flowering parts) consists of many white bristles.

The species is restricted to shallow deflation hollows in outcrops of Miocene sandstones of the Split Rock Formation (Van Houten 1964). These wind-excavated hollows accumulate drifting snow and may be more mesic (moist) than surrounding areas. The vegetation of these sites is typically sparse, consisting primarily of low-cushion plants and scattered clumps of Indian ricegrass (*Stipa hymenoides*).

Dorn observed approximately 500 plants within 1 hectare (2.5 acres) in 1990 on Federal land managed by the Bureau of Land Management (BLM). Surveys conducted since 1990 by Richard Scott, Curator of the Central Wyoming College Herbarium in Riverton, have failed to locate additional populations on outcrops of the White River, Wagon Bed, and Wind River formations in the Beaver Rim area. The estimate of the plant population's size has increased from 500 in 1990 to 11,967 plants in 2001. However, Dorn's original estimate of 500 plants was a visual estimate and did not include 2 nearby subpopulations, while Scott has been counting all plants in all 3 subpopulations using a monitoring grid. Therefore, the difference in estimates may be largely the result of different techniques used over differing acreages and cannot be assumed to show a significantly increasing trend in population size between 1990 and 2001. Based upon Scott's data collected from 1995 through 2001, the actual population count has increased from 9,293 in 1995 to 11,967 in 2001, possibly in response to higher than normal precipitation over the study period (R. Scott, Central Wyoming College, pers. comm., 2001).

Previous Federal Action

In the plant notice of review published on September 30, 1993 (58 FR 51144), we designated *Yermo xanthocephalus* a Category 2 species for potential listing under the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*). At that time, Category 2 species were those for which data in our possession indicated listing was possibly appropriate, but for which substantial data on biological vulnerability and threats were not currently known or on file to support a proposed rule. On February 28, 1996, we published a Notice of Review in the **Federal Register** (61 FR 7596) that discontinued the designation of Category 2 species as candidates, and this species was upgraded to candidate status at that time. A candidate is a species for which we possess substantial information on biological vulnerability and threats to support preparation of a listing proposal.

On November 24, 1997, we received a petition from the Biodiversity Legal Foundation and Biodiversity Associates alleging that *Yermo xanthocephalus* warranted emergency listing. On December 22, 1997, we notified the petitioners that emergency listing was not appropriate because BLM regulations provided some conservation measures for the species, and current exploratory oil and gas activities near the known occupied habitat of *Y. xanthocephalus* were being coordinated with our staff in the Wyoming Field Office. In addition, we notified the petitioners that petitions for candidate species are considered second petitions, because candidate species are species for which we have already decided that listing is warranted. Therefore, no 90-day finding was required for Biodiversity Legal Foundation's petition.

The proposed rule to list *Yermo xanthocephalus* as threatened was published in the **Federal Register** on December 22, 1998 (63 FR 70745). With a **Federal Register** publication on September 5, 2000 (65 FR 53691), we reopened the comment period. In the same publication, we sought comments regarding a draft conservation agreement, assessment, and strategy submitted by BLM for our consideration when making this listing decision. The conservation agreement, assessment, and strategy was never finalized or signed and has not been considered as a firm commitment to perform the actions when assessing conservation commitments in making this listing decision.

On August 9, 1999, BLM segregated (proposed withdrawal of) 3,759.12 acres surrounding the population of *Yermo xanthocephalus* for 2 years from location and entry under the General Mining Act of 1872, and from settlement, sale, location, and entry under the general land laws (64 FR 43209). However, this segregation expired on August 9, 2001, with no finalized withdrawal in place.

On November, 12, 2001, Biodiversity Legal Foundation, Biodiversity Associates, Center for Native Ecosystems, and Wyoming Outdoor Council filed a complaint in the U.S. District Court of Colorado alleging that the Service failed to make a timely final listing determination and critical habit designation for *Yermo xanthocephalus*.

Summary of Comments and Recommendations

In the December 22, 1998, proposed rule (63 FR 70745) we requested that all interested parties submit factual reports and information that might contribute to the development of this final rule. The comment period for the proposed rule was open from December 22, 1998, through February 22, 1999. On September 5, 2000, the comment period was reopened (65 FR 53691) to accommodate the public notice requirement of the Act, consider any new scientific information, and allow for comments on the draft conservation agreement submitted by BLM. We published legal notices in the "Casper Star Tribune" on September 5, 2000, and in the "Riverton Ranger" and the "Lander Journal" on September 6, 2000. The reopened comment period closed October 5, 2000.

During the initial comment period, 12 sets of comments were received. During the reopened comment period, we received 3 sets of comments regarding the proposed listing action. Additionally, 4 sets of comments were received by BLM regarding its draft conservation agreement, assessment, and strategy. We had no requests for a public hearing during either comment period. Of the comments we received, 8 supported, 3 opposed, and 4 were neutral regarding the proposed threatened status for *Yermo xanthocephalus*.

We updated the final rule to reflect comments and information we received during the comment period. We address opposing comments and other substantive comments concerning the rule below.

Issue 1: *Yermo xanthocephalus* warrants endangered status, not threatened status.

Response: As mentioned above, the population of Yermo xanthocephalus has increased from 9,293 individuals in 1995 to 11,967 individuals in 2001. The future existence of the species is threatened by potential oil and gas development and other factors, including its extremely limited range. Although we believe the species is likely to become endangered in the foreseeable future if the threats to the habitat are realized, the population has shown stability since 1995. Additionally, the population occurs on Federal land and BLM is cooperating with interested parties to conserve the plant. A monitoring and research program is being implemented as well. As a result, *Y. xanthocephalus* does not meet the definition of an endangered species under the Act because it is not in imminent danger of extinction in the foreseeable future. Therefore, listing as threatened is appropriate.

Issue 2: Listing of *Yermo xanthocephalus* is not warranted since the population has increased from 500 plants in 1990 to an estimated 15,000 plants in 1998.

Response: The proposed rule did indicate that the population contained an estimated 15,000 plants. The actual population size (based upon counting of all plants) was 11,635. The population has fluctuated between 9,293 and 13,244 since 1995, with the 2001 population being comprised of 11,927 individual plants. However, a meaningful comparison of the recent numbers with Dorn's initial estimate is not possible. The 1990 estimate of 500 plants made by Dorn was based purely on a visual estimate of 1 subpopulation within 1 hectare (2.5 acres). Subsequent surveys since 1995 by Dick Scott have involved counting all plants in all three subpopulations. It is not possible to make trend estimates comparing such different survey methods implemented on disparate acreages.

Issue 3: Listing *Yermo xanthocephalus* will draw attention to its location and increase the risk of harm through vandalism or collection. Similarly, critical habitat designation is not prudent because it will increase these risks.

Response: We remain concerned that publication of precise maps and descriptions of critical habitat in the **Federal Register** and local newspapers could increase the vulnerability of this plant to incidents of collection, general vandalism, and trampling by curiosity-seekers. However, we do not believe the listing of *Yermo xanthocephalus* increases the likelihood of such activities. The general location of *Y. xanthocephalus* is widely known by

VOL
67
ISS
50
MR
14
2002
UMI

many citizens. At this time we have no specific evidence of taking, vandalism, collection or trade of this species. We do not believe listing the species will increase this threat. Additionally, in the absence of specific evidence, we cannot conclude that designation of critical habitat would not be prudent based on increased threat. See the Critical Habitat section below for more detailed discussion of this issue.

Issue 4: Livestock use of the area and associated potential adverse effects to *Yermo xanthocephalus* are not characterized correctly.

Response: We have adjusted our description of livestock use in the area to better reflect information provided during the comment period. We acknowledge that livestock grazing may not currently be resulting in significant adverse effects to the *Yermo xanthocephalus* population. However, we believe a low level of adverse effect is occurring with the potential to become more significant in the future.

Issue 5: The existing data contain significant gaps and the Service should complete studies prior to making a listing determination.

Response: We thoroughly reviewed all scientific data available on *Yermo xanthocephalus* in preparing the proposed rule. We contacted experts and reviewed data collected since intensive population monitoring began in 1995. We based our opinion on the best scientific and commercial data available, as required by section 4(b)(1) of the Act. We have reviewed this information and any new information available since the date of the proposed rule in making this final listing decision.

Peer Review

In accordance with our peer review policy published on July 1, 1994 (59 FR 34270), we requested the expert opinions of three independent specialists regarding pertinent scientific or commercial data and assumptions relating to supportive biological and ecological information in the proposed rule. The purpose of such review is to ensure that the listing decision is based on scientifically sound data, assumptions, and analyses, including input of appropriate experts and specialists. Two of the specialists responded with comments. We have incorporated their comments into the final rule, as appropriate, and summarized their observations below.

One reviewer questioned the adequacy of the Act to appropriately protect *Yermo xanthocephalus* without making it more vulnerable to collectors and vandals. Additionally, the reviewer believed that certain land use changes (such as restriction of cattle and wildlife grazing) might be detrimental to the plant.

The second reviewer believed the evidence supported listing *Yermo xanthocephalus* as either threatened or endangered. The reviewer provided information regarding unsuccessful attempts to locate *Y. xanthocephalus* in other suitable habitat and indicated it is unlikely other populations of *Y. xanthocephalus* will be found. This reviewer expressed concerns regarding the likelihood that adequate funding and commitment will be provided to implement the BLM conservation strategy for the species. Additionally, the reviewer indicated a need for captive propagation and establishment of new populations as necessary conservation measures that should be implemented.

Summary of Factors Affecting the Species

Section 4 of the Act and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to the Federal lists. A species may be determined endangered or threatened due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Yermo xanthocephalus* (desert yellowhead) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range:* The entire known range of *Yermo xanthocephalus* consists of an area of 20 hectares (50 acres) in southern Fremont County, Wyoming. Surveys conducted since 1990 have failed to find additional populations, although there are a number of sites with similar soils, drainage and plant associations in the area. Surveys conducted since 1995 by Dr. Ron Hartman in similar potential habitat within the North Platte watershed, Washakie basin, Great Divide basin, and Green River basin have proved equally unsuccessful in locating additional populations (W. Fertig, University of Wyoming, *in litt.*, 1999). The plant is easily recognized during its summer flowering season, so it seems likely that surveys would have found additional populations if they exist. Therefore, the species is vulnerable to extinction from even small-scale habitat degradation due to its small population size and limited geographic range.

The known population is threatened by surface disturbances associated with recreation, oil and gas development, mineral extraction, trampling by livestock, and soil compaction by vehicles (Fertig 1995). Recreational off-road vehicle use presents a threat to *Yermo xanthocephalus* through the crushing of plants and compaction or erosion of soil. This threat is greatest in the spring and summer when plants are in flower or heavy with fruit. No physical barriers prevent vehicle use in the immediate area of the *Y. xanthocephalus* population. The known population is several miles from Wyoming State Highway 135 and other maintained roads. In 1996, Highway 135 had an estimated daily traffic of 360 vehicles (Wyoming Department of Transportation 1996). A two-track, four-wheel drive trail leading to an abandoned oil well bisects the population, and is open to hunters or other recreationists using four-wheel drive trucks and other smaller all-terrain vehicles (ATVs). The most common activities that attract users to the area are hunting, rock collecting, and searching for human artifacts (such as arrowheads). The population is a few miles north of the Sweetwater Crossing on the Oregon-California Trail, which is a popular tourist attraction. There has been no significant surface disturbance caused by vehicles during the past 6 years that the site has been under study (R. Scott, Central Wyoming College, pers. comm., 2001). However, Scott (2000) has noted light vehicular traffic and fresh tire tracks in the site. The BLM Resource Management Plan limits vehicle use to existing roads (including established two-tracks), but the potential for habitat and plant destruction by ATVs remains a threat.

Oil and gas development also threaten the known population. In 1997, BLM leased for oil and gas development a 1,160-acre tract (designated WYW140702) that encompasses the *Yermo xanthocephalus* population. An adjacent lease (WYW138846) consisting of 2,080 acres was purchased by the same operator in May 1996. Both leases are for a 10-year period, and no specific lease stipulations were included to protect the plant. Construction of well pads, access roads, and pipelines through occupied habitat would result in direct destruction or crushing of plants and soil compaction and erosion. The 1920 Mineral Leasing Act promotes maximum recovery of Federal mineral resources. However, the 1987 Amendments to the Mineral Leasing Act (30 U.S.C. 226(g)) require lessees to have an approved operating plan that protects surface resources prior to submitting Applications for Permission to Drill. The BLM regulations provide that

species that are candidates for listing under the Act be afforded protection.

The current lessee is aware that the plant exists in the area, and has been very cooperative with BLM staff. The current drilling plan proposes exploration in locations that should not pose a threat to *Yermo xanthocephalus*, but the current operator is free to sell its leases to other companies that could revise the drilling plan. An existing two-track road leading to an abandoned oil well currently bisects the only population of *Y. xanthocephalus*. Redrilling of abandoned wells in search of producing formations that may have been previously overlooked is a common technique used during oil and gas exploration. Permits to drill can be conditioned by BLM to provide some protection to sensitive species by requiring a proposed drill pad be relocated up to 200 meters (656 feet). Candidate, proposed, and listed species can be protected by prohibiting surface occupancy in known populations.

Although the current oil and gas exploratory wells pose no threat to *Yermo xanthocephalus*, the discovery of an oil or gas pool on the lease areas would precipitate field developments that would introduce new threats to the plant and its habitat. In-field development could involve up to eight wells per section, depending on the characteristics of the producing formations. This intensified drilling activity would result in a new network of additional roads and well pads, and more human intrusion into what is now a remote area.

Seismic explorations for oil and gas producing formations also present a threat to *Yermo xanthocephalus* and its habitat through use of explosives, direct trampling, and soil compaction. However, these activities were carried out in the lease area during the early 1990s, so a permit application for further exploration is not likely. In addition, seismic explorations on BLM surface now require environmental analysis prior to permitting, and BLM will protect occupied *Y. xanthocephalus* habitat from damage if a request for further exploration is received (J. Kelly, BLM, pers. comm., 1998).

The known *Yermo xanthocephalus* population is located in an area managed by BLM's Lander Field Office, and locatable mineral resources, such as gold and uranium, are known to exist in that part of Wyoming. Private parties can stake a mining claim, explore for, and extract locatable minerals in accordance with the 1872 General Mining Law, and such activity could jeopardize the known population of *Y. xanthocephalus*. Uranium and zeolites, a locatable mineral with properties useful in water softening, manufacturing of catalysts, and pollution control, are found in the Beaver Rim area. Zeolites also may have marketability for use in processes to remove radioactive products from radioactive wastes (Bureau of Land Management 1986). The BLM's authority to regulate mineral claims under the 1872 General Mining Law is limited, although mining activities in areas with 5 or more acres of surface disturbance of unpatented BLM land are required to have an approved operating plan under 43 CFR 3809. Although the staking of locatable mineral claims on or near the plant's habitat is not likely, official withdrawal of the area from locatable mineral claims would remove this threat.

Livestock grazing also may present a threat to *Yermo xanthocephalus* habitat, which is within an existing grazing allotment. Although Fertig (1995) indicated livestock appear to use the *Y. xanthocephalus* habitat primarily as a travel corridor between adjacent sagebrush-grassland pastures, the area is actually a large pasture and livestock trampling of plants occurs only as cattle casually move along "cow trails" or two-tracks while grazing or moving to water. Scott (2000) noted signs of moderate horse traffic adjacent to the site. There are no existing barriers to prevent livestock access to the habitat. Fencing of the area would protect the plants from this threat, but also would probably result in a change in the associated plant community in the habitat. This change could result in unanticipated adverse impacts to the survival of *Y. xanthocephalus*.

B. *Overutilization for commercial, recreational, scientific, or educational purposes: Yermo xanthocephalus* is vulnerable to over-collecting conducted for scientific or educational purposes because of its small extant population size and habitat. The leaves of *Y. xanthocephalus* contain a chemical that produces a mild numbing sensation in the human mouth when even tiny portions are tasted (R. Scott, pers. comm., 1998). This could indicate potential medicinal qualities that could prove attractive to pharmaceutical companies, but the potential for this to be a threat to the existing population is currently unknown.

C. *Disease or predation:* Cattle graze in the immediate vicinity of occupied Yermo xanthocephalus habitat, but observation on the site indicate that the plant is not palatable to grazers. Tracks reveal that domestic and wild animals grazing the area spit out *Y. xanthocephalus* leaves and flowers after tasting (R. Scott, pers. comm., 1998). Predation of *Y. xanthocephalus* fruit by insects does occur, and in 1990 fruit production appeared low because of insect predation. However, it is unknown whether or not the extent of current predation differs from historical levels. Therefore, the degree of threat that this factor poses to the species is unknown.

D. *The inadequacy of existing regulatory mechanisms:* The State of Wyoming has no endangered species act or other laws to provide protection to plant species. The current BLM Lander Resource Management Plan (RMP), which covers the known population of *Yermo xanthocephalus*, was approved in 1987, 3 years prior to the species' discovery. Therefore, the plan does not specifically mention the species. The RMP protects special status plant species in general across the entire Resource Area, and provides no-surface-occupancy restrictions for threatened and endangered species impacted by oil and gas development. As *Y. xanthocephalus* is not currently listed, and no specific stipulations were included with the current oil and gas leases, attempts by BLM to restrict activities by imposing conditions during the application to drill stage are appealable by the operator. On April 9, 2001, BLM approved a list of sensitive species occurring on BLM properties in Wyoming. The list is intended to heighten awareness of the conservation needs of the species and encourage protective measures where possible. However, there are no protective measures mandated for the species. Additionally, *Y. xanthocephalus* is not currently on the sensitive species list and would have to be officially added.

E. *Other natural or manmade factors affecting its continued existence:* Species with small population size and restricted distribution are vulnerable to extinction by natural processes and human disturbance (Levin et al. 1996). Random events causing population fluctuations or population extirpations become a serious concern when the number of individuals or the geographic distribution of the species is very limited. A single human-caused or natural environmental disturbance could destroy the entire population of *Yermo xanthocephalus*.

This species physically occupies an area of 3.37 hectares (8.33 acres), and while the total number of plants known to exist through actual counting of each plant has increased from 9,293 in 1995 to 11,967 in 2001 (with a high of 13,244 in 2000), this increase may be due to higher than normal precipitation during study years (R. Scott, Central Wyoming

VOL
67

2002
UMI

College, pers. comm., 2001). The establishment of this species is probably episodic and dependent on suitable spring and summer moisture conditions (Fertig 1995). Total fruit production appeared low due to heavy herbivory by insects and drought-induced abortion in 1990 (Dorn 1991). Dorn further speculated that in typical years recruitment of seedlings is probably extremely low or nil. However, observations since then have not supported that reproduction is necessarily low or that heavy herbivory by insects causes low reproduction. Drought-induced abortion has not been studied (Bureau of Land Management 1998). A decrease in population size from 12,099 plants in 1997 to 11,635 plants in 1998 may have been due to overall decreased precipitation (R. Scott, Central Wyoming College, pers. comm., 2001). A similar decrease in population size from 13,244 plants in 2000 to 11,967 in 2001 was noted and seems to have coincided with decreased precipitation. Therefore, a series of drought years could result in a severe reduction in population size and eventual extinction.

As described by Fertig (1995), the species is characterized by a long-lived perennial growth form, adaptation to severe habitats, and low annual reproductive output. This low reproductive output makes the species increasingly vulnerable to extinction due to chance events as population size declines, because it is unlikely that the species will exhibit a high rate of population growth, even if environmental conditions improve after such an event.

In addition to the above factors, threats to *Yermo xanthocephalus* are increased when people use the occupied area for recreational purposes. For example, erosion or trampling of plants is possible due to hikers or off-road vehicle use. The species occurs on barren sites with less than 25 percent total vegetative cover, and may be intolerant of competition (Fertig 1995). Competition from plants not native to the area would pose a greater threat than competition from species with which *Y. xanthocephalus* has evolved. Non-native plants that might outcompete *Y. xanthocephalus* could be introduced to the area if their seeds are carried in on the footwear or clothing of recreationists.

An additional threat that affects *Yermo xanthocephalus* is that posed by its small population size. Populations of plants that remain very small for several generations or that have gone through a past episode of rapid population decline may lose much of their previous genetic variability (Godt et al. 1996). When a population's genetic variability falls to low levels, its long-term persistence may be jeopardized because its ability to respond to changing environmental conditions is reduced. In addition, the potential for inbreeding depression increases, which means that fertility rates and survival rates of offspring may decrease. Although environmental and demographic factors usually supercede genetic factors in threatening species viability, inbreeding depression and the low genetic diversity may enhance the probability of extinction of rare plant species (Levin et al. 1996).

We have carefully assessed the best scientific and commercial information available regarding the past, present, and future threats to *Yermo xanthocephalus* in determining to issue this final rule. Based on this evaluation, the preferred action is to list *Y. xanthocephalus* as threatened. Although the population has increased since 1995, the future existence of the species is still threatened by potential oil and gas in-field development and by its extremely limited habitat and population size. While not in immediate danger of extinction, *Y. xanthocephalus* is likely to become an endangered species in the foreseeable future if the threats to the habitat are realized and if present threats posed by small population size and limited geographic range continue to exist. We have determined that threatened status would provide adequate protection from the described threats. As the species occurs only on Federal surface, a classification as endangered, if warranted, would provide no additional level of protection.

Critical Habitat

Critical habitat is defined in section 3 of the Act as—(i) the specific areas within the geographical area occupied by a species, at the time it is listed in accordance with the Act, on which are found those physical or biological features (I) essential to the conservation of the species and (II) that may require special management considerations or protection; and (ii) specific areas outside the geographical area occupied by a species at the time it is listed, upon a determination that such areas are essential for the conservation of the species. "Conservation" means the use of all methods and procedures needed to bring the species to the point at which listing under the Act is no longer necessary.

Section 4(a)(3) of the Act, as amended, and implementing regulations (50 CFR 424.12) require that, to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time the species is determined to be endangered or threatened. Our regulations (50 CFR 424.12(a)(1)) state that designation of critical habitat is not prudent when one or both of the following situations exist—(1) The species is threatened by taking or other human activity, and identification of critical habitat can be expected to increase the degree of threat to the species, or (2) such designation of critical habitat would not be beneficial to the species.

Critical habitat receives consideration under section 7 of the Act with regard to actions carried out, authorized, or funded by a Federal agency (see Available Conservation Measures section). As such, designation of critical habitat may affect activities on Federal lands and may affect activities on non-Federal lands where such a Federal nexus exists. Under section 7 of the Act, Federal agencies are required to ensure that their actions do not jeopardize the continued existence of a species or result in destruction or adverse modification of critical habitat. However, both jeopardizing the continued existence of a species and adverse modification of critical habitat often have similar standards and thus similar thresholds for violation of section 7 of the Act.

Critical habitat designation, in some situations, may provide some value to the species by identifying areas important for species conservation and calling attention to those areas in special need of protection. Critical habitat designation of unoccupied habitat also may benefit these species by alerting permitting agencies to potential sites for reintroduction and allowing them the opportunity to evaluate proposals that may affect those areas.

In the proposed rule, we found that the designation of critical habitat for *Yermo xanthocephalus* was not prudent because the minimal benefits of such designation would be far outweighed by the increase of threats from over collection or other human activities. We believed critical habitat designation would provide no additional benefit to the species beyond that conferred under sections 7 and 9 of the Act by listing. We indicated protection of *Y. xanthocephalus* would be most effectively addressed through the recovery process under section 4 of the Act and the consultation process under section 7 of the Act, and the current interagency coordination processes.

Given the extremely limited range of *Yermo xanthocephalus*, we believed any case of adverse modification of its habitat also would constitute jeopardy for the taxon. The designation of critical habitat for the purpose of informing Federal agencies of the location of occupied *Y. xanthocephalus* habitat was not thought to be necessary because BLM currently permits the surveys and monitoring of the only extant population. *Yermo xanthocephalus* is not known to have previously existed on any other sites. If future management actions include unoccupied habitat, the Service believed any benefit provided by designation of such habitat as critical would be conferred more effectively and efficiently through the current coordination process.

In the proposed rule, we indicated vandalism and unauthorized collection of *Yermo xanthocephalus* could be a significant threat to the species' survival and recovery, because of the plant's rarity and the fact that it is a monotypic genus. Critical habitat designation would require publication of the legal description of the 20 hectares (50 acres) habitat site in the **Federal Register**, providing information that might encourage collectors.

We received two comments agreeing with our prudency determination based upon possible adverse effects from collecting if the location of the plant is disclosed. Two commenters also expressed concern that the listing alone may draw attention to the plant's location and possibly lead to adverse effects from collection or vandalism.

Recent court decisions (*e.g., Natural Resources Defense Council* v. *U.S. Department of the Interior* 113 F. 3d 1121 (9th Cir. 1997); *Conservation Council for Hawaii* v. *Babbitt*, 2 F. Supp. 2d 1280 (D. Hawaii 1998)) have forced us to reevaluate our "not prudent" finding. The *Conservation Council* ruling is particularly relevant to our determination. In that case, the court held that in order to conclude that designation would increase the risk to the species, the Service must have evidence of specific threats (such as instances of collection and vandalism) that would be increased by designation of critical habitat. The court said that without species-specific evidence, the fact that there are few plants and that even a single taking could cause the species to become extinct was not sufficient justification for a "not prudent" finding based on increased threat.

We remain concerned that publication of precise maps and descriptions of critical habitat in the **Federal Register** and local newspapers could increase the vulnerability of this plant to incidents of collection, general vandalism, and trampling by curiosity-seekers. Due to the relatively low numbers of individuals, small area covered by the population, and the inherent transportability of plants, *Yermo xanthocephalus* is vulnerable to collection and other disturbance. However, at this time we have no specific evidence of taking, vandalism, collection or trade of this species. This may be due to its fairly recent description as a new species to science and its remote location. Nonetheless, in the absence of specific evidence, we cannot conclude that designation would not be prudent based on increased threat.

Without a finding that critical habitat would increase threats to a species, then designation would be prudent if it would provide any benefits to the species. As to benefits of designation on Federal land, the court ruled in *Conservation Council of Hawaii* v. *Babbitt* that if even as a general rule an action that would adversely modify critical habitat was likely to jeopardize the continued existence of the species, the Service must consider the adverse modification/jeopardy relationship for each species individually. The court also ruled that designation of critical habitat on any type of land serves to educate the public and government officials that this habitat is essential to the protection of the species.

With this taxon, designation of critical habitat may provide some minor benefits. The primary regulatory effect of critical habitat designation is to require Federal agencies to consult before taking any action that could destroy or adversely modify critical habitat. A critical habitat designation for habitat currently occupied by this species would not be likely to change the section 7 consultation outcome, because an action that destroys or adversely modifies such critical habitat also would be likely to result in jeopardy to the species. However, there may be instances where section 7 consultation would be triggered only if critical habitat is designated. Examples could include designated unoccupied habitat or occupied habitat that may become unoccupied in the future. No such habitat is known at this time, but some may be found in the future. Additionally, there will be educational or informational benefits from designating critical habitat.

Reevaluating our prudency determination under the standards mandated by court decisions, we find that designation of critical habitat for *Yermo xanthocephalus* is prudent. However, our budget for listing activities is currently insufficient to allow us to immediately complete all the listing actions required by the Act. Listing *Y. xanthocephalus* as threatened without designation of critical habitat will allow us to concentrate our limited resources on other listing actions that must be addressed, while allowing us to invoke the protections needed for the conservation of this species without further delay. This is consistent with section 4(b)(6)(C)(i) of the Act, which states that final listing decisions may be issued without critical habitat designations when it is essential that such determinations be promptly published. We will prepare a critical habitat designation in the future at such time when our available resources and priorities allow.

Available Conservation Measures

Conservation measures provided to a species listed as endangered or threatened under the Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, local and private agencies, groups, and individuals. The Act provides for possible land acquisition, cooperation with the States, and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibitions against certain activities impacting listed plants are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened, and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) of the Act requires Federal agencies to confer informally with us on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) of the Act requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with us.

Thus, the Act will require BLM to evaluate potential impacts to *Yermo xanthocephalus* that may result from activities it authorizes or permits, such as oil and gas development, grazing, and

VOL
67
ISS
50
MR
14
2002
UMI

recreational use. No special land management designations or conservation agreements currently exist to provide special protection for *Y. xanthocephalus*. Section 43 U.S.C. 1712(c)(3) allows BLM to protect tracts as Areas of Critical Environmental Concern (ACEC). Designation of the plant's habitat as an ACEC is a long process and would not, in itself, afford the species protection, unless a management plan for the ACEC identified the protective measures to be put in place. The BLM has prepared a draft conservation agreement, assessment, and strategy which outlines management, inventory, and monitoring actions to be taken to ensure the conservation of this species. However, the draft has not been finalized or signed.

The Act and its implementing regulations set forth a series of general prohibitions and exceptions that apply to all threatened plants. All prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.71, apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export, transport in interstate or foreign commerce in the course of a commercial activity, sell or offer for sale in interstate or foreign commerce, or remove and reduce the species to possession from areas under Federal jurisdiction. In addition, for plants listed as endangered, the Act prohibits the malicious damage or destruction on areas under Federal jurisdiction and the removal, cutting, digging up, or damaging or destroying of such plants in knowing violation of any State law or regulation, including State criminal trespass law. Section 4(d) of the Act allows for the provision of such protection to threatened species through regulation. This protection may apply to this species in the future if regulations are promulgated. Seeds from cultivated specimens of threatened plants are exempt from these prohibitions provided that their containers are marked "Of Cultivated Origin." Certain exceptions to the prohibitions apply to agents of the Service and State conservation agencies.

The Act and 50 CFR 17.72 also provide for the issuance of permits to carry out otherwise prohibited activities involving threatened plants under certain circumstances. Such permits are available for scientific purposes and to enhance the propagation or survival of the species. For threatened plants, permits also are available for botanical or horticultural exhibition, educational purposes, or special purposes consistent with the purposes of the Act. We anticipate that few trade permits will ever be sought or issued for *Yermo xanthocephalus* because the species is not in cultivation or common in the wild. Requests for copies of the regulations regarding listed species and inquiries about prohibitions and permits may be addressed to U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, Colorado 80225 (telephone (303) 236–7400, facsimile (303) 236–0027).

We adopted a policy on July 1, 1994 (59 FR 34272), to identify to the maximum extent practicable at the time a species is listed those activities that would or would not constitute a violation of section 9 of the Act. The intent of this policy is to increase public awareness of the effect of the listing on future and ongoing activities within a species' range. We believe that based upon the best available information, the actions listed below would not result in a violation of section 9 of the Act provided these activities are carried out in accordance with existing regulation and permit requirements:

(1) Activities authorized, funded, or carried out by Federal agencies (e.g., grazing management, agricultural conversions, range management, rodent control, mineral development, road construction, human recreation, pesticide application, controlled burns) and construction/maintenance of facilities (e.g., fences, power lines, pipelines, utility lines) when such activity is conducted according to any reasonable and prudent measures given by the Service in a consultation conducted under section 7 of the Act; and

(2) Casual, dispersed human activities on foot (*e.g.*, bird watching, sightseeing, photography, and hiking).

The actions listed below may potentially result in a violation of section 9 of the Act; however, possible violations are not limited to these actions alone:

(1) Unauthorized collecting of the species on Federal Lands;

(2) Interstate or foreign commerce and import/export without previously obtaining an appropriate permit. Permits to conduct activities are available for purposes of scientific research and enhancement of propagation or survival of the species.

Questions regarding whether specific activities, such as changes in land use, will constitute a violation of section 9 should be directed to the Wyoming Field Office (see **ADDRESSES** section).

Required Determinations

We have determined that Environmental Assessments and Environmental Impact Statements, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared concerning regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining our reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Paperwork Reduction Act

This rule does not contain any new requests or requirements for collection of information, other than those associated with permits, already approved under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, and assigned Office of Management and Budget control number 1018–0094, which is valid through July 31, 2004. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information, unless it displays a currently valid control number. For additional information concerning permit and associated requirements for threatened species, see 50 CFR 17.32.

Proposed Rules

Federal Register
Vol. 67, No. 50
Thursday, March 14, 2002

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 905

[Docket No. FV02–905–1]

Oranges, Grapefruit, Tangerines, and Tangelos Grown in Florida; Continuance Referendum

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Referendum order.

SUMMARY: This document directs that a referendum be conducted among eligible producers of Florida citrus fruit to determine whether they favor continuance of the marketing order regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in the production area.

DATES: The referendum will be conducted from April 4, 2002 through April 26, 2002. To vote in this referendum, growers must have been producing Florida citrus during the period August 31, 2000, through September 1, 2001.

ADDRESSES: Copies of the marketing order may be obtained from the office of the referendum agent at 799 Overlook Drive, Suite A, Winter Haven, Florida 33884, or the Office of the Docket Clerk, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW., STOP 0237, Washington, DC, 20250–0237.

FOR FURTHER INFORMATION CONTACT: William G. Pimental, Southeast Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Programs, Agricultural Marketing Service, Department of Agriculture, at 799 Overlook Drive, Suite A, Winter Haven, Florida 33884; telephone (863) 324–3375; or Melissa Schmaedick, Marketing Order Administration Branch, Fruit & Vegetable Programs, Agricultural Marketing Service, Department of Agriculture, 1400 Independence Avenue, SW., STOP 0237, Washington, DC 20250–0237; telephone (202) 720–2491.

SUPPLEMENTARY INFORMATION: Pursuant to Marketing Order No. 905 (7 CFR part 905), hereinafter referred to as the "order" and the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act," it is hereby directed that a referendum be conducted to ascertain whether continuance of the order is favored by producers. The referendum shall be conducted during the period April 4, 2002 through April 26, 2002 among Florida citrus producers in the production area. Only producers that were engaged in the production of Florida citrus during the period of August 31, 2000, through September 1, 2001, may participate in the continuance referendum.

The Department of Agriculture (USDA) has determined that continuance referenda are an effective means for ascertaining whether producers favor continuation of marketing order programs. The USDA would consider termination of the order if less than two-thirds of the producers voting in the referendum and producers of less than two-thirds of the volume of Florida citrus represented in the referendum favor continuance. In evaluating the merits of continuance versus termination, the USDA will consider the results of the referendum and other relevant information regarding operation of the order. USDA will evaluate the order's relative benefits and disadvantages to growers, handlers, and consumers to determine whether continuing the order would tend to effectuate the declared policy of the Act.

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the ballot materials used in the referendum herein ordered have been submitted to and approved by the Office of Management and Budget (OMB) and have been assigned OMB No. 0581–0189 for Florida citrus. It has been estimated that it will take an average of 20 minutes for each of the approximately 11,970 producers of Florida citrus to cast a ballot. Participation is voluntary. Ballots postmarked after May 6, 2002 will not be included in the vote tabulation.

William G. Pimental and Christian D. Nissen of the Southeast Marketing Field Office, and Melissa Schmaedick of the Washington, DC Office, Fruit and Vegetable Programs, Agricultural Marketing Service, USDA, are hereby designated as the referendum agents of the USDA to conduct such referendum. The procedure applicable to the referendum shall be the "Procedure for the Conduct of Referenda in Connection With Marketing Orders for Fruits, Vegetables, and Nuts Pursuant to the Agricultural Marketing Agreement Act of 1937, as Amended" (7 CFR part 900.400 *et seq*).

Ballots will be mailed to all producers of record and may also be obtained from the referendum agents and from their appointees.

List of Subjects in 7 CFR Part 905

Grapefruit, Marketing agreements, Oranges, Reporting and recordkeeping requirements, Tangelos, and Tangerines.

Authority: 7 U.S.C. 601–674.

Dated: March 8, 2002.

A.J. Yates,

Administrator, Agricultural Marketing Service.

BILLING CODE 3410–08–P

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

9 CFR Part 319

[Docket No. 01–018E]

Definitions and Standards of Identity or Composition: Elimination of the Pizza Standard

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Proposed rule: Reopening and extension of comment period.

SUMMARY: The Food Safety and Inspection Service (FSIS) is reopening and extending the comment period for the proposed rulemaking, "Definitions and Standards of Identity or Composition: Elimination of the Pizza Standard," that closed on January 2, 2002. This action responds to requests from two trade associations and a private company to allow additional time for comment.

DATES: Comments are due April 15, 2002.

ADDRESSES: Send one original and two copies of written comments to FSIS Docket No. 01–018P, Department of Agriculture, Food Safety and Inspection Service, Room 102, 300 12th Street, SW., Washington, DC 20250–3700.

FOR FURTHER INFORMATION CONTACT: Robert C. Post, Ph.D., Director, Labeling and Consumer Protection Staff, Office of Policy, Program Development and Evaluation, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250–3700; (202) 205–0279

SUPPLEMENTARY INFORMATION: On November 2, 2001, FSIS published a proposed rule, "Definitions and Standards of Identity or Composition: Elimination of the Pizza Standard" (66 FR 55601). In that document, the Agency proposed to amend the Federal meat inspection regulations to remove the standards of identity for "pizza with meat" and "pizza with sausage" and provided a 60-day comment period ending on January 2, 2002. FSIS received three comments requesting that the Agency extend the comment period for the proposed rule. Two comments from industry trade associations requested that the Agency extend the comment period for an additional 60 days and one comment from a private company requested that the Agency extend the comment period for an additional 90 days. The commenters requested additional time to get input and feed-back from trade association members who may be affected by the proposed rule and to conduct, gather, and analyze consumer research data. Because the comment period included the holiday season, the requestors asked for additional time to accommodate loss of time during the holidays.

FSIS has considered the requests and will reopen the comment period. However, FSIS is only reopening the comment period for an additional 30 days, which will provide additional time for comments to be made, while ensuring that the rulemaking proceeds in a timely manner. As a result of this reopening and extension, the comment period for the proposed rule will close on April 15, 2002.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, in an effort to better ensure that minorities, women, and persons with disabilities are aware of this notice, FSIS will announce the meeting and provide copies of this **Federal Register** publication in the FSIS Constituent Update. FSIS provides a weekly FSIS Constituent Update, which is communicated via fax to over 300 organizations and individuals. In addition, the update is available on-line through the FSIS web page located at *http://www.fsis.usda.gov*. The update is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, recalls, and any other types of information that could affect or would be of interest to our constituents/stakeholders. The constituent fax list consists of industry, trade, and farm groups, consumer interest groups, allied health professionals, scientific professionals, and other individuals that have requested to be included. Through these various channels, FSIS is able to provide information to a much broader, more diverse audience. For more information and to be added to the constituent fax list, fax your request to the Congressional and Public Affairs Office, at (202) 720–5704.

Margaret O'K Glavin,

Acting Administrator.

[FR Doc. 02–6125 Filed 3–13–02; 8:45 am]

BILLING CODE 3410–DM–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 23

[Docket No. CE174; Notice No. 23–02–01–SC]

Special Conditions: Installation of Full Authority Digital Engine Control (FADEC) System on Liberty Aerospace, Model XL–2 Airplane

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed special conditions.

SUMMARY: This action proposes special conditions for Liberty Aerospace, Model XL–2 Airplane, which will use a FADEC System. This airplane will have a novel or unusual design feature associated with the installation of an engine that uses an electronic engine control system in place of the engine's mechanical system. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for this design feature. These proposed special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: Comments must be received on or before April 15, 2002.

ADDRESSES: Comments on this proposal may be mailed in duplicate to: Federal Aviation Administration, Regional Counsel, ACE–7, Attention: Rules Docket, Docket No. CE174, DOT Building, 901 Locust, Kansas City, Missouri 64106, or delivered in duplicate to the Regional Counsel at the above address. Comments must be marked: Docket No. CE174. Comments may be inspected in the Rules Docket weekdays, except Federal holidays, between 7:30 a.m. and 4 p.m.

FOR FURTHER INFORMATION CONTACT: Ervin Dvorak, Aerospace Engineer, Standards Office (ACE–110), Small Airplane Directorate, Aircraft Certification Service, Federal Aviation Administration, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone (816) 329–4123.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of these proposed special conditions by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Administrator. The proposals described in this action may be changed in light of the comments received. All comments received will be available in the Rules Docket for examination by interested persons, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerning this rulemaking will be filed in the docket. Persons wishing the FAA to acknowledge receipt of their comments submitted in response to this action must include with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. CE174." The postcard will be date stamped and returned to the commenter.

Background

On October 26, 2000, Liberty Aerospace applied for a Type Certificate for the Model XL–2 airplane. The Model XL–2 is a small, normal category airplane. The airplane is powered by one reciprocating engine equipped with an electronic engine control system with full authority capability in place of the hydromechanical control system,

VOL
67
ISS
50
MR
14
2002
UMI

Type Certification Basis

• Under the provisions of 14 CFR 21.17, Liberty Aerospace must show that the Model XL–2 meets the applicable provisions of 14 CFR part 23, as amended by Amendments 23–1 through 23.53 thereto.

If the Administrator finds that the applicable airworthiness regulations (i.e., 14 CFR part 23) do not contain adequate or appropriate safety standards for the Model XL–2 because of a novel or unusual design feature, special conditions are prescribed under the provisions of § 21.16.

In addition to the applicable airworthiness regulations and special conditions, the Model LC40–550FG must comply with the fuel vent and exhaust emission requirements of 14 CFR part 34 and the noise certification requirements of 14 CFR part 36, and the FAA must issue a finding of regulatory adequacy pursuant to section 611 of Public Law 92–574, the "Noise Control Act of 1972."

Special conditions, as appropriate, as defined in § 11.19, are issued in accordance with § 11.38 after public notice and become part of the type certification basis in accordance with § 21.17(a)(2).

Special conditions are initially applicable to the model for which they are issued. Should the type certificate for that model be amended later to include any other model that incorporates the same novel or unusual design feature, the special conditions would also apply to the other model under the provisions of § 21.101(a)(1).

Novel or Unusual Design Features

Liberty Aerospace, Model XL–2 Airplane will incorporate the following novel or unusual design features:

Liberty Aerospace, Model XL–2 airplane will use an engine that includes an electronic control system with full engine authority capability.

Many advanced electronic systems are prone to either upsets or damage, or both, at energy levels lower than analog systems. The increasing use of high power radio frequency emitters mandates requirements for improved high intensity radiated fields (HIRF) protection for electrical and electronic equipment. Since the electronic engine control system used on the Liberty Aerospace, Model XL–2 will perform critical functions, provisions for protection from the effects of HIRF fields should be considered and, if necessary, incorporated into the airplane design data. The FAA policy contained in Notice 8110.71, dated April 2, 1998, establishes the HIRF energy levels that airplanes will be exposed to in service. The guidelines set forth in this Notice are the result of an Aircraft Certification Service review of existing policy on HIRF, in light of the ongoing work of the ARAC Electromagnetic Effects Harmonization Working Group (EEHWG). The EEHWG adopted a set of HIRF environment levels in November 1997 that were agreed upon by the FAA, JAA, and industry participants. As a result, the HIRF environments in this notice reflect the environment levels recommended by this working group. This notice states that a full authority digital engine control is an example of a system that should address the HIRF environments.

Even though the control system will be certificated as part of the engine, the installation of an engine with an electronic control system requires evaluation due to the possible effects on or by other airplane systems (e.g., radio interference with other airplane electronic systems, shared engine and airplane power sources). The regulatory requirements in 14 CFR part 23 for evaluating the installation of complex systems, including electronic systems, are contained in § 23.1309. However, when § 23.1309 was developed, the use of electronic control systems for engines was not envisioned; therefore, the § 23.1309 requirements were not applicable to systems certificated as part of the engine (reference § 23.1309(f)(1)). Also, electronic control systems often require inputs from airplane data and power sources and outputs to other airplane systems (e.g., automated cockpit powerplant controls such as mixture setting). Although the parts of the system that are not certificated with the engine could be evaluated using the criteria of § 23.1309, the integral nature of systems such as these makes it unfeasible to evaluate the airplane portion of the system without including the engine portion of the system. However, § 23.1309(f)(1) again prevents complete evaluation of the installed airplane system since evaluation of the engine system's effects is not required.

Therefore, special conditions are proposed for the Liberty Aerospace, Model XL–2 to provide HIRF protection and to evaluate the installation of the electronic engine control system for compliance with the requirements of § 23.1309(a) through (e) at Amendment 23–46.

Applicability

As discussed above, these special conditions are applicable to the Liberty Aerospace, Model XL–2 Airplane. Should Liberty Aerospace apply at a later date for a change to the type certificate to include another model incorporating the same novel or unusual design feature, the special conditions would apply to that model as well under the provisions of § 21.101.

Conclusion

This action affects only certain novel or unusual design features on one model, Liberty Aerospace, Model XL–2 Airplane. It is not a rule of general applicability, and it affects only the applicant who applied to the FAA for approval of these features on the airplane.

List of Subjects in 14 CFR Part 23

Aircraft, Aviation safety, Signs and symbols.

Citation

The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 106(g), 40113 and 44701; 14 CFR 21.16 and 21.17; and 14 CFR 11.38 and 11.19.

The Proposed Special Conditions

Accordingly, the Federal Aviation Administration (FAA) proposes the following special conditions as part of the type certification basis for Liberty Aerospace, Model XL–2 Airplane.

1. *High Intensity Radiated Fields (HIRF) Protection.* In showing compliance with 14 CFR part 21 and the airworthiness requirements of 14 CFR part 23, protection against hazards caused by exposure to HIRF fields for the full authority digital engine control system, which performs critical functions, must be considered. To prevent this occurrence, the electronic engine control system must be designed and installed to ensure that the operation and operational capabilities of this critical system are not adversely affected when the airplane is exposed to high energy radio fields.

At this time, the FAA and other airworthiness authorities are unable to precisely define or control the HIRF energy level to which the airplane will be exposed in service; therefore, the FAA hereby defines two acceptable interim methods for complying with the requirement for protection of systems that perform critical functions.

(1) The applicant may demonstrate that the operation and operational capability of the installed electrical and electronic systems that perform critical functions are not adversely affected when the aircraft is exposed to the external HIRF threat environment defined in the following table:

Frequency	Field strength (volts per meter)	
	Peak	Average
10 kHz–100 kHz	50	50
100 kHz–500 kHz	50	50
500 kHz–2 MHz	50	50
2 MHz–30 MHz	100	100
30 MHz–70 MHz	50	50
70 MHz–100 MHz	50	50
100 MHz–200 MHz	100	100
200 MHz–400 MHz	100	100
400 MHz–700 MHz	700	50
700 MHz–1 GHz	700	100
1 GHz–2 GHz	2000	200
2 GHz–4 GHz	3000	200
4 GHz–6 GHz	3000	200
6 GHz–8 GHz	1000	200
8 GHz–12 GHz	3000	300
12 GHz–18 GHz	2000	200
18 GHz–40 GHz	600	200

The field strengths are expressed in terms of peak root-mean-square (rms) values.

or,

(2) The applicant may demonstrate by a system test and analysis that the electrical and electronic systems that perform critical functions can withstand a minimum threat of 100 volts per meter peak electrical strength, without the benefit of airplane structural shielding, in the frequency range of 10 KHz to 18 GHz. When using this test to show compliance with the HIRF requirements, no credit is given for signal attenuation due to installation. Data used for engine certification may be used, when appropriate, for airplane certification.

2. *Electronic Engine Control System.* The installation of the electronic engine control system must comply with the requirements of § 23.1309(a) through (e) at Amendment 23–46. The intent of this requirement is not to re-evaluate the inherent hardware reliability of the control itself, but rather determine the effects, including environmental effects addressed in § 23.1309(e), on the airplane systems and engine control system when installing the control on the airplane. When appropriate, engine certification data may be used when showing compliance with this requirement.

Issued in Kansas City, Missouri on February 5, 2002.

Michael Gallagher,

Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 02–6131 Filed 3–13–02; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2000–NM–166–AD]

RIN 2120–AA64

Airworthiness Directives; McDonnell Douglas Model DC–9–81, –82, and –83 Series Airplanes, and Model MD–88 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain McDonnell Douglas Model DC–9–81, –82, and –83 series airplanes, and Model MD–88 airplanes. This proposal would require an inspection of the disconnect panel area above the aft left lavatory for chafed or damaged wires or unacceptable clearance between the wires and adjacent structure, and corrective actions, if necessary. This action is necessary to prevent chafing of wires at the disconnect panel above the aft left lavatory, which could result in electrical arcing, and consequent fire in the cabin. This action is intended to address the identified unsafe condition.

DATES: Comments must be received by April 29, 2002.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2000–NM–166–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays. Comments may be submitted via fax to (425) 227–1232. Comments may also be sent via the Internet using the following address: *9-anm-nprmcomment@faa.gov*. Comments sent via fax or the Internet must contain "Docket No. 2000–NM–166–AD" in the subject line and need not be submitted in triplicate. Comments sent via the Internet as attached electronic files must be formatted in Microsoft Word 97 for Windows or ASCII text.

The service information referenced in the proposed rule may be obtained from Boeing Commercial Aircraft Group, Long Beach Division, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Data and Service Management, Dept. C1-L5A (D800–0024). This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California.

FOR FURTHER INFORMATION CONTACT: Elvin Wheeler, Aerospace Engineer, Systems and Equipment Branch, ANM–130L, FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712–4137; telephone (562) 627–5344; fax (562) 627–5210.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this action may be changed in light of the comments received.

• Submit comments using the following format:

• Organize comments issue-by-issue. For example, discuss a request to change the compliance time and a request to change the service bulletin reference as two separate issues.

• For each issue, state what specific change to the proposed AD is being requested.

• Include justification (*e.g.*, reasons or data) for each request.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this action must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 2000–NM–166–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the

FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2000–NM–166–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

As part of its practice of re-examining all aspects of the service experience of a particular aircraft whenever an accident occurs, the FAA has become aware of an incident of uncommanded deployment of the cabin oxygen masks on a McDonnell Douglas Model MD–88 airplane. This deployment occurred as the airplane was in flight climbing through 19,000 feet. The oxygen mask deployment was isolated to the aft lavatories, aft flight attendant seat, and passenger seats aft of the aft galley. No oxygen system/mask deployment cockpit indication lights illuminated. Inspection revealed 30 burnt wires in the area of a disconnect panel above the aft left lavatory. The burnt wires were attributed to chafing against the disconnect panel structure due to slack in the wires from the module blocks to a wire bundle riding against the disconnect panel. Additional inspections revealed two airplanes with chafed wires, three airplanes with wiring coming into contact with surrounding structure, and seven airplanes with slack wiring.

Chafing of wires at the disconnect panel above the aft left lavatory, if not corrected, could result in electrical arcing, and consequent fire in the cabin.

The disconnect panel above the aft left lavatory on certain McDonnell Douglas Model DC–9–81, –82, and –83 series airplanes is identical to that on the affected Model MD–88 airplanes. Therefore, all of these models may be subject to the same unsafe condition.

Other Relevant Rulemaking

The FAA, in conjunction with Boeing and operators of Model DC–9–81, –82, and –83 series airplanes, and Model MD–88 airplanes, is continuing to review all aspects of the service history of those airplanes to identify potential unsafe conditions and to take appropriate corrective actions. This proposed airworthiness directive (AD) is one of a series of actions identified during that process. The process is continuing and the FAA may consider additional rulemaking actions as further results of the review become available.

Explanation of Relevant Service Information

The FAA has reviewed and approved Boeing Alert Service Bulletin MD80–24A184, including Appendix, dated October 26, 2000, which describes procedures for a general visual inspection of the disconnect panel area above the aft left lavatory for chafed or damaged wires or unacceptable clearance between the wires and adjacent structure; and corrective actions, if necessary. The corrective actions include securing wires using tie-wraps to obtain a 0.50-inch minimum clearance, and repairing or replacing any chafed or damaged wire with a new wire; as applicable. Accomplishment of the actions specified in the service bulletin is intended to adequately address the identified unsafe condition.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would require accomplishment of the actions specified in the service bulletin described previously.

Cost Impact

There are approximately 1,198 airplanes of the affected design in the worldwide fleet. The FAA estimates that 586 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 1 work hour per airplane to accomplish the proposed inspection, and that the average labor rate is $60 per work hour. Based on these figures, the cost impact of the proposed AD on U.S. operators is estimated to be $35,160, or $60 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this proposed AD were not adopted. The cost impact figures discussed in AD rulemaking actions represent only the time necessary to perform the specific actions actually required by the AD. These figures typically do not include incidental costs, such as the time required to gain access and close up, planning time, or time necessitated by other administrative actions. However, the FAA has been advised that manufacturer warranty remedies are available for some airplanes for labor costs associated with accomplishing the actions required by this proposed AD. Therefore, the future economic cost impact of this rule on U.S. operators may be less than the cost impact figure indicated above.

Regulatory Impact

The regulations proposed herein would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this proposal would not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

McDonnell Douglas: Docket 2000–NM–166–AD.

Applicability: Model DC–9–81, –82, and –83 series airplanes, and Model MD–88 airplanes; certificated in any category; as listed in Boeing Alert Service Bulletin MD80–24A184, dated October 26, 2000; equipped with Jamco lavatories.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (b) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent chafing of wires at the disconnect panel above the aft left lavatory, which could result in electrical arcing, and consequent fire in the cabin, accomplish the following:

Inspection and Corrective Action, If Necessary

(a) Within 120 days from the effective date of this AD, perform a general visual inspection of the disconnect panel area above the aft left lavatory for damaged or chafed wires or unacceptable clearance between the wires and structure, in accordance with Boeing Alert Service Bulletin MD80–24A184, including Appendix, dated October 26, 2000.

Note 2: For the purposes of this AD, a general visual inspection is defined as: "A visual examination of an interior or exterior area, installation, or assembly to detect obvious damage, failure, or irregularity. This level of inspection is made under normally available lighting conditions such as daylight, hangar lighting, flashlight, or droplight, and may require removal or opening of access panels or doors. Stands, ladders, or platforms may be required to gain proximity to the area being checked."

(1) Condition 1. If no damaged or chafed wire and if acceptable clearance (i.e., 0.50 inch minimum) between the wires and adjacent structure is found, no further action is required by this AD.

(2) Condition 2. If no chafed or damaged wire and if unacceptable clearance between the wires and adjacent structure is found, before further flight, secure wires using tie-wraps to obtain a 0.50-inch minimum clearance, in accordance with the service bulletin.

(3) Condition 3. If any chafed or damaged wire and unacceptable clearance between the wires and adjacent structure is found, before further flight, repair or replace any chafed or damaged wire with a new wire and secure wires using tie-wraps to obtain a 0.50-inch minimum clearance, in accordance with the service bulletin.

Alternative Methods of Compliance

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

Special Flight Permits

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on March 7, 2002.

Vi L. Lipski,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

[DFARS Case 2000–D029]

Defense Federal Acquisition Regulation Supplement; Restriction on Contingent Fees for Foreign Military Sales—Commercial Items

AGENCY: Department of Defense (DoD).

ACTION: Proposed rule with request for comments.

SUMMARY: DoD is proposing to amend the Defense Federal Acquisition Regulation Supplement (DFARS) to remove a clause from the list of clauses included in contracts for commercial items to implement provisions of law or Executive orders. The clause proposed for removal pertains to restrictions on contingent fees for foreign military sales.

DATES: Comments on the proposed rule should be submitted in writing to the address shown below on or before May 13, 2002, to be considered in the formation of the final rule.

ADDRESSES: Respondents may submit comments directly on the World Wide Web at *http://emissary.acq.osd.mil/dar/dfars.nsf/pubcomm*. As an alternative, respondents may e-mail comments to: *dfars@acq.osd.mil*. Please cite DFARS Case 2000–D029 in the subject line of e-mailed comments.

Respondents that cannot submit comments using either of the above methods may submit comments to: Defense Acquisition Regulations Council, Attn: Ms. Amy Williams, OUSD(AT&L)DP(DAR), IMD 3C132, 3062 Defense Pentagon, Washington, DC 20301–3062; facsimile (703) 602–0350. Please cite DFARS Case 2000–D029.

At the end of the comment period, interested parties may view public comments on the World Wide Web at *http://emissary.acq.osd.mil/dar/dfars.nsf*.

FOR FURTHER INFORMATION CONTACT: Ms. Amy Williams, (703) 602–0328.

SUPPLEMENTARY INFORMATION:

A. Background

The clause at DFARS 252.212–7001, Contract Terms and Conditions Required to Implement Statutes or Executive Orders Applicable to Defense Acquisitions of Commercial Items, includes a list of clauses that may be included in a contract for commercial items to implement provisions of law or Executive orders. Included on the list is the clause at DFARS 252.225–7027, Restriction on Contingent Fees for Foreign Military Sales, which cites 22 U.S.C. 2779 as its statutory basis. However, the clause at DFARS 252.225–7027 does not implement 22 U.S.C. 2779, which requires in subsection (c) that no fee may be included in the amount paid under a contract unless the amount is reasonable, allocable, and not made to a person who has used improper influence. The clause at DFARS 252.225–7027 implements DoD policy only, requiring that, in order for the costs of certain contingent fees to be allowable, the Government must identify the fees and the foreign military sales customer must approve payment of the fees in writing before contract award. This requirement has little effect in commercial contracts where the price the Government pays is generally a fixed price, not based on cost analysis.

This rule was not subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

B. Regulatory Flexibility Act

The proposed rule is not expected to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because most firms that pay or receive contingent fees for foreign military sales are not small business concerns. Therefore, DoD has not performed an initial regulatory flexibility analysis. DoD invites comments from small businesses and other interested parties. DoD also will consider comments from small entities concerning the affected DFARS subpart in accordance with 5 U.S.C. 610. Such comments should be submitted separately and should cite DFARS Case 2000–D029.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the rule does not impose any information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Part 107

[Docket No. RSPA–00–8439 (HM–208D)]

RIN 2137–AD53

Hazardous Materials: Temporary Reduction of Registration Fees

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Notice of proposed rulemaking; status.

SUMMARY: RSPA is issuing this document to inform persons of the status of a notice of proposed rulemaking (NPRM) which it published in the **Federal Register** on December 7, 2000, proposing to: temporarily lower the registration fees paid by persons who transport or offer for transportation in commerce certain categories and quantities of hazardous materials; charge not-for-profit organizations the same registration fee as a small business; use the North American Industry Classification System for size criteria for determining if an entity is a small business; and allow payment by additional credit cards than previously authorized. Consistent with the President's Fiscal Year 2003 budget request to Congress, RSPA is further delaying final action on these proposals pending enactment of the Fiscal Year 2003 Department of Transportation appropriations. Therefore, under the existing regulations, for registration year 2002–2003, which begins July 1, 2002, the registration fees remain $300 (including a $25 processing fee) for small businesses and $2,000 (including a $25 processing fee) for all other registrants.

FOR FURTHER INFORMATION CONTACT: Mr. David Donaldson, Office of Hazardous Materials Planning and Analysis, (202) 366–4484, or Ms. Deborah Boothe, Office of Hazardous Materials Standards, (202) 366–8553, Research and Special Programs Administration, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590.

SUPPLEMENTARY INFORMATION: On December 7, 2000 (65 FR 76889), RSPA issued a NPRM proposing to temporarily lower the registration fee for all registrants for the next six registration years (2001–2002 through 2006–2007) in order to eliminate an unexpended balance (or surplus) in the Hazardous Materials Emergency Preparedness (HMEP) grants fund. The HMEP grants program supports hazardous material emergency response planning, training and related activities by States, local governments, and Indian tribes. RSPA also proposed to charge not-for-profit organizations the same registration fee as a small business; amend its reference to the Small Business Administration's (SBA) small business criteria to reflect SBA's replacement of the Standard Industrial Classification (SIC) code system with the North American Industry Classification System; and allow payment by additional credit cards than previously authorized.

On May 2, 2001 (66 FR 22080), RSPA published a status document in the **Federal Register** stating that, consistent with the President's Fiscal Year 2002 budget request to Congress, it was delaying final action on the proposals in the NPRM pending enactment of the Fiscal Year 2002 Department of Transportation appropriations. In that budget request, the President proposed to fund a portion of RSPA's hazardous materials safety program from fees collected through the Hazardous Materials Registration program. Although that proposal was not adopted by Congress in the Fiscal Year 2002 DOT appropriations, the President's Fiscal Year 2003 budget request to Congress again proposes to fund a portion of RSPA's hazardous materials safety program budget from fees collected through the Hazardous Materials Registration program. Therefore, consistent with the President's current budget request to Congress, RSPA is again delaying final action on the proposals contained in this rulemaking to temporarily reduce registration fees pending enactment of the Fiscal Year 2003 Department of Transportation appropriations.

Consistent with current regulations, for registration year 2002–2003, which begins July 1, 2002, the registration fees remain unchanged at $300 (including a $25 processing fee) for small businesses and $2,000 (including a $25 processing fee) for all other registrants. Later this year, RSPA intends to issue a final rule on other proposals contained in the December 7, 2000 NPRM. A copy of the 2002–2003 registration form can be obtained after May 1, 2002, from our Web site at *http://hazmat.dot.gov/register.htm* and from our fax-on-demand service at 1–800–467–4922 (extension 2; document 700) .

Issued in Washington, DC, on March 8, 2002.

Frits Wybenga,

Deputy Associate Administrator for Hazardous Materials Safety.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Docket No. FV01–81–2NC]

Notice of Request for OMB Approval and Extension of a Currently Approved Information Collection

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), this notice announces that the Agricultural Marketing Service (AMS) is submitting to the Office of Management and Budget (OMB) for approval and extension the information collection on prune trees grown in California per clause (3) of Section 32 of the Act of August 24, 1935, as amended (7 U.S.C. 612c). This information collection was approved as an emergency package through May 31, 2002, and assigned OMB No. 0581–0201.

DATES: Comments on this notice must be received by May 13, 2002.

FOR FURTHER INFORMATION CONTACT: Contact Caroline C. Thorpe, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, room 2525–S, 1400 Independence Avenue, SW., Stop 0237, Washington, DC 20090–6456; Tel: (202) 720–2491, Fax: (202) 720–8983, or E-mail: *moab.docketclerk@usda.gov.*

Small businesses may request information on this notice by contacting Jay Guerber, Regulatory Fairness Representative, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, room 2525-S, 1400 Independence Avenue, SW., Stop 0237, Washington, DC 20090–6456; telephone (202) 720–2491, Fax: (202) 720–5698, or E-mail: *Jay.Guerber@usda.gov.*

SUPPLEMENTARY INFORMATION:

Title: California Prune/Plum Tree Removal Program ("the program").

OMB Number: 0581–0201.

Expiration Date of Approval: May 31, 2002.

Type of Request: Approval and extension of a currently approved information collection.

Abstract: The information collection requirements in this request are applied only to those growers who voluntarily participate in the tree removal program. The information is essential to carry out the program, and to administer release of payments to participating growers.

This program is intended to reestablish prune/plum growers' purchasing power and is authorized under clause (3) of section 32 of the Act of August 24, 1935, as amended (Section 32). Clause (3) of Section 32 authorizes USDA to "reestablish farmers' purchasing power by making payments in connection with the normal production of any agricultural commodity for domestic consumption." Section 32 also authorizes USDA to use Section 32 funds "* * * at such times, and in such manner, and in such amounts, as * * *" is found to "* * * effectuate substantial accomplishments of any one or more of the purposes of this section." Furthermore, "Determinations by the Secretary as to what constitutes * * * normal production for domestic consumption shall be final."

The forms covered under this information collection require the minimum information necessary to effectively carry out the requirements of the program, and their use is necessary to fulfill the intent of clause (3) of Section 32 and the rules and regulations issued thereunder.

The California prune industry has requested a tree removal program estimated to cost $20 million. The industry asked the Department of Agriculture (USDA) to provide $17 million in Section 32 funds. The industry has contributed $3 million. California's prune bearing acreage is expected to reach 94,000 acres next year if no acreage is removed. The industry's objective is to remove a minimum of 20,000 bearing acres of prune trees. Prune trees are generally planted 100 to 140 trees per acre. With an average yield of 2.2 tons per acre (5-year average), about 44,000 tons of prune variety plums would be removed from production under the program. Such a decrease will more closely align prune supply with demand while assuring an adequate supply for all market needs. If less productive acres are removed (yields less than 2.2 tons per acre) or less than 20,000 acres are removed, then the reduction in production would be less than 44,000 tons. With prune supplies more in line with market needs, market conditions are expected to stabilize and producer prices are expected to rise to more remunerative levels.

Two forms are needed to implement the program. The first form is "Application for Prune Tree Removal Program" (FV–298). Growers who wish to participate in the program must submit this form to the Prune Marketing Committee (Committee), which administers the program. Upon receipt of FV–298, the Committee will send the grower a "Notification of Prune Tree Removal" (FV–299) that requires only the grower's signature certifying that the trees were removed, and the date of removal. The notification also must be signed by a Committee staff member to verify actual removal of the trees. Growers are required to maintain copies of both forms for at least three years.

These forms require the minimum amount of information necessary to carry out the program. In addition, USDA has developed these forms in consultation with the Committee on behalf of the California prune industry. Because this program is not maintained by any other agency, the information collected is not available from any other existing records.

The information collected will be used only by authorized representatives of the USDA, including AMS' Fruit and Vegetable Programs' regional and headquarters staff, and authorized employees of the Committee. All information collected will be treated as confidential (as indicated on the forms), and will be in conformance with the Privacy Act and the Freedom of Information Act.

AMS estimates that the total annual burden are 250 hours. The proposed request for approval of the information collection under the program is as follows:

VOL
67
ISS
50
MR
14
2002
UMI

FV–298—Application for Prune Tree Removal Program Reporting:

Estimate of Burden per Response: 30 minutes.

Respondents: California prune growers.

Estimated Number of Respondents: 480.

Estimated Annual Number of Responses Per Respondent: 1.

Estimated Total Annual Burden on Respondents: 240 hours.

Recordkeeping:

Estimate of Burden: 1.2 minutes.

Respondents: California prune growers.

Estimated Number of Respondents: 480.

Estimated Annual Time per Respondent: 1 hour.

Estimated Total Annual Burden on Respondents: 10 hours.

Comments: Comments are invited on: (1) Whether the proposed collection of the information is necessary for the proper performance of the functions of AMS, including whether the information will have practical utility; (2) the accuracy of AMS estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments should reference OMB No. 0581–0201 and the California Prune Tree Removal Program, and be mailed to the Docket Clerk, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW., Stop 0237, Washington, DC 20090–6456; Fax (202) 720–5698; or E-mail: *moab.docketclerk@usda.gov*. Comments should reference the docket number and the date and page number of this issue of the **Federal Register**. All comments received will be available for public inspection in the Office of the Docket Clerk during regular USDA business hours at room 2525–S, 1400 Independence Avenue, SW., Stop 0237, Washington, DC 20090–6456; or telephone: (202) 720–2491.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Dated: March 8, 2002.

A.J. Yates,

Administrator, Agricultural Marketing Service.

BILLING CODE 3410–02–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 00–078–1]

Monsanto Co.; Availability of Petition and Environmental Assessment for Determination of Nonregulated Status for Corn Genetically Engineered for Insect Resistance

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service has received a petition from Monsanto Company seeking a determination of nonregulated status for corn designated as Event MON 863, which has been genetically engineered for insect resistance. The petition has been submitted in accordance with our regulations concerning the introduction of certain genetically engineered organisms and products. In accordance with those regulations, we are soliciting public comments on whether this corn presents a plant pest risk. We are also making available for public comment an environmental assessment for the proposed determination of nonregulated status.

DATES: We will consider all comments we receive that are postmarked, delivered, or e-mailed by May 13, 2002.

ADDRESSES: You may submit comments by postal mail/commercial delivery or by e-mail. If you use postal mail/commercial delivery, please send four copies of your comments (an original and three copies) to Docket No. 00–078–1, Regulatory Analysis and Development, PPD, APHIS, Station 3C71, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comments refer to Docket No. 00–078–1. If you use e-mail, address your comment to regulations@aphis.usda.gov. Your comment must be contained in the body of your message; do not send attached files. Please include your name and address in your message and Docket No. 00–078–1 on the subject line.

You may read a copy of the petition for a determination of nonregulated status submitted by Monsanto Company, the environmental assessment, and any comments we receive on this notice of availability in our reading room. The reading room is located in room 1141, USDA South Building, 14th Street and Independence Avenue, SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure that someone is available to help you, please call (202) 690–2817 before coming.

APHIS documents published in the **Federal Register**, and related information, including the names of organizations and individuals who have commented on APHIS dockets, are available on the Internet at *http://www.aphis.usda.gov/ppd/rad/webrepor.html*.

FOR FURTHER INFORMATION CONTACT: Dr. John Turner, PPQ, APHIS, Suite 5B05, 4700 River Road Unit 147, Riverdale, MD 20737–1236; (301) 734–8365. To obtain a copy of the petition or the environmental assessment, contact Ms. Kay Peterson at (301) 734–4885; e-mail: Kay.Peterson@aphis.usda.gov.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340, "Introduction of Organisms and Products Altered or Produced Through Genetic Engineering Which Are Plant Pests or Which There Is Reason to Believe Are Plant Pests," regulate, among other things, the introduction (importation, interstate movement, or release into the environment) of organisms and products altered or produced through genetic engineering that are plant pests or that there is reason to believe are plant pests. Such genetically engineered organisms and products are considered "regulated articles."

The regulations in § 340.6(a) provide that any person may submit a petition to the Animal and Plant Health Inspection Service (APHIS) seeking a determination that an article should not be regulated under 7 CFR part 340. Paragraphs (b) and (c) of § 340.6 describe the form that a petition for a determination of nonregulated status must take and the information that must be included in the petition.

On May 17, 2001, APHIS received a petition (APHIS Petition No. 01–137–01p) from Monsanto Company (Monsanto) of St. Louis, MO, requesting a determination of nonregulated status under 7 CFR part 340 for corn (*Zea mays* L.) designated as Corn Rootworm Protected Corn Event MON 863 (MON 863), which has been genetically engineered for resistance to the larvae of certain corn rootworm (CRW) species. The Monsanto petition states that the subject corn should not be regulated by APHIS because it does not present a plant pest risk.

As described in the petition, MON 863 corn has been genetically engineered to express a Cry3Bb1 insecticidal protein derived from the common soil bacterium *Bacillus thuringiensis* subsp. *kumamotoensis (Bt kumamotoensis)*. The petitioner states that the Cry3Bb1 protein is effective in controlling the larvae of CRW pests (Coleoptera, *Diabrotica* spp.). The subject corn also contains the *nptII* marker gene derived from the bacterium *Escherichia coli*. The *nptII* gene encodes neomycin phosphotransferase type II and is used as a selectable marker in the initial laboratory stages of plant cell selection. Expression of the added genes is controlled in part by gene sequences from the plant pathogens cauliflower mosaic virus and *Agrobacterium tumefaciens*. Particle gun acceleration technology was used to transfer the added genes into the recipient inbred yellow dent corn line A634.

MON 863 corn has been considered a regulated article under the regulations in 7 CFR part 340 because it contains gene sequences from plant pathogens. This corn has been field tested since 1998 in the United States under APHIS notifications. In the process of reviewing the notifications for field trials of the subject corn, APHIS determined that the vectors and other elements were disarmed and that the trials, which were conducted under conditions of reproductive and physical containment or isolation, would not present a risk of plant pest introduction or dissemination.

In § 403 of the Plant Protection Act (7 U.S.C. 7701–7772), plant pest is defined as any living stage of any of the following that can directly or indirectly injure, cause damage to, or cause disease in any plant or plant product: A protozoan, a nonhuman animal, a parasitic plant, a bacterium, a fungus, a virus or viroid, an infectious agent or other pathogen, or any article similar to or allied with any of the foregoing. APHIS views this definition very broadly. The definition covers direct or indirect injury, disease, or damage not just to agricultural crops, but also to plants in general, for example, native species, as well as to organisms that may be beneficial to plants, for example, honeybees, rhizobia, etc.

The U.S. Environmental Protection Agency (EPA) is responsible for the regulation of pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (7 U.S.C. 136 *et seq.*). FIFRA requires that all pesticides, including herbicides, be registered prior to distribution or sale, unless exempt by EPA regulation. In cases in which genetically modified plants allow for a new use of a pesticide or involve a different use pattern for the pesticide, EPA must approve the new or different use. Accordingly, Monsanto has filed an application to register the active ingredient *B. thuringiensis* Cry3Bb protein and the genetic material necessary for its production in corn (66 FR 15435–1536, March 19, 2001). When the use of the pesticide on the genetically modified plant would result in an increase in the residues in a food or feed crop for which the pesticide is currently registered, or in new residues in a crop for which the pesticide is not currently registered, establishment of a new tolerance or a revision of the existing tolerance would be required. Residue tolerances for pesticides are established by EPA under the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended (21 U.S.C. 301 *et seq.*), and the Food and Drug Administration (FDA) enforces tolerances set by EPA under the FFDCA. EPA has established an exemption from the requirement of a tolerance for residues of the *B. thuringiensis* Cry3Bb1 protein and the genetic material necessary for its production in or on all raw agricultural commodities (66 FR 24061–24066, May 11, 2001).

FDA published a statement of policy on foods derived from new plant varieties in the **Federal Register** on May 29, 1992 (57 FR 22984–23005). The FDA statement of policy includes a discussion of FDA's authority for ensuring food safety under the FFDCA, and provides guidance to industry on the scientific considerations associated with the development of foods derived from new plant varieties, including those plants developed through the techniques of genetic engineering. The petitioner has completed consultation with FDA on the subject corn.

In accordance with the regulations in 7 CFR 340.6(d), we are publishing this notice to inform the public that APHIS will accept written comments regarding the petition for determination of nonregulated status from any interested person for a period of 60 days from the date of this notice. We are also soliciting written comments from interested persons on the environmental assessment (EA) prepared to provide the public with documentation of APHIS' review and analysis of any potential environmental impacts and plant pest risk associated with a proposed determination of nonregulated status for MON 863 corn. The EA was prepared in accordance with (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372). The petition and the EA, and any comments received on these documents, are available for public review, and copies of the petition and the EA may be ordered (see the **FOR FURTHER INFORMATION CONTACT** section of this notice).

After the comment period closes, APHIS will review the data submitted by the petitioner, all written comments received during the comment period, and any other relevant information. After reviewing and evaluating the comments on the petition and the EA and other data and information, APHIS will furnish a response to the petitioner, either approving the petition in whole or in part, or denying the petition. APHIS will then publish a notice in the **Federal Register** announcing the regulatory status of Monsanto's insect-resistant MON 863 corn and the availability of APHIS' written decision.

Authority: 7 U.S.C. 166, 1622n, 7756, and 7761–7772; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.3.

Done in Washington, DC, this 7th day of March 2002.

W. Ron DeHaven,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–U

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

Agricultural Management Assistance

AGENCY: Commodity Credit Corporation, United States Department of Agriculture.

ACTION: Notice of availability of program funds for Agricultural Management Assistance.

SUMMARY: This notice announces the availability of funds for Agricultural Management Assistance (AMA) to implement Section 524(b) of the Federal Crop Insurance Act, 7 U.S.C. 1524(b), as added by Section 133 of the Agricultural Risk Protection Act of 2000, Public Law 106–224. The Commodity Credit Corporation (CCC) administers the funds under the general supervision of a Vice President of the CCC who is the Chief of the Natural Resources Conservation Service (NRCS). CCC is

VOL
67
ISS
50
MR
14
2002
UMI

announcing the availability of funds under Section 524(b) of the Federal Crop Insurance Act. Section 524(b) authorizes the Secretary of Agriculture to use $10 million of CCC funds annually for cost-share assistance to producers in 15 States in which participation in the Federal Crop Insurance Program is historically low. The 15 States include Connecticut, Delaware, Maine, Maryland, Massachusetts, Nevada, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Utah, Vermont, West Virginia, and Wyoming. The cost-share assistance will encourage and assist producers in the selected States to adopt natural resources conservation practices and investment strategies that will reduce or mitigate risks to their agricultural enterprises.

DATES: March 14, 2002 to September 30, 2002.

ADDRESSES: Address all comments to: Conservation Operations Division, Natural Resources Conservation Service, P.O. Box 2890, Washington, DC 20013–2890.

FOR FURTHER INFORMATION CONTACT: Mark W. Berkland, Director, or Gary Gross, AMA Program Manager, Conservation Operations Division, Natural Resources Conservation Service, P.O. Box 2890, Washington, DC 20013, (202) 720–1845, fax: 202–720–4265; Submit electronic comments to: *mark.berkland@usda.gov* or *gary.gross@usda.gov*.

SUPPLEMENTARY INFORMATION:

Background

Section 524(b) of the Federal Crop Insurance Act, 7 U.S.C. 1524(b), was added by Section 133 of the Agricultural Risk Protection Act of 2000, (Pub. L. 106–224, June 22, 2000). Section 524(b) authorizes the Secretary of Agriculture (Secretary) to use $10 million of CCC funds for cost-share assistance in 15 States where participation in the Federal Crop Insurance program is historically low. The 15 States designated by the Secretary are Connecticut, Delaware, Maine, Maryland, Massachusetts, Nevada, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Utah, Vermont, West Virginia, and Wyoming. The Risk Management Agency (RMA), Agricultural Marketing Service (AMS), and NRCS will administer the funds in such amounts per agency as determined by the Secretary.

Section 524(b)(2)(A), (B), and (C), provides for cost-share assistance to producers to: construct or improve water management structures or irrigation structures; plant trees for windbreaks or improve water quality; and mitigate risks through production diversification or resource conservation practices, including soil erosion control, integrated pest management, or transition to organic farming.

Section 524(b)(2)(D) and (E), provides for cost-share assistance to producers to: enter into futures, hedging, or options contracts in a manner designed to help reduce production, price, or revenue risk; and enter into agricultural trade options as a hedging transaction to reduce production, price, or revenue risk.

This notice deals with the funding administered by NRCS, approximately $7 million in fiscal year 2002, to carry out the conservation provisions of Section 524(b)(2)(A),(B), and (C).

The Chief of NRCS, on behalf of CCC, will determine the funds available to the States for financial and technical assistance.

The NRCS State Conservationist, in consultation with the State Technical Committee, will determine eligible practices using a locally led process. Eligible conservation practices will be those practices that improve soil or water management or water quality, or mitigate financial risk through resource conservation. AMA does not provide for incentive payments.

There will be a continuous signup period, with ranking cutoff dates as determined by the State Conservationist in consultation with the State Technical Committee.

The State Conservationist, in consultation with the State Technical Committee, will select applications based on State-developed ranking criteria and a ranking process, taking into account local and state priorities. The State Conservationist may also delegate the selection of applications to the local designated conservationist who will work in consultation with the local USDA Work Group.

AMA Requirements

CCC will accept applications throughout the year. The State Conservationist, in consultation with the State Technical Committee, will widely distribute information on the availability of assistance and the State-specific goals. Information will be provided that explains the process to request assistance.

Applicants must own or control the land for which assistance is being sought and agree to implement specific eligible conservation practices on the land. The applicants must meet the definition of "person" as set out in Section 1001(5), of the Food Security Act, 7 U.S.C. 1308(5), as determined by the Farm Service Agency (FSA). Any cooperative association of producers that markets commodities for producers shall not be considered to be a person eligible for payment. The status of an individual or entity on the date of the application shall be the basis on which the determination of the number of persons involved in the farming operation is made. There will be a 5 to 10 year cost-share agreement period to install eligible practices. Cost-share practices need to be maintained for the life of the practice. The maximum payment to any one person under the AMA program is $50,000 for any fiscal year.

The Federal share of cost-share payments shall be 75 percent of the cost of an eligible practice(s), based on percent of actual cost, percent of actual cost with not-to-exceed limits, flat rates, or average costs. Producers will be paid upon certification of the completion of the approved practice(s). Producers may contribute to the application of a cost-share practice through in-kind contributions. Eligible in-kind contributions include: personal labor; use of personal equipment; donated labor or materials; and use of on-hand or used materials that meet the requirements for the practice to be installed. In no instance shall the total financial contributions for an eligible practice from all public and private entity sources exceed 100 percent of the actual cost of the practice. Cost-share payments will not be made to a participant who has applied or initiated the application of a conservation practice prior to approval of the cost-share agreement.

Eligible participants must have control of the land for the life of the cost-share agreement period. An exception may be made by the Chief of NRCS in the case of land allotted by the Bureau of Indian Affairs (BIA), tribal land, or other instances in which the Chief of NRCS determines that there is sufficient assurance of control; or the applicant is a tenant of the land involved in agricultural production and the applicant provides CCC with the written concurrence of the landowner in order to apply an eligible practice(s).

Eligible land includes land used as agricultural land on which NRCS determines that assistance is needed to construct or improve watershed management structures or irrigation structures; plant trees to form windbreaks or to improve water quality; or to mitigate financial risk through production diversification or resource conservation practices, including soil erosion control, integrated pest management, or transition to organic farming. Additionally, land may only be considered for enrollment in AMA if NRCS determines that the land is privately-owned or publicly-owned where the land is under private control for the length of the cost-share agreement and is included in the participant's operating unit. The conservation practices installed on public land must contribute to an improvement in the identified natural resource concern as well as benefit private land. The applicant must provide CCC with written authorization from the government landowner to apply the conservation practices. Land that is Federally recognized Tribal, BIA allotted, or Indian trust land may be considered for enrollment in AMA.

Applicants must submit an application (CCC–1200 form) to CCC to be considered for participation in AMA. Any producer who has eligible land may obtain and submit an application for participation in AMA at a USDA service center. Producers who are members of a joint operation shall file a single application for the joint operation. A NRCS conservationist will work with the applicant to collect the information necessary to evaluate the application using the State-developed ranking criteria.

Conservation Plan Requirement

A conservation plan is required for the area to be included in the AMA cost-share agreement and becomes the basis for developing the cost-share agreement. The conservation plan must be acceptable to NRCS; be approved by the local conservation district; be signed by the participant, designated conservationist, and the conservation district; and clearly identify the conservation practices that will be cost-shared with AMA funds and the non-cost shared practices needed in the conservation plan.

Cost-Share Agreement Requirements

Participants will enter into a cost-share agreement agreeing to implement eligible conservation practices. An AMA cost-share agreement will incorporate by reference all portions of a unit applicable to AMA and be for a duration of 5 to 10 years.

Cost-share agreements will incorporate all provisions as required by law or statute, including requirements to not conduct any practices on the farm or ranch unit of concern that would tend to defeat the purposes of the cost-share agreement; refund to CCC any AMA payments received with interest, and forfeit any future payments under AMA, on the violation of a term or condition of the cost-share agreement; refund all AMA payments received on the transfer of the right and interest of the producer in land subject to the cost-share agreement, unless the transferee of the right and interest agrees to assume all obligations of the cost-share agreement; and supply information as required by CCC to determine compliance with the cost-share agreement and requirements of AMA. The participant and NRCS must certify that a conservation practice is completed in accordance with the cost-share agreement before CCC will approve any cost-share payments.

With respect to land under an AMA cost-share agreement which is inherited during the cost-share agreement period, the $50,000 per fiscal year limitation to any person will not apply to the extent that the payments from any cost-share agreements on the inherited land cause an heir, who was party to an AMA cost-share agreement on other lands prior to the inheritance, to exceed the annual limit.

With regard to cost-share agreements on tribal land, Indian trust land, or BIA allotted land, payments exceeding $50,000 per fiscal year limitation may be made to the tribal venture if an official of the BIA or tribal official certifies in writing that no one person directly or indirectly will receive more than the fiscal year limitation.

Conservation Practice Operation and Maintenance

The cost-share agreement will provide for the operation and maintenance of the conservation practices applied under the cost-share agreement. The participant will operate and maintain the conservation practices for their intended purposes as agreed-to as part of the cost-share agreement, and form CCC–1245, Practice Approval and Payment Application.

Additional Requirements and Information

Additional requirements and information pertaining to the AMA program relating to cost-share agreements, administrative requirements, and other matters can be found on CCC form CCC–1200, Conservation Program Contract, and the appendix to form CCC–1200, both of which are available at local USDA service centers.

Civil Rights

NRCS and CCC have collected civil rights data on farmers/ranchers participating in conservation programs. Based on past participation, it is estimated that the funding being made available with this notice will not negatively or disproportionately affect minorities, women, or persons with disabilities who are program beneficiaries or applicants for program benefits in NRCS or CCC assisted programs.

Environmental Evaluation

This assistance, administered by NRCS, will be funded at a level for 2002 as determined by the Secretary. Depending on the level of funding, and based on the participation in existing soil and water conservation programs, it is estimated that this assistance could result in approximately 230 cost-share agreements in the 15 States. On each farm or ranch, during the conservation planning process, the environmental effects of any proposed actions are evaluated on a case by case basis. That evaluation is used to determine whether further environmental analysis is required. Accordingly, neither an Environmental Assessment nor an Environmental Impact Statement has been prepared for this notice.

Signed in Washington, DC, on August 23, 2001.

Thomas A. Weber,

Deputy Chief for Programs, Natural Resources Conservation Service.

Forest Service

Fresno County Resource Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of Resource Advisory meeting.

SUMMARY: Pursuant to the authorities in the Federal Advisory Committee Act of 1972 (Public Law 92–463) and under the secure Rural Schools and Community Self-Determination Act of 2000 (Public Law 106–393) the Sierra and Sequoia National Forests' Resource Advisory Committee (RAC) for Fresno County will meet on March 19, 2002, 6:30–9:30 p.m. The Fresno County Resource Advisory Committee will meet at the Districts Ranger's office Prather, CA. The purpose of the meeting is for the Resource Advisory Committee to receive project proposals for recommendations to the Forest Supervisor for expenditure of Fresno County Title II funds.

DATES: The Fresno RAC meeting will be held on March 19, 2002. The meeting will be held from 6:30 p.m. to 9:30 p.m.

ADDRESSES: The Fresno County RAC meeting will be held at the Sierra

BILLING CODE 3410–11–M

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

Public Rights-of-Way Access Advisory Committee; Meeting

AGENCY: Architectural and Transportation Barriers Compliance Board.

ACTION: Notice of meeting.

SUMMARY: The Architectural and Transportation Barriers Compliance Board (Access Board) established a Public Rights-of-Way Access Advisory Committee (Committee) to assist the Board in developing a proposed rule on accessibility guidelines for newly constructed and altered public rights-of-way covered by the Americans with Disabilities Act of 1990 and the Architectural Barriers Act of 1968. This document announces the next meeting of the technical assistance sub-committee of that Committee, which will be open to the public.

DATES: The meeting of the sub-committee is scheduled for April 4, 2002 (beginning at 9 a.m. and ending at 5 p.m.) and April 5, 2002 (beginning at 9 a.m. and ending at 12:30 p.m.).

ADDRESSES: The meeting will be held at the Marriott Riverwalk, 711 East Riverwalk, San Antonio, TX 78205.

FOR FURTHER INFORMATION CONTACT: Scott Windley, Office of Technical and Information Services, Architectural and Transportation Barriers Compliance Board, 1331 F Street, NW., suite 1000, Washington, DC, 20004–1111. Telephone number (202) 272–5434 extension 125 (Voice); (202) 272–5449 (TTY). E-mail *windley@access-board.gov.* This document is available in alternate formats (cassette tape, Braille, large print, or ASCII disk) upon request. This document is also available on the Board's Internet site (*http://www.access-board.gov/prowmtg.htm*).

SUPPLEMENTARY INFORMATION: On October 20, 1999, the Architectural and Transportation Barriers Compliance Board (Access Board) published a notice appointing members to a Public Rights-of-Way Access Advisory Committee (Committee). 64 FR 56482 (October 20, 1999). The objectives of the Committee include providing recommendations for developing a proposed rule addressing accessibility guidelines for newly constructed and altered public rights-of-way covered by the Americans with Disabilities Act of 1990 and the Architectural Barriers Act of 1968, recommendations regarding technical assistance issues, and guidance for best practices for alterations in the public rights-of-way.

On January 10, 2001, the Committee presented its recommendations on accessible public rights-of-way in a report entitled "Building a True Community". The report is available on the Access Board's Web site at *www.access-board.gov* or can be ordered by calling the Access Board at (800) 872–2253 (voice) or (800) 993–2822 (TTY).

At its April meeting, the technical assistance sub-committee will continue to address the development and format of technical assistance materials relating to public rights-of-way. The sub-committee meeting will be open to the public and interested persons can attend the meeting and participate on subcommittees of the Committee. All interested persons will have the opportunity to comment when the proposed accessibility guidelines for public rights-of-way are issued in the **Federal Register** by the Access Board.

Individuals who require sign language interpreters or real-time captioning systems should contact Scott Windley by March 20, 2002. Notices of future meetings will be published in the **Federal Register.**

Lawrence W. Roffee,

Executive Director.

Certain Cased Pencils from the People's Republic of China: Rescission of Antidumping Duty New Shipper Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Rescission of Antidumping Duty New Shipper Review of Certain Cased Pencils from the People's Republic of China.

SUMMARY: The Department of Commerce (the Department) is rescinding the antidumping duty new shipper review, requested by Wuxi Andi Civilization PE Gift Give Away Co., Ltd. (Wuxi or respondent), the exporter, and Safety Touch & Javithon Inc., (Safety Touch) the importer, of the antidumping duty order on certain cased pencils from the People's Republic of China (PRC). The period of the requested review is December 1, 2000 through May 31, 2001.

EFFECTIVE DATE: March 14, 2002.

FOR FURTHER INFORMATION CONTACT: John Conniff or Paul Stoltz, AD/CVD Enforcement, Office 4, Group II, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone (202) 482–1009 and (202) 482–4474, respectively.

SUPPLEMENTARY INFORMATION:

The Applicable Statute and Regulations

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended, (the Act) are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department's regulations are to the regulations at 19 CFR Part 351 (2000).

Background

On December 3, 2001, counsel for the respondent notified the Department that it was withdrawing its representation. Counsel instructed the Department to direct all correspondence, questions and inquiries to Safety Touch. On January 23, 2002, the Department notified the petitioner and Safety Touch of the preliminary rescission of the instant new shipper review. On January 28, 2002, the Department published its preliminary rescission in the Federal Register. See Certain Cased Pencils from the People's Republic of China: Preliminary Rescission of Antidumping Duty New Shipper Review, 67 FR 3878 (January 28, 2002). In that notice, we invited interested parties to comment on the preliminary rescission within 21 days of the date of publication of the notice. Interested parties also were notified that they may request a hearing in this review within 30 days of publication of the preliminary results.

Scope of the Review

Imports covered by this review are shipments of certain cased pencils of any shape or dimension which are writing and/or drawing instruments that feature cores of graphite or other materials, encased in wood and/or man-made materials, whether or not decorated and whether or not tipped (e.g., with erasers, etc.) in any fashion, and either sharpened or unsharpened. The pencils subject to this investigation are classified under subheading 9609.10.00 of the Harmonized Tariff Schedules of the United States (HTSUS). Specifically excluded from the scope of this order are mechanical pencils, cosmetic pencils, pens, non-cased crayons (wax), pastels, charcoals, and chalks. Although the HTSUS subheading is provided for convenience and customs purposes our written description of the scope of the order is dispositive.

Changes Since the Preliminary Results

The time limits for submitting comments and requesting a hearing have passed without the Department receiving either comments or hearing requests. We have not changed our preliminary position with respect to rescission of this review. Thus, the Department is rescinding this new shipper review.

This new shipper review and this notice are issued and published in accordance with sections 751(a)(2)(B) and 777(i)(1) of the Act.

March 5, 2002

Bernard T. Carreau,

Deputy Assistant Secretary Import Administration, Group II.

BILLING CODE 3510–DS–S

DEPARTMENT OF COMMERCE

International Trade Administration

[A–475–703]

Granular Polytetrafluoroethylene (PTFE) Resin from Italy: Extension of Time Limit for Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: March 14, 2002.

FOR FURTHER INFORMATION CONTACT: Victoria Schepker or Constance Handley, Office 5, AD/CVD Enforcement, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th and Constitution Avenue, NW, Washington DC 20230; telephone: (202) 482–1756 or (202) 482–0631, respectively.

TIME LIMITS:

Statutory Time Limits

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended (the Act), requires the Department to issue the preliminary results of an administrative review within 245 days after the last day of the anniversary month of an order for which a review is requested and the final results within 120 days after the date on which the preliminary results are published. However, if it is not practicable to complete the review within the time period, section 751(a)(3)(A) of the Act allows the Department to extend the time limit for the preliminary results to a maximum of 365 days and for the final results to 180 days (or 300 days if the Department does not extend the time limit for the preliminary results) from the date of publication of the preliminary results.

Background

On September 24, 2001, the Department published a notice of initiation of administrative review of the antidumping order on PTFE resin from Italy, covering the period August 1, 2000, through July 31, 2001 (66 FR 49924). The preliminary results are currently due no later than May 3, 2002.

Extension of Preliminary Results of Review

We determine that it is not practicable to complete the preliminary results of this review within the original time limit. Therefore, we are extending the time limit for completion of the preliminary results until no later than September 3, 2002. See Decision Memorandum from Gary Taverman to Bernard T. Carreau, dated March 7, 2002, which is on file in the Central Records Unit, Room B–099 of the main Commerce building. We intend to issue the final results no later than 120 days after the publication of the notice of preliminary results.

This extension is in accordance with section 751(a)(3)(A) of the Act.

March 7, 2002

Bernard T. Carreau,

Deputy Assistant SecretaryImport Administration.

BILLING CODE 3510–DS–S

DEPARTMENT OF COMMERCE

International Trade Administration

[A–351–828]

Certain Hot-Rolled Flat-Rolled Carbon Quality Steel Products From Brazil: Rescission of Administrative Review of the Agreement Suspending the Antidumping Duty Investigation

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of rescission of antidumping duty administrative review.

SUMMARY: On August 20, 2001, in response to a request made by Bethlehem Steel Corporation, LTV Steel Company Inc., National Steel Corporation, and United States Steel LLC ("Domestic Producers"), the Department of Commerce ("the Department") published in the **Federal Register** (66 FR 43570) a notice announcing the initiation of an administrative review of the agreement suspending the antidumping duty investigation on certain hot-rolled flat-rolled carbon quality steel products from Brazil. The review period is July 1, 2000 to June 30, 2001. This review has now been rescinded because Domestic Producers have withdrawn their request for review.

EFFECTIVE DATE: March 14, 2002.

FOR FURTHER INFORMATION CONTACT: Michael Ferrier, Enforcement Group III, Office 8, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Room 7866, Washington, DC 20230; telephone (202) 482–1394.

The Applicable Statute

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the Act) are references to the

provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department's regulations are references to the provisions codified at 19 CFR part 351 (2001).

Scope of the Review

The products covered are certain hot-rolled flat-rolled carbon-quality steel products of a rectangular shape, of a width of 0.5 inch or greater, neither clad, plated, nor coated with metal and whether or not painted, varnished, or coated with plastics or other non-metallic substances, in coils (whether or not in successive, superimposed layers) regardless of thickness, and in straight lengths, of a thickness less than 4.75 mm and of a width measuring at least 10 times the thickness. Universal mill plate (*i.e.*, flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm, but not exceeding 1250 mm and of a thickness of not less than 4 mm, not in coils and without patterns in relief) of a thickness not less than 4.0 mm is not included within the scope of this agreement.

Specifically included in this scope are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels, high strength low alloy (HSLA) steels, and the substrate for motor lamination steels. IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium and/or niobium added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, titanium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum.

Steel products to be included in the scope of this agreement, regardless of HTSUS definitions, are products in which: (1) Iron predominates, by weight, over each of the other contained elements; (2) the carbon content is 2 percent or less, by weight; and (3) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

1.80 percent of manganese, or
1.50 percent of silicon, or
1.00 percent of copper, or
0.50 percent of aluminum, or
1.25 percent of chromium, or
0.30 percent of cobalt, or
0.40 percent of lead, or
1.25 percent of nickel, or
0.30 percent of tungsten, or
0.012 percent of boron, or
0.10 percent of molybdenum, or
0.10 percent of niobium, or
0.41 percent of titanium, or
0.15 percent of vanadium, or
0.15 percent of zirconium.

All products that meet the physical and chemical description provided above are within the scope of this agreement unless otherwise excluded. The following products, by way of example, are outside and/or specifically excluded from the scope of this agreement:

- Alloy hot-rolled steel products in which at least one of the chemical elements exceeds those listed above (including e.g., ASTM specifications A543, A387, A514, A517, and A506).
- SAE/AISI grades of series 2300 and higher.
- Ball bearing steels, as defined in the HTSUS.
- Tool steels, as defined in the HTSUS.
- Silico-manganese (as defined in the HTSUS) or silicon electrical steel with a silicon level exceeding 1.50 percent.
- ASTM specifications A710 and A736.
- USS Abrasion-resistant steels (USS AR 400, USS AR 500).
- Hot-rolled steel coil which meets the following chemical, physical and mechanical specifications:

C	Mn	P	S	Si	Cr	Cu	Ni
0.10–0.14%	0.90%	0.025% Max	0.005% Max	0.30–0.50%	0.30–0.50%	0.20–0.40%	0.20% Max.

Width = 44.80 inches maximum; Thickness = 0.063-0.198 inches; Yield Strength = 50,000 ksi minimum; Tensile Strength = 70,000–88,000 psi.

- Hot-rolled steel coil which meets the following chemical, physical and mechanical specifications:

C	Mn	P	S	Si	Cr	Cu	Ni
0.10–0.16 ..... Mo 0.21% Max	0.70–0.90	0.025% Max	0.006% Max	0.30–0.50%	0.30–0.50%	0.25% Max	0.20% Max.

Width = 44.80 inches maximum; Thickness = 0.350 inches maximum;
Yield Strength = 80,000 ksi minimum; Tensile Strength = 105,000 psi Aim.

- Hot-rolled steel coil which meets the following chemical, physical and mechanical specifications:

C	Mn	P	S	Si	Cr	Cu	Ni
0.10–0.14% ..... V(wt.) ..... 0.10% Max	1.30–1.80% ..... Cb ..... 0.08% Max	0.025% Max	0.005% Max	0.30–0.50%	0.50%–0.70% ..	0.20–0.40%	0.20% Max.

Width = 44.80 inches maximum; Thickness = 0.350 inches maximum;
Yield Strength = 80,000 ksi minimum; Tensile Strength = 105,000 psi Aim.

- Hot-rolled steel coil which meets the following chemical, physical and mechanical specifications:

C	Mn	P	S	Si	Cr	Cu	Ni
0.15% Max ..... Nb ..... 0.005% Min	1.40% Max ..... Ca ..... Treated	0.025% Max .... Al 0.01–0.07%	0.010% Max	0.50% Max	1.00% Max	0.50% Max	0.20% Max

Width = 39.37 inches; Thickness = 0.181 inches maximum; Yield Strength = 70,000 psi minimum for thicknesses ≤ 0.148 inches and 65,000 psi minimum for thicknesses > 0.148 inches; Tensile Strength = 80,000 psi minimum.

- Hot-rolled dual phase steel, phase-hardened, primarily with a ferritic-martensitic microstructure, contains 0.9 percent up to and including 1.5 percent silicon by weight, further characterized by either (i) tensile strength between 540 N/mm^2 and 640 N/mm^2 and an elongation percentage ≥ 26 percent for thicknesses of 2 mm and above, or (ii) a tensile strength between 590 N/mm^2 and 690 N/mm^2 and an elongation percentage ≥ 25 percent for thicknesses of 2 mm and above.
- Hot-rolled bearing quality steel, SAE grade 1050, in coils, with an inclusion rating of 1.0 maximum per ASTM E 45, Method A, with excellent surface quality and chemistry restrictions as follows: 0.012 percent maximum phosphorus, 0.015 percent maximum sulfur, and 0.20 percent maximum residuals including 0.15 percent maximum chromium.
- Grade ASTM A570–50 hot-rolled steel sheet in coils or cut lengths, width of 74 inches (nominal, within ASTM tolerances), thickness of 11 gauge (0.119 inch nominal), mill edge and skin passed, with a minimum copper content of 0.20%.

The merchandise subject to this agreement is classified in the *Harmonized Tariff Schedule of the United States* (HTSUS) at subheadings: 7208.10.15.00, 7208.10.30.00, 7208.10.60.00, 7208.25.30.00, 7208.25.60.00, 7208.26.00.30, 7208.26.00.60, 7208.27.00.30, 7208.27.00.60, 7208.36.00.30, 7208.36.00.60, 7208.37.00.30, 7208.37.00.60, 7208.38.00.15, 7208.38.00.30, 7208.38.00.90, 7208.39.00.15, 7208.39.00.30, 7208.39.00.90, 7208.40.60.30, 7208.40.60.60, 7208.53.00.00, 7208.54.00.00, 7208.90.00.00, 7210.70.30.00, 7210.90.90.00, 7211.14.00.30, 7211.14.00.90, 7211.19.15.00, 7211.19.20.00, 7211.19.30.00, 7211.19.45.00, 7211.19.60.00, 7211.19.75.30, 7211.19.75.60, 7211.19.75.90, 7212.40.10.00, 7212.40.50.00, 7212.50.00.00. Certain hot-rolled flat-rolled carbon-quality steel covered by this agreement, including: vacuum degassed, fully stabilized; high strength low alloy; and the substrate for motor lamination steel may also enter under the following tariff numbers: 7225.11.00.00, 7225.19.00.00, 7225.30.30.50, 7225.30.70.00, 7225.40.70.00, 7225.99.00.90, 7226.11.10.00, 7226.11.90.30, 7226.11.90.60, 7226.19.10.00, 7226.19.90.00, 7226.91.50.00, 7226.91.70.00, 7226.91.80.00, and 7226.99.00.00. Although the HTSUS subheadings are provided for convenience and Customs purposes, the written description of the merchandise under this agreement is dispositive.

Background

On July 31, 2001, Domestic Producers, as Petitioners in the suspended investigation, requested an administrative review of the agreement suspending the antidumping duty investigation on hot-rolled flat-rolled carbon quality steel from Brazil published in the **Federal Register** on July 19, 1999 (64 FR 38792). On August 20, 2001, the Department published in the **Federal Register** (66 FR 43570) a notice of "Initiation of Antidumping and Countervailing Duty Administrative Reviews and Requests for Revocations in Part" initiating the administrative review. On February 19, 2002, Domestic Producers withdrew their request for the review. The applicable regulation, 19 CFR 351.213(d)(1), states that if a party that requested an administrative review withdraws the request within 90 days of the publication of the notice of initiation of the requested review, the Secretary will rescind the review. Additionally, the Secretary may extend this time limit if the Secretary decides that it is reasonable to do so. Given that we have received no submissions opposing Domestic Producers' request for withdrawal of the administrative review and the Department terminated the suspension agreement in the first administrative review of the suspension agreement, we find it reasonable to extend the time period for filing a withdrawal request. Based upon Domestic Producers' request, therefore, we are rescinding this review of the agreement suspending the antidumping duty investigation on hot-rolled flat-rolled carbon quality steel from Brazil covering the period July 1, 2000 through June 30, 2001.

This notice is issued and published in accordance with section 777(i) of the Act and 19 CFR 351.213(d)(4).

Dated: March 6, 2002.

Joseph A. Spetrini,

Deputy Assistant Secretary for Import Administration, Group III.

International Trade Administration

[A–201–504]

Porcelain–on–Steel Cookware from Mexico: Notice of Extension of Time Limit for Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, United States Department of Commerce.

EFFECTIVE DATE: March 14, 2002.

FOR FURTHER INFORMATION CONTACT: Kate Johnson or Rebecca Trainor at (202) 482–4929 or (202) 482–4007, respectively, Office of AD/CVD Enforcement, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C., 20230.

POSTPONEMENT OF FINAL RESULTS OF ADMINISTRATIVE REVIEW:

The Department of Commerce ("the Department") published the preliminary results of the administrative review of the antidumping duty order on Porcelain–on–Steel Cookware from Mexico on November 13, 2001 (66 FR 56799). The current deadline for the final results in this review is March 13, 2002. In accordance with section 751(a)(3)(A) of the Tariff Act of 1930 ("the Act"), as amended, the Department finds that it is not practicable to complete this administrative review within the original time frame because it is conducting a changed–circumstances antidumping duty administrative review in which it is considering revoking the order on porcelain–on–steel cookware from Mexico and rescinding this administrative review. Thus, the Department is extending the time limit for completion of the final results until May 12, 2002, which is 180 days after the date on which notice of the preliminary results was published in the Federal Register.

March 8, 2002

Richard W. Moreland,

Deputy Assistant Secretary for Import Administration.

[A–570–001]

Potassium Permanganate From the People's Republic of China: Extension of Time Limit for Final Results of Antidumping Duty New Shipper Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Extension of Time Limit For Final Results of Antidumping Duty New Shipper Review.

EFFECTIVE DATE: March 14, 2002.

FOR FURTHER INFORMATION CONTACT: John Conniff at (202) 482–1009 or Chris Brady at (202) 482–4406, Office of AD/CVD Enforcement, Group II, Office 4, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Ave, NW, Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Statutory Time Limits

Section 751(a)(2)(B)(iv) of the Tariff Act of 1930, as amended (the Act), requires the Department of Commerce (the Department) to make a final determination within 90 days after the date on which the preliminary determination is issued. However, if the Department concludes that the case is extraordinarily complicated, it may extend the 90–day period to 150 days.

Background

On March 8, 2001, the Department published a notice of initiation of a new shipper review of the antidumping duty order on potassium permanganate from the People's Republic of China (PRC) covering the period of January 1, 2000, through December 31, 2000 (66 FR 13895). On January 3, 2002, the Department published the preliminary results of its antidumping duty new shipper review (67 FR 303). In our notice of preliminary results, we stated our intention to issue the final results of this new shipper review within 90 days from the date of the preliminary results unless the time limit is extended.

Extension of Time Limit For Final Results of Review

Based on a number of complex factual issues in the preliminary results, we have determined that additional time is needed in order to complete the final results of this review. Therefore, the Department is extending the time limit for completion of the final results until no later than May 25, 2002. *See* Memorandum from Holly A. Kuga to Bernard T. Carreau, dated concurrently with this notice, which is on file in the Central Records Unit, Room B–099 of the main Commerce building.

This extension is in accordance with section 751(a)(2)(B)(iv) of the Act.

March 7, 2002

Bernard T. Carreau,

Deputy Assistant Secretaryfor Import Administration, Group II.

International Trade Administration

North American Free-Trade Agreement, Article 1904; NAFTA Panel Reviews; Request for Panel Review

AGENCY: NAFTA Secretariat, United States Section, International Trade Administration, Department of Commerce.

ACTION: Notice of first request for panel review.

SUMMARY: On January 17, 2002, CEMEX, S.A. de C.V. ("CEMEX") filed a First Request for Panel Review with the United States Section of the NAFTA Secretariat pursuant to Article 1904 of the North American Free Trade Agreement. Panel review was requested of the Dismissal of the Request for Institution of a Section 751(b) review of the Sunset decision made by the International Trade Commission, respecting Gray Portland Cement and Clinker from Mexico. This determination was published in the **Federal Register** (66 FR 65740) on December 20, 2001. The NAFTA Secretariat has assigned Case Number USA-MEX–2002–1904–01 to this request.

FOR FURTHER INFORMATION CONTACT: Caratina L. Alston, United States Secretary, NAFTA Secretariat, Suite 2061, 14th and Constitution Avenue, Washington, DC 20230, (202) 482–5438.

SUPPLEMENTARY INFORMATION: Chapter 19 of the North American Free-Trade Agreement ("Agreement") establishes a mechanism to replace domestic judicial review of final determinations in antidumping and countervailing duty cases involving imports from a NAFTA country with review by independent binational panels. When a Request for Panel Review is filed, a panel is established to act in place of national courts to review expeditiously the final determination to determine whether it conforms with the antidumping or countervailing duty law of the country that made the determination.

Under Article 1904 of the Agreement, which came into force on January 1, 1994, the Government of the United States, the Government of Canada and the Government of Mexico established *Rules of Procedure for Article 1904 Binational Panel Reviews* ("Rules"). These Rules were published in the **Federal Register** on February 23, 1994 (59 FR 8686).

A first Request for Panel Review was filed with the United States Section of the NAFTA Secretariat, pursuant to Article 1904 of the Agreement, on January 17, 2002, requesting panel review of the Dismissal of the Request for Institution of a Section 751(b) review of the Sunset decision described above.

The Rules provide that:

(a) A Party or interested person may challenge the final determination in whole or in part by filing a Complaint in accordance with Rule 39 within 30 days after the filing of the first Request for Panel Review (the deadline for filing a Complaint is February 18, 2002);

(b) a Party, investigating authority or interested person that does not file a Complaint but that intends to appear in support of any reviewable portion of the final determination may participate in the panel review by filing a Notice of Appearance in accordance with Rule 40 within 45 days after the filing of the first Request for Panel Review (the deadline for filing a Notice of Appearance is March 4, 2002); and

(c) the panel review shall be limited to the allegations of error of fact or law, including the jurisdiction of the investigating authority, that are set out in the Complaints filed in the panel review and the procedural and substantive defenses raised in the panel review.

Dated: January 22, 2002.

Caratina L. Alston,

United States Secretary, NAFTA Secretariat.

Office of the Secretary

Meeting of the Secretary of Defense's Historical Records Declassification Advisory Panel

AGENCY: Office of the Secretary, Department of Defense.

ACTION: Notice of open meeting.

SUMMARY: Notice is hereby given of the forthcoming meeting of the Historical Records Declassification Advisory Panel (HRDAP). The purpose of this meeting is to discuss and form recommendations to the Secretary of Defense on issues involving the declassification and management of DoD classified historical documents. This is the first meeting held in 2002. The OSD Historian will chair this meeting.

DATES: Friday, March 29, 2002.

TIME: The meeting is scheduled 9 a.m. to 3 p.m.

ADDRESSES: 1777 Kent Street, Arlington (Rosslyn), VA, Room 005, 14th Floor, Penthouse Conference Area.

FOR FURTHER INFORMATION CONTACT: Ms. Chris Bromwell, Office of the Deputy Assistant Secretary of Defense (Security and Information Operations), Office of the Assistant Secretary of Defense (Command, Control, Communications and Intelligence), 6000 Defense Pentagon, Washington, DC 20302–6000, telephone (703) 697–1988.

Dated: March 7, 2002.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–08–M

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Meeting

AGENCY: Department of Defense.

ACTION: Notice of Advisory Committee meeting.

SUMMARY: The Defense Science Board (DSB) Task Force on Intelligence in Support of War on Terrorism will meet in closed session on April 22–23, 2002; May 20–21, 2002; and June 17–18, 2002, in the Pentagon. The Task Force will identify capabilities, technologies and approaches for strengthening intelligence in support of the war against terrorism.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition, Technology & Logistics on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings, the Defense Science Board Task Force will address capabilities and approaches for achieving early indications and warning of terrorist capabilities and intentions, providing effective operational and tactical intelligence in support of crisis operations against terrorists, and the capability for attribution of attackers, should a terrorist event occur. The Task Force will also consider promising new capabilities facilitated by recent changes in statutes (*e.g.*, Combating Terrorism Act of 2001).

In accordance with section 10(d) of the Federal Advisory Committee Act, Public Law 92–463, as amended (5 U.S.C. App. II), it has been determined that these Defense Science Board Task Force meetings concern matters listed in 5 U.S.C. 552b(c)(1) and that, accordingly, these meetings will be closed to the public.

Dated: March 8, 2002.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Office, Department of Defense.

[FR Doc. 02–6115 Filed 3–13–02; 8:45 am]

BILLING CODE 5001–08–M

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board

AGENCY: Department of Defense.

ACTION: Notice of Advisory Committee meeting.

SUMMARY: The Defense Science Board (DSB) Task Force on Special Operations and Joint Forces in Support of Countering Terrorism will meet in closed session on April 16–17, 2002, at SAIC, 4001 N. Fairfax Drive, Arlington, VA; May 13–14, 2002, at the Joint Forces Command and the Training & Doctrine Command in Hampton, VA; May 22–23, 2002, at US Central Command and US Special Operations Command in Tampa, FL; and July 16–17, 2002, at SAIC, 4001 N. Fairfax Drive, Arlington, VA. This Task Force will review all elements of the future joint force, including Special Operation Forces that can contribute to military campaigns.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition, Technology & Logistics on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings, the Defense Science Board Task Force will address how to: enhance and best integrate information, maneuver and fires (kinetic and other, lethal and otherwise); deploy, sustain and protect the joint force in these missions, particularly in remote locations and in the face of counter-access measures; and, exploit and leverage the contributions of coalition partners both traditional (*e.g.*, NATO allies) and non-traditional (*e.g.*, the Afghan Northern Alliance). The Task Force will recommend steps to pursue and implement the new and enhanced operational capabilities it identifies. These steps will include initiatives for technology, systems, doctrine, organization, training, leader development, experiments and demonstrations, modeling and simulation tools and facilities.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Pub. L. 92–463, as amended (5 U.S.C. App. II), it has been determined that these Defense Science Board Task Force meetings concern matters listed in 5 U.S.C. 552b(c)(1) and that, accordingly, these matters will be closed to the public.

Dated: March 8, 2002.

Patricia L. Toppings,

Alternate OSD Federal Register, Liaison Officer, Department of Defense.

Department of the Air Force

Privacy Act of 1974; System of Records

AGENCY: Department of the Air Force, DOD.

ACTION: Notice to alter systems of records.

SUMMARY: The Department of the Air Force is proposing to alter a system of records notice in its existing inventory of record systems subject to the Privacy Act of 1974, (5 U.S.C. 552a), as amended. The alteration revises the purposes for releasing records under the routine uses.

DATES: This proposed action will be effective without further notice on April 15, 2002 unless comments are received which result in a contrary determination.

ADDRESSES: Send comments to the Air Force Privacy Act Manager, AF-CIO/P, 1155 Air Force Pentagon, Washington, DC 20330–1155.

FOR FURTHER INFORMATION CONTACT: Mrs. Anne Rollins at (703) 601–4043 or DSN 329–4043.

SUPPLEMENTARY INFORMATION: The Department of the Air Force systems of records notices subject to the Privacy Act of 1974, (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address above.

The proposed system reports, as required by 5 U.S.C. 552a(r) of the Privacy Act of 1974, as amended, was

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Case files are maintained in file folders. Correspondence and other data generated by the agency may be maintained in computer files. Information from case files may be extracted and entered into a database used to store general information for management purposes.

RETRIEVABILITY:

Retrievable by name of claimant or litigant.

SAFEGUARDS:

Records are accessed by custodian of the record system and by person(s) responsible for servicing the record system in performance of their official duties, and who are properly screened and cleared for need-to-know. Records are stored in security file containers/cabinets/safes and controlled by personnel screening. Those records in computer storage devices are protected by computer system software.

RETENTION AND DISPOSAL:

Retained in office files for three years after end of year in which the case was closed, then retired to Washington National Records Center, Washington, DC 20409, for retention up to twelve years thereafter, then destroyed by tearing into pieces, shredding, pulping, macerating, or burning. Records in computer storage are destroyed by degaussing or overwriting.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Commercial Litigation Division, Directorate of Civil Law, Air Force Legal Services Agency (AFLSA/JACN), 1501 Wilson Boulevard, Suite 606, Arlington, VA 22209–2403.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether information about themselves is contained in this system should address written inquiries to or visit the Air Force Legal Services Agency, Directorate of Civil Law, Commercial Litigation Division (AFLSA/JACN), 1501 Wilson Boulevard, Suite 606, Arlington, VA 22209–2403.

RECORD ACCESS PROCEDURES:

Individuals seeking access to information about themselves in this system should address written inquiries to or visit the Air Force Legal Services Agency, Directorate of Civil Law, Commercial Litigation Division (AFLSA/JACN), 1501 Wilson Blvd, Suite 606, Arlington, VA 22209–2403.

CONTESTING RECORD PROCEDURES:

The Air Force rules for accessing records, and for contesting contents and appealing initial agency determinations are published in Air Force Instruction 37–132; 32 CFR part 806b; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Information received from the individual, contractors, other government agencies, individual corporations (non-contractors) and from source documents.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

[FR Doc. 02–6114 Filed 3–13–02; 8:45 am]

BILLING CODE 5001–08–P

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Leader, Regulatory Information Management, Office of the Chief Information Officer, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: An emergency review has been requested in accordance with the Act (44 U.S.C. Chapter 3507 (j)), since public harm is reasonably likely to result if normal clearance procedures are followed. Approval by the Office of Management and Budget (OMB) has been requested by April 1, 2002. A regular clearance process is also beginning. Interested persons are invited to submit comments on or before May 13, 2002.

ADDRESSES: Written comments regarding the emergency review should be addressed to the Office of Information and Regulatory Affairs, Attention: Karen Lee, Desk Officer: Department of Education, Office of Management and Budget; 725 17th Street, NW., Room 10235, New Executive Office Building, Washington, DC 20503 or should be electronically mailed to the internet address *Karen_F._Lee@omb.eop.gov.*

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Director of OMB provide interested Federal agencies and the public an early opportunity to comment on information collection requests. The Office of Management and Budget (OMB) may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Leader, Information Management Group, Office of the Chief Information Officer, publishes this notice containing proposed information collection requests at the beginning of the Departmental review of the information collection. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. ED invites public comment.

The Department of Education is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on respondents, including through the use of information technology.

Dated: March 11, 2002.

John D. Tressler,

Leader, Regulatory Information Management, Office of the Chief Information Officer.

Office of English Language Acquisition

Type of Review: Reinstatement.

Title: Application for Grants under School Improvement: Elementary School Foreign Language Incentive Program.

Abstract: This application is used by public elementary schools and local education agencies to apply for formula grants authorized under the Elementary School Foreign Language Incentive Program.

Additional Information: The Elementary School Foreign Language Incentive Program is an incentive payment program, authorized in Section 5494, Subpart 9 of Part D of Title V of the Elementary and Secondary Education Act of 1965, as amended by the No Child Left Behind Act of 2001. The purpose of the Foreign Language Incentive Program is to provide incentive payments to public elementary schools that provide students attending such a school a program designed to lead to communicative competency in a foreign language.

Frequency: Annually.

Affected Public: State, Local, or Tribal Gov't, SEAs or LEAs.

Reporting and Recordkeeping Hour Burden:

Responses: 300

Burden Hours: 7,650.

Requests for copies of the proposed information collection request should be addressed to Vivian Reese, Department of Education, 400 Maryland Avenue, SW., Room 4050, Regional Office Building 3, Washington, DC 20202–4651, *vivian.reese@ed.gov,* or should be electronically mailed to the internet address *OCIO_RIMG@ed.gov,* or should be faxed to 202–708–9346.

Comments regarding burden and/or the collection activity requirements, contact Sheila Carey at (202) 708–6287 or via her internet address *Sheila.Carey@ed.gov.* Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER01–2262–002, et al.]

Frederickson Power L.P., et al.; Electric Rate and Corporate Regulation Filings

March 7, 2002.

Take notice that the following filings have been made with the Commission. Any comments should be submitted in accordance with Standard Paragraph E at the end of this notice.

1. Frederickson Power L.P.

[Docket No. ER01–2262–002]

Take notice that on February 28, 2002, Frederickson Power L.P. (Frederickson Power) filed a notice of change of status and a Code of Conduct respecting Frederickson Power's pending affiliation with Duke Energy Corporation.

Comment Date: March 21, 2002.

2. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1188–000]

Take notice that on March 1, 2002, pursuant to Section 205 of the Federal Power Act and Section 35.13 of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by Ameren Energy, Inc.

A copy of this filing was sent to Ameren Energy, Inc.

Comment Date: March 22, 2002.

3. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1189–000]

Take notice that on March 1, 2002, pursuant to Section 205 of the Federal Power Act and Section 35.13 of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by Constellation Power Source, Inc.

A copy of this filing was sent to Constellation Power Source, Inc.

Comment Date: March 22, 2002.

4. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1190–000]

Take notice that on March 1, 2002, pursuant to section 205 of the Federal Power Act and section 35.13 of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by Consumers Energy Company d/b/a/ Consumers Energy Traders.

A copy of this filing was sent to Consumers Energy Company d/b/a/ Consumers Energy Traders.

Comment Date: March 22, 2002.

5. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1191–000]

Take notice that on March 1, 2002, pursuant to section 205 of the Federal Power Act and section 35.13 of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by DTE Energy Trading, Inc.

A copy of this filing was sent to DTE Energy Trading, Inc.

Comment Date: March 22, 2002.

6. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1192–000]

Take notice that on March 1, 2002, pursuant to Section 205 of the Federal Power Act and Section 35.13 of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by Dynegy Energy Services, Inc.

A copy of this filing was sent to Dynegy Energy Services, Inc.

Comment Date: March 22, 2002.

7. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1193–000]

Take notice that on March 1, 2002, pursuant to Section 205 of the Federal Power Act and Section 35.13 of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by El Paso Merchant Energy, L.P.

A copy of this filing was sent to El Paso Merchant Energy, L.P.

Comment Date: March 22, 2002.

8. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1194–000]

Take notice that on March 1, 2002, pursuant to section 205 of the Federal Power Act and section 35.13 of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by enXco, Inc.

A copy of this filing was sent to enXco, Inc.

Comment Date: March 22, 2002.

9. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1195–000]

Take notice that on March 1, 2002, pursuant to section 205 of the Federal Power Act and section 35.13 of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by Minnesota Power-MPEX.

A copy of this filing was sent to Minnesota Power-MPEX.

Comment Date: March 22, 2002.

10. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1196–000]

Take notice that on March 1, 2002, pursuant to section 205 of the Federal Power Act and section 35.13 of the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by Mirant Americas Energy Marketing, LP.

A copy of this filing was sent to Mirant Americas Energy Marketing, LP.

Comment Date: March 22, 2002.

11. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1197–000]

Take notice that on March 1, 2002, pursuant to Section 205 of the Federal Power Act and Section 35.13 of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by Rainbow Energy Marketing Corporation.

A copy of this filing was sent to Rainbow Energy Marketing Corporation.

Comment Date: March 22, 2002.

12. Cinergy Services, Inc.

[Docket No. ER02–1198–000]

Take notice that on March 1, 2002, Cinergy Services, Inc. (Cinergy) and Baltimore Gas and Electric Company are requesting a cancellation of Service Agreement No.4, under Cinergy Operating Companies, FERC Electric Cost-Based Power Sales Tariff, FERC Electric Tariff Original Volume No.6.

Cinergy requests an effective date of March 4, 2002.

Comment Date: March 22, 2002.

Cost-Based Power Sales Tariff, FERC Electric Tariff Original Volume No.7.

Cinergy requests an effective date of March 4, 2002.

Comment Date: March 22, 2002.

16. Cinergy Services, Inc.

[Docket No. ER02–1202–000]

Take notice that on March 1, 2002, Cinergy Services, Inc. (Cinergy) and Baltimore Gas and Electric Company are requesting a cancellation of Service Agreement No.154, under Cinergy Operating Companies, FERC Electric Cost-Based Power Sales Tariff, FERC Electric Tariff Original Volume No.6.

Cinergy requests an effective date of March 4, 2002.

Comment Date: March 22, 2002.

17. Ameren Energy, Inc. on Behalf of Union Electric Company d/b/a AmerenUE and Ameren Energy Generating Company

[Docket No. ER02–1203–000]

Take notice that on March 1, 2002, Ameren Energy, Inc. (Ameren Energy), on behalf of Union Electric Company d/b/a AmerenUE and Ameren Energy Generating Company (collectively, the Ameren Parties), pursuant to section 205 of the Federal Power Act, 16 USC 824d, and the market rate authority granted to the Ameren Parties, submitted for filing umbrella power sales service agreements under the Ameren Parties' market rate authorizations entered into *Engage Energy America LLC.* Ameren Energy seeks Commission acceptance of these service agreements effective January 1, 2002.

Copies of this filing were served on the public utilities commissions of Illinois and Missouri and the counterparty.

Comment Date: March 22, 2002.

18. Ameren Energy, Inc. on Behalf of Union Electric Company d/b/a AmerenUE and Ameren Energy Generating Company

[Docket No. ER02–1204–000]

Take notice that on March 1, 2002, Ameren Energy, Inc. (Ameren Energy), on behalf of Union Electric Company d/b/a AmerenUE and Ameren Energy Generating Company (collectively, the Ameren Parties), pursuant to section 205 of the Federal Power Act, 16 USC 824d, and the market rate authority granted to the Ameren Parties, submitted for filing umbrella power sales service agreements under the Ameren Parties' market rate authorizations entered into with *Wisconsin Electric Power Company.* Ameren Energy seeks Commission acceptance of these service agreements effective December 21, 2001.

Copies of this filing were served on the public utilities commissions of Illinois and Missouri and the counterparty.

Comment Date: March 22, 2002.

19. PJM Interconnection, L.L.C.

[Docket No. ER02–1205–000]

Take notice that on March 1, 2002, PJM Interconnection, L.L.C. (PJM), filed amendments to the PJM Open Access Transmission Tariff and the Amended and Restated PJM Operating Agreement to implement it Emergency Load Response Program on a permanent basis. Copies of this filing were served upon all PJM members and each state electric utility regulatory commission in the PJM region.

PJM requests an effective date of June 1, 2002 for the amendments.

Comment Date: March 22, 2002.

20. New England Power Pool

[Docket No. ER02–1206–000]

Take notice that on March 1, 2002, the New England Power Pool (NEPOOL) Participants Committee filed for acceptance materials (1) to permit NEPOOL to expand its membership to include Sprague Energy Corp. (Sprague); and (2) to terminate the memberships of Niagra Mohawk Energy Inc. (NIMO) and Amerada Hess Corporation (Hess). The Participants Committee requests an effective date of March 1, 2002 for commencement of participation in NEPOOL by Sprague and December 31, 2001 and February 1, 2002 for the terminations of NIMO and Hess, respectively.

The Participants Committee states that copies of these materials were sent to the New England state governors and regulatory commissions and the Participants in NEPOOL.

Comment Date: March 22, 2002.

21. New England Power Pool

[Docket No. ER02–1207–000]

Take notice that on March 1, 2001, the New England Power Pool (NEPOOL) Participants Committee tendered for filing a Service Agreement for Regional Network Service, including Network Integration Transmission Service pursuant to section 205 of the Federal Power Act and 18 CFR35.12 of the Commission's regulations. Acceptance of this Service Agreement will recognize the provision of Regional Network Service to Miller Hydro Group, in accordance with the provisions of the Restated NEPOOL Open Access Transmission Tariff, as amended and supplemented. An effective date of February 1, 2002 for commencement of transmission service has been requested.

Copies of this filing were sent to the NEPOOL Participants, the New England state governors and regulatory commissions, and all parties to the transaction.

Comment Date: March 22, 2002.

22. New England Power Company

[Docket No. ER02–1208–000]

Take notice that on March 1, 2002, New England Power Company (NEP) tendered for filing the Original Service Agreement No. 210 for Network Integration Transmission Service under NEP's Open Access Transmission Tariff, FERC Electric Tariff, Second Revised Volume No. 9 between NEP and Millennium Power Partners, L.P., the First Revised Service Agreement No. 109 for Network Integration Transmission Service under NEP's Open Access Transmission Tariff, FERC Electric Tariff, Second Revised Volume No. 9 between NEP and Massachusetts Electric Company and Nantucket Electric Company; the First Revised Service Agreement No. 108 for Network Integration Transmission Service under NEP's Open Access Transmission Tariff, FERC Electric Tariff, Second Revised Volume No. 9 between NEP and The Narragansett Electric Company; and the First Revised Service Agreement No. 116 for Network Integration Transmission Service under NEP's Open Access Transmission Tariff, FERC Electric Tariff, Second Revised Volume No. 9 between NEP and USGen New England, Inc. (USGen).

NEP states that this filing has been served upon USGen and regulators in the Commonwealth of Massachusetts and the State of Rhode Island.

Comment Date: March 22, 2002.

23. American Electric Power Service Corporation

[Docket No. ER02–1209–000]

Take notice that on March 1, 2002, Central Power and Light Company (CPL) and American Electric Power Service Corporation (AEPSC), as designated agent for Central Power and Light Company, submitted for filing (1) a service agreement (the OATT Service Agreement) under which Pedernales Electric Cooperative, Inc. (Pedernales) will take transmission service pursuant to Part IV of the Open Access Transmission Tariff of the American Electric Power System (AEP OATT); and (2) an Interconnection Agreement (IA) between CPL and Pedernales, implementing new arrangements attendant to converting the former Pedernales Points of Delivery on CPL to Points of Interconnection with CPL.

CPL and AEPSC seek an effective date of February 1, 2002 for the two agreements and, accordingly, seek waiver of the Commission's notice requirements. Copies of the filing have been served on Pedernales and on the Public Utility Commission of Texas.

Comment Date: March 22, 2002.

Standard Paragraph

E. Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

Federal Energy Regulatory Commission

[Docket No. EC02–54–000, et al.]

The New Power Company, et al.; Electric Rate and Corporate Regulation Filings

March 4, 2002.

Take notice that the following filings have been made with the Commission. Any comments should be submitted in accordance with Standard Paragraph E at the end of this notice.

1. The New Power Company, NewPower Holdings, Inc., Centrica plc

[Docket No. EC02–54–000]

Take notice that on February 28, 2002, The New Power Company, its parent company NewPower Holdings, Inc. and Centrica plc, filed with the Federal Energy Regulatory Commission (Commission) a joint application pursuant to section 203 of the Federal Power Act for authorization of a disposition of jurisdictional facilities whereby Centrica plc will indirectly acquire NewPower Holdings, Inc. Applicants request confidential treatment of Exhibit I, pursuant to 18 CFR 388.112 of the Commission's regulations, for the written instruments associated with the proposed disposition. Further, Applicants respectfully request that the Commission approve this application on an expedited basis by March 27, 2002.

Comment Date: March 21, 2002.

2. Shanghai WEI-Gang Energy Company Ltd.

[Docket No. EG02–70–000]

Take notice that on February 19, 2002, Shanghai WEI-Gang Energy Company Ltd. (Applicant) tendered for filing with the Federal Energy Regulatory Commission (Commission) an amended application for determination of exempt wholesale generator status pursuant to section 32(a)(1) of the Public Utility Holding Company Act of 1935. The applicant states that it is a Sino-foreign cooperative joint venture that is engaged directly and exclusively in developing, owning, and operating a gas-fired 50 MW simple cycle power plant in Shanghai, China, which will be an eligible facility.

Comment Date: March 25, 2002.

3. American Transmission Company LLC

[Docket No. ER02–529–001]

Take notice that on February 27, 2002, American Transmission Company LLC (ATCLLC) tendered for filing, in compliance with the Federal Energy Regulatory Commission's (Commission) January 30, 2002 order, a Revised Generation-Transmission Interconnection Agreement with Cloverland Electric Cooperative, which is designated as Revised Service Agreement No. 220. ATCLLC requests an effective date of June 29, 2001.

Comment Date: March 20, 2002.

4. RAMCO, Inc.

[Docket No. ER01–1916–001]

Take notice that on February 28, 2002, RAMCO, Inc. (RAMCO) filed a Notice of Change in Status with the Federal Energy Regulatory Commission (Commission) in accordance with the delegated letter order issued June 26, 2001 in RAMCO, Inc., Docket No. ER01–1916–000, accepting for filing RAMCO's marked-based rate tariff. The Notice of Change in Status reports that PG&E Dispersed Power Corporation will purchase 100% of the ownership shares of RAMCO. *Comment Date:* March 21, 2002.

5. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1164–000]

Take notice that on February 28, 2002, pursuant to Section 205 of the Federal Power Act and Section 35.13 of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by Dayton Power and Light Company—DP&L Power Services.

A copy of this filing was sent to Dayton Power and Light Company—DP&L Power Services.

Comment Date: March 21, 2002.

6. Connexus Energy

[Docket No. ER02–1165–000]

Take notice that on February 28, 2002, Connexus Energy submitted for filing with the Federal Energy Regulatory Commission (Commission) revised sheets to Connexus Energy's Electric Rate Schedule FERC No. 1. Connexus Energy states that the revised sheets effect minor rate changes under Connexus Energy's contract with Elk River Municipal Utilities.

Connexus Energy requests waiver of the Commission's notice requirement to allow a March 1, 2002 effective date.

Comment Date: March 21, 2002.

7. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1167–000]

Take notice that on February 28, 2002, pursuant to section 205 of the Federal Power Act and section 35.13 of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by Indianapolis Power & Light Company.

A copy of this filing was sent to Indianapolis Power & Light Company. *Comment Date:* March 21, 2002.

8. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1168–000]

Take notice that on February 28, 2002, pursuant to Section 205 of the Federal Power Act and Section 35.13 of the

VOL 67 ISS 50 MR 14 2002 UMI

Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by New Power Company.

A copy of this filing was sent to New Power Company.

Comment Date: March 21, 2002.

9. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1169–000]

Take notice that on February 28, 2002, pursuant to section 205 of the Federal Power Act and section 35.13 of the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by Western Area Power Administration-UGP Marketing.

A copy of this filing was sent to Western Area Power Administration-UGP Marketing.

Comment Date: March 21, 2002.

10. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1170–000]

Take notice that on February 28, 2002, pursuant to section 205 of the Federal Power Act and section 35.13 of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by Minnkota Power Cooperative.

A copy of this filing was sent to Minnkota Power Cooperative.

Comment Date: March 21, 2002.

Standard Paragraph

E. Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

Magalie R. Salas,

Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–7157–6]

Request for Nominations to the National and Governmental Advisory Committees to the U.S. Representative to the North American Commission for Environmental Cooperation

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of request for nominations.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is inviting nominations of qualified candidates to be considered for appointment to fill vacancies on the National and Governmental Advisory Committees to the U.S. Representative to the North American Commission for Environmental Cooperation. Current vacancies on these committees are scheduled to be filled by May 1, 2002.

ADDRESSES: Submit nominations to: Mark Joyce, Designated Federal Officer, Office of Cooperative Environmental Management, U.S. Environmental Protection Agency (1601A), 1200 Pennsylvania Avenue NW., Washington, DC 20004.

FOR FURTHER INFORMATION CONTACT: Mark Joyce, Designated Federal Officer, U.S. Environmental Protection Agency (1601A), 1200 Pennsylvania Avenue NW., Washington, DC 20004; telephone 202–564–9802; fax 202–501–0661; e-mail *joyce.mark@epa.gov*.

SUPPLEMENTARY INFORMATION: The National and Governmental Advisory Committees advise the Administrator of the EPA in the Administrator's capacity as the U.S. Representative to the Council of the North American Commission for Environmental Cooperation (CEC). The Committees are authorized under Articles 17 and 18 of the North American Agreement on Environmental Cooperation (NAAEC), North American Free Trade Agreement (NAFTA) Implementation Act, Public Law 103–182 and as directed by Executive Order 12915, entitled "Federal Implementation of the North American Agreement on Environmental Cooperation." The Committees are responsible for providing advice to the United States Representative on a wide range of strategic, scientific, technological, regulatory and economic issues related to implementation and further elaboration of the NAAEC. The National Advisory Committee consists of 12 representatives of environmental groups and non-profit entities, business and industry, and educational institutions. The Governmental Advisory Committee consists of 12 representatives from state, local and tribal governments.

Members are appointed by the Administrator of EPA for a two year term with the possibility of reappointment. The Committees usually meet 3 times annually and the average workload for Committee members is approximately 10 to 15 hours per month. Members serve on the Committees in a voluntary capacity, but EPA does provide reimbursement for travel expenses associated with official government business.

The following criteria will be used to evaluate nominees:

- They have extensive professional knowledge of the subjects the Committees examine, including trade and the environment, the NAFTA, the NAAEC, and the CEC.
- They represent a sector or group that is involved in the issues the Committees evaluate.
- They have senior level experience that will fill a need on the Committees for their particular expertise.
- They have a demonstrated ability to work in a consensus building process with a wide range of representatives from diverse constituencies.

Nominees will also be considered with regard to the mandates of the Federal Advisory Committee Act that require the Committees to maintain diversity across a broad range of constituencies, sectors, and groups.

Nominations for membership must include a resume describing the professional and educational qualifications of the nominee and the nominee's current business address and daytime telephone number.

Dated: March 1, 2002.

Mark N. Joyce,

Designated Federal Officer.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[OPP–30523; FRL–6826–4]

Pesticide Products; Registration Applications

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces receipt of applications to register pesticide products containing new active ingredients not included in any previously registered products pursuant to the provisions of section 3(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

DATES: Written comments, identified by the docket control number OPP–30523, must be received on or before April 15, 2002.

ADDRESSES: Comments may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit I. of the **SUPPLEMENTARY INFORMATION.** To ensure proper receipt by EPA, it is imperative that you identify docket control number OPP–30523 in the subject line on the first page of your response.

FOR FURTHER INFORMATION CONTACT: By Mail: Mary L. Waller, Product Manager (PM 21), Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (703) 308–9354 and e-mail address: waller.mary@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected categories and entities may include, but are not limited to:

Categories	NAICS codes	Examples of potentially affected entities
Industry	111 112	Crop production Animal production
	311	Food manufacturing
	32532	Pesticide manufacturing

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in the table could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether or not this action might apply to certain entities. If you have questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT.**

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at http://www.epa.gov/. To access this document, on the Home Page select "Laws and Regulations," "Regulations and Proposed Rules," and then look up the entry for this document under the "**Federal Register**—Environmental Documents." You can also go directly to the **Federal Register** listings at http://www.epa.gov/fedrgstr/.

2. *In person.* The Agency has established an official record for this action under docket control number OPP–30523. The official record consists of the documents specifically referenced in this action, any public comments received during an applicable comment period, and other information related to this action, including any information claimed as confidential business information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period, is available for inspection in the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

C. How and to Whom Do I Submit Comments?

You may submit comments through the mail, in person, or electronically. To ensure proper receipt by EPA, it is imperative that you identify docket control number OPP–30523 in the subject line on the first page of your response.

1. *By mail.* Submit your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

2. *In person or by courier.* Deliver your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA. The PIRIB is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

3. *Electronically.* You may submit your comments electronically by e-mail to: opp-docket@epa.gov, or you can submit a computer disk as described above. Do not submit any information electronically that you consider to be CBI. Avoid the use of special characters and any form of encryption. Electronic submissions will be accepted in WordPerfect 6.1/8.0 or ASCII file format. All comments in electronic form must be identified by docket control number OPP–30523. Electronic comments may also be filed online at many Federal Depository Libraries.

D. How Should I Handle CBI that I Want to Submit to the Agency?

Do not submit any information electronically that you consider to be CBI. You may claim information that you submit to EPA in response to this document as CBI by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public version of the official record.

Information not marked confidential will be included in the public version of the official record without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person identified under **FOR FURTHER INFORMATION CONTACT**.

E. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Provide specific examples to illustrate your concerns.
6. Offer alternative ways to improve the registration activity.
7. Make sure to submit your comments by the deadline in this notice.
8. To ensure proper receipt by EPA, be sure to identify the docket control number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

II. Registration Applications

EPA received applications as follows to register pesticide products containing active ingredients not included in any previously registered products pursuant to the provision of section 3(c)(4) of FIFRA. Notice of receipt of these applications does not imply a decision by the Agency on the applications.

Products Containing Active Ingredients not Included in any Previously Registered Products

1. *File Symbol*: 432–REER. *Applicant*: Aventis Environmental Science USA LP, 95 Chestnut Ridge Road, Monvale, NJ 07645. *Product name*: Triticonazole Technical Fungicide. *Active ingredient*: Triticonazole [(5-[(4-chlorophenyl) methylene]-2,2-dimethyl-1-(1*H*-1,2,4-triazol-1-ylmethyl)cyclopentanol at 92.5%. *Proposed classification/Use*: None. For formulation of fungicides only for turf and ornamentals.

2. *File Symbol*: 264–ANG. *Applicant*: Aventis Crop Science, 2TW Alexandria Drive, Research Triangle Park, NC 27709. *Product name*: CHARTER Triticonazole Fungicide. *Active ingredient*: Triticonazole at 2.4%. *Proposed classification/Use*: None. For control of various seed-borne diseases in wheat, barley, and oats.

3. *File Symbol*: 264–ANR. *Applicant*: Aventis Crop Science. *Product name*: Chipco(R) Brand Triton(TM) Fungicide. *Active ingredient*: Triticonazole at 19.3%. *Proposed classification/Use*: None. For the prevention and control of certain diseases of commercial turfgrass, golf courses, and sod farms.

4. *File Symbol*: 264–ATE. *Applicant*: Aventis Crop Science. *Product name*: CHARTER(TM) Brand PB Fungicide. *Active ingredient*: Triticonazole at 1.25%. *Proposed classification/Use*: None. For control of various seed-borne diseases in wheat and barley.

List of Subjects

Environmental protection, Pesticides and pest.

Dated: February 28, 2002.

Peter Caulkins,

Acting Director, Registration Division, Office of Pesticide Programs.

Information not marked confidential will be included in the public version of the official record without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person identified under **FOR FURTHER INFORMATION CONTACT**.

E. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Provide specific examples to illustrate your concerns.
6. Make sure to submit your comments by the deadline in this notice.
7. To ensure proper receipt by EPA, be sure to identify the docket control number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

II. What Action is the Agency Taking?

EPA has received a pesticide petition as follows proposing the establishment and/or amendment of regulations for residues of a certain pesticide chemical in or on various food commodities under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a. EPA has determined that this petition contains data or information regarding the elements set forth in section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the petition. Additional data may be needed before EPA rules on the petition.

List of Subjects

Environmental protection, Agricultural commodities, Feed additives, Food additives, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: February 28, 2002.

Peter Caulkins,

Acting Director, Registration Division, Office of Pesticide Programs.

Summary of Petition

The petitioner summary of the pesticide petition is printed below as required by section 408(d)(3) of the FFDCA. The summary of the petition was prepared by Aventis CropScience, and represents the view of the petitioners. EPA is publishing the petition summary verbatim without editing it in any way. The petition summary announces the availability of a description of the analytical methods available to EPA for the detection and measurement of the pesticide chemical residues or an explanation of why no such method is needed.

Aventis CropScience

PP 9F6051

EPA has received a pesticide petition (9F6051) from Aventis CropScience, 2 TW Alexander Drive, Research Triangle Park, NC 27709 proposing, pursuant to section 408(d) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(d), to amend 40 CFR part 180, by establishing tolerances for combined residues of the fungicide triticonazole 5-[(4-chlorophenyl)methylene]-2,2-dimethyl-1-(1H-1,2,4-triazol-1-ylmethyl)cyclopentanol), and its metabolites, 5-[(4-chlorophenyl)methylene]-2-hydroxymethyl-2-methyl-1-(1H-1,2,4-triazol- 1ylmethyl)cyclopentanol (RPA 404886) and 5-[(4-chlorophenyl)methylene]-2,2-dimethyl-1-(1H- 1,2,4-triazol-1ylmethyl)cyclopentan-1,3-trans-diol (RPA 406341)] in or on the raw agricultural commodities wheat grain at 0.05 parts per million (ppm), wheat forage at 0.05 ppm, wheat hay at 0.05 ppm, wheat straw at 0.05 ppm, barley grain at 0.05 ppm, barley forage at 0.05 ppm, barley hay at 0.05 ppm, and barley straw at 0.05 ppm. EPA has determined that the petition contains data or information regarding the elements set forth in section 408(d)(2) of the FFDCA; however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data supports granting of the petition. Additional data may be needed before EPA rules on the petition.

A. Residue Chemistry

1. *Plant metabolism.* Metabolism studies in wheat and barley were conducted using both phenyl-ring and triazole-ring labeled material in order to fully define the metabolic fate of triticonazole. Treatment regimes were chosen to simulate a commercial seed treatment application. The results from both crops were similar. Hydroxylation is the primary route of metabolism with the carbons of the cyclopentane ring and the methyl groups being the sites susceptible to oxidative degradation.

2. *Analytical method.* The plant metabolism studies indicated that analysis for the parent compound, triticonazole, and the metabolites RPA 404886 and RPA 406341 was sufficient to enable the assessment of the relevant residues in wheat and barley. Following extraction of the crop matrix and sample cleanup, the analytical enforcement method relies on the use of Turbo Ionspray, liquid chromatography/mass spectroscopy (LC/MS) for determination of the residue level. This method allows detection and measurement of residues in or on agricultural commodities at or above the proposed tolerance level. Analysis using Electrospray, liquid chromatography/ mass spectroscopy/ mass spectroscopy (LC/MS/MS) is more sensitive, and allows quantitation of analytes down to 0.005 ppm.

3. *Magnitude of residues.* Field residue trials were conducted across the major regions of small-grain cereal production in the United States. The treatment regime was selected to represent the use pattern that is the most likely to result in the highest residues.

Trials to define the magnitude of the residues in wheat raw agricultural commodity, were conducted at 22 trial sites of which 13 used spring wheat varieties and 9 used fall wheat varieties. The wheat seeds were treated with a triticonazole formulation at a rate of approximately 10 g active ingredient (a.i.)/100 kg wheat seed, a rate twice that anticipated under commercial use practice. Generally, the level of triticonazole residues observed in the samples were very low. For wheat forage, the residue of triticonazole found in or on the samples did not exceed 0.02 ppm; whereas, the residues for wheat hay did not exceed 0.008 ppm and the residues for wheat straw did not exceed 0.007 ppm. Triticonazole was not detected (method detection limit (MDL) = 0.002 ppm) in or on the wheat grain samples, except in one of the two replicate samples from one trial site where the residue level was determined to be 0.0055 ppm. Residues of the metabolites were not detected (MDL = 0.002 ppm) in any forage, hay grain or straw samples, except at one site where residues of RPA 406341 in the straw were just above the MDL but less than the limit of quantification (LOQ) of the method.

Trials to define the magnitude of the residues in the raw agricultural commodity barley were conducted at 14 trial sites of which 12 used spring wheat varieties and 2 used fall wheat varieties. The barley seeds were treated as described above for wheat. No residues of triticonazole or metabolites were detected (MDL = 0.002 ppm) in or on the barley grain samples. In the barley hay samples, no residues of triticonazole or metabolites were detected above the LOQ of the method (0.005 ppm), except at one site where the mean level of triticonazole in the duplicate samples was 0.0058 ppm. Similarly, in the straw, no residues of triticonazole or metabolites were detected above the LOQ of the method except in one replicate at one site where triticonazole was found at 0.0067 ppm.

Studies were conducted to determine if triticonazole residues concentrated upon processing wheat or barley grain. The wheat or barley seeds used for these studies were treated at a nominal rate of 50 g a.i./100kg wheat seed, a rate 10 times that anticipated under commercial use practice. Grain samples were collected at normal commercial maturity. Using procedures that simulate commercial practices, wheat grain was processed into bran, flour, middlings, shorts, and germ; whereas barley grain was processed into bran, flour, or pearled barley. Using LC/MS/MS, the LOQ and MDL for triticonazole and metabolites were 0.005 ppm and 0.002 ppm, respectively, for all matrices. Triticonazole-related residues were below the MDL for all grain and processed fraction samples. Based on these results, residues of triticonazole and metabolites do not concentrate in wheat or barley processed fractions following a triticonazole seed treatment application.

B. Toxicological Profile

1. *Acute toxicity.* Triticonazole is of low acute toxicity placing the active ingredient in Toxicity Category III and IV. Triticonazole is non-irritating to the eyes and skin and is not a skin sensitizer.

2. *Genotoxicty.* The genetic toxicity of triticonazole has been evaluated through a full battery of mutagenicity assays. Triticonazole was not mutagenic or genotoxic in any assay in either the presence or absence of metabolic activation.

3. *Reproductive and developmental toxicity.* Triticonazole is not a reproductive or developmental toxicant.

a. *Teratology - rat.* Groups of at least 23 pregnant rats received daily oral doses of 0, 40, 200 or 1,000 mg/kg/day of triticonazole from day 6 to day 15 of gestation inclusive. The mean weight gain and the food intake of females receiving 1,000 mg/kg/day was marginally lower than that of the controls. Litter size, survival *in utero* and mean fetal and placental weights were unaffected by treatment. There were no major abnormalities or visceral abnormalities at any dosage used. The mean weight gain and the food intake of females receiving 1,000 mg/kg/day was marginally lower than that of the controls. Females at 40 and 200 mg/kg/day were unaffected.

There was an apparent increase in the incidence of fetuses with an additional 14th rib or pair of ribs at 1,000 mg/kg/day. The incidences at 40 and 200 mg/kg/day were within the historical control range. Because the increased incidence of supernumerary (14th) ribs is not toxicologically significant, the NOAEL for maternal and developmental toxicity was 1,000 mg/kg/day.

b. *Teratology - rabbit.* Triticonazole was administered by gavage to 4 groups of at least 18 pregnant New Zealand white rabbits at dosages of 5, 25, 50 or 75 mg/kg/day, from Day 6 to Day 19 of gestation inclusive. Administration of 25 mg/kg/day was associated with body weight reduction and reduced food intake. At 50 and 75 mg/kg/day more marked body weight loss, reduced food intake and deaths were observed. Slightly increased pre-implantation and post-implantation losses and increased incidences of skeletal anomalies were observed at 75 mg/kg, secondary to severe maternal toxicity (6 animals died out of 20). The NOAEL for maternal toxicity was 25 milligrams/kilogram of body weight/day (mg/kg bwt/day) based on reduced body weight gains and food consumption at 50 mg/kg bwt/day. The NOAEL for fetal development was 50 mg/kg bwt/day, based on skeletal abnormalities noted in the presence of severe maternal toxicity at 75 mg/kg bwt/day.

c. *Two-generation reproduction - rat.* Groups of 28 males and 28 females Crl:CD BR/VAF/Plus rats (F0) were offered diets containing 0, 5, 25, 750 and 5,000 ppm of triticonazole for 10 weeks before mating and throughout gestation, lactation and weaning of the pups. A second generation of selected pups (F1) was provided diets at the same concentrations as their parents from weaning for at least 10 weeks before mating and throughout mating, gestation and lactation. The NOAEL for systemic toxicity is 750 ppm, based on mortality, decreased body weight gain, and food consumption seen in the high dose animals in both generations. The NOAEL for reproductive performance and fetal effects is also 750 ppm, based on a reduction in mating and fertility indices, number of live births, pup viability and pup body weights at 5,000 ppm.

4. *Subchronic toxicity*—i. 28-day *dietary - rat.* Groups of five male and five female F–344 rats received triticonazole continuously, via the diet, at concentrations of 0, 500, 1,500, 5,000, 15,000 or 50,000 ppm (0, 50, 150, 500, 1,500, and 5,000 mg/kg/day, respectively for 4–weeks. At 5,000 ppm (500 mg/kg/day) growth performance, food consumption and efficiency of food utilization of males were inferior to control values throughout the treatment period. Hematological investigations revealed low platelet counts in males. Blood chemistry investigations revealed minimally low glucose concentrations. High liver weights and low prostate and uterus weights were noted at necropsy. The NOAEL for systemic toxicity was 1,500 ppm (150 mg/kg/day).

ii. *90–day dietary - rat.* Four groups of 10 male and 10 female CD rats received triticonazole via the diet at concentrations of 25, 250, 12,500 or 25,000 ppm (2.5, 25, 1,250, or 2,500 mg/kg/day) for 13 weeks. The NOAEL for this study was 12,500 ppm (1,250 mg/kg/day) based on reduced body weight gain, food consumption, and histopathological changes in the liver and adrenals.

c. *Dermal toxicity evaluation.* No adverse effects were noted in rats at the limit dose of 1,000 mg/kg bwt/day.

5. *Chronic toxicity - dog.* a. Four groups of 4 male and 4 female beagle dogs received triticonazole in gelatin capsules at dosages 2.5, 25 and 150 mg/kg/day. A similar control group received only empty gelatin capsules. The NOAEL for this study was 25 mg/kg bwt/day based on clinical signs of toxicity, lower for body weight gains; organ weight changes and histopathological changes of the liver and adrenals were seen at the LOAEL of 150 mg/kg/day.

b. *Combined chronic toxicity/ oncogenicity - rat.* Four groups of 50 males and 50 females CD rats were administered triticonazole via the diet at concentrations of 5, 25, 750 and 5,000 ppm for 2–years. Observed adverse effects were only at the highest dose of 5,000 ppm with decreased body weight gain in females and histopathological changes in the adrenals. The NOAEL for this study was 750 ppm that is equivalent to 29.4 and 38.3 mg/kg/day respectively for males and females.

c. *Oncogenicity - mouse.* Triticonazole was administered via the diet to four groups of 52 male and 52 female CD mice at concentrations of 0, 15, 150 and 1,500 ppm for 78 weeks. The NOAEL was 150 ppm (17.4 and 20.1 mg/kg for males and females respectively) based on reductions in body weight gain, increased relative and absolute liver weights and histopathological changes in the liver at 1,500 ppm. There were no treatment-related neoplasms in this study.

6. *Neurotoxicity*—a. *Acute neurotoxicity.* Groups of 10 male and 10 female rats were dosed once by oral gavage at dose levels of 0, 80, 400, or 2,000 mg/kg of triticonazole in a methyl cellulose suspension. There were no differences observed in body weight, in any of the functional observation battery (FOB), or in motor activity. Microscopy revealed no changes related to the administration of triticonazole. Therefore, the NOAEL for acute neurotoxicity exceeds 2,000 mg/kg.

b. *Subchronic neurotoxicity.* Groups of 10 male and 10 female rats received basal diet containing triticonazole at inclusion levels of 0, 500, 2,500 or 10,000 ppm (0, 33, 170 and 695 mg/kg/day in the males, and 0, 39, 199 and 820 mg/kg/day in the females). There were no differences observed in bodyweight, in any of the FOB, or in motor activity. Microscopy revealed no changes related to the administration of triticonazole. Therefore, the NOAEL for sub-acute neurotoxicity exceeds 10,000 ppm (exceeds 695 mg/kg/day) in the rat.

7. *Animal metabolism.* Studies conducted in cows and hens using ^{14}C-triticonazole indicate the majority of the radioactivity is rapidly excreted with almost a negligible amount transferred to tissues, milk or eggs. Hyrdoxylation represented the primary metabolic pathway with the carbon atoms on the cyclopentane and those of the methyl groups being the sites of attack. Principal metabolites included RPA 406341 and RPA 404886 and a metabolite in which the hydroxymethyl group of RPA 404886 was further oxidized to a carboxylic acid function.

8. *Endocrine disruption.* No studies have been conducted to investigate the potential of triticonazole to induce estrogenic or other endocrine effects. The EPA has not yet developed the criteria it will use for characterizing endocrine disrupting substances. Therefore, an evaluation of the potential of triticonazole to induce estrogenic or other endocrine effects cannot be conducted at this time.

C. Aggregate Exposure

1. *Dietary exposure.* Tolerances are proposed under 40 CFR part 180 for the combined residues of triticonazole and metabolites in or on wheat grain, forage, straw, and hay, and in or on barley grain, forage, straw, and hay. The registration of triticonazole for control of fungal diseases in turf (non-food use) is pending at EPA. The turf use is for application by professional applicators, and does not include use on residential turf. Therefore, potential non-occupational (residential) exposure would include exposures resulting from consumption of potential residues in food and water only.

i. *Food.* Potential dietary exposures from food were estimated using the DEEM software system (Novigen Sciences, Inc.) and the 1994–96 USDA consumption data. Residue data from field trial studies in which grain grown from triticonazole treated barley and wheat seed was used to estimate chronic and acute dietary exposure. Percent crop treated values include the total amount of barley and wheat treated with any seed treatment pesticide, and thus, are conservative. Metabolism studies show that triticonazole residues are not expected in livestock tissues from animals fed at levels found in treated seed feed items. Tier 3 chronic exposure for the overall U.S. population was estimated to be 0.000002 mg/kg/bwt/day, representing less than 0.1% of the chronic reference dose. Chronic exposure for the most highly exposed population subgroup, children 1–6 years of age, was calculated to be 0.000004 mg/kg/bwt/day, also less than 0.1% of the chronic reference dose.

Tier 3 acute exposure at the 99.9th percentile for the overall U.S. population was estimated to be 0.000017 mg/kg/bwt/day, less than 0.1% of the acute reference dose. Acute exposure for the most highly exposed population subgroup, again children 1–6 years old, was estimated to be 0.00002 mg/kg/bwt/day, less than 0.1% of the acute reference dose. These analyses represent worst case estimates of potential dietary exposure to wheat and barley. Any exposure from residues of triticonazole in the diet are likely to be negligible to non-existent in real world situations.

ii. *Drinking water.* EPA's standard operating procedure (SOP) for drinking water exposure and risk assessments was used to perform the drinking water assessment. This SOP uses a variety of tools to conduct drinking water assessment. These tools include water models such as screening concentration in ground water (SCI-GROW), generic

VOL
67
ISS
50
MR
14
2002
UMI

expected environmental concentration (GENEEC), pesticide root zone management system/exposure analysis modeling system (PRZMS/EXAMS), and monitoring data. If monitoring data are not available, then the models are used to predict potential residues in surface and ground water, and the highest residue is assumed to be the drinking water residue. In the case of triticonazole, monitoring data do not exist; therefore, GENEEC was used to estimate the concentration of triticonazole that might occur in water. The GENEEC values represent very conservative assumptions and worst case scenarios. The calculated drinking water levels of comparison (DWLOC), for chronic and acute exposures for all adults and children exceed the drinking water estimated concentrations (DWECs) from the models by many orders of magnitude. The acute DWLOC for children is 2,500 parts per billion (ppb). The acute DWEC is 0.098 ppb. The chronic DWLOC for adults is 5,950 ppb. The chronic DWLOC for children/toddlers is 1,700 ppb. The DWEC for the worst case chronic scenario is 0.024 ppb. The drinking water levels of comparison are based on highly conservative dietary (food) exposures and are expected to be even higher in real world situations. Any exposure from triticonazole in drinking water would be negligible based on these highly conservative analyses.

2. *Non-dietary exposure*. The pending CHIPCO brand TRITON registration for triticonazole is for commercial turf grass, golf courses and sod farms. It is not intended for home use. As such, there would be no exposure in residential homes from this use, and is not included in the aggregate risk assessment.

D. Cumulative Effects

Section 408(b)(2)(D)(v) requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider "available information", concerning the cumulative effects of a particular pesticide's residues and "other substances that have a common mechanism of toxicity." There is no reliable data at this time to determine whether triticonazole has a common mechanism of toxicity with other substances, or how to include this pesticide in a cumulative risk assessment. Unlike other pesticides for which EPA has followed a cumulative risk approach based on a common mechanism of toxicity, triticonazole does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance petition, therefore, it has not been assumed that triticonazole has a common mechanism of toxicity with other substances.

E. Safety Determination

1. *U.S. population*. Using the conservative assumptions described above, based on the completeness and reliability of the toxicity data, it is concluded that chronic dietary exposure to the proposed uses of triticonazole will utilize less than 0.1% of the chronic reference dose for the U.S. population. The actual exposure is likely to be much less as more realistic data and models are developed. EPA generally has no concern for exposures below 100% of the RfD because the RfD represents the level at or, below which daily aggregate exposure over a lifetime will not pose appreciable risk to human health. Acute exposure estimates for the U.S. population utilizes less than 0.1% of the acute RfD. This is a conservative assessment and actual exposure is likely to be far less. Drinking water levels of comparison based on the dietary exposure are much greater than highly conservative estimated levels, and would be expected to be well below the 100% level of the RfD, if they occur at all. Therefore, there is a reasonable certainty that no harm will occur to the U.S. population from aggregate exposure (food and drinking water) residues of triticonazole.

2. *Infants and children*. FFDCA Section 408 provides that the Agency may apply an additional safety factor for infants and children to account for pre-natal and post-natal toxicity or incompleteness of the data base. The toxicology data base for triticonazole regarding potential pre-natal and post-natal effects in children is complete according to existing Agency data requirements and does not indicate any particular developmental or reproductive concerns. The developmental toxicity studies clearly demonstrate that triticonazole is not teratogenic and the reproductive toxicity study did not indicate any increased sensitivity to the effects of triticonazole in developing, or young animals. Therefore, an extra safety factor is not warranted.

Using the conservative assumptions described in the exposure section above, exposure to residues of triticonazole in food for children 1–6 years old, (the most highly exposed sub group) is less than 0.1% of the acute and chronic reference doses. As in the adult situation, drinking water levels of comparison are much higher than the worst case drinking water estimated concentrations, and are expected to use well below 100% of the reference dose, if they occur at all. Therefore, there is a reasonable certainty that no harm will occur to infants and children from aggregate exposure to residues of triticonazole.

F. International Tolerances

Maximum residue limits codex MRLs for triticonazole and metabolites in or on wheat and barley commodities have not been established by the Codex Alimentarius Commission.

[FR Doc. 02–6156 Filed 3–13–02; 8:45 am]
BILLING CODE 6560–50–S

ENVIRONMENTAL PROTECTION AGENCY

[PF–1074; FRL–6826–3]

Notice of Filing Pesticide Petitions to Establish a Tolerance for Certain Pesticide Chemicals in or on Food

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the initial filing of pesticide petitions proposing the establishment of regulations for residues of certain pesticide chemicals in or on various food commodities.

DATES: Comments, identified by docket control number PF–1074, must be received on or before April 15, 2002.

ADDRESSES: Comments may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit I.C. of the **SUPPLEMENTARY INFORMATION**. To ensure proper receipt by EPA, it is imperative that you identify docket control number PF–1074 in the subject line on the first page of your response.

FOR FURTHER INFORMATION CONTACT: By mail: Shaja Brothers, Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number (703) 308–3194; and e-mail address: brothers.shaja@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be affected by this action if you are an agricultural producer, food manufacturer or pesticide manufacturer. Potentially affected categories and entities may include, but are not limited to:

Categories	NAICS codes	Examples of potentially affected entities
Industry	111 112 311 32532	Crop production Animal production Food manufacturing Pesticide manufacturing

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in the table could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether or not this action might apply to certain entities. If you have questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

1. *Electronically*. You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at http://www.epa.gov/. To access this document, on the Home Page select "Laws and Regulations" and then look up the entry for this document under the "**Federal Register**—Environmental Documents." You can also go directly to the **Federal Register** listings at http://www.epa.gov/fedrgstr/.

2. *In person*. The Agency has established an official record for this action under docket control number PF–1074. The official record consists of the documents specifically referenced in this action, any public comments received during an applicable comment period, and other information related to this action, including any information claimed as confidential business information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period, is available for inspection in the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

C. How and to Whom Do I Submit Comments?

You may submit comments through the mail, in person, or electronically. To ensure proper receipt by EPA, it is imperative that you identify docket control number PF–1074 in the subject line on the first page of your response.

1. *By mail*. Submit your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

2. *In person or by courier*. Deliver your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA. The PIRIB is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

3. *Electronically*. You may submit your comments electronically by e-mail to: opp-docket@epa.gov, or you can submit a computer disk as described above. Do not submit any information electronically that you consider to be CBI. Avoid the use of special characters and any form of encryption. Electronic submissions will be accepted in Wordperfect 6.1/8.0 or ASCII file format. All comments in electronic form must be identified by docket control number PF–1074. Electronic comments may also be filed online at many Federal Depository Libraries.

D. How Should I Handle CBI That I Want to Submit to the Agency?

Do not submit any information electronically that you consider to be CBI. You may claim information that you submit to EPA in response to this document as CBI by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public version of the official record. Information not marked confidential will be included in the public version of the official record without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

E. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.

2. Describe any assumptions that you used.

3. Provide copies of any technical information and/or data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.

5. Provide specific examples to illustrate your concerns.

6. Make sure to submit your comments by the deadline in this notice.

7. To ensure proper receipt by EPA, be sure to identify the docket control number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

II. What Action is the Agency Taking?

EPA has received pesticide petitions as follows proposing the establishment and/or amendment of regulations for residues of certain pesticide chemicals in or on various food commodities under section 408 of the FFDCA, 21 U.S.C. 346a. EPA has determined that these petitions contain data or information regarding the elements set forth in section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the petition. Additional data may be needed before EPA rules on the petition.

List of Subjects

Environmental protection, Agricultural commodities, Feed additives, Food additives, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: February 28, 2002.

Peter Caulkins,

Director, Registration Division, Office of Pesticide Programs.

Summaries of Petitions

Petitioner summaries of the pesticide petitions are printed below as required by section 408(d)(3) of the FFDCA. The summaries of the petitions were prepared by the petitioner and represent

VOL
67
ISS
50
MR
14
2002
UMI

the views of the petitioner. The petition summary announces the availability of a description of the analytical methods available to EPA for the detection and measurement of the pesticide chemical residues or an explanation of why no such method is needed.

1. Interregional Research Project Number 4

PP 6E4636

EPA has received pesticide petition (6E4636) from the Interregional Research Project Number 4 (IR–4), 681 U.S. Highway #1 South, North Brunswick, NJ 08902–3390 proposing, pursuant to section 408(d) of the FFDCA, 21 U.S.C. 346a(d), to amend 40 CFR part 180.142 by establishing a tolerance for residues of the herbicide, plant regulator, and fungicide 2,4–D (2,4-dichlorophenoxyacetic) in or on the raw agricultural commodity wild rice at 0.1 parts per million (ppm). This notice includes a summary of the petition prepared by Rhone-Poulenc Ag Company, P.O. Box 12014, 2 T.W. Alexander Drive, Research Triangle Park, NC 27709. EPA has determined that the petition contains data or information regarding the elements set forth in section 408(d)(2) of the FFDCA; however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the petition. Additional data may be needed before EPA rules on the petition.

A. Residue Chemistry

1. *Plant metabolism.* The nature of the residue of 2,4–D is adequately understood. The regulable residue is 2,4–D *per se*, as established in 40 CFR 180.142. No livestock feed issues are raised by this action.

2. *Analytical method.* EN-CAS Method ENC gas liquid chromatograhy/ electron capture detector (GLC/ECD), which has underdone successful independent laboratory validation is available for enforcement.

3. *Magnitude of residues.* One field trial (Minnesota) with 2 treatment rates was conducted. 2,4–D was applied by hand-held sprayer at 0X, 1X, and 2X the proposed label rate. The preharvest interval (PHI) was 53–64 days. Samples of grain and hulls were analyzed with 22+ months of harvest. No detectable residues (<0.05 ppm) of 2,4–D were reported.

B. Toxicological Profile

The nature of the toxic effects caused by 2,4–D are discussed in Unit II.B. of the **Federal Register** of October 24, 2001, (66 FR 53791) (FRL–6802–5).

C. Aggregate Exposure

The aggregate exposure (food, drinking water, and residential) assessment for 2,4–D is discussed in Unit II.C. of the **Federal Register** of October 24, 2001. The dietary exposure assessment includes a time-limited tolerance for wild rice at 0.1 ppm which was established in support of a section 18 emergency exemption.

D. Cumulative Effects

The potential for cumulative effects for 2,4–D and other substances with a common mechanism of toxicity is discussed in Unit II.D. of the **Federal Register** of October 24, 2001.

E. Safety Determination

The safety determination for the U.S. population, infants, and children for 2,4–D is discussed in Unit II.E. of the **Federal Register** of October 24, 2001.

F. International Tolerances

There are no Codex, Canadian, or Mexican maximum residue limits for use of 2,4–D on wild rice. Therefore, international harmonization is not an issue for this commodity.

2. Interregional Research Project Number 4

PP 1E6325

EPA has received pesticide petition (1E6325) from the Interregional Research Project Number 4 (IR–4), 681 U.S. Highway #1 South, North Brunswick, NJ 08902–3390 proposing, pursuant to section 408(d) of the FFDCA, 21 U.S.C. 346a(d), to amend 40 CFR part 180.448 by establishing a tolerance for residues of the miticide, hexythiazox, trans-5-(4-chlorophenyl)-*N*-cyclohexyl-4-methyl-2-oxothiazolidine-3-carboxamide and its metabolites containing the (4-chlorophenyl-4-methyl-2-oxo-3-thiazolidine moiety in or on the raw agricultural commodity date at 1.0 ppm. This notice includes a summary of the petition prepared by Gowan Company, P.O. Box 5569, Yuma, AZ 85366–5569. EPA has determined that the petition contains data or information regarding the elements set forth in section 408(d)(2) of the FFDCA; however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the petition. Additional data may be needed before EPA rules on the petition.

A. Residue Chemistry

1. *Plant metabolism.* The metabolism of hexythiazox as well as the nature of the residues in plants is adequately understood for purposes of this tolerance. The residue of concern is hexythiazox and its metabolites containing the (4-chlorophenyl)-4-methyl-2-oxo-3-thiazolidine moiety as specified in 40 CFR 180.448.

2. *Analytical method.* Adequate methods to enforce the tolerance expression have been submitted for publication in Pesticide Analytical Manual (PAM) II. The approved method is designated as AMR 985–87 which has been used in a variety of commodities. The method involves separation by high performance liquid chromotography (HPLC) followed by ultraviolet (UV) detection at 225 nm.

3. *Magnitude of residues.* Three field trials (06957.99–CA82, CA83, and CA84) were conducted in Coachella, California. No detectable residues of hexythiazox were found in the untreated date samples. The treated samples from trial CA82 had residues of 0.07 ppm and 0.26 ppm. The treated samples from trial CA83 had residues of 0.09 ppm and 0.11 ppm. The treated samples from trial CA84 had residues of 0.30 ppm and 0.63 ppm. Based on available data, the proposed use, one application of hexythiazox at the rate of 6 oz. (0.1875 lb active) per acre, minimum 90 day PHI should be reported.

B. Toxicological Profile

The nature of the toxic effects caused by hexythiazox are discussed in Unit II.B. of the **Federal Register** of December 28, 2000 (65 FR 82349) (FRL–6761–6).

C. Aggregate Exposure

The aggregate exposure (food, drinking water, and residential) assessment for hexythiazox is discussed in Unit II.C. of the **Federal Register** of December 28, 2000. Dates were included in this risk assessment in connection with a section 18 emergency exemption. A time-limited tolerance has been established at 1.0 ppm and is currently set to expire on October 31, 2002.

D. Cumulative Effects

The potential for cumulative effects caused by hexythiazox and other substances with a common mechanism of toxicity is discussed in Unit II.D. of the **Federal Register** of December 28, 2000.

E. Safety Determination

The safety determination for hexythiazox is discussed in Unit II.E. of the **Federal Register** of December 28, 2000.

F. International Tolerances

There are no CODEX, Canadian, or Mexican maximum residue limits for hexythiazox on dates.

[FR Doc. 02–6158 Filed 3–13–02; 8:45 a.m.]

BILLING CODE 6560–50–S

ENVIRONMENTAL PROTECTION AGENCY

[FRL–7157–8]

Developing EPA Information Quality Guidelines Pursuant to OMB Information Quality Guidelines Under Section 515 of the Treasury and General Government Appropriations Act for FY 2001 (Public Law 106–554; HR 5658)

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) will hold an Online Public Comment Session between March 19, 2002, and March 22, 2002, to give early opportunity to comment on areas to be considered as EPA develops Information Quality Guidelines pursuant to Office of Management and Budget Final Guidelines issued on February 22, 2002 (67 FR 8452–8460). EPA will post a request for public input on March 19 and comments will be accepted until midnight EST March 22, 2002. The time frame for this comment opportunity is brief due to the accelerated schedule for finalizing the Guidelines. The Public's comments will help inform and shape the direction EPA will take in developing the Guidelines. Instructions for providing your comments will be available online as of March 19, 2002. In addition to this online comment opportunity, EPA will make its draft Guidelines available for public comment and hold a Public Meeting on the Information Quality Guidelines in May 2002 in Washington, DC. Additional details about the Public Meeting will be posted on the EPA Office of Environmental Information website as soon as they become available.

DATES: The Online Public Comment Session will be held March 19–22, 2002.

ADDRESSES: The Online Public Comment Session will be accessible via the Internet at *www.epa.gov/oei*.

FOR FURTHER INFORMATION CONTACT: Evangeline Tsibris Cummings, Environmental Protection Agency, Office of Environmental Information, Office of Information Analysis and Access; telephone: 202–260–1655; e-mail: *cummings.evangeline@epa.gov*

Dated: March 7, 2002.

Elaine Stanley,

Director, Office of Information Analysis and Access, Office of Environmental Information.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

[DA–02–502]

Eighth Meeting of the Advisory Committee for the 2003 World Radiocommunication Conference (WRC–03 Advisory Committee)

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: In accordance with the Federal Advisory Committee Act, this notice advises interested persons that the next meeting of the WRC–03 Advisory Committee will be held on April 4, 2002, at the Federal Communications Commission. The purpose of the meeting is to continue preparations for the 2003 World Radiocommunication Conference. The Advisory Committee will consider any preliminary views and/or proposals introduced by the Advisory Committee's Informal Working Groups.

DATES: April 4, 2002; 2 p.m.–4 p.m.

ADDRESSES: Federal Communications Commission, 445 12th Street, SW., Room TW–C305, Washington DC 20554.

FOR FURTHER INFORMATION CONTACT: Alexander Roytblat, FCC International Bureau, Planning and Negotiations Division, at (202) 418–7501.

SUPPLEMENTARY INFORMATION: The Federal Communications Commission (FCC) established the WRC–03 Advisory Committee to provide advice, technical support and recommendations relating to the preparation of United States proposals and positions for the 2003 World Radiocommunication Conference (WRC–03). In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, this notice advises interested persons of the eighth meeting of the WRC–03 Advisory Committee.

The WRC–03 Advisory Committee has an open membership. All interested parties are invited to participate in the Advisory Committee and to attend its meetings. The proposed agenda for the eighth meeting is as follows:

Agenda

Eighth Meeting of the WRC–03 Advisory Committee, Federal Communications Commission, 445 12th Street, SW., Room TW–C305, Washington, DC 20554.

April 4, 2002; 2 p.m.–4 p.m.

1. Opening Remarks
2. Approval of Agenda
3. Approval of the Minutes of the Seventh Meeting
4. Status of Preliminary Views and Proposals
5. Reports from regional WRC–03 Preparatory Meetings
6. NTIA Draft Preliminary Views and Proposals
7. IWG Reports and Documents relating to:
   a. Consensus Views and Issue Papers
   b. Draft Proposals
8. Future Meetings
9. Other Business

Federal Communications Commission.

Don Abelson,

Chief, International Bureou.

BILLING CODE 6712–01–P

FEDERAL RESERVE SYSTEM

Notice of Proposals to Engage in Permissible Nonbanking Activities or To Acquire Companies That Are Engaged in Permissible Nonbanking Activities

The companies listed in this notice have given notice under section 4 of the Bank Holding Company Act (12 U.S.C. 1843) (BHC Act) and Regulation Y (12 CFR Part 225) to engage *de novo*, or to acquire or control voting securities or assets of a company, including the companies listed below, that engages either directly or through a subsidiary or other company, in a nonbanking activity that is listed in § 225.28 of Regulation Y (12 CFR 225.28) or that the Board has determined by Order to be closely related to banking and permissible for bank holding companies. Unless otherwise noted, these activities will be conducted throughout the United States.

Each notice is available for inspection at the Federal Reserve Bank indicated. The notice also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether the proposal complies with the standards of section 4 of the BHC Act. Additional information on all bank holding companies may be obtained from the National Information Center website at www.ffiec.gov/nic/.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than March 29, 2002.

BILLING CODE 6210-01-S

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States. Additional information on all bank holding companies may be obtained from the National Information Center website at www.ffiec.gov/nic/.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 8, 2002.

A. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166-2034:

1. First Citizens Bancshares, Inc., Dyersburg, Tennessee; to acquire 100 percent of Metropolitan Bancshares, Inc., Munford, Tennessee, and thereby indirectly acquire The Munford Union Bank, Munford, Tennessee.

Board of Governors of the Federal Reserve System, March 8, 2002.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Meeting of the National Advisory Council for Healthcare Research and Quality

AGENCY: Agency for Healthcare Research and Quality (AHRQ), HHS.

ACTION: Notice of public meeting.

SUMMARY: In accordance with section 10(a) of the Federal Advisory Committee Act, this notice announces a meeting of the National Advisory Council for Healthcare Research and Quality.

DATES: The meeting will be held of Friday, March 29, from 8:30 a.m. to 4 p.m. and is open to the public..

ADDRESSES: The meeting will be held at 6010 Executive Boulevard, Fourth Floor, Rockville, Maryland, 20852.

FOR FURTHER INFORMATION CONTACT: Anne Lebbon, Coordinator of the Advisory Council, at the Agency for Healthcare Research and Quality, 2101 East Jefferson Street, Suite 600, Rockville, Maryland, 20852, (301) 594-7216. for press related information, please contact Karen Migdail at (301) 594-6120.

If sign language interpretation or other reasonable accommodation for a disability is needed, please contact Linda Reeves, Assistant Administrator for Equal Opportunity, AHRQ, on (301) 594-6662 no later than March 22, 2002.

Agenda, roster, and minutes are available from Ms. Bonnie Campbell, Committee Management Officer, Agency for Healthcare Quality and Research, 2101 E. Jefferson Street, Suite 400, Rockville, Maryland, 20852. Her phone number is (301) 594-1846. Minutes will be available after April 30, 2002.

SUPPLEMENTARY INFORMATION:

I. Purpose

Section 921 of the Public Health Service Act (42 U.S.C. 299c) established the National Advisory Council for Healthcare Research and Quality. In accordance with its statutory mandate, the Council is to advise the Secretary of the Department of Health and Human Services and the Director, Agency for Healthcare Research and Quality (AHRQ), on matters related to actions of the Agency to enhance the quality, improve outcomes, reduce cost of health care services, improve access to such services through scientific research, the promotion of improvements in clinical practice and in the organization, financing, and delivery of health care services. The Council is composed of members of the public appointed by the Secretary and Federal ex-officio members.

II Agenda

On Friday, March 29, 2002, the meeting will begin at 8:30 a.m., with the call to order by the Council Chairman. The Director, AHRQ, will present the status of the Agency's current research, programs, and initiatives. Tentative agenda items include discussions on disparities in health care, bioterrorism, and AHRQ's Priority Populations Inclusion Policy. The official agenda will be available on AHRQ's website at *www.ahrq.gov* no later than March 8, 2002. The meeting will adjourn at 4:00 p.m.

Dated: March 4, 2002.

Lisa Simpson,

Acting Director.

Proposed Information Collection Activity; Comment Request

Proposed Projects

Title: State High Performance Bonus System (HPBS) Transmission File Layouts for HPBS Work Measure.

OMB No.: 0970-0230.

Description: This is a proposed extension of a current information collection. The purpose of this collection is to obtain data upon which to base the computation for measuring State performance in meeting the legislative goals of TANF as specified in section 403(a)(4) of the Social Security Act and 45 CFR part 270. Specifically, DHHS will use the data to award the portion of the bonus that rewards States for their success in moving TANF recipients from welfare to work. States will not be required to submit this information unless they elect to compete on a work measure for the TANF High Performance Bonus awards.

Respondents: Respondents may include any of the 50 States, Guam, Puerto Rico, and the Virgin Islands.

ANNUAL BURDEN ESTIMATES

Instrument	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
State High Performance Bonus System (HPBS) Transmission File Layouts for HPBS Work Measures	54	2	16	1,728

Estimated Total Annual Burden Hours: 1,720.

In compliance with the requirements of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Administration for Children and Families is soliciting public comment on the specific aspects of the information collection described above.

Copies of the proposed collection of information can be obtained and comments may be forwarded by writing to the Administration for Children and Families, Office of Information Services, 370 L'Enfant Promenade, SW., Washington, DC 20447, Attn: ACF Reports Clearance Officer. All requests should be identified by the title of the information collection.

The Department specifically requests comments on: (a) Whether the proposed

VOL

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; Comment Request

Proposed Projects

Title: DHHS/ACF Employment Retention and Advancement (ERA) Evaluation 12-Month Survey.

OMB No.: New Collection.

Description: The Employment Retention and Advancement (ERA) Evaluation is the most ambitious, comprehensive effort to learn what works in this area to date and is explicitly designed to build on past research by rigorously testing a wide variety of approaches to promoting employment retention and advancement for a range of populations. The project, conceived and sponsored by the Administration for Children and Families (ACF) of the U.S. Department of Health and Human Services (HHS),[1] seeks to "conduct a multi-site evaluation that studies the net impact and cost-benefits of programs designed to help Temporary Assistance for Needy Families (TANF) recipients, former TANF recipients, or families at-risk of needing TANF benefits retain and advance in employment."[2] The ERA Evaluation involves up to 15 random assignment experiments in 9 states, testing a diverse set of strategies designed to promote stable employment and/or career advancement for current and former welfare recipients and other low-income parents. Over the next several years, the ERA project will generate a wealth of rigorous data on the implementation, effects, and costs of these alternative approaches. The data collected will be used for the following purposes:

- To study ERA's impacts on employment, earnings, participation, educational attainment and income;
- To collect data on a wider range of outcome measures than is available through welfare or UI records in order to understand how individuals were affected by ERA; job retention and job quality, educational attainment; interactions with and knowledge of the ERA program; household composition; childcare, transportation, and health coverage; and income;
- To supplement research on the implementation of ERA across sites;
- To conduct non-experimental analyses to explain participation decisions and provide a descriptive picture of the circumstances of low-wage workers;
- To obtain participation information important to the evaluation's benefit-cost component;
- And to obtain contact information for possible future follow-up, information that will be important to achieving high response rates for the 36-month survey.

Respondents: The respondents of the 12-month survey are Temporary Assistance for Needy Families (TANF) applicants, current and former TANF recipients, or individuals in families at-risk of needing TANF benefits (working poor and hard-to-employ) from 9 states participating in the ERA Evaluation: California, Oregon, New York, Ohio, Minnesota, Illinois, South Carolina, Texas, Tennessee. Survey respondents can be grouped according to 3 program clusters: Advancement projects; placement and retention (hard-to-employ) projects; and mixed goal projects. All 3 program clusters will receive the 12-month core survey. The placement and retention (hard-to-employ) participants will also receive the hard-to-employ survey module. Survey participants will be administered a telephone survey (for those individuals who cannot be reached by phone, staff at the survey firm will attempt to contact them in person) approximately 12 months after random assignment. Approximately 7,050 participants will complete the core survey and 2,400 participants will complete the core plus hard-to-employ module survey.

ANNUAL BURDEN ESTIMATES

Instrument	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
12-Month Survey (Core only)	7,050	1	30 minutes or .5 hrs	3,525
12-Month Survey (Core plus Hard-to-Employ Module)	2,400	1	45 minutes or .75 hrs	1,800

Estimated Total Annual Burden Hours: 5,325.

In compliance with the requirements of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Administration for Children and Families is soliciting public comment on the specific aspects of the information collection described above. Copies of the proposed collection of information can be obtained and comments may be forwarded by writing to the Administration for Children and Families, Office of Information Services, 370 L'Enfant Promenade, SW., Washington, DC 20447, Attn: ACF Reports Clearance Officer. All requests should be identified by the title of the information collection.

The Department specifically requests comments on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

[1] The U.S. Department of Labor has also provided funding to support the ERA project.

BILLING CODE 4184–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

[Program Announcement No. ACF/ACYF/HS 02–04]

Fiscal Year 2002 Discretionary Announcement for Nationwide Competition of Early Head Start; Availability of Funds and Request for Applications

AGENCY: Administration on Children, Youth and Families (ACYF), Administration for Children and Families (ACF), DHHS.

ACTION: Notice of Fiscal Year 2002 Early Head Start availability of financial assistance for nationwide competition and request for applications.

SUMMARY: Early Head Start programs provide early, continuous, intensive and comprehensive child development and family support services on a year-round basis to low-income families. The purpose of the Early Head Start program is to enhance children's physical, social, emotional, and intellectual development; to support parents' efforts to fulfill their parental roles; and to help parents move toward self-sufficiency. The Administration on Children, Youth and Families announces approximately $72 million in financial assistance to be competitively awarded to local public and private non-profit and for-profit entities—including Early Head Start and Head Start grantees—to provide child and family development services for low-income families with children under age three and pregnant women. Faith-based organizations are eligible to apply for these funds to become Early Head Start grantees.

Applicants may apply for one or more of the following categories of expansion:

1. Current Early Head Start grantees, proposing to expand in their currently approved EHS service area ($20 million). (See Priority 1 Evaluation Criteria.)

2. Applicants, including current Early Head Start grantees and, proposing to establish an Early Head Start program in areas currently unserved by Early Head Start (see Attachment A for a listing of currently served areas; any area not listed is eligible for funding in this category) ($42 million). (See Priority 1 Evaluation Criteria.)

3. Applicants proposing to serve children in an Early Head Start program whose families are receiving support from the Child Welfare Services (CWS) system ($10 million). (See Priority 2 Evaluation Criteria.)

Applicants eligible for funding under this category are as follows:

a. Current grantees may include a request for serving CWS children as a second part of their application under either 1 or 2 above or may submit an application only to serve CWS children.

While each applicant should decide on the appropriate mix between CWS children and other children, we would not expect applicants to propose that a large portion of their children be CWS children unless there are compelling reasons for doing so which must be documented in the application.

b. Applicants who are not current EHS providers may apply to serve CWS children only if they are also submitting an expansion proposal under 2 above.

While each applicant should decide on the appropriate mix between CWS children and other children, we would not expect applicants to propose that a large portion of their children be CWS children unless there are compelling reasons for doing so which must be documented in the application.

DATES: The closing date and time for receipt of applications is 4:30 p.m. EDT on May 13, 2002.

Note: Applications should be submitted to: Early Head Start Nationwide Competition, 1901 N. Fort Myer Drive, Suite 301, Arlington, VA 22209. However, prior to preparing and submitting an application, in order to satisfactorily compete under this announcement, it will be necessary for potential applicants to read the full announcement which is available through the addresses listed below.

ADDRESSES: A copy of the program announcement, necessary application forms, and appendices can be obtained by contacting: Early Head Start Nationwide Competition, 1901 North Fort Myer Drive, Suite 301, Arlington, Virginia 22209. The telephone number is 1–800–458–7699; or e-mail to: *ehsn@pal-tech.com.*

Copies of the program announcement and necessary application forms can also be downloaded from the Head Start Web site at: *www.acf.dhhs.gov/programs/hsb*

FOR FURTHER INFORMATION CONTACT: Early Head Start Nationwide Competition, 1901 N. Fort Myer Drive, Suite 301, Arlington, VA 22209 or telephone: 1–800–458–7699 or e-mail to: *ehsnpal-tech.com.*

SUPPLEMENTARY INFORMATION:

Eligible Applicants

Applicants eligible to apply to become an Early Head Start program are local public and private non-profit and for-profit entities. Early Head Start and Head Start grantees are eligible to apply. Faith-based organizations are eligible to apply for funds. Applicants are reminded that eligibility to apply for a grant under this Notice is limited to local agencies, as defined in section 641 (a) and (b) of the Head Start Act.

Project Duration

For new Early Head Start grantees, the competitive awards made through this announcement will be for one-year budget periods and an indefinite project period. Subsequent year budget awards will be made non-competitively, subject to availability of funds and the continued satisfactory performance of the applicant. Successful applicants which are current Early Head Start grantees will be funded in one of two ways. Those Early Head Start grantees that currently have indefinite project periods will continue to be funded as indefinite project period grants. However, those Early Head Start grantees that have finite project periods will be given supplements to their current, time limited grant. A grantee, for example, currently funded for $200,000 with a project period ending September 30, 2003 that is awarded another $100,000 through this announcement would then be funded as a $300,000 Early Head Start grantee with a project period that still ends on September 30, 2003. This would be true regardless of whether the new funds are to expand services within the grantee's current service area or to expand into another currently unserved area. Prior to the end of an Early Head Start grantee's current project period (*i.e.*, September 30, 2003 in the above example), ACF will announce a competition for those areas served by each EHS grantee whose project period is nearing an end. In such a competition, current EHS grantees in good standing, who submit acceptable

VOL
67
ISS
50
MR
14
2002
UMI

applications, will be given priority in funding decisions.

Early Head Start Child Welfare Services Initiative (See Priority 2 Evaluation Criteria)

The Head Start Bureau is establishing a new initiative to promote and expand partnerships between local EHS programs and local child welfare services (CWS) agencies. This initiative will enhance and expand services for children and their families who are part of the child welfare service system and provide additional and more intensive services in local communities for this population. The Head Start Bureau is setting aside $10 million to fund this initiative and plans to serve approximately 1,000 children. Both new applicants and existing EHS grantees may apply for these funds. See below for the Priority 2 Evaluation Criteria for the EHSCWS Initiative. For additional information about the Initiative, see the full Program Announcement for this competition which is available from the address listed above.

Federal Share of Project Costs

The Federal share will not be more than 80 percent of the total approved costs of the project except if a waiver is granted under the authority cited in section 640(b) of the Head Start Act.

Matching Requirements

Grantees that operate Early Head Start programs must, in most instances, provide a non-Federal contribution of at least 20 percent of the total approved costs of the project.

Available Funds

See the Program Announcement for the list of the approximate amount of funds available for States. (The Program Announcement is available from the address listed above.)

Anticipated Number of Projects to be Funded

It is estimated that there will be 100–125 awards.

Statutory Authority

The Head Start Act, as amended, 42 U.S.C. 9831 et seq.

Priority 1 Evaluation Criteria

All new applicants and current grantees proposing to expand services in their current service area or provide services in a new service area should address the criteria for Priority 1 below. Competing applications for financial assistance will be reviewed and evaluated on the six criteria which are summarized below. The point values following each criterion indicate the numerical weight each criterion will be accorded in the review process.

Criterion 1: Objectives and Need for Assistance (15 Points)

The extent to which, based on community assessment information, the applicant identifies any relevant physical, economic (e.g., poverty in the community), social, financial, institutional, or other issues which demonstrate a need for the Early Head Start program.

The extent to which the applicant lists relevant program objectives that adequately address the strengths and needs of the community.

The extent to which the applicant describes the population to be served by the project and explains why this population is most in need of the services to be provided by the program.

The extent to which the applicant gives a precise location and rationale for the project site(s) and area(s) to be served by the proposed project. If the applicant is a current grantee planning to expand its program it needs to demonstrate that the geographic area is currently underserved or, where applicable, unserved by Early Head Start Programs. If the applicant is new, it needs to demonstrate that the proposed service area is currently unserved by Early Head Start programs.

Criterion 2: Results or Benefits Expected (10 Points)

The extent to which the applicant identifies the results and benefits to be derived from the project and links these to the stated objectives.

The extent to which the applicant describes the kind of data to be collected and how they will be utilized to measure progress towards the stated results or benefits.

Criterion 3: Approach (25 Points)

The extent to which the applicant demonstrates a thorough knowledge and understanding of the Head Start Program Performance Standards.

The extent to which the applicant explains why the approach chosen is effective in light of the needs, objectives, results and benefits described above.

The extent to which the approach is grounded in recognized standards and/or guidelines for high quality service provision or is defensible from a current research or best practices standpoint.

Criterion 4: Staff and Position Data and Organization Profiles (15 Points)

The extent to which the proposed program director, proposed key project staff, the organization's experience, including experience in providing early, continuous, and comprehensive child and family development services, and the organization's history with the community demonstrate the ability to effectively and efficiently administer a project of this size, complexity and scope.

The extent to which the applicant's management plan demonstrates sufficient management capacity to implement a high quality Early Head Start program.

The extent to which the organization demonstrates an ability to carry out continuous improvement activities.

Criterion 5: Third Party Agreements/Collaboration (15 Points)

The extent to which the applicant presents documentation of efforts (letters of commitment, interagency agreements, etc.) to establish and maintain ongoing collaborative relationships with community partners.

The extent and thoroughness of approaches to combining Early Head Start resources and capabilities with those of other local child care agencies and providers to provide high quality child care services to infants and toddlers which meet the Head Start Program Performance Standards.

Criterion 6: Budget and Budget Justification (20 Points)

The extent to which the program's costs are reasonable in view of the planning and activities to be carried out and the anticipated outcomes.

The extent to which the program has succeeded in garnering cash or in-kind resources, in excess of the required Federal match, from local, State, other Federal or private funding sources. The extent to which costs for facilities are reasonable and cost effective.

The extent to which the salaries and fringe benefits reflect the level of compensation appropriate for the responsibilities of staff.

The extent to which assurances are provided that the applicant can and will contribute the non-Federal share of the total project cost.

Priority 2 Evaluation Criteria

All applicants (current grantees and new applicants) applying to serve children under the EHS Child Welfare Services Initiative discussed in detail in the full program announcement should address the following six evaluation criteria separately in their application. Competing applications for financial assistance will be reviewed and evaluated on the six criteria. The point values following each criterion indicate the numerical weight each criterion will be accorded in the review process.

Criterion 1: Objectives and Need for Assistance (15 Points)

The extent to which the applicant identifies the need and objectives for services to children and their families who are in the child welfare system, how many children and families will be served, and provide a description of the children and families to be served through the EHSCWS Initiative. This could include children in the child welfare system who are living with their parents or other family members, those in foster care settings, children whose parents are incarcerated or in substance abuse recovery programs, and/or other children birth to three who are within the child welfare system. The children the applicant proposes to serve must also meet EHS eligibility requirements, and can receive EHS services until the child is three years of age, even if the CWS services end.

Criterion 2: Results or Benefits Expected (10 Points)

The extent to which the applicant identifies and describes the results and benefits to be derived from the EHSCWS Initiative and link these to the stated objectives.

The extent to which the applicant describes the kind of data to be collected and how they will be utilized to measure progress towards the stated results or benefits.

Criterion 3: Approach (25 Points)

The extent to which the applicant describes the Early Head Start Child Welfare Services (EHSCWS) collaboration design and the approach to providing services to EHSCWS children through this Initiative, and outlines a plan of action for implementing those services, including the scope and detail of how the proposed work will be accomplished. This will include information about recruitment, what each partner will be responsible for in the delivery of services, how both the Head Start and the applicable Child Welfare Services regulations will be met, and what kind of shared communication system will be in place between the partners that will ensure quality and timely delivery of services

Criterion 4: Staff and Position Data and Organization Profiles (15 Points)

The extent to which the applicant describes the staffing plan for the EHSCWS Initiative, including how the partners will share staff, supervise staff, and provide training. They will indicate other areas of resource sharing, such as space and the possible co-location of staff.

Criterion 5: Third Party Agreements/Collaboration (15 Points)

The extent to which the applicant includes a written collaboration agreement between the EHS and local CWS agency that specifically outlines the roles and responsibilities of each partner and how the EHSCWS Initiative will be carried out.

Criterion 6: Budget and Budget Justification (20 Points)

The extent to which the applicant submits a reasonable budget and justification that supports the activities proposed for the partnership, and that is appropriate in the carrying out of the EHSCWS Initiative. Grantees must budget for two meetings in Washington, DC, during the first year of funding. Project directors and evaluators will meet approximately three months after funding for approximately two days. In years two and three, grantees will be expected to send both their project directors and evaluators to one meeting in Washington, DC each year.

Required Notification of the State Single Point of Contact

This program is covered under Executive Order 12372, "Intergovernmental Review of Federal Programs," and 45 CFR part 100, "Intergovernmental Review of Department of Health and Human Services Programs and Activities." Under the Order, States may design their own processes for reviewing and commenting on proposed Federal assistance under covered programs.

All States and territories except Alabama, Alaska, Colorado, Connecticut, Hawaii, Idaho, Kansas, Louisiana, Massachusetts, Minnesota, Montana, Nebraska, New Jersey, New York, Ohio, Oklahoma, Oregon, Pennsylvania, South Dakota, Tennessee, Vermont, Virginia, Washington, American Samoa, and Palau have elected to participate in the Executive Order process and have established Single Points of Contact (SPOCs). Applicants from these jurisdictions need not take action regarding Executive Order 12372.

Applications for projects to be administered by Federally recognized Indian Tribes are also exempt from the requirements of Executive Order 12372. Otherwise, applicants should contact their SPOC as soon as possible to alert them to the prospective application and to receive any necessary instructions. Applicants must submit any required material to the SPOC as early as possible so that the program office can obtain and review SPOC comments as part of the award process. It is imperative that the applicant submit all required materials, if any, to the SPOC and indicate the date of this submittal (or date of contact if no submittal is required) on the Standard Form 424, item 16a.

Under 45 CFR 100.8(a)(2), a SPOC has 60 days from the application deadline to comment on proposed new or competing continuation awards.

SPOCs are encouraged to eliminate the submission of routine endorsements as official recommendations.

Additionally, SPOCs are requested to clearly differentiate between mere advisory comments and those official State process recommendations which may trigger the "accommodate or explain" rule.

When comments are submitted directly to the ACF, they should be addressed to: William Wilson, Head Start Bureau, Grants Officer, 330 C Street SW., Room 2220, Washington, DC 20447.

Attn: Early Head Start Nationwide Competition/Expansion

A list of the Single Points of Contact for each State and Territory can be found on the following Web site: *http://www.whitehouse.gov/omb/grants/spoc.html*

(Catalog of Federal Domestic Assistance Program Number 93.600, Project Head Start)

Dated: March 7, 2002.

Joan E. Ohl,

Commissioner, Administration on Children, Youth and Families.

SERVICE AREAS FOR CURRENT EARLY HEAD START GRANTEES AS OF FY 2002—Continued

State and county	Service area (local community)
Morgan	Entire County.
Jefferson	Birmingham, Bessemer, Tarrant City, Centerpoint, Adamsville, Grayville, Brookville, Sayre, Roebuck, Ensley, Forrestdale, Gardendale, and other small unincorporated areas.
	Referrals from the county welfare agency for teen mothers and mothers with chemical addictions and at risk of child abuse.
St. Claire	Entire County.
Walker	Jasper.
Elmore	Bradford.
Chilton	Entire County.
Autauga	Autaugaville.
Lee	Entire County.
Russell	Entire County except Phenix City.
Tuscaloosa	Entire County.
Montgomery	Entire County.
Calhoun	Anniston.
Houston	Entire County.
Alaska:	
Lower Yukon	Villages of Pilot Station and St. Mary's.
Kuskokwin	Villages of Akiak and Nunapitchuk.
Anchorage	Municipality of Anchorage.
Fairbanks North Star	Entire Borough.
Arizona:	
Apache	Concho, Springerville, St. Johns.
Coconino	Grand Canyon, Flagstaff, Page, Williams.
Yavapai	Ashfork/Seligman, Black Canyon City, Camp Verde, Sedona, Prescott Valley, Prescott, Humboldt/Dewey/Mayer, Cottonwood, Chino Valley, Clarkdale.
Navajo	Holbrook, Pinetop-Lakeside, Show Low, Snowflake, Winslow.
Maricopa	City of Phoenix: an area bounded by Camelback Road on the north; Elliot Road on the south; 40th Street on the east; and 43rd Avenue on the west.
	City of Avindale: an area bounded on the north by Van Buren; on the east by Dysart; on the south by Litchfield Road; and on the west by Lower Buckeye Road.
	El Mirage: an area bounded on the north by Bell Road; on the east by 107th Avenue; on the west by 120th Avenue; and on the south by Northern Avenue.
	South Central Phoenix: Baseline on the south; north to Van Buren; 35th Avenue on the west; and east to 40th Street.
Pima	Entire County.
Graham	Entire County.
Santa Cruz	Entire County.
Conchise	Entire County.
Greenlee	Entire County.
Pinal	Entire County.
Gila	Entire County.
Navajo Nation (also see CO, NM, and UT).	Navajo Reservation.
	Navajo School Board.
Mohave (also see Washington County in UT).	Colorado City.
Arkansas:	
Arkansas	Entire County.
Logan	Entire County.
Lonoke	Entire County.
Conway	Entire County.
Franklin	Entire County.
Johnson	Entire County.
Yell	Entire County.
Polk	Entire County.
Pope	Entire County.
Calhoun	City of Hampton.
Ouachita	City of Bearden.
Union	City of Fairview.
Clay	Cities of Rector, Piggott, and Corning.
Lawrence	Entire County.
Randolph	Entire County.
Newton	Entire County.
Mississippi	Entire County.
Pulaski	(1) Townships of College Station, Sweet Homes, Higgins, and Wrightsville to Oak Street.
	(2) In the City of Little Rock: the township of Granite Mountain; and in east Little Rock: east of Main Street to include West Broadway north and south; Interstate 30 South, Scott Hamilton Rd., Baseline Rd., and Geyer Springs Road.
	Within the City of Little Rock: north of Roosevelt Road; west of Main Street; east of University Avenue; and south of I–630.
Sebastian	All of Wards One and Two on the north side of Fort Smith; joined and bordered by the Arkansas River on the north, east and west; ending to the south at Rogers Avenue, Dodson Avenue, and Euper Lane.

SERVICE AREAS FOR CURRENT EARLY HEAD START GRANTEES AS OF FY 2002—Continued

State and county	Service area (local community)
Washington	Entire County.

SERVICE AREAS FOR CURRENT EARLY HEAD START GRANTEES AS OF FY 2002—Continued

State and county	Service area (local community)
	Cities of Pasadena, Altadena and Glendale.
	City of Hawaiian Gardens.
Orange County	Entire County.
San Bernardino	City of Upland.
	Cities of San Bernardino and Colton.
Marin	San Rafael, Novato, Corte Madera, Greenbrae, San Anselmo.
Mendocino	Ukiah, Willits.
Nevada	North San Juan, Nevada City, Truckee.
Placer	Lincoln, Rocklin, Kings Beach, Foresthill.
Sacramento	(1) The City of Sacramento: the communities of Del Paso Heights, North Sacramento/Gardenland, Midtown, Oak Park, South Sacramento, Meadowview, Natomas, Land Park and Arden/Howe.
	(2) Cities of Citrus Heights and Galt.
	(3) Towns of Rio Linda/Everta, North Highlands, Foothill Farms, Orangevale, Carmichael, Fair Oaks, Rancho Cordova, South Sacramento, Franklin/Laguna, Elk Grove, and Antelope.
	(4) Woodland, Winters, Davis and West Sacramento.
San Diego	Carlsbad, Encinitas, Del Mar, Solana Beach, Escondido, San Diego, Poway, Coronado, La Mesa, El Cajon, Lemon Grove, Santee, Ramona, Palomar Julain, Anza Borrego, Lakeside, Spring Valley, Jamul, Harbinson Crest, Laguna Pine Valley, Mountain Empire, Alpine, Chula Vista, National City, Imperial Beach, Nestor.
	Oceanside, Vista, San Marcos, Fallbrook, Valley Center, Rincon, San Pasqual, Pauma Valley.
	Campo Reservation, Rincon Reservation, San Pasqual Reservation, Pauma Reservation, and Pala Reservation.
Riverside	Soboba Reservation, Morongo Reservation, and San Jacinto.
	Cities of Banning and Beaumont.
	All cities in Riverside County with the exception of Banning, Beaumont and Morongo Band Indian Reservation.
San Francisco	Chinatown, Tenderloin, Visitation Valley; and parts of Northbeach, Civic Center, and Bayview Hunters Point.
San Joaquin	Entire County.
San Mateo	Half Moon Bay, East Palo Alto, Menlo Park, South San Francisco, Daly City, San Bruno and San Mateo.
Santa Barbara	Santa Maria, Lompoc, Santa Barbara and Summerland.
Santa Clara	Northwest and central San Jose.
Santa Cruz	Watsonville and Santa Cruz.
Shasta	Entire County.
Siskyu	Community of Weed.
Trinity	Cities of Weaverville and Hayfork.
Stanislaus	Westside of county: areas of Westley and Patterson.
Sutter	Entire County.
Yuba	Entire County.
Tulare	Entire County.
Ventura	Oxnard, Hueneme, Santa Paula, Fillmore and Piru.
Yolo	Entire County.
Sonoma	Sebastopol, Petaluma, Guernville, Sonoma, Rohnert Park, Windsor, and Santa Rosa.
San Luis Obispo	Entire County.
San Benito	Entire County.
Monterey	Chular, Greenfield, King City, San Lucas, San Ardo, Bradley, Gonzales.
	Seaside, Marina, East Salinas, Pajaro, Castroville, Prunedale, Soledad, Speckles, Monterey, Boronda.
Colorado:	
Adams	City of Aurora within Adams County.
Arapahoe	City of Aurora within Arapahoe County.
Crowley	Entire County.
Otero	Entire County.
Denver	An area bounded on the east by Colorado Boulevard; on the north by I–70; on the west by Sheridan Boulevard; and on the south by Hampden Avenue.
	Neighborhoods of East Colfax, Northeast Park Hill, Elyrie Swansea, Clayton, Cole, Five Points, Whittier, and Auraria Lincoln Park.
	Northwest Denver: an area bordered by Sheridan Blvd. on the west; I–70 on the north; I–25 on the east; and Mississippi Avenue on the south.
Eagle	Entire County.
El Paso	Entire County.
Fremont	Entire County.
Larimer	Pourde School District boundary that includes the cities of Fort Collins, LaPorte, Timnath and Wellington, and the communities of Wellington, La Porte, Loreland and surrounding areas.
La Plata	Within the boundaries of the Southern Ute Reservation and the Ignacio School District.
	Entire County, with the exception of the area served by Southern Ute Nation.
Navajo Nation (also see AZ, NM, and UT).	Navajo Reservation, Navajo School Board.
Connecticut:	
Fairfield	City of Bridgeport: neighborhoods of The Hollow, West End, South End, North End, East End, and East Side.
	City of Stamford.
Hartford	City of Manchester.

SERVICE AREAS FOR CURRENT EARLY HEAD START GRANTEES AS OF FY 2002—Continued

State and county	Service area (local community)
Litchfield	Towns of Torrington, Winston, Canaan, and New Milford.
Middlesex	Towns of Middletown, Essex, Portland, Clinton, Westbrook, East Hampton and Deep River.
New Haven	City of Waterbury.
	City of New Haven.
Windham	Towns of Brooklyn, Danielson and Willimantic.
Tolland	City of Vernon.
Delaware:	
Kent	Entire County.

Rogers	Entire County.
Wagner	Entire County.
Oklahoma	Oklahoma City: an area bounded on the north by North 50th; on the east by Bryant Avenue; on the south by South 44th; and on the west by Meridian Avenue.
Green	Entire County.
Payne	Entire County.
Seminole	Entire County.
Cleveland	Entire County.
Logan	Entire County.
Potawatomi	Entire County.
	The Sac, Fox and Absentee Shawnee Districts of Potawatomi County.
	Potawatomi Reservation, extending north to the North Canadian River; south to the South Canadian River; west to the Indian Meridian Line; and east to the county line.
Seminole	Entire County.
Cherokee	Entire County.
Mayes	Entire County.
Craig	Entire County.
Oregon:	
Hood River	Entire County (also serves Klickitat County in Washington State).
Wasco	Entire County.
Jackson	City of Medford and metropolitan area, and the Illinois Valley.
Josephine	Entire County.
Multnomah	City of Portland: an area bounded by N.E. Skidmore to the north; N.E. Tillamook to the south; 82nd Street to the east; and the Willamette River to the west.
	City of Portland: an area bounded by the Willamette River on the west; the Columbia River on the north; Holgate Blvd on the south; and N.E. 122nd Ave on the east (excluding the Enterprise Zone between N.E. Skidmore and N.E. Tillamook Streets).
	City of Portland: an area bounded by Holgate Ave on the north; the Multnomah County line to the south; SE 45th St. to the west; and 122nd Ave. to the east. After 122nd, the service area extends north to Burnside and out to S.E 162nd Avenue (Lents Junction).
	An area bounded by the Columbia River on the north; Multnomah County line on the east; 122nd Street on the west until Burnside Street, then moving east to 162nd Street, and south to the Clackamas County line.
Umatilla	The communities of Pendleton, Hermiston, Umatilla, and Stanfield.
Marrow	City of Boardman.
Washington	City of Hillsboro.
Jefferson	Warm Springs Indian Reservation.
Pennsylvania:	
Allegheny	Hill District, Uptown, Upper Hill, Middle Hill, Lower Hill, South Oakland, North Oakland, Clairton, City of Clairton, West Mifflin, Wilson, Jefferson, Glassport, Elizabeth, Dravesburg, Sto-Rox, McKees Rocks Borough, Kennedy Township, Esplen, Neville Island, and Stowe Township.
	Bloomfield, East Hills, East Liberty, Friendship, Garfield, Homewood, Larimer, Lawrenceville, Lincoln-Lemington-Belmar, Morningside, Baldwin.

Pike	Entire County.
Susquehanna	Entire County.
Lehigh	Entire County.
Luzeme	Entire County.
Mercer	Entire County.
Snynder	Entire County.
Union	Entire County.
Mifflin	Entire County.
Philadelphia	City of Philadelphia—an area bounded by the Schuylkill River; north to Girard Avenue; west on Girard to Parkside Avenue; north on Parkside Avenue to Belmont Avenue; south on Belmont to Westminster Avenue; west on Wesminster to 50th Street; south on 50th Street to Spruce Street; east on Spruce to 45th Street; and south on 45th Street to the Schuylkill River. City of Philadelphia—an area bounded by Pine Street on the north; Broad Street on the east; Philadelphia Naval Base on the south; and Schuylkill River on the west. City of Philadelphia—North Central Philadelphia Empowerment Zone: 6th Street to 23rd Street, and from Montgomery Street to Poplar Street. City of Philadelphia—An area bounded on the north by Allegheny Avenue; on the south by Norris Street; on the east by 5th Street; and on the west by 17th Street, excluding the North Philadelphia Empowerment Zone area. City of Philadelphia—Frankford Area.
Venango	Entire County.
Washington	Entire County.
Greene	Entire County.
Westmoreland	Entire County.
Dauphin	City of Harrisburg.
Rhode Island:	
Bristol	Bristol, Warren, and Barrington.
Newport	Entire County.
Providence	Town of East Providence. City of Cranston. City of Central Falls, South and Southwest Providence. Towns of Burrillville, Johnston, North Providence, Smithfield, North Smithfield, Glocester, Scituate, and Foster.
Kent	The City of Warwick and the towns of Coventry and West Warwick.
South Carolina:	
Bamberg	Olar, Bamberg City, Denmark, Ehrhardt.
Charleston	West Ashley, downtown Charleston, and Charleston Nech area.
Greenville	City of Greenville: Communities of Nicholtown (including the Jesse Jackson Town Homes), Woodland-Pierce Homes, and Parker District (including Monaghan, San Souci).
Anderson	Honeapath.
Pickens	City of Pickens.
Greenville	Pleasant Valley.
Lancaster	Entire County.
Spartanburg	Entire County.
Sumter	City of Sumter: Sumter School District, Maysville, Dalzell, Wedgefield, Sahw Air Force Base, Pinewood, Rembert, within the eastern section of Sumter County.
Beaufort	St. Helena.
Jasper	Robertville.
Greenwood	Greenwood City.
Saluda	Saluda City.
South Dakota:	
Brookings	Entire County.
Codington	Entire County.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 02N-0070]

Agency Information Collection Activities; Proposed Collection; Comment Request; Regulations for In Vivo Radiopharmaceuticals Used for Diagnosis and Monitoring

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on regulations for in vivo radiopharmaceuticals used for diagnosis and monitoring.

DATES: Submit written or electronic comments on the collection of information by May 13, 2002.

ADDRESSES: Submit electronic comments on the collection of information to *http://accessdata.fda.gov/scripts/oc/dockets/edockethome.cfm*. Submit written comments on the collection of information to the Dockets Management Branch (HFA-305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. All comments should be identified with the docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Karen L. Nelson, Office of Information Resources Management (HFA-250), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-827-1482.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501-3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on: (1) Whether the collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Regulations for In Vivo Radiopharmaceuticals Used for Diagnosis and Monitoring (OMB Control No. 0910-0409)—Extension

FDA is requesting OMB approval of the information collection requirements contained in 21 CFR 315.4, 315.5, and 315.6. These regulations require manufacturers of diagnostic radiopharmaceuticals to submit information that demonstrates the safety and effectiveness of a new diagnostic radiopharmaceutical or of a new indication for use of an approved diagnostic radiopharmaceutical.

In response to the requirements of section 122 of the Food and Drug Administration Modernization Act of 1997 (FDAMA) (Public Law 105-115), FDA published a final rule (64 FR 26657, May 17, 1999) amending its regulations by adding provisions that clarify FDA's evaluation and approval of in vivo radiopharmaceuticals used in the diagnosis or monitoring of diseases. The regulation describes the kinds of indications of diagnostic radiopharmaceuticals and some of the criteria that the agency would use to evaluate the safety and effectiveness of a diagnostic radiopharmaceutical under section 505 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 355) and section 351 of the Public Health Service Act (42 U.S.C. 262) (the PHS Act). Information about the safety or effectiveness of a diagnostic radiopharmaceutical enables FDA to properly evaluate the safety and effectiveness profiles of a new diagnostic radiopharmaceutical or a new indication for use of an approved diagnostic radiopharmaceutical.

The rule clarifies existing FDA requirements for approval and evaluation of drug and biological products [1] already in place under the authorities of the act and the PHS act. The information, which is usually submitted as part of a new drug application (NDA) or biologics license application (BLA) or as a supplement to an approved application, typically includes, but is not limited to, nonclinical and clinical data on the pharmacology, toxicology, adverse events, radiation safety assessments, and chemistry, manufacturing, and controls. The content and format of an application for approval of a new drug are set forth in § 314.50 (21 CFR 314.50). Under 21 CFR part 315, information required under the act and needed by FDA to evaluate the safety and effectiveness of in vivo radiopharmaceuticals still needs to be reported.

Based on the number of submissions (that is, human drug applications and/or new indication supplements for diagnostic radiopharmaceuticals) that FDA received during fiscal years 2000 and 2001, FDA estimates that it will receive approximately two submissions annually from two applicants. The hours per response refers to the estimated number of hours that an applicant would spend preparing the information required by the regulations. Based on FDA's experience, the agency estimates the time needed to prepare a complete application for a diagnostic radiopharmaceutical to be approximately 10,000 hours, roughly one-fifth of which, or 2,000 hours, is estimated to be spent preparing the portions of the application that would be affected by these regulations. The regulation does not impose any additional reporting burden for safety and effectiveness information on diagnostic radiopharmaceuticals beyond the estimated burden of 2,000 hours because safety and effectiveness information is already required by § 314.50 (collection of information approved by OMB until February 28, 2002, under OMB Control No. 0910-0001). In fact, clarification in these regulations of FDA's standards for evaluation of diagnostic radiopharmaceuticals is intended to streamline overall information collection burdens, particularly for diagnostic radiopharmaceuticals that may have well-established, low-risk safety profiles, by enabling manufacturers to tailor information submissions and avoid unnecessary clinical studies. Table 1 of this document contains estimates of the annual reporting burden for the preparation of the safety and effectiveness sections of an application that are imposed by existing regulations. The burden totals do not include an increase in burden. This estimate does not include the actual time needed to conduct studies and trials or other research from which the reported information is obtained.

[1] The information collection requirements for biological products are no longer submitted for approval to OMB in this package, but are included under OMB Control No. 0910-0124.

TABLE 1.—ESTIMATED ANNUAL REPORTING BURDEN [1]

21 CFR section	Number of respondents	Annual frequency per response	Total annual responses	Hours per response	Total hours
315.4, 315.5, and 315.6	2	1	2	2,000	4,000
Total					4,000

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

Dated: March 5, 2002.

Margaret M. Dotzel,

Associate Commissioner for Policy.

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the revocation of the biologics license (U.S. License No. 0740-001) issued to Ashford Blood Bank, Inc., for the manufacture of Whole Blood and Red Blood Cells. Ashford Blood Bank, Inc., did not respond to a notice of opportunity for a hearing on a proposal to revoke its license.

DATES: The revocation of the biologics license (U.S. License No. 0740-001) is effective March 14, 2002.

FOR FURTHER INFORMATION CONTACT: Joseph L. Okrasinski, Jr., Center for Biologics Evaluation and Research (HFM-17), Food and Drug Administration, 1401 Rockville Pike, Rockville, MD 20852-1448, 301-827-6210.

SUPPLEMENTARY INFORMATION: FDA is revoking the biologics license (U.S. License No. 0740-001) issued to Ashford Blood Bank, Inc., Ashford Medical Center, suite 401-402, Santurce, PR 00907, for the manufacture of Whole Blood and Red Blood Cells. FDA initiated proceedings to revoke the biologics license because: (1) Authorized FDA employees were unable to gain access to either of the establishment's locations for the purpose of carrying out a required inspection of the facility as mandated under § 600.21 (21 CFR 600.21), and (2) manufacturing of products had been discontinued to an extent that a meaningful inspection or evaluation could not be made. In a certified, return-receipt letter dated October 28, 1997, FDA notified an authorized official of the firm that FDA had suspended the establishment's biologics license for the manufacture of Whole Blood and Red Blood Cells at its facilities at Santurce, PR, and Bayamon, PR. This action was based on the fact that significant deviations from the regulations were noted by FDA's San Juan district office during inspections of the facilities conducted August 19, 1997, through September 17, 1997, and September 9, 1997, through September 17, 1997, respectively. FDA's San Juan district office attempted to conduct additional inspections of the two Ashford facilities. On May 1, 1998, FDA investigators attempted to inspect the satellite collection facility at Bayamon, PR, but found that the facility was no longer in operation, and the manufacturing of Whole Blood and Red Blood Cells had been discontinued. On November 23, 1999, FDA investigators attempted to inspect the main facility in Santurce, PR, but found that the facility was no longer in operation and the manufacturing of Whole Blood and Red Blood Cells had been discontinued.

In certified, return-receipt letters dated April 13, 2000, sent to the establishment's facility at Santurce, PR, and also to the Ashford Blood Bank, Inc., P.O. Box 195034, San Juan, PR, 00919, FDA notified an authorized official of the firm that FDA's attempt to conduct inspections of the two facilities at Santurce, PR and Bayamon, PR were unsuccessful because the facilities were no longer in operation and the manufacture of Whole Blood and Red Blood Cells had been discontinued. The letter advised the establishment that, under § 601.5(b)(l) and (b)(2) (21 CFR 601.5(b)(1) and (b)(2)) (now codified as § 601.5(b)(1)(i) and (b)(1)(ii)), when FDA finds that authorized employees have been unable to gain access to an establishment for the purpose of carrying out an inspection required under § 600.21, or the manufacturing of products or of a product has been discontinued to an extent that a meaningful inspection could not be made at the establishment, FDA may initiate proceedings for license revocation. FDA also stated that a meaningful inspection could not be made at the establishment's facilities and issued to the establishment a notice of FDA's intent to revoke U.S. License No. 0740-001 and announced its intent to offer an opportunity for a hearing.

Under § 12.21(b) (21 CFR 12.21(b)), FDA published in the **Federal Register** of February 6, 2001 (66 FR 9087), a notice of opportunity for a hearing on a proposal to revoke the biologics license of Ashford Blood Bank, Inc. In the notice, FDA explained that the proposed license revocation was based on the inability of authorized FDA employees to conduct a meaningful inspection of the establishment because it was no longer in operation, and noted that documentation in support of license revocation had been placed on file with the Dockets Management Branch (HFA-305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. The notice provided the establishment 30 days to submit a written request for a hearing and 60 days to submit any data and information

VOL
67
ISS
50
MR
14
2002
UMI

justifying a hearing. The notice provided other interested persons with 60 days to submit written comments on the proposed revocation. The establishment did not respond within the 30-day time period with a written request for a hearing, and under § 12.21(b), the 30-day time period prescribed in the notice of opportunity for a hearing may not be extended. No other comments were received.

Accordingly, under 21 CFR 12.38, section 351 of the Public Health Service Act (42 U.S.C. 262), and under the authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), the biologics license (U.S. License No. 0740–001) issued to Ashford Blood Bank, Inc., is revoked, effective March 14, 2002.

Dated: March 6, 2002.

Margaret M. Dotzel,

Associate Commissioner for Policy.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

DEPARTMENT OF AGRICULTURE

Forest Service

[CA 668–02–1610–DO–083A]

Monument Advisory Committee Meeting Schedule

AGENCY: Bureau of Land Management, Interior; United States Forest Service, Agriculture.

ACTION: Notice of meetings.

SUMMARY: The Bureau of Land Management (BLM) and United States Forest Service (USFS) announces the schedule of meetings for the Advisory Committee to the Santa Rosa and San Jacinto Mountains National Monument (hereinafter referred to as "National Monument"). The meetings will be held on the following dates:

Saturday, April 6, 2002
Saturday, June 1, 2002
Saturday, August 3, 2002
Saturday, October 5, 2002
Saturday, December 7, 2002
Saturday, February 1, 2003

The meetings will be held at the Palm Desert City Hall Council Chambers, located at 73–510 Fred Waring Drive, Palm Desert, California, 92260. The meetings will take place from 9 a.m. until 4:00 p.m. There will be a half hour dedicated to public input during both the first half hour of the meetings and at the last half hour of the meetings. A sign up sheet will be located at the meeting room on the day of the meeting. Speakers wishing to comment publicly should sign the public comment sign-in sheet provided at the location of the meetings and provide a written copy of their statement. All committee and subcommittee meetings, including field examinations, will be open to the general public, including representatives of the news media. Any organization, association, or individual may file a statement with or appear before the committee and its subcommittees regarding topics on a meeting agenda—except that the chairperson or the designated federal official may require written comments to the Advisory Committee. The meetings will have agendas developed and available to the public prior to the meeting date. The agendas for each meeting will be located on the Bureau of Land Management web page for the Santa Rosa San Jacinto National Monument (*http://www.ca.blm.gov/palmsprings/.*) The subject matter of each meeting will focus on the development and implementation of the Santa Rosa San Jacinto Mountains National Monument Management Plan.

The Monument Advisory Committee (MAC) is a committee of citizens appointed to provide advice to the BLM and USFS with respect to preparation and implementation of the management plan for the National Monument as required in the Santa Rosa and San Jacinto Mountains National Monument Act of 2000 (16 U.S.C. 431nt). The act authorized establishment of the MAC with representative members from State and local jurisdictions, the Agua Caliente Band of Cahuilla Indians, a natural science expert, local conservation organization, local developer or building organization, the Winter Park Authority and a representative from the Pinyon Community Council.

The meetings will be open to the public with attendance limited to space available. Individuals who plan to attend and need special assistance such as sign language interpretations or other reasonable accommodations should notify the contact person listed below in advance of the meeting. Persons wishing to make statements will need to sign up at the meeting location.

DATES: April 6, 2002; June 1, 2002; August 3, 2002; October 5, 2002; December 7; 2002; February 1, 2003; All meetings will take place from 9 a.m. to 4 p.m with a morning public comment period from 9 to 9:30 a.m. and an afternoon public comment period from 3:30 to 4 p.m.

ADDRESSES: The meetings will be held in the Council Chambers of the Palm Desert City Hall, 73–510 Fred Waring Drive, Palm Desert, California, 92260.

FOR FURTHER INFORMATION CONTACT: Written comments should be sent to Miss Danella George, Santa Rosa San Jacinto Mountains National Monument Manager, Bureau of Land Management, P.O. Box 581260, North Palm Springs, CA 92258; or by fax at (760) 251–4899 or by e-mail at *dgeorge@ca.blm.gov.* Information can be found on our webpage: *http://www.ca.blm.gov/palmsprings/.* Documents pertinent to this notice, including comments with the names and addresses of respondents, will be available for public review at the Palm Springs-South Coast Field Office located at 690 W. Garnet Avenue, North Palm Springs, California, during regular business hours 8 a.m. to 4:30 p.m., Monday through Friday, except holidays.

SUPPLEMENTARY INFORMATION: The Santa Rosa and San Jacinto Mountains National Monument was established by act of Congress and signed into law on October 24, 2000. The National Monument was established in order to preserve the nationally significant biological, cultural, recreational, geological, educational and scientific values found in the Santa Rosa and San Jacinto Mountains. This legislation established the first monument to be jointly managed by the Bureau of Land Management (BLM) and the U.S. Forest Service (USFS). The Santa Rosa and San Jacinto Mountains National Monument Act of 2000 affects only Federal lands and Federal interests located within the established boundaries.

The 272,000 acre Monument encompasses 86,400 acres of Bureau of Land Management lands, 64,400 acres of Forest Service lands, 23,000 acres of Agua Caliente Band of Cahuilla Indians lands, 8,500 acres of California Department of Parks and Recreation lands, 35,800 acres of other State of California agencies lands, and 53,900 acres of private land. The BLM and the Forest Service will jointly manage Federal lands in the National Monument in coordination with the Agua Caliente Band of Cahuilla Indians, other federal agencies, state agencies and local governments.

Dated: February 7, 2002.

Danella George,

Designated Federal Official, National Monument Manager.

Laurie Rosenthal,

District Ranger, San Jacinto Ranger District, San Bernardino National Forest.

Public Land Order No. 7515; Modification of Secretarial Orders Dated October 10, 1905 and February 2, 1912; Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order modifies two Secretarial orders insofar as they affect 97.95 acres of public lands withdrawn for the Bureau of Reclamation's Yakima-Tieton Reclamation Project. The action will open the lands to exchange only.

EFFECTIVE DATE: March 14, 2002.

FOR FURTHER INFORMATION CONTACT: Charles R. Roy, BLM Oregon/Washington State Office, P.O. Box 2965, Portland, Oregon 97208–2965, 503–952–6189.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714 (1994), it is ordered as follows:

1. The Secretarial Orders dated November 10, 1905 and February 2, 1912, which withdrew lands for the Bureau of Reclamation's Yakima-Tieton Reclamation Project, are hereby modified insofar as they affect the following described public lands to allow for exchange in accordance with Section 206 of the Federal Land Policy and Management Act of October 21, 1976, as amended, 43 U.S.C. 1716 (1994):

Willamette Meridian

T. 14 N., R. 16 E.,
  Sec. 12, SE¼SW¼.
T. 12 N., R. 17 E.,
  Sec. 6, lot 10.
T. 13 N., R. 17 E.,
  Sec. 10, SE¼NE¼ and E½E½SE¼SW¼NE¼;
  Sec. 20, NE¼NW¼NW¼.

The areas described aggregate 97.95 acres in Yakima County.

2. The lands described in paragraph 1 are hereby made available for exchange in accordance with section 206 of the Federal Land Policy and Management Act of October 21, 1976, as amended by the Federal Land Exchange Facilitation Act of 1988, 43 U.S.C. 1716 (1994), subject to valid existing rights, the provisions of existing withdrawals, other segregation of record, and the requirements of applicable law.

Dated: February 15, 2002.

J. Steven Griles,

Deputy Secretary.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

DEPARTMENT OF AGRICULTURE

Forest Service

[CA 668–02–1610–DO–083A]

Notice of intent To Prepare a Land and Resource Management Plan

AGENCY: Bureau of Land Management; Palm Springs-South Coast Field Office, and the United States Forest Service, San Bernardino National Forest.

ACTION: Notice of intent to prepare a Land and Resource Management Plan (LRMP) for the Santa Rosa and San Jacinto Mountains National Monument, designated by Congress on October 24, 2000. This action will require a single Environmental Impact Statement (EIS). The planning area is located in Riverside County, California.

SUMMARY: This document provides notice that the Bureau of Land Management (BLM) and United States Forest Service (USFS) intend to prepare an LRMP with an associated EIS for the Santa Rosa and San Jacinto Mountains National Monument located within the BLM Palm Springs-South Coast Field Office and the San Bernardino National Forest. This planning activity encompasses approximately 150,800 acres of Federally managed public land. The plan will fulfill the needs and obligations set forth by the National Environmental Policy Act (NEPA), the Federal Land Policy and Management Act (FLPMA), the Forest and Rangeland Renewable Resources Planning Act of 1974, the National Forest Management Act of 1976, the Santa Rosa and San Jacinto Mountains National Monument Act of 2000, and BLM and USFS management policies. The BLM and USFS will work collaboratively with interested parties to identify the management decisions that are best suited to local, regional, and national needs and concerns. The public scoping process will identify planning issues, develop planning criteria, and will include an evaluation of the existing BLM and USFS land and resource management plans in the context of the needs and interests of the public and conservation of natural and cultural resources specified in the legislation.

DATES: This notice initiates the public scoping process. Comments on issues and planning criteria may be submitted in writing to the address listed below. All public meetings will be announced through the local news media, newsletters, and the BLM web site (*www.ca.blm.gov*) at least 15 days prior to the event. The minutes and list of attendees for each meeting will be available to the public and open for 30 days to any participant who wishes to clarify the views they expressed.

Public Participation: Public meetings will be held throughout the plan scoping and document preparation period. In order to ensure local community participation and input, public meeting locations will be rotated among the communities located within the Santa Rosa and San Jacinto Mountains and the cities of the Coachella Valley, Riverside County. Meeting sites will also be provided throughout southern California commensurate with interest in the National Monument. Early and ongoing participation is encouraged and will help determine the future management of Federally managed public lands within the Santa Rosa and San Jacinto Mountains National Monument. In addition to the ongoing public participation process, formal opportunities for public participation will be provided through comment on the alternatives and upon publication of the draft LRMP/EIS. Written comments will be accepted and considered throughout the entire planning process.

ADDRESSES: Written comments should be sent to Mr. James G. Kenna—Field Manager, Palm Springs-South Coast Field Office, Bureau of Land Management, P.O. Box 581260, North Palm Springs, CA 92258; or by fax at (760) 251–4899 or by email at *cdunning@ca.blm.gov.* Documents pertinent to this proposal, including comments with the names and addresses of respondents, will be available for public review at the Palm Springs-South Coast Field Office located at 690 W. Garnet Avenue, North Palm Springs, California, during regular business hours 7:45 a.m. to 4:30 p.m.,

Monday through Friday, except holidays, and may be published as part of the EIS. Individual respondents may request confidentiality. If you wish to withhold your name or street address from public review or from disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your written comment. Such requests will be honored to the extent allowed by law. All submissions from organizations and businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be available for public inspection in their entirety.

FOR FURTHER INFORMATION CONTACT: For further information and/or to have your name added to our mailing list, contact Ms. Connell Dunning at (760) 251–4817, *cdunning@ca.blm.gov*, or Elena Misquez at (760) 251–4810, *emisquez@ca.blm.gov*.

SUPPLEMENTARY INFORMATION: The creation of the Santa Rosa and San Jacinto Mountains National Monument along with the changing needs and interests of the public necessitates a separate stand-alone plan for the Monument. This action requires a maintenance action to BLM's California Desert Conservation Area Plan (as amended in 1980) to change its planning boundary and an amendment to the USFS's San Bernardino National Forest Land and Resource Management Plan. A management plan for the Santa Rosa and San Jacinto Mountains National Monument will facilitate coordination and efficiency between the BLM and USFS as joint Federal leads, and to focus collaborative efforts with state and local government, the Agua Caliente Band of Cahuilla Indians and interested public. This joint BLM–USFS planning document will require a single EIS and two separate Records of Decision (ROD).

Preliminary issues and management concerns have been identified by BLM and USFS personnel, other agencies, and in meetings with individuals and user groups. The preliminary issues identified thus far represent the USFS and BLM's knowledge to date on the existing issues and concerns with current management, but are not limited to these. The major issue themes that will be addressed in the plan effort include:

- Integrating monument management with community, tribal, and other agency needs.
- Recreation/visitor use and safety.
- Access and transportation on the public lands; management and protection of public land resources; and balancing multiple uses.

After gathering public comments on what issues the plan should address, the suggested issues will be placed in one of three categories:

1. Issues to be resolved in the plan.
2. Issues resolved through policy or administrative action.
3. Issues beyond the scope of this plan.

Rationale will be provided in the plan for each issue placed in category two or three. In addition to these major issues, a number of management questions and concerns will be addressed in the plan. The public is encouraged to help identify these questions and concerns during the scoping phase.

An interdisciplinary approach will be used to develop the plan in order to consider the variety of resource issues and concerns identified. Disciplines involved in the planning process will include specialists with expertise in outdoor recreation, archaeology, paleontology, wildlife and plants, lands and realty, hydrology, soils, geographic information systems, rangeland management, minerals and geology, forestry, sociology and economics. Where necessary, outside expertise may be used.

Dated: October 11, 2001.

Danella George,

Acting Field Manager, Bureau of Land Management.

Gene Zimmerman,

Forest Supervisor, Forest Service, USDA.

BILLING CODE 4310–32–P

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

Information Collection Activities Under OMB Review

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of data collection submission.

SUMMARY: In compliance with the Paperwork Reduction act (44 U.S.C. 3501 et seq.), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden.

DATES: Comments must be submitted on or before April 15, 2002.

ADDRESSES: Comments on this information collection should be submitted to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for the Department of the Interior, 725 17th Street, NW., Washington, DC 20503. A copy of your comments should also be directed to the Bureau of Reclamation, Pacific Northwest Regional Office, Attention Ms. Vicki Kellerman, 1150 N. Curtis Road, Suite 100, Boise, Idaho 83706.

FOR FURTHER INFORMATION CONTACT: For further information or a copy of the proposed collection of information form, contact Ms. Vicki Kellerman at (208) 378–5326.

SUPPLEMENTARY INFORMATION: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of Reclamation's functions, including whether the information will have practical use; (b) the accuracy of Reclamation's estimated time and cost burdens of the proposed collection of information, including the validity of the methodoly and assumptions used; (c) ways to enhance the quality, use, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including increased use of automated collection techniques or other forms of information technology.

Title: Ririe Reservoir Recreation Survey.

Abstract: Ririe Reservoir is located on Willow Creek, a minor tributary of the Snake River in Bonneville County of eastern Idaho. Ririe Reservoir has recreation attributes that serve Idaho Falls, Ririe, and southeastern Idaho, as well as out-of-state visitors. Primary summer activities consist of boating, swimming, fishing, camping, and picnicking. In general the survey will be used to determine carrying capacity for recreation uses on both Reclamation lands and water, and necessary management actions related to recreation, as identified in the Resource Management Plan for this reservoir. Further, the survey will determine if and when boat ramps, docks, trails, parking, and other facilities need to be expanded for recreation during the next 10 years and if the expansion can be accomplished without detriment to natural, recreational, and cultural resources.

Description of respondents: Ririe Reservoir recreationists from Idaho Falls, Ririe, southeastern Idaho, and an indeterminate diversity of out-of-state visitors to Ririe Reservoir.

Frequency: This is a one-time voluntary survey.

Estimated completion time: An average of 30 minutes per respondent.

Annual responses: 250 respondents.

Annual burden hours: 125.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Reclamation will display a valid OMB control number on the forms.

The **Federal Register** notice with a 60-day comment period soliciting comments on this collection of information was published on December 13, 2001 (66 FR 64454). Reclamation did not receive any comments on this collection of information during the comment period.

OMB has up to 60 days to approve or disapprove this information collection, but may respond after 30 days; therefore, public comment should be submitted to OMB within 30 days in order to assure maximum consideration.

Our practice is to make comments, including names and home addresses of respondents, available for public review. Individual respondents may request that we withhold their home address from public disclosure, which we will honor to the extent allowable by law. There also may be circumstances in which we would withhold a respondent's identity from public disclosure, as allowable by law. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public disclosure in their entirety.

Jerrold D. Gregg,

Area Manager.

[FR Doc. 02–6113 Filed 3–13–02; 8:45 am]

BILLING CODE 4310–MN–M

DEPARTMENT OF JUSTICE

Office of Justice Programs

Agency Information Collection Activities: Extension of a Currently Approved Collection; Comment Request

ACTION: 60-day notice of information collection under review: new collection; Domestic Preparedness Training Evaluation and Follow-up.

The Department of Justice, Office of Justice Programs, Office for Domestic Preparedness has submitted the following information collection request for review and clearance in accordance with the Paperwork Reduction Act of 1995. Office of Management and Budget approval is being sought for the information collection listed below. This proposed information collection is published to obtain comments from the public and affected agencies. Comments are encouraged and will be accepted for "sixty days" until May 13, 2002.

If you have comments, suggestions, or need a copy of the proposed information collection instrument or additional information, please contact Patricia A. Malak, 202–616–3461, Office for Domestic Preparedness, Office of Justice Programs, U.S. Department of Justice, 810 7th Street, NW., Washington, DC 20531.

Written comments and/or suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points:

(1) Evaluate whether the proposal collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Overview of this information:

(1) Type of information collection: New collection

(2) The title of the form/collection: Domestic Preparedness Training Evaluation and Follow-up.

(3) The agency form number, if any, and the applicable component of the Department sponsoring the collection: The Office for Domestic Preparedness, Office of Justice Programs, U.S. Department of Justice is sponsoring the collections. A form number has not been assigned.

(4) Affected public who will be asked or required to respond, as well as a brief abstract: Primary: Individuals who participate in Office for Domestic Preparedness-sponsored training other: None.

Abstract: The data collection effort is designed to obtain feedback from participants, who attend Office for Domestic Preparedness-sponsored training, on enhanced knowledge and/or skills, course improvements, and actions to use the information to improve personal, agency, or jurisdictional preparedness to respond to a terrorism incident. Approximately 4 months after the training, a sample of participants will be asked to complete a follow-up survey on how useful the training has been to them in performing their job actions they have taken to enhance response capacities.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond/reply.* It is estimated that approximately 21,390 respondents will be asked to complete the training evaluation forms and that will take approximately 15 minutes to complete.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total hour burden to complete evaluation forms is approximately 5,347 hours.

If additional information is required contact: Ms. Brenda E. Dyer, Deputy Clearance Officer, United States Department of Justice, Information Management and Security Staff, Justice Management Division, Suite 1600, 601 D Street, NW., Washington, DC 20530– or via facsimile at (202) 514–1590.

Dated: March 8, 2002.

Brenda E. Dyer,

Department Deputy Clearance Officer, United States Department of Justice.

[FR Doc. 02–6109 Filed 3–13–02; 8:45 am]

BILLING CODE 4410–18–M

DEPARTMENT OF LABOR

Office of the Secretary

Advisory Council on Employee Welfare and Pension Benefit Plans; Nominations for Vacancy of Unexpired Term of Investment Counseling Member

Section 512 of the Employee Retirement Income Security Act of 1974 (ERISA), 88 Stat. 895, 20 U.S.C. 1142, provides for the establishment of an "Advisory Council on Employee Welfare and Pension Benefit Plans" (the Council), which is to consist of 15 members to be appointed by the Secretary of Labor (the Secretary) as follows: Three representatives of employee organizations (at least one of whom shall be representative of an organization whose members are participants in a multi employer plan); three representatives of employers (at least one of whom shall be

VOL
67
ISS
50
MR
14
2002
UMI

representative of employers maintaining or contributing to multi employer plans); one representative each from the fields of insurance, corporate trust, actuarial counseling, investment counseling, investment management and accounting; and three representatives from the general public (one of whom shall be a person representing those receiving benefits from a pension plan). No more than eight members of the Council shall be members of the same political party.

Members shall be persons qualified to appraise the programs instituted under ERISA. Appointments are for terms of three years. The prescribed duties of the Council are to advise the Secretary with respect to the carrying out of his or her functions under ERISA, and to submit to the Secretary, or his or her designee, recommendations with respect thereto. The Council will meet at least four times each year, and recommendations of the Council to the Secretary will be included in the Secretary's annual report to the Congress on ERISA.

The un-expired term of one member of the Council who has been serving as the investment-counseling representative is now open to nominations as the member has resigned from the Advisory Council. There are two years remaining of the un-expired term. The Department of Labor is committed to equal opportunity in the workplace and seeks a broad-based and diverse ERISA Advisory Council membership.

Accordingly, notice is hereby given that any person or organization desiring to recommend one or more individuals for appointment to the ERISA Advisory Council on Employee Welfare and Pension Benefit Plans to represent the field specified in the preceding paragraph, may submit recommendations to Sharon Morrissey, Executive Secretary, ERISA Advisory Council, Frances Perkins Building, U.S. Department of Labor, 200 Constitution Avenue, NW., Suite N–5677, Washington, DC 20210. Recommendations must be delivered or mailed on or before April 10, 2002. Recommendations may be in the form of a letter, resolution or petition, signed by the person making the recommendation or, in the case of a recommendation by an organization, by an authorized representative of the organization.

Signed at Washington, DC this 11th day of March 2002.

Ann L. Combs,

Assistant Secretary of Labor Pension and Welfare Benefits Administration

National Environmental Policy Act; NASA Routine Payloads for Expendable Launch Vehicles

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Notice of availability of draft environmental assessment (DEA) for launch of NASA routine spacecraft as payloads on expendable launch vehicles.

SUMMARY: Pursuant to the National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), the Council on Environmental Quality Regulations for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500–1508), and NASA policy and procedures (14 CFR part 1216 subpart 1216.3), NASA has prepared and issued a DEA for launch of NASA routine spacecraft as payloads on expendable launch vehicles. This DEA addresses the potential environmental impacts associated with preparing and implementing the launch of missions that are designated routine payloads on U.S. expendable launch vehicles from existing U.S. facilities using established procedures. The spacecraft covered by this DEA (referred to as routine payload spacecraft) would meet rigorously defined criteria ensuring that the spacecraft, their operation, and their decommissioning would not present any new or substantial environmental and safety concerns. A Routine Payload Checklist (RPC) is used to exclude missions from consideration as routine payloads if they include any extraterrestrial sample return; would be launched on a vehicle and launch pad combination not covered in this DEA; carry radioactive sources that could not be approved by the NASA Office of Safety and Mission Assurance (OSMA) Nuclear Flight Safety Assurance Manager (NFSAM); cause the manifested launch rate (per year) for a particular launch vehicle to exceed the rate previously approved and permitted at the launch sites; require the construction of any new facilities (or substantial modification of existing facilities); utilize hazardous materials in quantities exceeding the Envelope Payload Characteristics (EPCs); utilize potentially hazardous material whose type or amount would not be covered by new or existing local permits or is not included within the definition of the Envelope Spacecraft (ES); release material other than propulsion system exhaust or inert gases into the atmosphere; suggest the potential for any substantial impact on public health and safety not covered by this DEA; have the potential for substantial effects on the environment outside the United States; utilize an Earth-pointing laser system that does not meet the requirements for safe operations according to American National Standards Institute (ANSI) analysis techniques; carry live or inactive disease-causing biological agents; or have the potential to create substantial public controversy related to environmental issues. The proposed launches would occur from existing launch facilities at Cape Canaveral Air Force Station (CCAFS), Florida, and Vandenberg Air Force Base (VAFB), California, during the period 2002 to 2012. Spacecraft that comply with the RPC would utilize materials, quantities of materials, launch vehicles, and operational characteristics that are consistent with normal and routine spacecraft preparation and flight activities at VAFB, CCAFS, and Kennedy Space Center (KSC), Florida. Therefore, the environmental impacts of launching routine payload spacecraft would fall within the range of routine, ongoing, and previously documented impacts associated with approved programs that have been determined not to be significant. The purpose and need for this proposed action is to fulfill NASA's mission for Earth exploration, space exploration, technology development, and scientific research. The scientific missions associated with NASA routine payload spacecraft could not be accomplished without launching orbital and interplanetary spacecraft.

DATES: Comments must be provided in writing to NASA on or before April 15, 2002.

ADDRESSES: Comments should be addressed to Mark R. Dahl, Program Executive, NASA Headquarters, Code SM, Washington, DC 20546. Hard copy comments are preferred, but comments may be sent by electronic mail to *mdahl@hq.nasa.gov*. The DEA may be reviewed at the locations listed under the supplementary information in this notice.

FOR FURTHER INFORMATION CONTACT: Mark R. Dahl, 202–358–4800; *mdahl@hq.nasa.gov*. The DEA also is available in Acrobat® format at *http://spacescience.nasa.gov/admin/pubs/routine_EA/index.htm*.

SUPPLEMENTARY INFORMATION: U.S. space and Earth exploration is integral to NASA's strategic plan for carrying out its mission. NASA is also committed to the further development of advanced, low-cost technologies for exploring and utilizing space. To fulfill these objectives, a continuing series of scientific spacecraft would need to be designed, built, and launched into Earth orbit or towards other bodies in the Solar System. These spacecraft would flyby, encounter, orbit about, land on, or impact with these bodies to collect various scientific data that would be transmitted to Earth via radio for analysis. The scientific missions associated with NASA routine payload spacecraft could not be accomplished without launching such scientific spacecraft.

The proposed action is comprised of preparing, launching, and decommissioning missions designated NASA routine payload spacecraft. The design and operational characteristics and, therefore, the environmental impacts of routine payload spacecraft would be rigorously bounded. Routine payload spacecraft would utilize materials, launch vehicles, facilities, and operations that are normally and customarily used at Vandenberg Air Force Base (VAFB), California, and Cape Canaveral Air Force Station (CCAFS) and Kennedy Space Center (KSC), Florida. The routine payload spacecraft would use these materials, launch vehicles, facilities, and operations only within the scope of activities already approved or permitted. The scope of this DEA includes all spacecraft that would meet specific criteria on their construction and launch, would accomplish the requirements of NASA's research objectives, and would not present new or substantial environmental impacts or hazards. These spacecraft would meet the limitations set forth in the Routine Payload Checklist (RPC), which was developed to delimit the characteristics and environmental impacts of this group of spacecraft. Preparation and launch of all spacecraft that are defined as routine payloads would have environmental impacts that fall within the range of routine, ongoing, and previously documented impacts associated with approved missions that have been determined not to be significant. Alternative spacecraft designs that exceed the limitations of the RPC may have new or substantial environmental impacts or hazards and are not covered by this DEA. Foreign launch vehicles would require individual consideration, review, and separate environmental analysis, and were not considered to be reasonable alternatives for the purpose of this routine payload spacecraft DEA. The No-Action Alternative would mean that NASA would not launch scientific spacecraft missions defined as routine payloads using specific criteria and thresholds. NASA would then continue to propose spacecraft missions for individualized review under NEPA. Such duplicate analyses and redundant documentation for spacecraft missions that meet the limitations of the RPC, however, would not present any new information or identify any substantially different environmental impacts.

The expendable launch vehicles (ELVs) proposed for launching the routine payload spacecraft represent domestic (U.S.) ELVs that would be suitable for launching the routine payload spacecraft, would potentially be available during the 2002 to 2012 period, have documented environmental impacts, and would utilize existing launch facilities. The ELVs included in this action are the Atlas series, Delta series, Taurus, Athena series, Pegasus XL, and Titan II. These launch vehicles would accommodate the desired range of payload masses, would provide the needed trajectory capabilities, and would provide highly reliable launch services. Individual ELVs would be carefully matched to the launch requirements of each particular routine payload spacecraft. For the NASA routine spacecraft missions, the potentially affected environment for normal launches includes the areas at and in the vicinity of the two launch sites, CCAFS in Florida, and VAFB in California. For normal launches of routine payloads under the proposed action, the environmental impacts would be associated principally with the exhaust emissions from the launch vehicles. These effects would include short-term impacts on air quality within the exhaust cloud and near the launch pads, and the potential for acidic deposition on the vegetation and surface water bodies at and near each launch complex, particularly if a rain storm occurred. To minimize the potential for disturbance of protected wildlife species, consultation with the U.S. Fish and Wildlife Service under Section 7 of the Endangered Species Act of 1973 (as amended) is required. Routine payload processing and launch activities would not require any additional permits or mitigation measures beyond those already existing, or in coordination, for VAFB or CCAFS launches.

There are no direct or substantial environmental impacts, including cumulative impacts, associated with the proposed action that have not already been covered by NEPA documentation for the existing launch sites, launch vehicles, launch facilities, and payload processing facilities. NASA missions covered by this DEA would be manifested at VAFB or CCAFS and would be within the total number of launch operations previously analyzed in launch vehicle and launch site NEPA documents.

The DEA may be reviewed at the following locations:

(a) NASA Headquarters, Library, Room 1J20, 300 E Street, SW., Washington, DC 20546 (202–358–0167).

(b) Spaceport U.S.A., Room 2001, John F. Kennedy Space Center, FL 32899. Please call Penny Myers beforehand at 321–867–9280 so that arrangements can be made.

(c) Jet Propulsion Laboratory, Visitors Lobby, Building 249, 4800 Oak Grove Drive, Pasadena, CA 91109 (818–354–5179).

The DEA may be examined at the following NASA Centers by contacting the appropriate Freedom of Information Act Office:

(d) NASA, Ames Research Center, Moffett Field, CA 94035 (650–604–1181).

(e) NASA, Dryden Flight Research Center, P.O. Box 273, Edwards, CA 93523 (661–258–3689).

(f) NASA, Glenn Research Center at Lewis Field, 21000 Brookpark Road, Cleveland, OH 44135 (216–433–2755).

(g) NASA, Goddard Space Flight Center, Greenbelt Road, Greenbelt, MD 20771 (301–286–6255).

(h) NASA, Johnson Space Center, Houston, TX 77058 (281–483–8612).

(i) NASA, Langley Research Center, Hampton, VA 23681 (757–864–2497).

(j) NASA, Marshall Space Flight Center, Huntsville, AL 35812 (256–544–1837).

(k) NASA, Stennis Space Center, MS 39529 (228–688–2164).

Limited hard copies of the DEA are available, on a first request basis, by contacting Mr. Dahl at the address or telephone number indicated herein.

Jeffrey E. Sutton,

Assistant Administrator for Management Systems.

BILLING CODE 7510–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 35–27495]

Filings Under the Public Utility Holding Company Act of 1935, as Amended ("Act")

March 8, 2002.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to

VOL
67
ISS
50
MR
14
2002
UMI

provisions of the Act and rules promulgated under the Act. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendment(s) is/are available for public inspection through the Commission's Branch of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by April 2, 2002, to the Secretary, Securities and Exchange Commission, Washington, DC 20549–0609, and serve a copy on the relevant application(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for hearing should identify specifically the issues of facts or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After April 2, 2002, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Allegheny Energy, Inc., et al. (70–9897)

Allegheny Energy, Inc. ("Allegheny"), a registered holding company, Allegheny Ventures, Inc. ("Ventures"), a direct wholly owned nonutility subsidiary company of Allegheny, both located at 10435 Downsville Pike, Hagerstown, Maryland 21740; and Allegheny Energy Supply Company, L.L.C. ("AE Supply"), 4350 Northern Pike, Monroeville, Pennsylvania 15146–2841, a direct wholly owned generating subsidiary company except by order under section 3(a)(2) of the Act and direct held by Allegheny; (collectively, "Applicants") have filed a post-effective amendment under sections 6(a) and 7, of the Act, and rules 53 and 54 under the Act.

By order dated December 31, 2001 (HCAR No. 27486) ("Order"), the Commission authorized, among other things, through July 31, 2005 ("Authorization Period"): (1) Allegheny to issue up to $1 billion in equity securities [1] and (2) Allegheny and/or AE Supply to issue short-term debt [2] and long-term debt in an aggregate amount up to $4 billion. Applicants now seek to amend the authorization granted in the Order.

Specifically, Applicants now make the following requests:

(1) Allegheny to issue up to an aggregate of $1 billion at any one time outstanding through the Authorization Period to issue and sell, common stock or options, warrants or other stock purchase rights exercisable for common stock or contracts to purchase common stock in public or privately negotiated for cash or as consideration for the acquisition of equity securities or assets of other companies, provided in section 32 and 33 of the Act and under rule 58; and

(2) Allegheny and AE Supply seek to modify the Order to extend the maturity of the Notes from 270 days to 364 days.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

J. Lynn Taylor,

Assistant Secretary.

[FR Doc. 02–6103 Filed 3–13–02; 8:45 am]

BILLING CODE 8010–01–P

[1] Specifically, the Order stated, "Allegheny may issue common stock or options, warrants or other stock purchase rights exercisable for common stock in public or privately negotiated transactions for cash or as consideration for the equity securities or assets of other companies, provided that the acquisition of securities of the equity securities or assets has been authorized in this proceeding, a separate proceeding, or is exempt by the Act or the rules under the Act."

[2] The Order generally provided that short-term debt will not have a maturity of less than one day and not more than 364 days. The Order also provided that notes payable to banks would have a maturity of not more than 270 days after the date of issuance or renewal ("Notes").

SECURITIES AND EXCHANGE COMMISSION

[File No. 1–13841]

Issuer Delisting; Notice of Application for Withdrawal From Listing and Registration on the American Stock Exchange LLC (the Rottlund Company, Inc., Common Stock, Par Value $.10 Per Share)

March 8, 2002.

The Rottlund Company, Inc., a Minnesota corporation ("Issuer"), has filed an application with the Securities and Exchange Commission ("Commission"), pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 12d2–2(d) thereunder,[2] to withdraw its Common Stock, par value, $.10 per share ("Security"), from listing and registration on the American Stock Exchange LLC ("Amex" or "Exchange").

On March 5, 2002, the Board of Directors of the Issuer ("Board") approved a resolution to withdraw the Issuer's Security from the Amex. On January 24, 2002, the Issuer commenced a tender offer to purchase any and all of the outstanding shares of its Security, pursuant to the terms and conditions set forth in the Issuer's Tender Offer Statement filed with the Commission (the "Offer"). The Offer expired on March 6, 2002 and, as a result, the Issuer no longer meets Amex's required maintenance standards concerning the number of registered shareholders of the Security. In addition, the Issuer also cites the following reasons for withdrawal of its Security from the Amex; (i) the Security has had historically low trading prices and trading volume; (ii) the costs of remaining a publicly-traded company are significant; (iii) the Issuer has not been able to realize the benefits associated with being a publicly-traded company; and (iv) as a result of the merger, the Issuer will no longer have any public shareholders. Consequently, the Issuer has not made alternative arrangements for the trading of the Security following its delisting from the Amex.

The Issuer stated in its application that it has met the requirements of Amex Rule 18 by complying with all applicable laws in effect in the state of Minnesota, in which it is incorporated, and with the Amex's rules governing an issuer's voluntary withdrawal of a security from listing and registration. The Issuer's application relates solely to the Security's withdrawal from listing and registration under Section 12(b) of the Act [3] and shall not affect its obligation to be registered under Section 12(g) of the Act.[4]

Any interested person may, on or before March 29, 2002 submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609, facts bearing upon whether the application has been made in accordance with the rules of the Amex and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[5]

Jonathan G. Katz,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission held the following additional meeting during the week of March 4, 2002: An additional closed meeting was held on Tuesday, March 5, 2000 at 5:45 p.m.

Commissioner Glassman, as duty officer, determined that no earlier notice thereof was possible.

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries attended the closed meeting. Certain staff members who had an interest in the matter were also present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(5), (7), (9)(A), (9)(B), and (10) and 17 CFR 200.402(a)(5), (7), 9(i), 9(ii) and (10), permit consideration of the scheduled matter at the closed meeting.

The subject matter of the closed meeting held on Tuesday, March 5, 2002 was: Regulatory matter concerning financial markets.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact:

The Office of the Secretary at (202) 942–7070.

Dated: March 11, 2002.

Jonathan G. Katz,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45524; File Nos. SR–DTC–2000–21, SR–OCC–2001–01, SR–NSCC–2001–13, SR–EMCC–2001–02, SR–GSCC–2001–12, and SR–MBSCC–2001–03]

Self-Regulatory Organizations; the Depository Trust Company, the Options Clearing Corporation, National Securities Clearing Corporation, Emerging Markets Clearing Corporation, Government Securities Clearing Corporation, and MBS Clearing Corporation; Notice of Filing of Proposed Rule Changes Seeking Authority To Enter Into a Multilateral Cross-Guaranty Agreement

March 8, 2002.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on December 14, 2000, February 20, 2001, June 26, 2001, June 27, 2001, September 21, 2001, and September 25, 2001, The Depository Trust Company ("DTC"), The Options Clearing Corporation ("OCC"), National Securities Clearing Corporation ("NSCC"), Emerging Markets Clearing Corporation ("EMCC"), Government Securities Clearing Corporation ("GSCC"), and MBS Clearing Corporation ("MBSCC") (collectively referred to as the "clearing corporations"), respectively, filed with the Securities and Exchange Commission ("Commission") the proposed rule changes (File Nos. SR–DTC–2000–21, SR–OCC–2001–01, SR–NSCC–2001–13, SR–EMCC–2000–02, SR–GSCC–2001–12, and SR–MBSCC–2001–03) as described in Items I, II, and III below, which items have been prepared primarily by DTC, OCC, NSCC, EMCC, GSCC, and MBSCC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The purpose of the proposed rule change is to modify the clearing corporations' rules to enable them to enter into a multilateral cross-guaranty agreement ("Multilateral Agreement").

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In their filings with the Commission the clearing corporations included statements concerning the purpose of and basis for the proposed rule changes and discussed any comments they received on the proposed rule changes. The text of these statements may be examined at the places specified in Item IV below. The clearing corporations have prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.[2]

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

At the present time, there are limited cross-guaranty agreements ("bilateral agreements") in effect between:

(1) DTC and NSCC (forming part of the DTC–NSCC Amended and Restated Netting Contract and Limited Cross-Guaranty Agreement that also provides for the netting of settlement payments and the collateralization of transactions processed through the facilities of DTC and NSCC);[3]

(2) MBSCC and Participants Trust Company;[4]

(3) NSCC and each of MBSCC, GSCC and International Securities Clearing Corporation ("ISCC");[5]

(4) NSCC and OCC;[6] and

(5) EMCC and each of NSCC, GSCC, and ISCC.[7]

In general, each clearing agency that is a party to a bilateral agreement provides the other clearing agency with a limited guaranty of the obligations of any entity that is a member of both clearing agencies. This means that if a common member fails and if one clearing agency winds up its business with the common member with assets of the common member in excess of the common member's liabilities to the clearing agency and the other clearing agency winds up its business with the common member with liabilities of the common member in excess of the

[1] 15 U.S.C. 78s(b)(1).

[2] The Commission has modified parts of these statements.

[3] Securities Exchange Act Release Nos. 36867 (February 21, 1996) [File No. SR–DTC–96–06] and 36866 (February 21, 1996) [File No. SR–NSCC–96–03](orders amending rules and cross-guaranty agreement to accommodate same-day funds settlement).

[4] Participants Trust Company has been merged into DTC. Securities Exchange Act Release No. 38604 (May 9, 1997) [File No. SR–PTC–97–01].

[5] ISCC has ceased operations and is no longer a registered clearing agency. Securities Exchange Act Release Nos. 37616 (August 28, 1996) [File Nos. SR–MBSCC–96–02, SR–GSCC–96–03 and SR–ISCC–96–04] and 39020 (September 4, 1997) [File No. SR–NSCC–97–11].

[6] Securities Exchange Act Release No. 39022 (September 4, 1997) [File Nos. SR–OCC–97–17 and SR–NSCC–97–12].

[7] Securities Exchange Act Release No. 42180 (November 29, 1999) [File No. SR–EMCC–99–7] and 37616 (August 28, 1996) [File Nos. SR–NSCC–96–02, SR–GSCC–96–03, and SR–ISCC–96–04].

VOL
67

2002
UMI

common member's liabilities, (i) the clearing agency with the excess pays the clearing agency with the deficiency an amount equal to the lesser of the excess or the deficiency, and (ii) the amount paid by the clearing agency with the excess to the clearing agency with the deficiency becomes an obligation of the common member to the clearing agency with the excess which the clearing agency with the excess may satisfy if necessary (thereby reimbursing itself for the amount paid to the clearing agency with the deficiency) from the assets of the common member. In this way, through the mechanism of a limited cross-guaranty and a compensating reimbursement obligation, the assets of a common member at one clearing agency in excess of its liabilities to that clearing agency may be made available to satisfy the liabilities of the common member to another clearing agency where the common member has a deficiency of assets to satisfy its liabilities.

Background

The proposed Multilateral Agreement is similar in purpose to the existing bilateral agreements but differs in form, scope, and operation because (i) all of the parties to the several bilateral agreements will be parties to the Multilateral Agreement, (ii) all of the transactions of common members with any of the clearing corporations will be subject to the limited cross-guaranties of the Multilateral Agreement, (iii) all of the assets of common members with any of the parties to the Multilateral Agreement will be subject to application pursuant to the provisions of the Multilateral Agreement, (iv) all of the parties to the Multilateral Agreement will rank *pari passu* in terms of the payment of their respective guaranty obligations and entitlements, and (v) all such guaranty obligations and entitlements will be (A) calculated by DTC (based on information provided by the clearing agencies) pursuant to a formula set forth in the Multilateral Agreement and (B) settled through the facilities of DTC upon instructions from the clearing agencies required to make guaranty payments.

Set forth below is a description of the material terms and conditions of the Multilateral Agreement:

If a clearing agency that is a party to the Multilateral Agreement ceases to act for or suspends a person ("ceases to act") and if that person is a member or participant of two or more clearing agencies ("common member"), such clearing agency must give each other clearing agency a notice ("default notice") that it has ceased to act for such common member (thereafter, "defaulting member"). Each other clearing agency that also ceases to act for the defaulting member within a period of ten business days after the default notice is given ("participating clearing agency") will have fifteen business days to deliver to each other participating clearing agency a statement ("information statement") that sets forth the positive or negative sum derived (after application of any applicable liquidation procedures) from adding the amounts (specified in the Multilateral Agreement) owed by the participating clearing agency to the defaulting member as of the close of business on the day on which such participating clearing agency ceased to act for such defaulting member and subtracting the amounts (specified in the Multilateral Agreement) owed by the defaulting member to the participating clearing agency as of the close of business on such date. The resulting amount is the "available net resources" of such participating clearing agency with respect to such defaulting member.

Each participating clearing agency with positive available net resources ("payor clearing agency") has an obligation to make a payment ("guaranty obligation") to each participating clearing agency with negative available net resources, and each participating clearing agency with negative available net resources ("payee clearing agency") will have an entitlement to receive a payment ("guaranty entitlement") from each participating clearing agency with positive available net resources, in an amount determined by a formula set forth in the Multilateral Agreement which: (i) Limits the aggregate guaranty obligation of any payor clearing agency to the amount of its positive available net resources and prorates the aggregate guaranty obligations of all payor clearing agencies (based on their available net resources) if all positive available net resources of all payor clearing agencies exceeds all negative available net resources of all payee clearing agencies and (ii) limits the aggregate guaranty entitlement of any payee clearing agency to the amount of its negative available net resources and prorates the aggregate guaranty entitlements of all payee clearing agencies (based on their available net resources) if the negative available net resources of all payee clearing agencies exceeds the positive available net resources of all payor clearing agencies.

Within two business days after the end of the period for submitting information statements with the information on the available net resources of the participating clearing agencies, DTC, acting for the participating clearing agencies whether or not DTC is a participating clearing agency with respect to any particular claim under the Multilateral Agreement and using only the information on available net resources contained in the information statements, will calculate the guaranty obligations and the guaranty entitlements of the participating clearing agencies in accordance with the formula set forth in the Multilateral Agreement and will deliver a report thereon to each of the participating clearing agencies. Two business days after that, DTC, acting on appropriate payment instructions from the payor clearing agencies, will debit their settlement accounts at DTC the amounts of their guaranty obligations and will credit the settlement accounts of the payee clearing agencies at DTC the amounts of their guaranty entitlements. Such debits and credits are then netted and settled with all other debits and credits to the settlement accounts of the participating clearing agencies on the day of settlement. All of the clearing agencies are or will be prior to the execution of the Multilateral Agreement participants of DTC.

It is important to note that a clearing agency cannot assert a claim and cannot be obligated to make or be entitled to receive a payment unless it ceases to act for a defaulting member. Each clearing agency will determine on the basis of its own rules whether or not to cease to act for a defaulting member. Generally, a clearing agency may cease to act for a defaulting member to protect the interests of the clearing agency, its other members or participants, and the national system for the clearance and settlement of securities transactions if, among other things, the defaulting member (a) has failed to pay a settlement debit, (b) has failed to pay or perform any other obligation to the clearing agency or (c) has become the subject of an insolvency proceeding or has become a "failed member" within the meaning of the Federal Deposit Insurance Corporation Improvement Act of 1991 (*e.g.* it ceases to meet its obligations when due even if it has not become the subject of a formal insolvency proceeding). Ceasing to act for a member or participant is a serious measure which clearing agencies do not take lightly or do for minor defaults. Accordingly, by requiring that a clearing agency cease to act for a defaulting member before the procedures of the Multilateral Agreement can be implemented, the Multilateral Agreement ensures that the payment obligations of payor clearing agencies and the reimbursement obligations of defaulting participants to payor clearing agencies will not be triggered by minor defaults which do not pose a threat to the interests of the clearing agencies, their members or participants, or to the national system for the clearance and settlement of securities transactions.

As the foregoing description of the process for determining and satisfying a claim under the Multilateral Agreement indicates, no clearing agency would ever be required under the Multilateral Agreement to deliver assets or the proceeds of assets of a defaulting member to another clearing agency except for assets or the proceeds thereof in excess of the obligations and liabilities of the defaulting member to the first clearing agency and then only up to the amount needed to discharge the liabilities and obligations of the defaulting member to the second clearing agency. In substance and effect, the Multilateral Agreement provides a mechanism for using the assets of a member or participant of any clearing agency to secure the obligations and liabilities of such member or participant, first, to such clearing agency and, second, to other clearing agencies to the extent of any excess assets. The Multilateral Agreement, therefore, should reduce risk to the clearing agencies (and to the national system for the clearance and settlement of securities transactions) because a defaulting common member may have positions spread across the clearing agencies in such manner as to cause its available net resources at one or more clearing agencies to be positive even though its available net resources at one or more other clearing agencies are negative.

The Multilateral Agreement also provides for subsequent adjustments in guaranty obligations and guaranty entitlements among participating clearing agencies if information is discovered which, if known at the time of the initial calculation, would have changed the amounts of such guaranty obligations and guaranty entitlements, subject to certain conditions and limitations as described below.

If at any time within four years after any payment is made with respect to a guaranty obligation any participating clearing agency has any information that could result in a change in the calculation of such payment, such participating clearing agency must give each other participating clearing agency a notice thereof ("adjustment notice"). Within a period of ten business days after the adjustment notice is given, each participating clearing agency must deliver to each other participating clearing agency (and to DTC if DTC is not a participating clearing agency with respect to such default) a statement ("supplemental information statement") which sets forth (i) the amount of the available net resources of such participating clearing agency with respect to the defaulting member as of the close of business on the day on which such participating clearing agency ceased to act for such defaulting member but taking into account the effect, if any, of the information in the adjustment notice and (ii) the amount of its available net resources, if any, as of the close of business on the day it received the adjustment notice.

Within two business days after the end of the period for submitting supplemental information statements with the information on the available net resources of the participating clearing agencies, DTC, acting for the participating clearing agencies (whether or not DTC is a participating clearing agency with respect to such default) and using only the information on available net resources contained in the supplemental information statements, will recalculate the guaranty obligations and guaranty entitlements of the participating clearing agencies in accordance with the same formula originally used to calculate the guaranty obligations and guaranty entitlements of the participating clearing agencies and will deliver a report thereon to the participating clearing agencies. However, no participating clearing agency that is required to make a payment as a result of any recalculation of guaranty obligations and guaranty entitlements with respect to a prior default will be required to make any payment in excess of the positive amount of its available net resources on the date it received the adjustment notice plus any cash payments it previously received or minus any cash payments it previously paid pursuant to the terms of the Multilateral Agreement with respect to the same default. Two business days after that, DTC, acting on appropriate instructions from the participating clearing agencies required to make adjustment payments as a result of the recalculation of guaranty obligations and guaranty entitlements described above will debit their settlement accounts the amounts they are obligated to pay and will credit the settlement accounts of the participating clearing agencies entitled to receive adjustment payments the amounts they are entitled to receive. Such debits and credits will then be netted and settled with all other debits and credits to the settlement accounts of the participating clearing agencies on the day of settlement.

As the foregoing description of the process for adjusting guaranty obligations and guaranty entitlements under the Multilateral Agreement indicates, a clearing agency will never be required to use its own assets to pay the claim of any other clearing agency against a defaulting member. Only the available net assets of the defaulting member will ever be used for this purpose. So, if as a result of a recalculation of guaranty obligations and guaranty entitlements, a participating clearing agency which was a payor clearing agency has an increased payment obligation or a participating clearing agency which was a payee clearing agency is now required to make a payment, the amount of that payment will be limited to the net assets of the defaulting member then in the possession of the participating clearing agency plus the net amount of any payments it previously received from other participating clearing agencies regarding the same claim.

Any clearing agency other than DTC may withdraw from the Multilateral Agreement upon ten days' advance written notice. Any clearing agency which resigns as a participant of DTC will also cease to be a party to the Multilateral Agreement effective upon such resignation. DTC may terminate the Multilateral Agreement entirely on one year's advance written notice. However, any such withdrawal or resignation will not affect the obligations of a withdrawing or resigning clearing agency with respect to a claim for which a default notice was delivered prior to such withdrawal or resignation and any such termination does not affect the obligations of any clearing agency with respect to a claim for which a default notice was delivered prior to such termination.

In conjunction with the Multilateral Agreement, NSCC, EMCC, GSCC, MBSCC, and OCC will be terminating the bilateral agreements so that there will be no issues of conflict or priority with the limited cross-guaranty provisions of the Multilateral Agreement. DTC and NSCC will enter into a Seconded Amended and Restated Netting Contract and Limited Cross-Guaranty Agreement ("New DTC–NSCC Agreement"). The New DTC–NSCC Agreement will modify and supercede the current Amended and Restated Netting Contract and Limited Cross-Guaranty Agreement dated February 21,

VOL 67 ISS 50 MR 14 2002 UMI

1996,[8] between DTC and NSCC ("Old DTC–NSCC Agreement"). The New DTC–NSCC Agreement will delete the limited net resources cross-guaranty provisions of the Old DTC–NSCC Agreement so that the limited net resources cross-guaranty provisions of the Multilateral Agreement will be the only such provisions of this type between DTC and NSCC and among DTC, NSCC, and the other parties to the Multilateral Agreement.

Pursuant to the Multilateral Agreement, a clearing agency party may be entitled to receive a guaranty payment from one or more other parties to the Multilateral Agreement with respect to the obligations of a defaulting member. However, if a clearing agency party receives a guaranty payment pursuant to the Multilateral Agreement, it will have a contingent obligation to refund some or all of such guaranty payment under two circumstances (each colloquially referred to as a "clawback"):

(i) A repayment as a result of a recalculation of the guaranty obligations and guaranty entitlements of participating clearing agencies, which, as stated above, could take place at any time up to four years after the guaranty payment is received; or

(ii) A payment or repayment as a result of a judicial determination that the defaulting member did not owe a participating clearing agency some or all of the amount of the charge covered by the guaranty payment, which, as explained below, could take place at any time up to six years after such charge.

The Multilateral Agreement provides that if a court of competent jurisdiction determines that an amount paid by a payor clearing agency to a payee clearing agency was not paid on account of an amount owed by the defaulting member to the payee clearing agency, (i) the payee clearing agency will repay such amount (which may be some or all of the guaranty payment it received from the payor clearing agency) to the payor clearing agency or (ii) if so ordered by a court, the payee clearing agency shall pay such amount to the defaulting member or its legal representative (*e.g.*, a trustee or receiver).

There is no time limit expressed in the Multilateral Agreement within which a payee clearing agency can be required to make such court-ordered repayment to the payor clearing agency or payment to the defaulting member or its legal representative because the parties to the Multilateral Agreement cannot by contract among themselves bind any court or any third party seeking relief in any court to any such time limit. Accordingly, the time within which a payee clearing agency could be required to make such payment or repayment would be the time within which a third party may bring a claim for such relief (*i.e.*, the statutory limitations period applicable to such claim). Although it is difficult to predict how a claim that the payee clearing agency improperly charged the defaulting member and thereby received a guaranty payment from a payor clearing agency for an amount that the defaulting member did not in fact owe to the payor clearing agency would be framed, it is probable that it would be framed as a claim in contract (*i.e.*, that the charge was not a proper charge under the rules of the payee clearing agency). Under the rules of each clearing agency, such rules constitute a contract between such clearing agency and its members or participants and are binding on all parties. In New York, which is the most likely venue of any proceeding and the law that would most likely govern any claim, the statutory limitations period applicable to a claim on contract is generally six years from the time of the breach.

Although, as just discussed, a clawback could occur up to four to six years after a payee clearing agency receives a payment, as a practical matter, it is extremely unlikely that it would take (i) four years for participating clearing agencies to make all necessary adjustments in the calculation of guaranty obligations and guaranty entitlements under the Multilateral Agreement or (ii) six years for a defaulting member or its legal representative to assert a claim against a payee clearing agency that an amount was improperly charged against such defaulting member. Nevertheless, because MBSCC does not currently mutualize risk among its participants and a payment of such amount from its own resources would have the economic effect of charging all participants for such costs, MBSCC must make appropriate arrangements to deal with a clawback if it ever occurs.

GSCC and MBSCC are proposing to amend their rules regarding clawbacks. The following is a summary of the amendments proposed by GSCC and the amendments proposed by MBSCC.

GSCC

GSCC is proposing to amend its rules to provide it with two options in dealing with a clawback:

Option 1

The proposed rule change would give GSCC the option to apply any guaranty payment that it receives pursuant to the Multilateral Agreement upon receipt. If GSCC chooses this option:

a. the members that would have been assessed in the absence of the guaranty payment will be required to reimburse GSCC for any amount subject to a clawback pro rata based on the benefits they received (in terms of the reduction or elimination of assessments made or that otherwise would be made against them) from such guaranty payment;

b. the obligations of the members referred to in (a) above will be secured by requiring that such members must make and maintain additional deposits to the clearing fund in amounts equal to the benefits they received (in terms of the reduction or elimination of assessments made or that would have been made against them) from the guaranty payment;

c. to deal with the possibility that a shortfall may occur in the situation where the additional clearing fund deposit of a particular member referred to in (a) above is no longer available at the time a clawback occurs (because, for example, that member became insolvent, and its entire clearing fund deposit was used to cover losses incurred by GSCC), GSCC may treat such shortfall as an "other loss" pursuant to GSCC Rule 4, Section 8(g); and

d. to deal with the fact that, at least theoretically, a clawback may not occur until four years (in the case of a recalculation of guaranty obligations and guaranty entitlements) to six years (in the case of a court determination of an improper charge) after receipt of a guaranty payment, the additional deposits made, pursuant to (b) or (c) above, by the members that would have been assessed must be retained by GSCC until GSCC is satisfied that (i) GSCC is no longer subject to a clawback under the Multilateral Agreement and (ii) the members are therefore no longer subject to a corresponding obligation to reimburse GSCC for the amount of any such clawback; and

e. GSCC has the right (i) to waive the obligation of the members to make and maintain additional deposits to the clearing fund to secure an obligation on their part to reimburse GSCC for the amount of any clawback and/or (ii) to pay the clawback from the resources of GSCC without recourse to any member or their deposits to the clearing fund.

Option 2

The proposed rule change will give GSCC the option to retain the guaranty payment and not apply it to its losses and/or liabilities arising from the default of the member until after the end of the clawback period. If GSCC chooses this option:

a. the members would be assessed pursuant to GSCC's loss sharing rule and

b. at the end of the clawback period, GSCC would distribute the guaranty payment to the members who were assessed (whether or not they are still members at the time of such distribution) pro rata the amounts of such assessments.

Given that similar repayment issues are presented by GSCC's cross-margining arrangements, GSCC is proposing to make comparable changes in the rules with respect to the repayment of cross-margining payments.

MBSCC

To deal with clawbacks, MBSCC is proposing to amend its rules as follows:

a. upon receipt of a guaranty payment, MBSCC will reduce or eliminate by an equivalent amount the assessments made or that otherwise would be made against the original contra-side participants pro rata as now provided in Rule 4 of Article III of its rules;

b. the original contra-side participants will be required to reimburse MBSCC for any amount subject to a clawback pro rata the benefits they received (in terms of the reduction or elimination of assessments made or that otherwise would be made against them) from the guaranty payment;

c. MBSCC will secure the obligations of the original contra-side participants referred to above by requiring that such original contra-side participants must make and maintain additional deposits to the participants fund in amounts equal to the benefits they received (in terms of the reduction or elimination of assessments made or that otherwise would be made against them) from the guaranty payment;

d. to deal with the possibility that the participants fund deposit of a particular original contra-side participant referred to in (3) above may no longer be available at the time the clawback occurs (because, for example, that participant became insolvent and its entire participant fund deposit was used to cover losses incurred by MBSCC), the remaining original contra-side participants referred to in (3) above would be required to replenish the deficiency by making additional deposits to the participants fund pro rata their additional deposits to the participants fund pursuant to (3) above;

e. to deal with the fact that, at least theoretically, a clawback may not occur until four years (in the case of a recalculation of guaranty obligations and guaranty entitlements) to six years (in the case of a court determination of an improper charge) after receipt of a guaranty payment, the additional deposits made, pursuant to (3) or (4) above, by original contra-side participants must be retained by MBSCC until MBSCC is satisfied that (i) MBSCC is no longer subject to a clawback under the Multilateral Agreement and (ii) the original contra-side participants are therefore no longer subject to a corresponding obligation to reimburse MBSCC the amount of any such clawback; and

f. MBSCC has the right to (i) waive the obligation of the original contra-side participants to make and maintain additional deposits to the participants fund to secure an obligation on their part to reimburse MBSCC for the amount of any clawback and/or (ii) to pay any clawback from the resources of MBSCC without recourse to any original contra-side participants or their deposits to the participants fund.

Section 17A(a)(2)(A) of the Act directs the Commission to facilitate the establishment of a national system for the prompt and accurate clearance and settlement of securities transactions and to facilitate the establishment of linked or coordinated facilities for the clearance and settlement of transactions.[9] Section 17A(b)(3)(F) of the Act requires that the rules of a clearing agency be designed to assure the safeguarding of securities and funds which are in its custody or control or for which it is responsible.[10]

The clearing agencies believe that the proposed rule changes are consistent with the requirements of the Act and the rules and regulations promulgated thereunder because they will: (i) Reduce the risk of loss to clearing agencies resulting from the failure or default of a common member, (ii) mitigate the risk to the national clearance and settlement system resulting from such failure or default and the impact of such failure or default on clearing agencies and their other members or participants, (iii) foster cooperation and coordination among clearing agencies and other persons involved in the clearance and settlement of securities transactions, and (iv) assist clearing agencies in safeguarding the securities and funds in their custody or control or for which they are responsible.

(B) Self-Regulatory Organizations' Statement on Burden on Competition

The clearing agencies do not believe that the proposed rule change would impose any burden on competition.

(C) Self-Regulatory Organizations' Statement on Comments on the Proposed Rule Changes Received From Members, Participants, or Others

Written comments were not and are not intended to be solicited with respect to the proposed rule changes, and none have been received.

III. Date of Effectiveness of the Proposed Rule Changes and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to ninety days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

VI. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal offices of DTC, OCC, NSCC, EMCC, GSCC, and MBSCC. All submissions should refer to the File Nos. SR–DTC–

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45519; File No. SR–NASD–2001–48]

Self-Regulatory Organizations; Order Approving Proposed Rule Change by National Association of Securities Dealers, Inc. To Clarify That the Nasdaq Limited Partnership Qualitative Listing Requirements Are Applicable to Limited Partnerships Listed on Both the National Market and the SmallCap Market

March 7, 2002.

On August 7, 2001, the National Association of Securities Dealers, Inc. ("NASD" or "Association") through its subsidiary, The Nasdaq Stock Market, Inc. ("Nasdaq") filed with the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change to clarify that Nasdaq's limited partnership qualitative listing requirements are applicable to limited partnerships listed on both the National Market and the SmallCap Market.

The proposed rule change was published for comment in the **Federal Register** on December 13, 2001.[3] No comments were received on the proposal. In this order, the Commission is approving the proposed rule change.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities association[4] and, in particular, with the requirements of Section 15A(b)(6).[5] In particular, the Commission finds that the proposed rule change is consistent with Section 15A(b)(6) of the Act[6] in that the proposal is designed to prevent fraudulent and manipulative acts and practices, and to protect investors and the public interest. The Commission believes that the adoption of uniform listing requirements for limited partnerships will assist Nasdaq in maintaining an efficient and open market.

It Is Therefore Ordered, pursuant to Section 19(b)(2) of the Act,[7] that the proposed rule change (SR–NASD–2001–48), is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45526; File Nos. SR–NASD–2002–21; SR–NYSE–2002–09]

Self-Regulatory Organizations: Notice of Filing of Proposed Rule Changes by the National Association of Securities Dealers, Inc. and the New York Stock Exchange, Inc. Relating to Research Analyst Conflicts of Interest

March 8, 2002.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on February 13, 2002, the National Association of Securities Dealers, Inc. ("NASD" or "Association"), through its wholly owned subsidiary, NASD Regulation, Inc. ("NASDR"), and on February 27, 2002, the New York Stock Exchange, Inc. ("NYSE" or "Exchange"), filed with the Securities and Exchange Commission ("SEC" or "Commission") proposed rule changes as described in Items I, II, and III below, which Items have been prepared by the respective self-regulatory organizations ("SROs"). On March 7, 2002, NASDR submitted Amendment No. 1 to its proposed rule change.[3] The Commission is publishing this notice to solicit comments on the proposed rule changes, as amended, from interested persons.

I. Self-Regulatory Organizations' Statement of the Terms of Substance of the Proposed Rule Changes

The SROs propose to amend their rules to address research analyst conflicts of interest. NASDR is proposing to amend the rules of the NASD to establish new NASD Rule 2711 ("Research Analysts and Research Reports") to address research analyst conflicts of interest. The NYSE is proposing amendments to NYSE Rule 472 ("Communications with the Public"), which will place prohibitions and/or restrictions on the Investment Banking Department, Research Department, and Subject Company Relationships and Communications, and will impose additional disclosure requirements on members, member organizations, and associated persons preparing research reports and making public appearances.

The NYSE is also proposing amendments to NYSE Rule 351 ("Reporting Requirements"), which will require members and member organizations to submit to the Exchange, annually, a written attestation, that the member or member organization has established and implemented written procedures reasonably designed to comply with the provisions of NYSE Rule 472.

Below is the text of the proposed rule changes. Proposed new language is in italic; proposed deletions are in [brackets].

A. NASD Proposed Rule Text

Rule 2711. Research Analysts and Research Reports

(a) Definitions

For purposes of this rule, the following terms shall be defined as provided.

(1) "Investment banking department" means any department or division, whether or not identified as such, that performs any investment banking service on behalf of a member.

(2) "Investment banking services" include, without limitation, acting as an underwriter in an offering for the issuer; acting as a financial adviser in a merger or acquisition; providing venture capital, equity lines of credit, PIPEs or similar investments; or serving as placement agent for the issuer.

(3) "Member of a research analyst's household" means any individual whose principal residence is the same as the research analyst's principal residence.

(4) "Public appearance" means any participation in a seminar, forum (including an interactive electronic forum), radio or television interview, or other public speaking activity in which a research analyst makes a recommendation or offers an opinion concerning an equity security.

(5) "Research analyst" means the associated person who is principally responsible for, and any associated person who reports directly or indirectly to such a research analyst in connection with, preparation of the substance of a research report, whether or not any such person has the job title of "research analyst."

(6) "Research analyst account" means any account in which a research analyst or member of the research analyst's household has a beneficial interest, or over which such analyst or household member has discretion or control, other than an investment company registered under the Investment Company Act of 1940.

(7) "Research department" means any department or division, whether or not identified as such, that is principally responsible for preparing the substance of a research report on behalf of a member.

(8) "Research report" means a written or electronic communication that the member has distributed or will distribute with reasonable regularity to its customers or the general public, which presents an opinion or recommendation concerning an equity security.

(9) "Subject company" means the company whose equity securities are the subject of a research report or recommendation in a public appearance.

(b) Restrictions on Investment Banking Department Relationship with Research Department

(1) No research analyst may be subject to the supervision or control of any employee of the member's investment banking department.

(2) Except as provided in paragraph (b)(3), no employee of the investment banking department may review or approve a research report of the member before its publication.

(3) Investment banking personnel may review a research report before its publication as necessary only to verify the factual accuracy of information in the research report or to review the research report for any potential conflict of interest, provided that:

(A) Any written communication between investment banking and research department personnel concerning such a research report must be made either through an authorized legal or compliance official of the member or in a transmission copied to such an official; and

(B) any oral communication between investment banking and research department personnel concerning such a research report must be documented and made either through an authorized legal or compliance official acting as intermediary or in a conversation conducted in the presence of such an official.

(c) Restrictions on Review of a Research Report by the Subject Company

(1) Except as provided in paragraphs (c)(2) and (c)(3), a member may not submit a research report to the subject company before its publication.

(2) A member may submit sections of such a research report to the subject company before its publication for review as necessary only to verify the factual accuracy of information in those sections, provided that:

(A) The sections of the research report submitted to the subject company do not contain the research summary, the research rating or the price target;

(B) a complete draft of the research report is provided to the legal or compliance department before sections of the report are submitted to the subject company; and

(C) if after submitting the sections of the research report to the subject company the research department intends to change the proposed rating or price target, it must first provide written justification to, and receive written authorization from, the legal or compliance department for the change. The member must retain copies of any draft and the final version of such a research report for three years following its publication.

(3) The member may notify a subject company that the member intends to change its rating of the subject company's securities, provided that the notification occurs on the business day before the member announces the rating change, after the close of trading in the principal market of the subject company's securities.

(d) Prohibition of Certain Forms of Research Analyst Compensation

No member may pay any bonus, salary or other form of compensation to a research analyst that is based upon a specific investment banking services transaction.

(e) Prohibition of Promise of Favorable Research

No member may directly or indirectly offer favorable research, a specific rating or a specific price target, or threaten to change research, a rating or a price target, to a company as consideration or inducement for the receipt of business or compensation.

(f) Imposition of Quiet Periods

No member may publish a research report regarding a subject company for which the member acted as manager or co-manager of:

(1) An initial public offering, for 40 calendar days following the date of the offering; or

(2) a secondary offering, for 10 calendar days following the date of the offering; provided that this provision will not prevent a member from publishing a research report concerning the effects of significant news or a significant event on the subject company within such 40- and 10-day periods, and provided further that the legal and compliance department authorizes publication of that research report before it is issued.

(g) Restrictions on Personal Trading by Research Analysts

(1) No research analyst account may purchase or receive any securities before the issuer's initial public offering if the issuer is principally engaged in the same types of business as companies that the research analyst follows.

(2) No research analyst account may purchase or sell any security issued by a company that the research analyst follows, or any option on or derivative of such security, for a period beginning 30 calendar days before and ending five calendar days after the publication of a research report concerning the company or a change in a rating or price target of the company's securities; provided that:

(A) A member may permit a research analyst account to sell all of the securities held by them that are issued by a company that the research analyst follows, within 30 calendar days after the research analyst began following the company for the member;

(B) a member may permit a research analyst account to purchase or sell any security issued by a subject company within 30 calendar days before the

England, Assistant Director, Division of Market Regulation ("Division"), Commission (March 7, 2002) ("Amendment No. 1"). In Amendment No. 1, NASDR revised its response to Items 1(b) and 1(c) of the Form 19b–4 to indicate the impact that proposed NASD Rule 2711 would have on NASD Rule 2210. Additionally, NASDR is inserting language in its Purpose section to clarify how the current disclosure requirements regarding securities recommendations in NASD Rule 2210 would apply if proposed NASD Rule 2711 is approved by the SEC. Finally, NASDR is revising the provisions requiring disclosure of actual material conflicts of interest to conform its provisions to those of the NYSE.

publication of a research report or change in the rating or price target of the subject company's securities due to significant news or a significant event concerning the subject company, provided that the member's legal or compliance department pre-approves the research report and any change in the rating or price target.

(3) No research analyst account may purchase or sell any security or any option on or derivative of such security in a manner inconsistent with the research analyst's recommendation as reflected in the most recent research report published by the member.

(4) A member's legal or compliance department may authorize a transaction otherwise prohibited by paragraphs (g)(2) and (g)(3) based upon significant personal financial circumstances of the beneficial owner of the research analyst account, provided that:

(A) The legal or compliance department authorizes the transaction before it is entered;

(B) each exception is granted in compliance with policies and procedures adopted by the member that are reasonably designed to ensure that these transactions do not create a conflict of interest between the professional responsibilities and the personal trading activities of a research analyst; and

(C) the member maintains written records concerning each transaction and the justification for permitting the transaction for three years following the date on which the transaction is approved.

(5) The prohibitions in paragraphs (g)(1) through (g)(3) do not apply to a purchase or sale of the securities of:

(A) any registered diversified investment company as defined under Section (5)(b)(1) of the Investment Company Act of 1940; or

(B) any other investment fund over which neither the research analyst nor a member of the research analyst's household has any investment discretion or control, provided that:

(i) The research analyst accounts collectively own interests representing no more than 1% of the assets of the fund;

(ii) the fund invests no more than 20% of its assets in securities of issuers principally engaged in the same types of business as companies that the research analyst follows; and

(iii) the investment fund does not distribute securities in kind to the research analyst or household member before the issuer's initial public offering.

(h) Disclosure Requirements

(1) Ownership and Material Conflicts of Interest

A member must disclose in research reports and a research analyst must disclose in public appearances:

(A) If the research analyst or a member of the research analyst's household has a financial interest in the securities of the subject company, and the nature of the financial interest (including, without limitation, whether it consists of any option, right, warrant, future, long or short position);

(B) if, as of five business days before the publication of the research report or the public appearance, the member or its affiliates beneficially own 1% or more of any class of common equity securities of the subject company; and

(C) any other actual, material conflict of interest of the research analyst or member of which the research analyst knows or has reason to know at the time of publication of the research report or at the time of the public appearance.

(2) Receipt of Compensation

(A) A member must disclose in research reports if:

(i) The research analyst principally responsible for preparation of the report received compensation that is based upon (among other factors) the member's investment banking revenues; and

(ii) the member or its affiliates received compensation from the subject company within twelve months before, or reasonably expects to receive compensation from the subject company within three months following, publication of the research report.

(B) A research analyst must disclose in public appearances if the analyst knows or has reason to know that the subject company is a client of the member or its affiliates.

(3) Position as Officer or Director

A member must disclose in research reports and a research analyst must disclose in public appearances if the research analyst or a member of the research analyst's household serves as an officer, director or advisory board member of the subject company.

(4) Meaning of Ratings

A member must define in its research reports the meaning of each rating used by the member in its rating system. The definition of each rating must be consistent with its plain meaning.

(5) Distribution of Ratings

(A) Regardless of the rating system that a member employs, a member must disclose in each research report the percentage of all securities rated by the member to which the member would assign a "buy," "hold/neutral," or "sell" rating.

(B) In each research report, the member must disclose the percentage of subject companies within each of these three categories for whom the member has provided investment banking services within the previous twelve months.

(C) The information that is disclosed under paragraphs (h)(5)(A) and (h)(5)(B) must be current as of the end of the most recent calendar quarter (or the second most recent calendar quarter if the publication date is less than 15 calendar days after the most recent calendar quarter).

(6) Price Chart

A member must present in any research report concerning an equity security on which the member has assigned any rating for at least one year, a line graph of the security's daily closing prices for the period that the member has assigned any rating or for a three-year period, whichever is shorter. The line graph must:

(A) Indicate the dates on which the member assigned or changed each rating or price target;

(B) Depict each rating and price target assigned or changed on those dates; and

(C) Be current as of the end of the most recent calendar quarter (or the second most recent calendar quarter if the publication date is less than 15 calendar days after the most recent calendar quarter).

(7) Price Targets

A member must disclose in research reports the valuation methods used to determine a price target. Price targets must have a reasonable basis and must be accompanied by a disclosure concerning the risks that may impede achievement of the price target.

(8) Market Making

A member must disclose in research reports if it was making a market in the subject company's securities at the time that the research report was published.

(9) Disclosure Required by Other Provisions

In addition to the disclosure required by this rule, members and research analysts must provide disclosure in research reports and public appearances that is required by applicable law or regulation, including NASD Rule 2210 and the antifraud provisions of the federal securities laws.

(10) Prominence of Disclosure

The disclosures required by paragraph (h) must be presented on the front page of research reports or the front page must refer to the page on which disclosures are found. Disclosures and references to disclosures must be clear, comprehensive and prominent.

(i) Supervisory Procedures

Each member subject to this rule must adopt and implement written supervisory procedures reasonably designed to ensure that the member and its employees comply with the provisions of this rule, and a senior officer of such a member must attest annually to the Association that it has adopted and implemented those procedures.

B. NYSE Proposed Rule Text

Rule 472 Communications with the Public

Approval of Communications and Research Reports

(a)(1) Each advertisement, market letter, sales literature or other similar type of communication which is generally distributed or made available by a member or member organization to customers or the public [shall] *must* be approved in advance by a member, allied member, supervisory analyst, or *qualified* person designated under the provisions of Rule 342(b)(1).

(2) Research reports [shall] *must* be prepared or approved, in advance, by a supervisory analyst acceptable to the Exchange under the provisions of Rule 344. Where a supervisory analyst does not have technical expertise in a particular product area, the basic analysis contained in such report may be co-approved by a product specialist designated by the organization. In the event that the member organization has no principal or employee qualified with the Exchange to approve such material, it [shall] *must* be approved by a qualified supervisory analyst in another member organization by arrangement between the two member organizations.

Investment Banking, Research Department and Subject Company Relationships and Communications

(b)(1) Research Department personnel or any associated person(s) engaged in the preparation of research reports may not be subject to the supervision or control of the Investment Banking Department of the member or member organization. Research reports may not be subject to review or approval prior to distribution by the Investment Banking Department.

(2) Investment Banking personnel may check research reports prior to distribution only to verify the accuracy of information and to identify or to review for any potential conflicts of interest that may exist, provided that:

(i) *Any such written communication concerning the accuracy of research reports between the Investment Banking and Research Departments must be made either through the Legal or Compliance Department or in a transmission copied to Legal or Compliance; and*

(ii) *any such oral communication concerning the accuracy of research reports between the Investment Banking and Research Departments must be documented and made either with Legal or Compliance personnel acting as intermediary or in a conversation conducted in the presence of Legal or Compliance personnel.*

(3) The subject company may not review or approve research reports prior to distribution, except for the review of sections of a draft of the research report solely to verify facts. Members and member organizations may not, under any circumstances, provide the subject company sections of research reports that include the research summary, the research rating or the price target.

(i) Prior to submitting any sections of the research report to the subject company, the Research Department must provide a complete draft of the research report to the Legal or Compliance Department.

(ii) If after submission to the subject company, the Research Department intends to change the proposed rating or price target, the Research Department must provide written justification to, and receive prior written authorization from, the Legal or Compliance Department for any change. The Legal or Compliance Department must retain copies of any drafts and changes thereto of the research reports provided to the subject company.

(iii) The member or member organization may not notify a subject company that a rating will be changed until after the close of trading in the principal market of the subject company one business day prior to the announcement of the change.

Written Procedures

(c) Each member and member organization must establish written procedures reasonably designed to ensure that members, member organizations and their associated persons are in compliance with this Rule (see Rule 351(f) for attestations to the Exchange regarding compliance).

Retention of Communications

[(c)] (*d*) Communications with the public prepared or issued by a member or member organization [shall] *must* be retained in accordance with Rule 440 ("Books and Records"). The names of the persons who prepared and who reviewed and approved the material [shall] *must* be ascertainable from the retained records and the records retained [shall] *must* be readily available to the Exchange, upon request.

Restrictions on Trading Securities by Associated Persons

(e)(1) No associated person or member of the associated person's household may purchase or receive an issuer's securities prior to its initial public offering (e.g., so-called pre-IPO shares), if the issuer is principally engaged in the same types of business as companies (or in the same industry classification) which the associated person usually covers in research reports.

(2) No associated person or member of the associated person's household may trade in any recommended subject company's securities or derivatives of such securities for a period of thirty (30) calendar days prior to and five (5) calendar days after the member's or member organization's issuance of research reports concerning such security or a change in rating or price target of a subject company's securities.

(3) No associated person or member of the associated person's household may effect trades contrary to the member's or member organization's most current recommendations (i.e., sell securities while maintaining a "buy" or "hold" recommendation, buy securities while maintaining a "sell" recommendation, or effecting a "short sale" in a security while maintaining a "buy" or "hold" recommendation on such security).

(4) The following are exceptions to the prohibitions contained in paragraphs (1), (2), and (3):

(i) Transactions by associated persons and household members that have been pre-approved in writing by the Legal or Compliance Department that are made due to an unanticipated significant change in their personal financial circumstances;

(ii) a member or member organization may permit the issuance of research reports or permit a change to the rating or price target on a subject company, regardless of whether an associated person and/or household members traded the subject company's securities or derivatives of such securities, within the thirty (30) calendar day period

VOL
67
ISS
50
MR
14
2002
UMI

described in paragraph (e)(2), when the issuance of such research reports, or change in such rating or price target is attributable to some significant news or events regarding the subject company, provided that the issuance of such research reports, or change in rating or price target on such subject company has been pre-approved in writing by the Legal or Compliance Department;

(iii) sale transactions by an associated person and/or household member who is new to the member or member organization within thirty (30) calendar days of such associated person's employment with the member or member organization when such associated person and/or household member had previously purchased such security or derivatives of such security prior to the associated person's employment with the member or member organization;

(iv) sale transactions by an associated person and/or household member within thirty (30) calendar days from the date of the member's or member organization's issuance of research reports or changes to the rating or price target on a subject company when such associated person and/or household member had previously purchased the subject company's securities or derivatives of such securities prior to initiation of coverage of the subject company by the associated person;

(v) transactions in accounts not controlled by the associated person and for investment funds in which an associated person or household member participates as a passive investor, provided the interest of the associated person or household member in the assets of the fund does not exceed 1% of the fund's assets, and the fund does not invest more than 20% of its assets in securities of issuers principally engaged in the same types of business as companies (or in the same industry classification) which the associated person usually covers in research reports. If an investment fund distributes securities in kind to an associated person before the issuer's initial public offering, the associated person must either divest those securities immediately or refrain from participating in the preparation of research reports concerning that issuer.

(vi) transactions in a registered diversified investment company as defined under Section 5(b)(1) of the Investment Company Act of 1940.

Restrictions on Member's or Member Organization's Issuance of Research Reports

(f)(1) A member or member organization may not issue research reports regarding an issuer for which the member or member organization acted as manager or co-manager of an initial public offering within forty (40) calendar days following the effective date of the offering.

(2) A member or member organization may not issue research reports regarding an issuer for which the member or member organization acted as manager or co-manager of a secondary offering within ten (10) calendar days following the effective date of the offering.

(3) A member or member organization may permit exceptions to the prohibitions in paragraphs (f)(1) and (2) (consistent with other securities laws and rules) for research reports that are issued due to significant news or events, provided that such research reports are pre-approved in writing by the Legal or Compliance Department.

Prohibition of Offering Favorable Research for Business

(g) No member or member organization may directly or indirectly offer a favorable research rating or specific price target, or offer to change a rating or price target, to a subject company as consideration or inducement for the receipt of business or for compensation.

Restrictions on Compensation to Associated Persons

(h) No member or member organization may compensate an associated person(s) for specific investment banking services transactions. An associated person may not receive an incentive or bonus that is based on a specific investment banking services transaction. However, a member or member organization is not prohibited from compensating an associated person based upon such person's overall performance, including services provided to the Investment Banking Department (see Rule 472(k)(2) for disclosure of such compensation).

(i) [.30] General Standards for All Communications

No change

(j) [.40] Specific Standards for Communications

(1) Recommendations

A recommendation (even though not labeled as a recommendation) must have a basis which can be substantiated as reasonable.

When recommending the purchase, sale or switch of specific securities, supporting information must be provided or offered.

The market price at the time the recommendation is made must be indicated.

(2) [(3)] Records of Past Performance

No change

(3) [(4)] Projections and Predictions

No change

(4) [(5)] Comparisons

No change

(5) [(6)] Dating Reports

No change

(6) [(7)] Identification of Sources

No change

(7) [(8)] Testimonials

No change

(k) [(2)] Disclosure

[When a communication (excluding extemporaneous interviews in and with the media) recommends the purchase or sale of a specific security, member organizations must disclose the following information:

(i) if the organization usually makes a market in the security being recommended or if some or all of the recommended securities are to be sold to or bought from customers on a principal basis.

(ii) if the member organization was manager or co-manager of the most recent public offering (within 3 years) of any securities of the recommended issuer.

(iii) if the member organization or its employees involved in the preparation or the issuance of the communication may have positions in any securities or options of the recommended issuer.

(iv) if a member, allied member or employee is a director of a corporation whose security is being recommended.]

(k)(1) Disclosures Required in Research Reports and Scheduled Public Appearances Disclosure of Member's, Member Organization's and Associated Person's Ownership of Securities

(i) *A member or member organization must disclose in research reports and an associated person must disclose in public appearances:*

a. *if, as of five (5) business days before the publication or appearance, the member or member organization or its affiliates beneficially own 1% or more of any class of common equity securities of the subject company. Computation of beneficial ownership of securities must be based upon the same standards used to compute ownership for purposes of the reporting requirements under Section 13(d) of the Securities Exchange Act of 1934,*

b. *if the associated person or a household member has a financial interest in the securities of the subject company, or*

c. *any other actual, material conflict of interest of the member or member organization, which the associated person knows, or has reason to know, at the time the research report is issued or at the time the public appearance is made.*

Member Organization Compensation

(ii) *A member or member organization must disclose in research reports if the member or member organization or its affiliates received compensation from the subject company within the twelve (12) months prior to the date of the research report. A member or member organization must also disclose if the member or member organization or its affiliates reasonably expects to receive compensation from the subject company within the three months following the date of issuance of the research report. When an associated person recommends securities in a public appearance, the associated person must disclose if the subject company is an investment banking services client of the member, member organization, or one of its affiliates, when the associated person knows or has reason to know of this relationship.*

Disclosure of Associated Person's Affiliations With Subject Company

(iii) *A member or member organization must disclose in research reports whether the associated person or member of the associated person's household is an officer, director or advisory board member of the recommended issuer.*

(k)(2) Disclosures Specific to Research Reports

The front page of a research report either must include the disclosures required under this Rule or must refer the reader to the page(s) on which each such disclosure is found. Disclosures, and references to disclosures, must be clear, comprehensive and prominent. A member or member organization must disclose in research reports if the associated person preparing such reports received compensation that is based upon (among other factors) the member's or member organization's overall investment banking revenues. A member or member organization must disclose in research reports that recommend securities:

(i) If it is making a market in the subject company's securities at the time the research report is issued.

(ii) the valuation methods used, and any price objectives must have a reasonable basis and include a discussion of risks.

(iii) the meanings of all ratings used by the member or member organization in its ratings system. (For example, a member or member organization might disclose that a "strong buy" rating means that the rated security's price is expected to appreciate at least 10% faster than other securities in its sector over the next 12-month period). Definitions of ratings terms also must be consistent with their plain meaning. Therefore, for example, a "hold" rating should not mean or imply that an investor should sell a security.

(iv) the percentage of all securities that the member or member organization recommends an investor "buy," "hold," or "sell". Within each of the three categories, a member or member organization must also disclose the percentage of subject companies that are investment banking services clients of the member or member organization within the previous twelve (12) months. (See Rule 472.70 for further information.)

(v) a chart that depicts the price of the subject company's stock over time and indicates points at which a member or member organization assigned or changed a rating or price target. This provision would apply only to securities that have been assigned a rating for at least one year, and need not extend more than three years prior to the date of the research report. The information in the price chart must be current as of the end of the most recent calendar quarter (or the second most recent calendar quarter if the publication date is less than fifteen (15) calendar days after the most recent calendar quarter).

[Supplementary Material * * *]

.10 Definitions

(1) Communication—The term "Communication" is deemed to include, but is not limited to, advertisements, market letters, research reports, sales literature, electronic communications, communications in and with the press and wires and memoranda to branch offices or correspondent firms which are shown or distributed to customers or the public.

(2) Research Report—"Research reports"are generally defined as, *but are not limited to*, an analysis of *equity securities of* individual companies[,] or industries, [market conditions, securities or other investment vehicles] which provide information reasonably sufficient upon which to base an investment decision *and include a recommendation. For purposes of Rule 472(a)(2), research reports include, but are not limited to, reports which recommend equity securities, derivatives of such securities, including options, debt and other types of fixed income securities, single stock futures products, and other investment vehicles subject to market risk.*

(3) *Advertisement—"Advertisement" is defined to include, but is not limited to, any sales communications that is published, or designed for use in any print, electronic or other public media such as newspapers, periodicals, magazines, radio, television, telephone recording, web sites, motion pictures, audio or video device, telecommunications device, billboards or signs.*

(4) *Market letters—"Market letters" are defined as, but are not limited to, any written comments on market conditions, individual securities, or other investment vehicles. They also include "follow-ups" to research reports and articles prepared by members or member organizations which appear in newspapers and periodicals*

(5) *Sales literature—"Sales literature" is defined as, but is not limited to, written or electronic communications including, but not limited to, telemarketing scripts, performance reports or summaries, form letters, seminar texts, and press releases discussing or promoting the products, services and facilities offered by a member or member organization, the role of investment in an individual's overall financial plan, or other material calling attention to any other communication.*

[.20 Other Communications Activities

Other communications activities are deemed to include, but not be limited to, conducting interviews with the media, writing books, conducting seminars or lecture courses, writing newspaper or magazine articles and making radio/TV appearances.

Member organizations must establish specific written supervisory procedures applicable to members, allied members and employees who engage in these types of communications activities. These procedures must include provisions which require prior approval of such activity by a person designated under the provisions of Rule 342(b)(1). These types of activities are subject to the general standards set forth in .30. In addition, any activity which includes discussion of specific securities is subject to the specific standards in .40.]

.20 For purposes of this Rule, "investment banking services" includes, without limitation, acting as an underwriter in an offering for the issuer; acting as a financial adviser in a merger or acquisition; providing venture capital, equity lines of credit, PIPEs (private investment, public equity transaction), or similar investments; or serving as placement agent for the issuer.

.30 For purposes of this Rule, the term "Investment Banking Department" means any department or division of the member or member organization, whether or not identified as such, that

VOL
67
ISS
50
MR
14
2002
UMI

performs any investment banking services on behalf of the member or member organization.

.40 For purposes of this Rule, the term "associated person" includes a member, allied member, or employee of a member or member organization responsible for, and any person who reports directly or indirectly to such associated person in connection with the making of the recommendation to purchase, sell or hold an equity security in research reports, or public appearances or establish a rating or price target of a subject company's equity securities. For purposes of this Rule, the term "household member" means any individual whose principal residence is the same as the associated person's principal residence. Paragraphs (e)(1), (2), (3); (4)(i), (ii), (iii), (iv) and (v); (k)(1)(i)(B), (k)(1)(iii) apply to any account in which an associated person has a financial interest, or over which the associated person exercises discretion or control.

.50 For purposes of this Rule, the term "public appearance" includes, without limitation, participation in a seminar, forum (including an interactive electronic forum), radio or television interview, or other public appearance or public speaking activity.

.60 For purposes of this Rule, "subject company" is the company whose equity securities are the subject of research reports.

.70 For purposes of Rule 472(k)(2)(iv), a member or member organization must determine, based on its own ratings system, into which of the three categories each of their securities ratings utilized falls. This information must be current as of the end of the most recent calendar quarter (or the second most recent calendar quarter if the publication date is less than fifteen (15) calendar days after the most recent calendar quarter). For example, a research report might disclose that the member or member organization has assigned a "buy" rating to 58% of the securities that it follows , a "hold" rating to 15%, and a "sell" rating to 27%.

Rule 472(k)(2)(iv) requires members or member organizations to disclose the percentage of companies that are investment banking services clients for each of the three ratings categories within the previous twelve (12) months. For example, if 20 of the 25 companies to which a member or member organization has assigned a "buy" rating are investment banking clients of the member or member organization, the member or member organization would have to disclose that 80% of the companies that received a "buy" rating are its investment banking clients. Such disclosure must be made for the "buy", "hold" and "sell" ratings categories as appropriate.

.80 For purposes of this Rule, the term "Legal or Compliance Department" also includes, but is not limited to, any department of the member or member organization which performs a similar function.

.90 For purposes of Rule 472(a), a qualified person is one who has passed an examination acceptable to the Exchange.

.100 For purposes of this Rule, the term "initial public offering" refers to the initial registered equity security offering by an issuer, regardless of whether such issuer is subject to the reporting requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, prior to the time of the filing of such issuer's registration statement.

.110 For purposes of this Rule, a secondary offering shall include a registered follow-on offering by an issuer or a registered offering by persons other than the issuer involving the distribution of securities subject to Regulation M of the Securities Exchange Act of 1934.

Rule 351 Reporting Requirements

(a)–(e) No change

(f) *Each member and member organization that prepares, issues or distributes communications to the public, (including but not limited to, research reports, media presentations and interviews), is required to submit to the Exchange annually, a letter of attestation signed by a senior officer or partner that the member or member organization has established and implemented procedures reasonably designed to comply with the provisions of Rule 472.*

* * * * *

.11 For purposes of Rule 351(f), the attestation must be submitted by April 1 of each year.

.12 The term "research reports" is defined in Rule 472.10.

II. Self-Regulatory Organizations' Statements of the Purpose of, and Statutory Basis for, the Proposed Rule Changes

In their filings with the Commission, NASDR and the NYSE included statements concerning the purpose of and basis for the proposed rule changes. The text of these statements may be examined at the places specified in Item IV below. NASDR and the NYSE have prepared summaries, set forth in Sections A, B, and C below.

A. Self-Regulatory Organizations' Statements of the Purpose of, and Statutory Basis for, the Proposed Rule Changes

1. NASD's Purpose

According to NASDR, it has worked closely with the NYSE to develop rules to address conflicts of interest that can arise when research analysts recommend equity securities in research reports and public appearances. NASD's proposed rule change is intended to improve the objectivity of research and provide investors with more useful and reliable information when making investment decisions.

To that end, the NASD's proposed rule change generally would minimize the influence that a member's investment banking department has over its research department and would restrict analysts' personal trading of securities. The NASD's proposed rule change also would require disclosure of financial interests held by the member firm, the analyst and his or her family members, and any other material conflict of interest associated with a recommendation of a security. The NASD's proposed rule change also would require firms to clarify the meanings of their research ratings and provide historical price and ratings distribution data in research reports to better enable investors to evaluate and compare the quality of research.

A more detailed discussion of the proposed rule's provisions follows.

a. Definitions

The terms "research analyst" and "research report" are used frequently throughout the NASD's proposed rule change. "Research analyst" would be defined to mean an "associated person who is principally responsible for, and any associated person who reports directly or indirectly to such a research analyst in connection with preparation of the substance of a research report, whether or not any such person has the job title of 'research analyst.'" "Research report" would be defined to mean "a written or electronic communication that the member has distributed or will distribute with reasonable regularity to its customers or the general public, which presents an opinion or recommendation concerning an equity security."

Accordingly, the term "research analyst" would not include every associated person who may express an opinion on an equity security. Thus, for example, most mutual fund portfolio managers are not principally responsible for the preparation of "research reports" as defined by the NASD's proposed rule change. Consequently, a mutual fund portfolio manager generally would not be deemed to be a "research analyst," even if the portfolio manager is an associated person of a member firm and discusses the mutual fund's portfolio holdings in a television interview.

The NASD specifically requests comments on these definitions. Would the definition of "research analyst" have any regulatory gaps? Would it impose any unnecessary burdens on members, particularly by including any associated person who reports to a research analyst? Would the definition of "research report" properly exclude those communications that do not present the types of concerns that the proposed rule change is designed to address?

The NASD's proposed rule change would require research analysts to make various types of disclosures in their public appearances. The term "public appearance" would be defined to include any participation in a seminar, forum (including an interactive electronic forum), radio or television interview, or other public speaking activity in which a research analyst makes a recommendation or offers an opinion concerning an equity security. Consequently, this term also would include any public conference call in which a research analyst expresses an opinion on an equity security. The NASD's proposed rule change would require only that a research analyst make these disclosures. An independent decision by the sponsor of the public appearance, such as a television program sponsor, to edit out the required disclosures, would not constitute a violation of the NASD's proposed rule. NASD requests comment on whether the scope of this definition is adequate to address the concerns raised by a research analyst's public speaking activities and whether it might impose any unnecessary burdens on members or their research analysts.

The term "member of a research analyst's household" is used in connection with the proposed rule change's personal trading restrictions and disclosure requirements. NASD proposes to define this term to include any individual whose principal residence is the same as the research analyst's residence. Thus, it would include any family member living with the research analyst, as well as any other individual living in the same principal residence. NASD requests comment on whether this definition is appropriate.

The term "research analyst account" is used in connection with the NASD's proposed rule change's personal trading restrictions. The NASD proposes to define this term to include any account in which a research analyst or a member of the research analyst's household has a beneficial interest, or over which such analyst or household member has discretion or control. The term would not include an investment company registered under the Investment Company Act of 1940 that is managed by a research analyst or a member of the analyst's household.

b. Investment Banking Department Relationship With Research Department

NASD believes that a potential conflict exists between a firm's responsibility to provide fair, objective and unbiased research and its interest in obtaining or retaining investment banking business from a company that is the subject of a research report ("subject company"). The NASD proposes to adopt several measures to address this potential conflict.

(1) Supervision and Control of Research Department

The NASD's proposed rule change would prohibit a member's investment banking department from supervising or controlling the member's research department and from reviewing or approving research reports before their publication. "Investment banking department" is proposed to be defined to include any department or division, whether or not identified as such, that performs any investment banking service on behalf of the member. "Investment banking services" is proposed to encompass a broad array of services typically offered to investment banking clients, including acting as an underwriter in an offering for the issuer, acting as a financial advisor in a merger or acquisition, providing venture capital, equity lines of credit, PIPES or similar investments, or serving as placement agent for the issuer. NASD requests comment on whether this definition of "investment banking services" is appropriate or inclusive enough in light of the purposes of the proposed rule change.

The NASD believes that this provision would better ensure that research is shielded from the influence of the investment banking department's relationship with the subject company. Under the NASD's proposed rule change, investment banking personnel could communicate with research personnel concerning a research report before the report's publication only to ensure the report's factual accuracy and to screen for conflicts of interest. The NASD's proposed rule change would require an authorized legal or compliance official to act as intermediary for all such communications. The term "legal or compliance department" as used in the proposed rule change would include any department or division that is principally responsible for compliance with applicable securities laws, regardless of whether the department or division is named "legal" or "compliance." The NASD's proposed rule change would not restrict or impose conditions on any communication between a research department and an investment banking department that does not concern a proposed research report.

The NASD's proposed rule change also would address the concern that the subject company may attempt to influence the conclusions provided in a research report. The NASD's proposed rule change would prohibit a member from submitting a research report to the subject company for approval. The NASD's proposed rule change would allow the subject company to review only certain sections of a research report before its publication to ensure that it is factually accurate. However, a member could not submit in advance to the subject company those sections of the report that contain the research summary, the rating or the price target. The NASD's proposed rule change would require that if a research analyst intends to make changes to the proposed rating or price target after review by the subject company, the research analyst would first have to receive written approval from the member's legal and compliance department.

The NASD requests comment on the "gate-keeping" functions that the proposed rule change would impose on the legal or compliance department. The NASD recognizes that these responsibilities may require members to hire additional legal or compliance staff and to dedicate resources to these gate-keeping functions. Nevertheless, the possibility that investment banking departments exert undue influence over the contents of a research report has necessitated the proposed gate-keeping provisions. NASD requests comment on whether these provisions adequately address these concerns about undue influence and whether any alternative provisions would be equally effective. In addition, NASD requests comment on whether the gate-keeper approach that the proposed rule change would impose with respect to contact with the subject company also should apply to contacts with the investment banking department?

VOL
67
ISS
50
MR
14
2002
UMI

(2) Research Analyst's or Member's Investment Banking Compensation

The NASD's proposed rule change would prohibit a member from tying analyst compensation to specific investment banking transactions. The NASD requests comment on whether this provision might impose unnecessary burdens on smaller members that may have the same employee perform investment banking and research services. To the extent that this provision might impose such unnecessary burdens, the NASD requests comment on how widespread this problem would be? Further, NASD requests comment on what, if any, alternative measure would respond to the concerns that this provision is intended to address without imposing these burdens?

Since research analysts, as part of their job responsibilities, advise investment banking departments concerning such matters as whether a potential underwriting client is financially or operationally prepared for an initial public offering, the NASD's proposed rule change would permit a member to compensate its research analysts based on their overall performance, which may include these services to the investment banking department. However, a member would have to disclose in research reports if a research analyst received compensation based in whole or in part on the member's investment banking revenues.

The NASD's proposed rule change also would require a member to disclose in research reports if the member or its affiliates received compensation from the subject company within the last 12 months, or expected to receive compensation within the next three months following publication of the report. This disclosure requirement, like all of the other disclosure requirements of the proposed rule change, would mandate definitive disclosure. Ambiguous or conditional language, such as disclosure that the member "may have" received compensation from the subject company, would not comply with the disclosure requirements of the proposed rule change.

The NASD recognizes the possibility that this requirement might necessitate disclosure of compensation related to non-public transactions. The NASD believes that this type of compensation presents the same conflicts as the receipt of compensation related to transactions that have been publicly disclosed. Moreover, the NASD does not believe that the proposed rule change would alert the research department or the investing public concerning non-public transactions, for at least two reasons. First, the proposed rule change would require only disclosure that compensation was received by the member or one of its affiliates. It would not require disclosure concerning the nature of the transaction, such as the fact that the member received the compensation in connection with non-public merger and acquisition services, or even that the compensation was received by the member (as opposed to one of its affiliates that is not engaged in investment banking). Second, the term "compensation" is to be broadly interpreted to include the receipt of any consideration from the subject company. Given the breadth of the meaning of "compensation," the NASD believes that this disclosure requirement should not alert the research department whether the compensation related to a non-public transaction. Nevertheless, the NASD does request comment on the efficacy of this disclosure requirement, and whether any alternative, definitive disclosure would be effective.

The NASD proposes that a research analyst would have to disclose in public appearances if the issuer of a recommended security is a client of the member or its affiliates, provided the analyst knows or has reason to know this fact. For purposes of this provision, the NASD proposes that an issuer would be deemed a "client" of the member if the member or its affiliates received compensation from the issuer within the previous twelve months, or reasonably expects to receive compensation from the issuer within the next three months. This disclosure requirement thus would not apply with regard to a non-public transaction in which the issuer is a client of the member or its affiliates and the research analyst does not know and has no reason to know of this fact due to an information barrier imposed by the member.

c. Promises of Favorable Research

The proposed rule change would include a provision that expressly prohibits a member from offering or threatening to change favorable research, a specific research rating or a specific price target as consideration or inducement for the receipt of business or compensation. According to the NASD, such behavior already constitutes a violation of just and equitable principles of trade (NASD Rule 2110) and could violate the anti-fraud provisions of the federal securities laws. The proposed rule change would make this prohibition explicit. A member would violate this provision simply by making such an offer or threat, whether or not the member provided any service to or received any compensation or business from the issuer.

d. Quiet Periods

The NASD's proposed rule change would impose two "quiet periods" on the issuance of research reports. The proposed rule change would prohibit a member from issuing a research report regarding a subject company for which the member acted as an underwriting manager or co-manager for 40 days following the date of an initial public offering and 10 days following the date of a secondary offering. For purposes of this provision, the "date" of an IPO is proposed to be the date on which the IPO's registration statement becomes effective. The "date" of a secondary offering is proposed to be the date on which a member commences sales on behalf of an issuer or selling security holders pursuant to an underwriting agreement or similar agreement that governs the transaction.

According to the NASD, the quiet periods are intended to reduce a manager's ability to improperly reward the subject company for its underwriting business by publishing favorable research after completion of the offering. The NASD's proposed rule change would not prohibit a manager or co-manager from issuing a research report during these quiet periods due to significant news or a significant event concerning the subject company. In general, NASD proposes that a "significant" news item or event would constitute a news item or event that is expected to have a material impact on, or that reflects a material change to, the subject company's earnings, operations or financial condition.

The NASD specifically seeks comment on the proposed quiet period after secondary offerings. In addition, the NASD seeks comment on the following: (1) How significant is a manager's opportunity to engage in this behavior with respect to a public company that conducts a secondary offering?; (2) Should the NASD adopt an exception to this provision for seasoned companies qualified to issue their securities in an initial public offering under Form S–3?; (3) Would the $75 million public float and one-year reporting requirements applicable to S–3 companies provide a sufficiently high threshold to ensure that the quiet period for secondary offerings is effective?; (4) Would an alternative standard, such as the $150 million public float value for actively traded securities under Regulation M, be more appropriate?

NASD also requests comment on whether the proposed quiet periods should apply not only to the issuance of research reports, but also to any public appearance by a research analyst employed by the manager or co-manager of the underwriting.

e. Research Analysts' Personal Trading

The NASD's proposed rule change would impose certain restrictions on an analyst's personal trading activities to help ensure that research reports and recommendations are not influenced by the prospect of personal enrichment and to ensure that analysts do not profit from the issuance of a research report or change in a rating or price target. The NASD's proposed rule change would prohibit a research analyst account (which would include any account of the research analyst or member of the analyst's household, and any account over which the analyst or household member has discretion or control) from purchasing or receiving securities of a company in the industry the analyst covers before that company's initial public offering. According to the NASD, this provision is designed to prevent a research analyst from receiving "cheap stock" before the initial public offering of a company that the analyst may subsequently cover.

The NASD's proposed rule change also would prohibit a research analyst account from trading a subject company's securities during a "blackout" period beginning 30 calendar days before, and ending five calendar days after, the issuance of a research report or change in the research rating or price target for the subject company's securities. This prohibition would apply not only to transactions in the subject company's securities themselves (including short sales), but also any derivative security, such as an option, right, warrant or future. Furthermore, the NASD's proposed rule change would prohibit a research analyst account from trading in a manner inconsistent with the analyst's most current recommendation concerning a security. Thus, for example, the proposed rule change would prohibit a research analyst from selling or effecting a short sale in a security while maintaining a "buy," "hold" or "neutral" recommendation.

The NASD's proposed rule change would permit members to adopt certain exceptions to these prohibitions that are reasonable in light of the purposes of the personal trading restrictions. For example, the proposed rule change would permit a transaction within 30 calendar days before the member publishes a research report or changes a rating or price target due to significant news or a significant event concerning the subject company. This exception is designed to ensure that the 30-day blackout provision does not impede the member's ability to publish a research report or change a rating or price target in these circumstances. The exception would require that the member's legal or compliance department pre-approve any research report or change in a rating or price target made in connection with a significant news item or event. The legal or compliance department should consider, among other factors, whether the research analyst knew or had reason to know of the significant news or event before the research analyst account entered into the transaction that occurred less than 30 days prior to the new research report, rating or price target.

The NASD's proposed rule change would permit members to authorize an exception to the blackout period and prohibition of trading against recommendations to allow a research analyst account to trade securities due to significant personal financial circumstances, provided certain conditions are met. Reliance on this provision should be rare. In most cases, a research analyst account should not hold such a significant interest in a subject company's securities as to necessitate reliance on this provision. Moreover, this provision is meant to be narrowly construed to permit an exception in extremely limited circumstances such as when the beneficial owner of a research analyst account must liquidate securities holdings in order to have funds available for an unforeseen medical emergency.

According to the NASD, the restrictions on personal trading would not apply to transactions in shares of registered diversified investment companies as defined under Section 5(b)(1) of the Investment Company Act of 1940, even if the diversified investment company held shares of a subject company.[4] NASD also proposes that the restrictions would not apply to transactions in holdings of any other investment fund (including a non-diversified investment company) over which neither the research analyst nor a household member has any investment discretion or control, provided that the fund meets certain conditions. First, the research analyst account could not own more than one percent of the fund's assets. Second, the fund could not invest more than 20 percent of its assets in securities of issuers principally engaged in the same types of business as companies that the research analyst covers. Third, the fund could not distribute securities in kind to the research analyst or household member before the issuer's initial public offering. The NASD requests comment on whether this investment fund exception would create a regulatory gap that could undermine the effectiveness of the personal trading restrictions or, would it impose any unnecessary restrictions on a research analyst's ability to invest appropriately in certain investment funds?

f. Members' or Research Analysts' Financial Interests

The NASD's proposed rule change would impose several disclosure requirements on members and research analysts concerning their financial interest in a subject company's securities. First, the NASD's proposed rule change would require members and research analysts to disclose in research reports and public appearances if the research analyst (or a member of the research analyst's household) has a financial interest in a subject company, and the nature of the financial interest. According to the NASD, this "financial interest" could include any option, right, warrant, future, long or short position in the subject company's securities. The NASD requests comment on whether members and research analysts also should be required to disclose if any discretionary account managed by the research analyst or a member of the analyst's household (other than a registered investment company) has a financial interest in a subject company, and the nature of this interest.

Second, the NASD's proposed rule change would require members and analysts to disclose if the member or its affiliates beneficially own 1% or more of any class of a subject company's common equity securities. Members could determine whether they or their affiliates "beneficially own" a security by relying upon the standards set forth

[4] According to the NASD, under Section 5(b)(1) of the Investment Company Act of 1940, a "diversified" investment company's assets are divided into two baskets, one representing 75% of its assets and one representing 25% of its assets. The restrictions focus on the 75% basket: its assets must consist of cash, government securities, securities of other investment companies, and "other securities." The "other securities" of a single issuer may not account for more than 5% of the fund's assets, and the fund may not hold more than 10% of a single issuer's voting securities. The 25% basket is not subject to these restrictions. 15 U.S.C. 80a–5 (b)(1).

in Section 13(d)[5] and section 13(g)[6] of the Act, and the rules thereunder.

Finally, the NASD's proposed rule change contains a provision that would require disclosure in research reports and public appearances of any other actual, material conflict of interest of which the analyst knows or has reason to know. The NASD requests comment on this provision. Specifically, the NASD solicits comment on what types of guidance would members need in order to know when this disclosure is necessary? The NASD's proposed rule change would explicitly require that members and their research analysts comply with the disclosure requirements of other applicable laws and regulations, including NASD Rule 2210 and the anti-fraud provisions of the federal securities laws. In light of this explicit requirement, the NASD requests comment on whether the general admonishment to disclose "other, actual material conflicts of interest" is necessary.

g. Other Disclosures

The NASD's proposed rule change would require additional disclosures in research reports to clarify the meaning of a member's ratings system and provide investors with better information to evaluate and compare the quality of a firm's research and the influence of possible conflicts on the assignment of ratings.

First, the NASD's proposed rule change would require that research reports disclose the meaning of all ratings used in the member's rating system. The NASD's proposed rule change also would require that the definition of each rating be consistent with its plain meaning. For example, a "hold" rating could not mean that an investor should sell the security.

Second, the NASD's proposed rule change would require a member to disclose in its research reports the percentage of all securities rated by the member to which the member would assign a "buy," "hold/neutral" or "sell" rating, regardless of whether the member's rating system uses other categories. The NASD's proposed rule change would require a member to determine based on its own rating system into which of the three categories each securities rating falls. Thus, for example, a rating of "market outperform" or "strong buy" might constitute a "buy" under this requirement. The member then would provide the percentage of all of its ratings in each of these categories. For example, a research report might disclose that the member has assigned a "buy" rating to 70% of the securities that it follows, a "hold" rating to 25%, and a "sell" rating to 5% (even if the member employs a system that assigns five different ratings to the securities that it follows). NASD requests comment on whether another set of terms would be more appropriate than "buy," "hold/neutral" or "sell," such as a numerical rating system of "one," "two" and "three."

Third, the NASD proposes that the member would have to disclose the percentage of subject companies within each of these three rating categories for which the member has provided investment banking services within the previous twelve months. For example, if 20 of the 25 companies that a member categorizes with a "buy" rating are investment banking clients , the member would have to disclose that 80 percent of the companies in the "buy" rating category are its investment banking clients. NASD proposes that all of this information would have to be current as of the most recent calendar quarter (or the second most recent calendar quarter if the publication date is less than 15 calendar days after the most recent calendar quarter).

Fourth, the NASD's proposed rule change would require that research reports present a price chart that maps the historical price movements of the recommended security and indicates those points at which the member assigned or changed a research rating or price target. The NASD believes that such a chart could enable investors to compare the ratings and price targets that a member has assigned with the stock performance of the recommended security.[7]

The NASD proposes that this disclosure requirement would apply only to securities on which the member has assigned a rating for at least one year, in recognition of the long-term nature of many ratings. The NASD proposes that the provision also would require that the price chart cover the period that the member has rated the security or three years, whichever is shorter. The NASD proposes that the price chart would have to be current as of the end of the most recent calendar quarter (or the second most recent calendar quarter if the publication date is less than 15 calendar days after the most recent calendar quarter).

Fifth, the NASD's proposed rule change would require disclosure in research reports of the valuation methods used in developing the research rating price target. The price target must have a reasonable basis and must be accompanied by a disclosure concerning the risks that may impede achievement of the price target. The requirement that the price target have a reasonable basis is based upon the current requirement in NASD Rule 2210(d)(2)(B)(i) that any member securities recommendation in an advertisement or item of sales literature have a reasonable basis.

Sixth, the NASD's proposed rule change would require the member to disclose if it makes a market in the subject company's securities. According to the NASD, the market-making provisions are similar to requirements that exist under NASD Rule 2210. Ambiguous or conditional language, such as the fact that a member "may" make a market, or "usually" makes a market in the security, would not comply with this disclosure requirement.[8]

Seventh, the NASD proposed rule change would require disclosure in research reports and public appearances of whether a research analyst or a member of the research analyst's household is an officer, director or advisory board member of the subject company. The NASD requests comment as to whether this disclosure requirement should extend to *any* employment with the subject company, including recent past employment.

Finally, in addition to the disclosure required by this proposed rule change, members and research analysts would be required to provide disclosure in research reports and public appearances that is required by applicable law or regulation, including NASD Rule 2210 and the anti-fraud provisions of the federal securities laws. In particular, NASD Rule 2210(d)(2)(B)(i) provides that, in making a recommendation in advertisements and sales literature, a member must disclose, as applicable:

- That the member usually makes a market in the recommended security, or that the member or associated persons will sell to or buy from customers on a principal basis;
- That the member and/or its officers or partners own options, rights or warrants to purchase any of the securities of the recommended issuer, unless the extent of such ownership is nominal; and
- That the member was manager or co-manager of a public offering of any securities of the recommended issuer within the last three years.

To the extent that the proposed rule change's disclosure requirements regarding market-making activities differ from those in Rule 2210(d)(2)(B)(i), the proposed rule change provisions would govern. However, the other disclosure requirements of Rule 2210(d)(2)(B)(i) would continue to apply to advertisements and sales literature (including research reports) in addition to the proposed rule change's disclosure requirements. Thus, a member would continue to be required to disclose in research reports if the member buys the recommended securities from, or sells them to, customers on a principal basis; if the member or its officers or partners own options, rights or warrants to purchase any securities of the recommended issuer in any amount (unless the extent of such ownership is nominal); and if the member was a manager or co-manager of a public offering of the recommended issuer's securities within the last three years.

The NASD proposes that disclosures required by the proposed rule change either would have to be presented on the front page of a research report, or the report's front page would have to refer to the page on which the disclosures are found. The NASD's proposed rule change would require disclosures to be clear, comprehensive and prominent. Ambiguous or conditional disclosures would not meet this standard.

h. Supervisory Procedures/Reporting Requirements

The NASD's proposed rule change would require each member that is subject to the proposed rule to adopt written supervisory procedures reasonably designed to ensure that the member and its employees comply with the rule. The NASD also proposes that a member's senior officer also would have to attest annually to the NASD that the member has established and implemented procedures reasonably designed to comply with the rule. The NASD believes that this provision is similar to NYSE Rule 351, which requires NYSE members to submit to the NYSE annually a letter signed by a senior officer of a member that the member has met certain supervisory requirements. The NASD requests comment on whether attestation to the NASD is necessary, or whether this provision should simply require members to maintain records of such annual attestations. The NASD also requests comment as to whether this attestation should be submitted only to a member's designated examining authority (generally the NYSE or the NASD).

2. NASD's Statutory Basis

NASD believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6)[9] of the Act, which require, among other things, that the NASD's rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest. The NASD believes that this proposed rule change will eliminate or expose conflicts of interest and thereby significantly curtail the potential for fraudulent and manipulative acts. The NASD further believes that the proposed rule change will provide investors with better and more reliable information with which to make investment decisions.

3. NYSE's Purpose

According to the NYSE, its Rule 472 establishes standards governing member and member organization communications with the public. In particular, NYSE Rule 472.40(2) requires disclosure by member organizations as to certain relationships with recommended issuers, *e.g.*, if the member organization participates in a public offering, makes a market or has positions in the securities of a company that is recommended in a communication to the public.

a. Background

According to the NYSE, during 2000 and 2001, the stock market decline and negative news reports brought attention to the issue of research analysts' conflicts of interest as well as to the adequacy of disclosure in communications with the public that recommend securities. According to the NYSE, the SEC expressed particular concern about analysts and others who make stock recommendations during TV interviews and had additional concerns about written communications in which disclosures were vague and buried in hedge clauses or footnotes.

According to the NYSE, in 2000, the NYSE and NASDR began working on proposed amendments to NYSE and NASDR rules governing communications with the public (NYSE Rule 472 and NASDR Rule 2210) to strengthen the disclosure requirements.

In June 2001, the Securities Industry Association's ("SIA") Ad Hoc Committee on Analyst Integrity issued new guidelines for research analysts entitled "Best Practices for Research." These best practices, which do not have the effect of rules of the SEC or SROs, suggested prohibitions on linking analysts' compensation to investment banking deals; on analysts' trading against their own securities recommendations; and on approving research by investment banking departments and subject companies. The guidelines also recommended disclosure of ownership positions in securities of companies that research analysts cover.

In July 2001, the Association for Investment Management and Research ("AIMR") published for comment an issues paper, "Preserving the Integrity of Research," in which it identified conflicts of interest and pressures on research analysts that may bias research and recommendations.

In addition, during the second half of 2001, several broker-dealers announced that they would either prohibit analysts from owning shares in companies they cover or require their analysts to disclose ownership stakes in such companies.

During June and July 2001, the House Committee on Financial Service's Subcommittee on Capital Markets, Insurance and Government Sponsored Enterprises (the "Subcommittee") held hearings on the sources and ramifications of analysts" conflicts of interest and on the adequacy of disclosures in communications to the public.

During these hearings, according to the NYSE, the following industry issues were addressed: [10] research analysts were "subject to several influences that may affect the integrity and the quality of their analysis and recommendations;" analysts provide assistance to investment banking by "initiating research coverage on prospective investment banking clients;" "many firms pay their analysts largely based upon the profitability of their investment banking unit;" "investment bankers at some firms are involved in evaluating the firm's research analysts to determine their compensation;" and several "firms reported that investment banking had input into research analysts' bonuses."

Further, according to the NYSE, it was found that "analysts were invited to invest" in "companies' private

[5] 15 U.S.C. 78m(d).
[6] 15 U.S.C. 78m(g).

[7] The NASD submitted a sample price chart that complies with this proposed rule provision as Exhibit 3 to its Furm 19b–4, which is part of the public file and can be inspected at the Commission's Public Reference Room, as well as at the principal office of the NASD.

[8] To the extent that there are differences in the disclosure requirements regarding market making between the proposed rule change and current NASD Rule 2210, the proposed rule change provisions would govern.

placements, which were not available to the public generally," and "if the company went public and the analyst's firm underwrote the IPO, the analyst always issued positive research on the company." Also, "firms did not always know whether their research analysts owned stock in companies they underwrote and upon which their analysts then issued research reports."

Additionally, "analysts sometimes provided investment bankers with prior notice of changes in recommendation," and in some instances, "analysts provided investment bankers and client management with advance notice of a pending change in the analyst's recommendations."

According to the NYSE, it was also found that some research analysts issued "booster-shot" research reports, whereby they reiterated "buy recommendations shortly before, or just after, the lock-up period expired." Further, it was noted that some analysts "executed trades for their personal accounts that were contrary to their recommendations in their research reports." In some instances, "analysts" ownership in stock of the covered company was not disclosed in the research report at all."

In addition, according to the NYSE, it was found that "sell-side analysts routinely recommend securities during public appearances in the media (such as on financial television and radio programs), but rarely reveal any conflicts of interest to investors." Finally, ratings categories used by firms in their research reports "may be unclear to investors" and that "full-service broker-dealers use a variety of undefined terms to describe their investment recommendations," and that "the wide variety of terms may confuse investors."

The report of these hearings deemed the SIA best practices to be inadequate as a means of eliminating and/or mitigating the systemic conflicts of interest confronting analysts and the biased research attributable to such conflicts. According to NYSE, the Subcommittee concluded that rulemaking would be a more effective way to deal with these issues.

In November 2001, the NYSE and NASDR established a joint SRO/industry committee to elicit industry comment on the proposal on communications with the public developed to address Congress' concerns. The proposal also incorporates as rules many of the SIA best practices, and recommendations from the AIMR issues paper.

b. Proposed Amendments to NYSE Rule 472

As proposed, the NYSE Rule amendments will address and remediate the issues discussed above in regard to analysts' conflicts of interest and lack of adequate disclosure.

NYSE's proposed rules are intended to reinforce the integrity of the process and help rebuild investors' faith in research and in the equities markets as a whole. The amendments should impact the way research analysts work within their firms and with subject companies. As an unavoidable consequence, NYSE believes that this will add to the firms' costs and administrative burden of operating and overseeing the research process.

The most significant changes are as follows:

(1) Proposed amendments to NYSE Rule 472 would place the following prohibitions and/or restrictions on Investment Banking Department, Research Department and Subject Company Relationships and Communications:

- Research Department personnel or others engaged in the preparation of research reports may not be subject to the supervision or control of the Investment Banking Department (Proposed NYSE Rule 472(b)(1)).
- Research reports may not be subject to review or approval prior to distribution by the Investment Banking Department (Proposed NYSE Rule 472(b)(1)).
- The NYSE believes that analyst's responsibility to provide fair, objective and unbiased research may be compromised if, at the same time, the analyst is involved with and/or supervised by the member or member organization's Investment Banking Department responsible for taking a company public or participating in other types of equity underwritings.

The NYSE's proposed rule change would address this potential conflict by prohibiting investment banking supervision and control, and thus should protect research analysts from undue influence by the Investment Banking Department. Further, NYSE believes that this prohibition would be a codification of one of the SIA's Best Practices recommendations.

- An exception is provided for written and oral communications, intermediated through the Legal or Compliance Department, to verify the accuracy of information and to identify potential conflicts of interest (Proposed NYSE Rule 472(b)(2)(i) and (ii)).
- This limited exception would further the purpose of the NYSE's proposed rule change in that research analysts will be shielded from pressure and influences of investment banking, while providing for the issuance of factually accurate research reports. Moreover, NYSE believes that the Legal or Compliance Department intermediation requirement is consistent with and furthers the purpose of both Federal securities laws and NYSE rules governing information barriers.[11]
- The subject company may not review or approve a research report prior to its distribution (Proposed NYSE Rule 472(b)(3)).
- However, the subject company may review sections of draft research reports excluding the research summary, research rating or price target to verify facts, provided the Legal or Compliance Department receives a complete draft prior to submission to the subject company (Proposed NYSE Rule 472(b)(3)(i)).
- After submission of the draft research report to the subject company, any changes in the proposed rating or price target must be justified by the Research Department, and receive prior written authorization from the Legal or Compliance Department (Proposed NYSE Rule 472(b)(3)(ii)).

The NYSE believes that its proposed rule change addresses concerns raised by AIMR in its issues paper that a subject company may attempt to pressure an analyst to issue a favorable research recommendation provided in a research report. Moreover, should an analyst change a recommendation on a subject company, after limited review by the subject company, such change would have to be justified to, and approved by, the Legal or Compliance Department.

The NYSE recognizes that the proposed rule amendment may require members and member organizations to make additions to their Legal or Compliance Departments, with concomitant financial costs to the members and member organizations.

- The subject company may not be notified of a ratings change until after the close of trading in the principal market one business day prior to the announcement of the change (Proposed NYSE Rule 472(b)(3)(iii)).

The NYSE believes that limiting advance notification of the ratings change should substantially reduce the

[11] According to NYSE, Section 15(f) of the Act provides, in part, that every registered broker or dealer shall establish, maintain, and enforce written policies and procedures designed to prevent the misuse of material non-public information. 15 U.S.C. 78o(f). *See also* NYSE Rules 98, 342, and 351.

possibility of the subject company and its insiders from taking advantage of such knowledge to their benefit, and to the detriment of its shareholders.

(2) Proposed amendments to NYSE Rule 472 prohibit and/or restrict the following in connection with associated persons and/or their household members and to any account in which an associated person has a financial interest or over which the associated person exercises discretion or control, in preparing research reports:

- Prohibits compensation linked to specific investment banking services transactions (Proposed NYSE Rule 472(h)).
- Prohibits ownership positions (including purchasing or receiving pre-IPO shares) if the issuer is principally engaged in the same type of business or industry classification as companies which the associated person covers in research reports (Proposed NYSE Rule 472(e)(1)).
- Prohibits trading in recommended securities thirty (30) days prior to and five (5) days after the issuance of research reports, changes in rating or price target (Proposed NYSE Rule 472(e)(2)).
- Prohibits trades contrary to the analyst's current recommendation (Proposed NYSE Rule 472(e)(3)).

The proposed amendments include exceptions to the above prohibitions for:

- A significant unanticipated change in the personal financial circumstances which is pre-approved by the Legal or Compliance Department (Proposed NYSE Rule 472(e)(4)(i));
- Thirty (30) and five (5) day blackout period for the issuance of research reports, change in rating or price target attributable to significant news or events regarding the subject company which are pre-approved by the Legal or Compliance Department (Proposed NYSE Rule 472(e)(4)(ii));
- Sale transactions for associated persons new to the member or member organization within thirty (30) days of employment (Proposed NYSE Rule 472(e)(4)(iii)) or being assigned the responsibility of preparing research reports with respect to a subject company (Proposed NYSE Rule 472(e)(4)(iv)); and
- Transactions in accounts not controlled by the associated person, *e.g.*, certain investment funds (Proposed NYSE Rule 472(e)(4)(v)), or registered investment company (Proposed NYSE Rule 472(e)(4)(vi)).

The NYSE believes that prohibitions on tying analyst compensation to specific investment banking deals, or on analyst ownership of pre-IPO shares in subject companies would help eliminate incentives analysts and members or member organizations may have to publish favorable research on such subject companies.

The NYSE believes that the proposed rule change would also impose certain restrictions on an analyst's personal trading activities to help ensure that research reports and recommendations are not influenced by the prospect of personal enrichment.

Further, the NYSE proposed rule change would prohibit a research analyst from trading in a manner contrary to the analyst's most current recommendation concerning a security. Thus, for example, the NYSE proposed rule change would prohibit a research analyst from selling a security while maintaining a "buy" recommendation.

(3) Proposed amendments to NYSE Rule 472 place the following prohibitions and/or restrictions on members or member organizations:

- The publishing of research reports within forty (40) calendar days of the completion of an initial public offering and ten (10) calendar days of the completion of a secondary offering in which a member or member organization acted as a manager or co-manager (Proposed NYSE Rule 472(f)(1) and (2)).
- An exception to the forty (40) and ten (10) day quiet period for a research report issued due to significant news or events about the issuer, provided it is pre-approved by the Legal or Compliance Department (Proposed NYSE Rule 472(f)(3)).
- Offering favorable research to companies as consideration or inducement for their business is prohibited (Proposed NYSE Rule 472(g)).

While NYSE recognizes that efficient markets require the dissemination of information on publicly traded companies, the proposed quiet periods are intended to minimize the concern that a managing underwriter has the ability to reward the subject company for its underwriting business by publishing favorable research soon after completion of the offering.

As proposed, the forty (40) and ten (10) calendar day quiet periods exceed those provided for under the federal securities laws.[12] Although the proposed quiet periods are longer than what is currently mandated, NYSE believes that they are warranted.

Recognizing that markets may be volatile, the proposed rule change would not prohibit a manager or co-manager from issuing a research report during these quiet periods due to significant news or a significant event concerning the subject company. In general, a "significant" news item or event is one that is expected to have a material impact on, or that reflects a material change to, the subject company's earnings, operations or financial condition.

The NYSE proposed rule change would include a provision that expressly prohibits a member or member organization from offering favorable research, a specific research rating or a specific price target as consideration or inducement for the receipt of business or compensation. While, according to NYSE, such action constitutes a violation of existing just and equitable principles of trade, the NYSE proposed rule change makes this prohibition explicit.

(4) Proposed amendments to NYSE Rule 472 impose requirements on members, member organizations, and associated persons preparing research reports to disclose the following in written communications and public appearances:

- whether, as of five (5) days prior to the publication of a research report, a member or member organization owns a position in excess of 1% of any class of common equity securities of the subject company (Proposed NYSE Rule 472 (k)(1)(i)(a));
- the associated person's or household member's financial interest in the subject company (Proposed NYSE Rule 472(k)(1)(i)(b));
- any actual, material conflict of interest of the member or member organization which the associated person knows or has reason to know exists at the time of the issuance of a research report or public appearance (Proposed NYSE Rule 472(k)(1)(i)(c));
- whether the member or member organization received compensation from subject companies within the past twelve (12) months or reasonably expects to receive compensation in the next three (3) months (Proposed NYSE Rule 472(k)(1)(ii)); and
- whether the associated person or household member is an officer, director, or advisory board member of the recommended issuer (Proposed NYSE Rule 472(k)(1)(iii)).

[12] According to NYSE, currently Rule 174(d) of the Securities Act of 1933 provides for a twenty-five (25) day prospectus delivery requirement for an issuer's IPO if the security is to be listed on an exchange or authorized for inclusion in an interdealer quotation system such as Nasdaq. The twenty-five (25) day quiet period coincides with the twenty-five (25) day prospectus delivery requirement under this rule. In addition, according to NYSE, the restrictions regarding publication of research reports in Rule 101 of Regulation M do not apply to research reports that comply with Rules 138 or 139 (available to S–2 and/or S–3 issuers) of the Securities Act.

VOL

2002
UMI

NYSE proposes that all required disclosures must be clear, comprehensive and on the first page of a research report or must reference the reader to the page in which it is found (Proposed NYSE Rule 472(k)(2)).

As noted above, the NYSE proposed rule change would require a member or member organization to disclose in research reports whether the member, member organization or its affiliates received compensation from the subject company within the last 12 months, or reasonably expects to receive compensation within the next three months following publication of the research report. According to NYSE, this requirement would mandate definitive disclosure. Ambiguous or conditional language, such as disclosure that the member or member organization "may have" received compensation from the subject company, would not comply with the disclosure requirements of the proposed rule change.

The NYSE recognizes the possibility that this requirement might include compensation related to non-publicly announced transactions. However, both publicly announced and non-publicly announced related compensation present the potential for conflicts. Moreover, the NYSE does not believe that the proposed rule change would alert the Research Department or the investing public concerning non-public transactions, for at least two reasons.

First, the NYSE proposed rule change would require only disclosure that compensation was received by the member, member organization or its affiliates. It would not require disclosure concerning the specific amount received or expected to be received or the nature of the transaction, such as the fact that the member, member organization or its affiliates received the compensation in connection with non-public merger and acquisition services, or even that the compensation was received by the member or member organization (as opposed to one of its affiliates that is not engaged in investment banking). Second, according to NYSE, the term "compensation" is to be broadly interpreted to include the receipt of any consideration from the subject company. Given the breadth of the meaning of "compensation," this disclosure requirement should not alert the Research Department whether the compensation is related to a non-public transaction.

According to the NYSE, research analysts would have to disclose in public appearances if the issuer of a recommended security is a client of the member, member organization or its affiliates, provided the analyst knows or has reason to know this fact. For purposes of this provision, an issuer would be deemed a "client" of the member, member organization or its affiliates, if the member, member organization or its affiliates received compensation from the issuer within the previous twelve months, or reasonably expects to receive compensation from the issuer within the next three months. This disclosure requirement thus would not apply with regard to a non-public transaction in which the issuer is a client of the member, member organization or its affiliates and the research analyst does not know and has no reason to know of this fact due to an information barrier imposed by the member or member organization.

(5) The proposed rule change would require additional disclosures in research reports to clarify the meaning of a member's or member organization's ratings system and provide investors with better information to evaluate and compare the quality of a member or member organization's research and the influence of possible conflicts in the assignment of ratings (Proposed NYSE Rule 472(k)(2)(iv)).

(6) Proposed amendments to NYSE Rule 351 would require members and member organizations to submit to NYSE, annually, a letter of attestation signed by a senior officer or partner, that the member or member organization has established and implemented written procedures reasonably designed to comply with the provisions of NYSE Rule 472 (Proposed NYSE Rule 351(f)). *See also* NYSE Rule 472(c) for the requirement to establish written procedures.

According to the NYSE, the scope of sales practice examinations conducted by NYSE will be expanded to ensure compliance with the new rule amendments.

4. NYSE's Statutory Basis

The Exchange believes that the proposed rule change furthers the objectives of Section 6(b)(5)[13] of the Act in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organizations' Statements on Burden on Competition

NASDR and the NYSE do not believe that the proposed rule changes will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended.

C. Self-Regulatory Organizations' Statements on Comments on the Proposed Rule Change Received From Members, Participants, or Others

1. NASD

Written comments were neither solicited nor received for this proposed rule change. Previously, the NASD published for comment in NASD Notice to Members 01–45 (July 2, 2001) a more limited proposal to amend NASD Rule 2210, Communications With The Public. The NASD received 850 comments in response to that Notice. The NASD has not included a discussion of the comments received on that proposal because the current proposed rule change is significantly different and more comprehensive.

2. NYSE

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Changes and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the SROs consent, the Commission will:

A. By order approve such proposed rule changes, or

B. institute proceedings to determine whether the proposed rule changes should be disapproved.

IV. Solicitation of Comments

The Commission notes that the NASDR and NYSE have worked together to fashion these proposals. However, there are differences in the text of the proposals. The Commission specifically requests comment on the substance of proposed NASD Rule 2711, as amended; NYSE's proposed rule changes to NYSE Rule 472 and NYSE Rule 351; and whether there are any differences between the NYSE proposed Rule 472 and NASD proposed Rule 2711 that present compliance or interpretive issues. The Commission also specifically seeks comment on whether the text or substance of proposed NASD Rule 2711 and current NASD Rule 2210 present compliance or interpretive issues.[14] The Commission notes that, in Section II above, the NASD has requested comment on several issues relating to proposed NASD Rule 2711.

Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room.

Copies of such filing will also be available for inspection and copying at the principal offices of the SROs. All submissions should refer to File Nos. SR–NASD–2002–21 and SR–NYSE–2002–09 and should be submitted by April 4, 2002.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[15]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45525; File No. SR–SCCP–2002–01]

Self-Regulatory Organizations; Stock Clearing Corporation of Philadelphia; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Relating to Fees Applicable to Philadelphia Stock Exchange Competing Specialists

March 8, 2002.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on January 9, 2002, the Stock Clearing Corporation of Philadelphia ("SCCP") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which items have been prepared primarily by SCCP. The Commission is publishing this notice to solicit comments on the proposed rule change from interested parties.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change amends SCCP's fee schedule to establish clearly that SCCP's fees, credits, discounts, and other charges which are based upon Philadelphia Stock Exchange ("Phlx") equity specialists" specialist activities also apply to competing specialists' specialist activities.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, SCCP included statements concerning the purpose of and statutory basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. SCCP has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.[2]

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to clearly establish that any fees and charges (as well as any credits and discounts) included in SCCP's fee schedule which are based upon Phlx equity specialists' specialist activities also apply to competing specialists' specialist activities. On December 21, 2001, the Commission approved a Phlx proposed rule change to adopt rules designed to facilitate the establishment of a competing specialist program on Phlx.[3] The new rules provide for the approval by Phlx's Equity Allocation, Evaluation and Securities Committee of applications by qualified specialist units to act as competing specialists in one or more equity securities. Phlx contemplates commencing a competing specialist program in the near future. Under that program, equity securities traded on Phlx may have both a primary specialist (contemplated to be Phlx's current sole specialist in the security) and one or more competing specialists. At this time, SCCP is proposing to apply all specialist fees and charges (as well as any applicable credits or discounts) to Phlx specialists whether primary or competing.

For these reasons, SCCP believes that the proposed rule change is consistent with Section 17A(b)(3)(D) of the Act[4] which requires that the rules of a registered clearing agency provide for equitable allocation of reasonable dues, fees, and other charges for services which it provides to its participants because SCCP will charge the same for primary and competing specialists.

(B) Self-Regulatory Organization's Statement on Burden on Competition

SCCP does not believe that the proposed rule change will impose any inappropriate burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule change establishes or changes a due, fee, or other charge imposed by SCCP, it has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act[5] and Rule 19b–4(f)(2) thereunder.[6] At any time within sixty days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the

[1] 15 U.S.C. 78s(b)(1).

[2] The Commission has modified parts of these statements.

[3] Securities Exchange Act Release No. 34–45183 (December 21, 2001), 67 FR 118 (January 2, 2002) (order approving SR–Phlx–2001–97).

provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at SCCP. All submissions should refer to the File No. SR–SCCP–2002–01 and should be submitted by April 4, 2002.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[7]

BILLING CODE 8010–01–P

OFFICE OF SPECIAL COUNSEL

Agency Information Collection Activities; Request for Comment

AGENCY: Office of Special Counsel.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), and implementing regulations at 5 CFR part 1320, the U.S. Office of Special Counsel (OSC), plans to request approval from the Office of Management and Budget (OMB) for use of three previously approved information collections consisting of customer survey forms.

OSC is required by law to conduct an annual survey of those who seek its assistance. The information collections are used to carry out that mandate. The current OMB approval for these collections of information expires on March 31, 2002; OSC does not plan to use the forms again until the next round of annual surveys beginning on October 1, 2002.

Current and former Federal employees, employee representatives, other Federal agencies, state and local government employees, and the general public are invited to comment on these information collections. Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of OSC functions, including whether the information will have practical utility; (b) the accuracy of OSC's estimate of the burden of the proposed collections of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Comments should be received by May 13, 2002.

ADDRESSES: Kathryn Stackhouse, Attorney, Planning and Advice Division, U.S. Office of Special Counsel, 1730 M Street, N.W., Suite 201, Washington, DC 20036–4505.

FOR FURTHER INFORMATION CONTACT: Kathryn Stackhouse, Attorney, Planning and Advice Division, at the address shown above; by facsimile at (202) 653–5151; or by telephone at (202) 653–8971. The survey forms for collection of information are available for review on OSC's Web site, at www.osc.gov/reading.htm.

SUPPLEMENTARY INFORMATION: OSC is an independent agency responsible for: (1) investigation of allegations of prohibited personnel practices defined by law at 5 U.S.C. 2302(b), and certain other illegal employment practices under titles 5 and 38 of the U.S. Code, affecting current or former Federal employees or applicants for employment, and covered state and local government employees; (2) the interpretation and enforcement of Hatch Act provisions on political activity in chapters 15 and 73 of title 5 of the U.S. Code; and (3) the provision of a secure channel through which Federal employees may make disclosures of information evidencing violations of law, rule or regulation; gross waste of funds; gross mismanagement; abuse of authority; or a substantial and specific danger to public health or safety.

OSC is required to conduct an annual survey of all individuals who seek its assistance. Section 13 of Public Law 103–424 (1994), codified at 5 U.S.C. 1212 note, states, in part: "[T]he survey shall—(1) determine if the individual seeking assistance was fully apprised of their rights; (2) determine whether the individual was successful either at the Office of Special Counsel or the Merit Systems Protection Board; and (3) determine if the individual, whether successful or not, was satisfied with the treatment received from the Office of Special Counsel." The same section also provides that survey results are to be published in OSC's annual report to Congress. Copies of prior years' annual reports are available on OSC's Web site, at www.osc.gov/forms.htm#annual, or by calling OSC at (202) 653–2253.

OSC uses three forms to survey potential respondents in three types of matters closed during the previous fiscal year: Form OSC–48a is sent to complainants who alleged prohibited personnel practices, or other prohibited activities (including violations of the Hatch Act); Form OSC–48b is sent to persons who received a written advisory opinion on the application of the Hatch Act; and Form OSC–48c is sent to covered persons who made whistleblower disclosures to OSC. Each of these forms for information collection is described below. The forms to be submitted to OMB contain some minor modifications to existing forms, including increased use of "plain English" and minor format changes. In addition, the estimated number of annual respondents for each survey has been reduced to reflect estimated actual survey response rates, rather than surveys sent.

1. Title of Collection: OSC Survey—Prohibited Personnel Practice or Other Prohibited Activity (Agency Form Number OSC–48a; OMB Control Number 3255–0003)

Type of Information Collection Request: Approval of a previously approved collection of information that expires on March 31, 2002, with some revisions.

Affected public: Current and former Federal employees, applicants for Federal employment, state and local government employees, and their representatives.

Respondent's Obligation: Voluntary.

Estimated Annual Number of Respondents: 682.

Frequency: Annual.

Estimated Average Amount of Time for a Person to Respond: 20 minutes.

Estimated Annual Burden: 227 hours.

Abstract: This form is used to survey current and former Federal employees and applicants for Federal employment who have submitted allegations of possible prohibited personnel practices or other prohibited activity for investigation and possible prosecution by OSC, and whose matter has been closed during the prior fiscal year (FY), on their experience at OSC. Specifically, the survey asks questions relating to whether the respondent was: (1) apprised of his or her rights; (2) successful at the OSC or at the Merit Systems Protection Board; and (3) satisfied with the treatment received at the OSC.

2. Title of Collection: OSC Survey—Hatch Act Advisory Opinion (Agency Form Number OSC–48b; OMB Control Number 3255–0003)

Type of Information Collection Request: Approval of a previously approved collection of information that expires on March 31, 2002, with some revisions.

Affected public: Current and former Federal employees, applicants for Federal employment, state and local government employees, and their representatives.

Respondent's Obligation: Voluntary.

Estimated Annual Number of Respondents: 65.

Frequency: Annual.

Estimated Average Amount of Time for a Person to Respond: 12 minutes.

Estimated Annual Burden: 13 hours.

Abstract: This form is used to survey those who request a written advisory opinion on the application of the Hatch Act, and whose matter has been closed during the prior FY, on their experience at OSC. Specifically, the survey asks questions relating to whether the respondent was: (1) apprised of his or her rights; (2) successful at the OSC; and (3) satisfied with the treatment received at the OSC.

3. Title of Collection: OSC Survey—Whistleblower Disclosure (Agency Form Number OSC–48c; OMB Control Number 3255–0003)

Type of Information Collection Request: Approval of a previously approved collection of information that expires on March 31, 2002, with some revisions.

Affected public: Current and former Federal employees, applicants for Federal employment, and their representatives.

Respondent's Obligation: Voluntary.

Estimated Annual Number of Respondents: 93.

Frequency: Annual.

Estimated Average Amount of Time for a Person to Respond: 15 minutes.

Estimated Annual Burden: 23 hours.

Abstract: This form is used to survey those who have filed a whistleblower disclosure, and whose matter has been closed during the prior FY, on their experience at OSC. Specifically, the survey asks questions relating to whether the respondent was: (1) apprised of his or her rights; (2) successful at the OSC; and (3) satisfied with the treatment received at the OSC.

Dated: March 8, 2002.

Elaine D. Kaplan,

Special Counsel.

Bureau of Educational and Cultural Affairs Request for Grant Proposals: Balkans Junior Faculty Development Program

SUMMARY: The Office of Academic Exchange Programs/European Programs Branch of the Bureau of Educational and Cultural Affairs announces an open competition for the new Balkans *Junior Faculty Development Program* (JFDP). Public and private non-profit organizations meeting the provisions described in Internal Revenue Code section 26 U.S.C. 501 (c) (3) may submit proposals to place visiting faculty from Bosnia and Herzegovina, Macedonia, Montenegro and Serbia at U.S. universities in a one academic year (nine months) teacher training and curriculum development program. The grantee organization for this new program will support and oversee the activities of the faculty throughout their stay in the United States, including their undertaking a practical internship at the end of the academic program (an additional two months). In addition, the

[7] 17 CFR 200.30–3(a)(12).

grantee organization will recruit and select candidates for the JFDP in Bosnia and Herzegovina, Macedonia, Montenegro and Serbia to begin the program in the United States in Fall 2003.

Program Information

Overview

The new Balkans Junior Faculty Development Program (JFDP) will offer fellowships to university instructors from Bosnia and Herzegovina, Macedonia, Montenegro and Serbia. Selected through an open, merit-based competition, JFDP Fellows will attend U.S. universities for one academic year to work with faculty mentors and to audit courses in order to develop new curricula and approaches to teaching in their fields of study. The JFDP will encourage its Fellows to develop professional relationships with the U.S. academic community, and to forge ties between their U.S. colleagues and colleagues in their home countries, and to share their experiences and knowledge with U.S. students and professors. Throughout their stay in the United States, JFDP Fellows will attend conferences and seminars, and participate in two-month practical internships after completing the academic component of the program. The goals of the program are to allow U.S. scholars and scholars from the participating countries to exchange ideas on curriculum design and teaching, and to increase collaboration and cooperation between universities in the United States and Bosnia and Herzegovina, Macedonia, Montenegro and Serbia. Participation in the JFDP under this grant is restricted to university instructors from Bosnia and Herzegovina, Macedonia, Montenegro and Serbia in the following fields of study: American studies, business administration, economics, education administration, environmental studies, history, international affairs, journalism, law, library science, political science, public administration and public policy.

Programs must comply with J–1 Visa regulations. Subject to the availability of funds, it is anticipated that this grant will begin on or about July 1, 2002. Please refer to the Solicitation Package for further information.

Budget Guidelines

Grants awarded to eligible organizations with less than four years of experience in conducting international exchange programs will be limited to $60,000.

Applicants must submit a comprehensive budget for the entire program. The Bureau anticipates awarding one grant in the amount of $1,240,000 ($140,000 for Bosnia and Herzegovina; $550,000 for Macedonia; $150,000 for Montenegro; and $400,000 for Serbia) to support the program and administrative costs required to implement this program. The Bureau encourages applicants to provide maximum levels of cost sharing and funding from private sources in support of its programs. There must be a summary budget as well as breakdowns reflecting both administrative and program budgets. Applicants may provide separate sub-budgets for each program component, phase, location, or activity to provide clarification.

Allowable costs for the program include the following:

(1) Overseas recruitment and selection of candidates

(2) Participant travel expenses, stipends, accident and sickness insurance, visa fees, professional development costs

(3) Orientations, participant conferences

(4) Host university fees

(5) Alumni and follow-on activities

Please refer to the Solicitation Package for complete budget guidelines and formatting instructions.

Announcement Title and Number: All correspondence with the Bureau concerning this RFGP should reference the above title and number *ECA/A/E/EUR–02–07.*

FOR FURTHER INFORMATION, CONTACT: The Office of Academic Exchanges, ECA/A/E/EUR, Room 246, U.S. Department of State, 301 4th Street, SW., Washington, DC 20547, tel. (202) 205–0525, fax (202) 260–7985, *exchanges@pd.state.gov* to request a Solicitation Package. The Solicitation Package contains detailed award criteria, required application forms, specific budget instructions, and standard guidelines for proposal preparation. Please specify Bureau Program Officer Sheila Casey on all other inquiries and correspondence.

Please read the complete **Federal Register** announcement before sending inquiries or submitting proposals. Once the RFGP deadline has passed, Bureau staff may not discuss this competition with applicants until the proposal review process has been completed.

To Download a Solicitation Package Via Internet

The entire Solicitation Package may be downloaded from the Bureau's website at *http://exchanges.state.gov/education/RFGPs.* Please read all information before downloading.

Deadline for Proposals: All proposal copies must be received at the Bureau of Educational and Cultural Affairs by 5 p.m. Washington, DC time on Friday, May 10, 2002. Faxed documents will not be accepted at any time. Documents postmarked the due date but received on a later date will not be accepted. Each applicant must ensure that the proposals are received by the above deadline.

Applicants must follow all instructions in the Solicitation Package. The original and eight (8) copies of the application should be sent to: U.S. Department of State, SA–44, Bureau of Educational and Cultural Affairs, Ref.: ECA/A/E/EUR–02–07, Program Management, ECA/EX/PM, Room 534, 301 4th Street, SW., Washington, DC 20547.

Applicants must also submit the "Executive Summary" and "Proposal Narrative" sections of the proposal on a 3.5″ diskette, formatted for DOS. These documents must be provided in ASCII text (DOS) format with a maximum line length of 65 characters. The Bureau will transmit these files electronically to the Public Affairs Sections at U.S. Embassies (or Public Affairs Office in Montenegro) for review, with the goal of reducing the time it takes to obtain Embassy comments for the Bureau's grants review process.

Diversity, Freedom and Democracy Deadlines

Pursuant to the Bureau's authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social, and cultural life. "Diversity" should be interpreted in the broadest sense and encompass differences including, but not limited to ethnicity, race, gender, religion, geographic location, socio-economic status, and physical challenges. Applicants are strongly encouraged to adhere to the advancement of this principle both in program administration and in program content. Please refer to the review criteria under the 'Support for Diversity' section for specific suggestions on incorporating diversity into the total proposal. Public Law 104–319 provides that "in carrying out programs of educational and cultural exchange in countries whose people do not fully enjoy freedom and democracy," the Bureau "shall take appropriate steps to provide opportunities for participation in such programs to human rights and democracy leaders of such countries." Public Law 106–113 requires that the governments of the countries described above do not have inappropriate influence in the selection process. Proposals should reflect advancement of these goals in their program contents, to the full extent deemed feasible.

Review Process

The Bureau will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines stated herein and in the Solicitation Package. All eligible proposals will be reviewed by the program office, as well as by the Public Diplomacy Sections overseas, where appropriate. Eligible proposals will be subject to compliance with Federal and Bureau regulations and guidelines and forwarded to Bureau grant panels for advisory review. Proposals may also be reviewed by the Office of the Legal Adviser or by other Department elements. Final funding decisions are at the discretion of the Department of State's Assistant Secretary for Educational and Cultural Affairs. Final technical authority for assistance awards (grants or cooperative agreements) resides with the Bureau's Grants Officer.

Review Criteria

Technically eligible applications will be competitively reviewed according to the criteria stated below. These criteria are not rank ordered and all carry equal weight in the proposal evaluation:

1. *Program Development and Management:* The proposal should exhibit originality, substance, precision, innovation, and relevance to the Bureau's mission. Objectives should be reasonable, feasible and flexible. The proposal should clearly demonstrate how the grantee organization will meet the program's objectives. A detailed agenda and relevant work plan should demonstrate substantive undertakings and logistical capacity. The agenda should adhere to the program overview and guidelines described above.

2. *Multiplier Effect/Impact:* The JFDP should strengthen long-term mutual understanding, including maximum sharing of information and establishment of long-term institutional and individual linkages. The proposal should include creative ways to involve program participants in U.S. communities.

3. *Support of Diversity:* The proposal should demonstrate the grantee organization's commitment to promoting the awareness and understanding of diversity through participant recruitment efforts, and through its selection of host universities.

4. *Institution's Record/Ability:* The proposal should demonstrate an institutional record of successful exchange programs, including responsible fiscal management and full compliance with all reporting requirements for past Bureau/USIA grants as determined by the Bureau's Grants Division. Proposed personnel and institutional resources should be adequate and appropriate to achieve the program's goals.

5. *Follow-on and Alumni Activities:* The proposal should provide a plan for continued follow-on activity that insures that Bureau-supported programs are not isolated events, but have meaning and scope beyond the time the actual exchange took place.

6. *Project Evaluation:* The proposal should include a plan to evaluate the success of the JFDP, both during and after the program. The Bureau recommends that the proposal include a draft survey questionnaire or other technique, plus a description of methodologies that can be used to link outcomes to original project objectives. The grantee organization will be expected to submit intermediate reports after each project component is concluded or quarterly, whichever is less frequent.

7. *Cost-effectiveness and Cost Sharing:* The overhead and administrative components of the proposal, including salaries and honoraria, should be kept as low as possible. All other items should be necessary and appropriate. The proposal should maximize cost sharing through other private sector support as well as institutional direct funding contributions.

Authority

Overall grant making authority for this program is contained in the Mutual Educational and Cultural Exchange Act of 1961, Public Law 87–256, as amended, also known as the Fulbright-Hays Act. The purpose of the Act is "to enable the Government of the United States to increase mutual understanding between the people of the United States and the people of other countries * * *; to strengthen the ties which unite us with other nations by demonstrating the educational and cultural interests, developments, and achievements of the people of the United States and other nations * * * and thus to assist in the development of friendly, sympathetic and peaceful relations between the United States and the other countries of the world." The funding authority for the program above is provided in part through the Support for East European Democracy (SEED) Act.

Notice

The terms and conditions published in this RFGP are binding and may not be modified by any Bureau representative. Explanatory information provided by the Bureau that contradicts published language will not be binding. Issuance of the RFGP does not constitute an award commitment on the part of the Government. The Bureau reserves the right to reduce, revise, or increase proposal budgets in accordance with the needs of the program and the availability of funds. Awards made will be subject to periodic reporting and evaluation requirements.

Notification

Final awards cannot be made until funds have been appropriated by Congress, allocated and committed through internal Bureau procedures.

Dated: March 5, 2002.

Patricia S. Harrison,

Assistant Secretary for Educational and Cultural Affairs, Department of State.

BILLING CODE 4710–05–U

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Deadline for Notification of Intent To Use the Airport Improvement Program (AIP) Sponsor Entitlement, Cargo Funds, and Nonprimary Entitlement Funds for Fiscal Year 2002

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces May 1, 2002, as the deadline for each airport sponsor to notify the FAA that it will use its fiscal year 2002 entitlement funds to accomplish projects identified in the Airports Capital Improvement Plan that was formulated in the spring of 2001.

FOR FURTHER INFORMATION CONTACT: Mr. Stan Lou, Manager, Program Implementation Branch, Airports Financial Assistance Division, Office of Airport Planning and Programming, APP–520, on (202) 267–8812.

SUPPLEMENTARY INFORMATION: Section 47105(f) of Title 49, United States Code, provides that the sponsor of each airport to which funds are apportioned shall notify the Secretary by such time and in a form as prescribed by the Secretary, of the sponsor's intent to apply for the funds apportioned to it (entitlements). This notice applies only to those

VOL
67
ISS
50
MR
14
2002
UMI

airports that have received such entitlements, except those nonprimary airports located in designated Block Grant States. Notification of the sponsor's intent to apply during fiscal year 2002 for any of its available entitlement funds including those unused from prior years, shall be in the form of inclusion of projects for fiscal year 2002 in the Airports Capital Improvement Plan.

This notice is promulgated to expedite and prioritize grants in the final quarter of the fiscal year. Absent an acceptable application by May 1, 2002, FAA will defer an airport's entitlement funds until the next fiscal year. Pursuant to the authority and limitations in section 47117(f), FAA will issue discretionary grants in an aggregate amount not to exceed the aggregate amount of deferred entitlement funds. Airport sponsors may request unused entitlements after September 30, 2002.

Issued in Washington, DC on March 6, 2002.

Stan Lou,

Manager, Program Implementation Branch.

Air Traffic Procedures Advisory Committee

AGENCY: Federal Aviation Administration (FAA), DOT.

SUMMARY: The FAA is issuing this notice to advise the public that a meeting of the Federal Aviation Administration Air Traffic Procedures Advisory Committee (ATPAC) will be held to review present air traffic control procedures and practices for standardization, clarification, and upgrading of terminology and procedures.

DATES: The meeting will be held from April 16–19, 2002, from 8 a.m. to 5 p.m. each day.

ADDRESSES: The meeting will be held at the Federal Aviation Administration Headquarters Building, Bessie Coleman Conference Center, 800 Independence Avenue, SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: Mr. David W. Madison, Acting Executive Director, ATPAC, Air Traffic Planning and Procedures, 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267–3725.

SUPPLEMENTARY INFORMATION: Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92–463; 5 U.S.C. App. 2), notice is hereby given of a meeting of the ATPAC to be held April 16 through April 19, 2002, at the Federal Aviation Administration Headquarters Building, Bessie Coleman Conference Center, 800 Independence Avenue, SW., Washington, DC 20591.

The agenda for this meeting will cover: a continuation of the Committee's review of present air traffic control procedures and practices for standardization, clarification, and upgrading of terminology and procedures. It will also include:

1. Approval of Minutes.
2. Submission and Discussion of Areas of Concern.
3. Discussion of Potential Safety Items.
4. Report from Executive Director.
5. Items of Interest.
6. Discussion and agreement of location and dates for subsequent meetings.

Attendance is open to the interested public but limited to the space available. With the approval of the Chairperson, members of the public may present oral statements at the meeting. Persons desiring to attend and persons desiring to present oral statements should notify the person listed above or not later than April 12, 2002. The next quarterly meeting of the FAA ATPAC is planned to be held from July 15–18, 2002, in Seattle, Washington.

Any member of the public may present a written statement to the Committee at any time at the address given above.

Issued in Washington, DC, on March 4, 2002.

David W. Madison,

Acting Executive Director, Air Traffic Procedures Advisory Committee.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Intent To Rule on Application To Use the Revenue From a Passenger Facility Charge (PFC) at Fayetteville Regional Airport, Fayetteville, NC

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to use the revenue from a PFC at Fayetteville Regional Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

DATES: Comments must be received on or before April 15, 2002.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Atlanta Airports District Office, 1701 Columbia Avenue, Suite 2–260, College Park, Georgia 30337.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Bradley S. Whited, A.A.E., Airport Director, of the city of Fayetteville at the following address; Mr. Bradley Whited, A.A.E., Airport Manager, Fayetteville Regional Airport, P.O. Box 64218, Fayetteville, NC 28306.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the city of Fayetteville under section 158.23 of Part 158.

FOR FURTHER INFORMATION CONTACT: Southern Region, Atlanta Airports District Office, Mrs. Tracie D. Kleine, Program Manager, 1701 Columbia Avenue, Suite 2–260, College Park, Georgia 30337–2747, (404) 305–7148.

The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to use the revenue from a PFC at Fayetteville Regional Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

On March 4, 2002, the FAA determined that the application to use the revenue from a PFC submitted by the city of Fayetteville was substantially complete within the requirements of section 158.25 of part 158. The FAA will approve or disapprove the application, in whole or in part, no later than June 13, 2002.

The following is a brief overview of the application.

PFC Application No.: 02–02–U–00–FAY.

Level of the proposed PFC: $3.00.

Proposed charge effective date: November 1, 2000.

Proposed charge expiration date: November 1, 2005.

Total estimated net PFC revenue: $1,026,513.

Brief description of proposed project(s): Construct North General Aviation Ramp, Security System Upgrade, Phase II, Design and Construct Runway 04 Safety Area, Phase I, Acquire Land, Renovate Terminal Building, Phase II, Construct Runway 04 Safety Area, Phase II, Renovate Terminal Building, Phase III, Construct Runway 22 Safety Area, Construct non-license Vehicle Road, Construct Jet Bridge Modification, Construct Taxiway 'K'.

Class or classes of air carriers which the public agency has requested not be required to collect PFCs: None.

Any person may inspect the application in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT**.

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the Fayetteville Regional Airport.

Issued in College Park, Georgia on March 6, 2002.

Scott L. Seritt,

Manager, Atlanta Airports District Office, Southern Region.

Notice of Intent To Rule on Application 02–04–C–00–RDM To Impose and Use the Revenue From a Passenger Facility Charge (PFC) at Roberts Field, Submitted by the City of Redmond, Roberts Field, Redmond, OR

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to impose and use PFC revenue at Roberts Field under the provisions of 49 U.S.C. 40117 and part 158 of the Federal Aviation Regulations (14 CFR part 158).

DATES: Comments must be received on or before April 15, 2002.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Mr. J. Wade Bryant, Manager; Seattle Airports District Office, SEA-ADO; Federal Aviation Administration; 1601 Lind Avenue SW., Suite 250, Renton, Washington 98055–4056. In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Ms. Carolyn S. Novick, Airport Manager, at the following address: City of Redmond, PO Box 726, Redmond, Oregon 97756.

Air Carriers and foreign air carriers may submit copies of written comments previously provided to Roberts Field, under § 158.23 of part 158.

FOR FURTHER INFORMATION CONTACT: Ms. Suzanne Lee-Pang, (425) 227–2654, Seattle Airports District Office, SEA-ADO; Federal Aviation Administration; 1601 Lind Avenue SW., Suite 250, Renton, Washington, 98055–4056. The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application 02–04–C–00–RDM to impose and use PFC revenue at Roberts Field, under the provisions of 49 U.S.C. 40117 and part 158 of the Federal Aviation Regulations (14 CFR part 158).

On March 6, 2002, the FAA determined that the application to impose and use the revenue from a PFC submitted by City of Redmond, Roberts Field, Redmond, Oregon, was substantially complete within the requirements of § 158.25 of part 158. The FAA will approve or disapprove the application, in whole or in part, no later than May 24, 2002.

The following is a brief overview of the application.

Level of the proposed PFC: $4.50.

Proposed charge effective date: June 1, 2003.

Proposed charge expiration date: April 1, 2006.

Total requested for use approval: $1,968,545.

Brief description of proposed project: Expand Terminal Access Road; Design of Terminal Expansion; Install Perimeter Fence; Wildlife Mitigation; Design and Rehabilitate Air Carrier Terminal Apron; Rock Obstruction Removal.

Class or classes of air carriers, which the public agency has requested, not be required to collect PFC's: Air Taxis which comprise less than one percent of the total enplanements at Roberts Field.

Any person may inspect the application in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT** and at the FAA Regional Airports Office located at: Federal Aviation Administration, Northwest Mountain Region, Airports Division, ANM–600, 1601 Lind Avenue SW., Suite 315, Renton, WA 98055–4056.

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at Roberts Field.

Issued in Renton, Washington on March 6, 2002.

David A. Field,

Manager, Planning, Programming and Capacity Branch, Northwest Mountain Region.

Surface Transportation Board

[STB Finance Docket No. 34179]

Bulkmatic Railroad Corporation—Operation Exemption—Bulkmatic Transport Company

Bulkmatic Railroad Corporation (BRC), a noncarrier, has filed a verified notice of exemption under 49 CFR 1150.31 to operate approximately 3.9 miles of railroad right-of-way and trackage at transloading and freighthouse facilities known as Bulkmatic Distribution Center, at Chicago Heights, IL (line).[1]

The transaction was scheduled to be consummated no earlier than March 6, 2002, the effective date of the exemption (7 days after the exemption was filed).[2]

If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to reopen the proceeding to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

[1] The Board exempted BRC's acquisition by sublease of the line from Bulkmatic Transport Company. *See Bulkmatic Railroad Corporation-Acquisition Exemption-Bulkmatic Transport Company*, STB Finance Docket No. 34145 (STB served Jan. 15, 2002). The Board also exempted the Chicago Heights Switching Company's (CHSC) operation of the line. *See Chicago Heights Switching Company-Operation Exemption-Bulkmatic Railroad Corporation*, STB Finance Docket No. 34146 (STB served Jan. 15, 2002). BRC states that the exemptions in STB Finance Docket Nos. 34145 and 34146 have not been consummated. BRC also states that the exemption in STB Finance Docket No. 34145 will go forward but that BRC will be the operator of the line in lieu of CHSC.

[2] On March 4, 2002, a petition to reject and/or to revoke the exemptions in STB Finance Docket Nos. 34145 and 34179 and for stay of the effective date of the exemption in STB Finance Docket No. 34179 was filed by Joseph C. Szabo, for and on behalf of the United Transportation United-Illinois Legislative Board (UTU–IL). By decision served on March 5, 2002, the petition for stay was denied. That decision also noted that UTU-IL had not supported its request for rejection of the notices and that the request to revoke the exemptions would be addressed in a subsequent decision. *See Bulkmatic Railroad Corporation-Acquisition and Operation Exemption-Bulkmatic Transport Company*, STB Finance Docket No. 34145 *et al.* (STB served Mar. 5, 2002). In the decision served on March 5, 2002, the title of STB Finance Docket No. 34145 was incorrect. The correct title of STB Finance Docket No. 34145 is shown in note 1 above.

[STB Finance Docket No. 34174]

Grand Trunk Western Railroad Incorporated—Trackage Rights Exemption—Pennsylvania Lines LLC and Norfolk Southern Railway Company

Pennsylvania Lines LLC (PRR), as owner, and Norfolk Southern Railway Company (NS), as operator, pursuant to a written trackage rights agreement entered into among Grand Trunk Western Railroad Incorporated, PRR and NS, have agreed to grant nonexclusive overhead trackage rights to GTW [1] between milepost UW–2.4 of the former Chicago Junction Railway Company to a point approximately 250 feet south of 43rd Street via Tracks #237 and #222, and between 43rd Street and a point approximately 100 feet south of 43rd Street, via Track #224, all in Chicago, IL, a total distance of approximately 0.7 miles.

[1] GTW is a wholly owned subsidiary of Canadian National Railway Company.

The transaction was scheduled to be consummated on or after March 7, 2002, the effective date of the exemption.

The purpose of the trackage rights is to allow GTW to connect with Track #224.

As a condition to this exemption, any employees affected by the trackage rights will be protected by the conditions imposed in *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry. Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

This notice is filed under 49 CFR 1180.2(d)(7). If it contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S. C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

An original and 10 copies of all pleadings, referring to STB Finance Docket No. 34174, must be filed with the Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, NW., Washington, DC 20423–0001. In addition, one copy of each pleading must be served on Michael J. Barron, Jr., 455 North Cityfront Plaza Drive, Chicago, IL 60611–5317.

BILLING CODE 4915–00–P

DEPARTMENT OF VETERANS AFFAIRS (VA)

President's Task Force To Improve Health Care Delivery for Our Nation's Veterans, Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under Public Law 92–463 that a meeting of the President's Task Force to Improve Health Care Delivery for Our Nation's Veterans scheduled to take place on Wednesday, March 13, 2002, beginning at 8:00 a.m. until 5:30 p.m. The meeting will be held in the Horizon Ballroom, the Ronald Reagan Building International Trade Center, 1300 Pennsylvania Avenue, NW., Washington, DC, and is open to the public.

The purpose of the President's Task Force to Improve Health Care Delivery for Our Nation's Veterans is to:

(a) Identify ways to improve benefits and services for Department of Veterans Affairs (VA) beneficiaries and for Department of Defense (DoD) military retirees who are also eligible from VA, through better coordination of the activities of the two departments;

(b) Review barriers and challenges that impede VA and DoD coordination, including budgeting processes, timely billing, cost accounting, information technology, and reimbursement. Identify opportunities to improve such business practices to ensure high quality and cost effective health care; and

(c) Identify opportunities for improved resource utilization through partnership between VA and DoD to maximize the use of resources and infrastructure, including: buildings, information technology and data sharing systems, procurement of supplies, equipment and services, and delivery of care.

During this meeting, the Task Force work groups will continue to obtain current and updated information and to validate and/or clarify that information. The work groups will make presentations on the various topics to the members.

Interested parties can provide written comments to Mr. Dan Amon, Communications Director, President's Task Force to Improve Health Care Delivery for Our Nation's Veterans, 1401 Wilson Boulevard, 4th Floor, Arlington, Virginia, 22209.

Dated: March 5, 2002.

By direction of the Secretary.

Nora E. Egan,

Committee Management Officer.

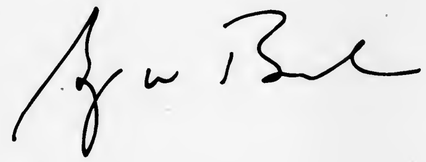
Presidential Documents

Title 3—



The President

Notice of March 13, 2002

Continuation of the National Emergency with Respect to Iran

On March 15, 1995, by Executive Order 12957, the President declared a national emergency with respect to Iran pursuant to the International Emergency Economic Powers Act (50 U.S.C. 1701–1706) to deal with the unusual and extraordinary threat to the national security, foreign policy, and economy of the United States constituted by the actions and policies of the Government of Iran, including its support for international terrorism, efforts to undermine the Middle East peace process, and acquisition of weapons of mass destruction and the means to deliver them. On May 6, 1995, the President issued Executive Order 12959 imposing more comprehensive sanctions to further respond to this threat, and on August 19, 1997, the President issued Executive Order 13059 consolidating and clarifying the previous orders.

Because the actions and policies of the Government of Iran continue to pose an unusual and extraordinary threat to the national security, foreign policy, and economy of the United States, the national emergency declared on March 15, 1995, must continue in effect beyond March 15, 2002. Therefore, in accordance with section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), I am continuing for 1 year the national emergency with respect to Iran. Because the emergency declared by Executive Order 12957 constitutes an emergency separate from that declared on November 14, 1979, by Executive Order 12170, this renewal is distinct from the emergency renewal of November 2001. This notice shall be published in the **Federal Register** and transmitted to the Congress.

THE WHITE HOUSE,
March 13, 2002.

Federal Register

Vol. 67, No. 50

Thursday, March 14, 2002

CUSTOMER SERVICE AND INFORMATION

Federal Register/Code of Federal Regulations	
General Information, indexes and other finding aids	**202–523–5227**
Laws	**523–5227**
Presidential Documents	
Executive orders and proclamations	**523–5227**
The United States Government Manual	**523–5227**
Other Services	
Electronic and on-line services (voice)	**523–3447**
Privacy Act Compilation	**523–3187**
Public Laws Update Service (numbers, dates, etc.)	**523–6641**
TTY for the deaf-and-hard-of-hearing	**523–5229**

ELECTRONIC RESEARCH

World Wide Web

Full text of the daily Federal Register, CFR and other publications is located at: **http://www.access.gpo.gov/nara**

Federal Register information and research tools, including Public Inspection List, indexes, and links to GPO Access are located at: **http://www.nara.gov/fedreg**

E-mail

FEDREGTOC-L (Federal Register Table of Contents LISTSERV) is an open e-mail service that provides subscribers with a digital form of the Federal Register Table of Contents. The digital form of the Federal Register Table of Contents includes HTML and PDF links to the full text of each document.

To join or leave, go to **http://listserv.access.gpo.gov** and select *Online mailing list archives, FEDREGTOC-L, Join or leave the list (or change settings);* then follow the instructions.

PENS (Public Law Electronic Notification Service) is an e-mail service that notifies subscribers of recently enacted laws.

To subscribe, go to **http://hydra.gsa.gov/archives/publaws-l.html** and select *Join or leave the list* (or change settings); then follow the instructions.

FEDREGTOC-L and **PENS** are mailing lists only. We cannot respond to specific inquiries.

Reference questions. Send questions and comments about the Federal Register system to: **info@fedreg.nara.gov**

The Federal Register staff cannot interpret specific documents or regulations.

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. This list is also available online at *http://www.nara.gov/fedreg/plawcurr.html.*

The text of laws is not published in the **Federal Register** but may be ordered in "slip law" (individual pamphlet) form from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–1808). The text will also be made available on the Internet from GPO Access at *http://www.access.gpo.gov/nara/nara005.html.* Some laws may not yet be available.

S. 1206/P.L. 107–149

Appalachian Regional Development Act Amendments of 2002 (Mar. 12, 2002; 116 Stat. 66)

H.R. 1892/P.L. 107–150

Family Sponsor Immigration Act of 2002 (Mar. 13, 2002; 116 Stat. 74)

H.R. 3699/P.L. 107–151

To revise certain grants for continuum of care assistance for homeless individual and families. (Mar. 13, 2002; 116 Stat. 76)

Last List March 13, 2002

Public Laws Electronic Notification Service (PENS)

PENS is a free electronic mail notification service of newly enacted public laws. To subscribe, go to *http://hydra.gsa.gov/archives/publaws-l.html* or send E-mail to **listserv@listserv.gsa.gov** with the following text message:

SUBSCRIBE PUBLAWS-L Your Name.

Note: This service is strictly for E-mail notification of new laws. The text of laws is not available through this service. **PENS** cannot respond to specific inquiries sent to this address.

Would you like to know. . .

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected
The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected. $35 per year.

Federal Register Index
The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references. $30 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Superintendent of Documents **Subscription** Order Form

INFORMATION ABOUT THE SUPERINTENDENT OF DOCUMENTS' SUBSCRIPTION SERVICE

Know when to expect your renewal notice and keep a good thing coming. To keep our subscription prices down, the Government Printing Office mails each subscriber *only one renewal notice*. You can learn when you will get your renewal notice by checking the number that follows month/year code on the top line of your label *as shown in this example:*

A renewal notice will be sent approximately 90 days **before the shown date.**

```
                                        DEC97 R 1
AFR SMITH212J
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20704
```

A renewal notice will be sent approximately 90 days **before the shown date.**

```
                                        DEC97 R 1
AFRDO SMITH212J
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20704
```

To be sure that your service continues without interruption, please return your renewal notice promptly. If your subscription service is discontinued, simply send your mailing label from any issue to the Superintendent of Documents, Washington, DC 20402–9372 with the proper remittance. Your service will be reinstated.

To change your address: Please SEND YOUR MAILING LABEL, along with your new address to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9373.

To inquire about your subscription service: Please SEND YOUR MAILING LABEL, along with your correspondence, to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9373.

To order a new subscription: Please use the order form provided below.

The **FEDERAL REGISTER** is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see http://www.nara.gov/fedreg.

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and it includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

GPO Access users can choose to retrieve online **Federal Register** documents as TEXT (ASCII text, graphics omitted), PDF (Adobe Portable Document Format, including full text and all graphics), or SUMMARY (abbreviated text) files. Users should carefully check retrieved material to ensure that documents were properly downloaded.

On the World Wide Web, connect to the **Federal Register** at http://www.access.gpo.gov/nara. Those without World Wide Web access can also connect with a local WAIS client, by Telnet to swais.access.gpo.gov, or by dialing (202) 512–1661 with a computer and modem. When using Telnet or modem, type swais, then log in as guest with no password.

For more information about GPO Access, contact the GPO Access User Support Team by E-mail at gpoaccess@gpo.gov; by fax at (202) 512–1262; or call (202) 512–1530 or 1–888–293–6498 (toll free) between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $699, or $764 for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $264. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $10.00 for each issue, or $10.00 for each group of pages as actually bound; or $2.00 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 67 FR 12345.

Printed on recycled paper.

Rules and Regulations

Federal Register
Vol. 67, No. 51
Friday, March 15, 2002

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

Agricultural Marketing Service

7 CFR Part 989

[Docket No. FV02–989–2 IFR]

Raisins Produced From Grapes Grown in California; Reduction In Production Cap for 2002 Diversion Program

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule with request for comments.

SUMMARY: This rule reduces the production cap for the 2002 diversion program (RDP) for Natural (sun-dried) Seedless (NS) raisins from 2.75 to 2.0 tons per acre. The cap is specified under the Federal marketing order for California raisins (order). The order regulates the handling of raisins produced from grapes grown in California and is administered locally by the Raisin Administrative Committee (RAC). Under an RDP, producers receive certificates from the RAC for curtailing their production to reduce burdensome supplies. The certificates represent diverted tonnage. Producers sell the certificates to handlers who, in turn, redeem the certificates with the RAC for raisins from the prior year's reserve pool. The production cap limits the yield per acre that a producer can claim in an RDP. Reducing the cap for the 2002 RDP will bring the figure in line with 2001 crop yields.

DATES: Effective March 18, 2002. Comments received by April 1, 2002, will be considered prior to issuance of a final rule.

ADDRESSES: Interested persons are invited to submit written comments concerning this rule. Comments must be sent to the Docket Clerk, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW STOP 0237, Washington, DC 20250–0237; Fax: (202) 720–5698, or e-mail: *moab.docketclerk@usda.gov*. All comments should reference the docket number and the date and page number of this issue of the **Federal Register** and will be made available for public inspection in the Office of the Docket Clerk during regular business hours, or can be viewed at: *http://www.ams.usda.gov/fv/moab.html*.

FOR FURTHER INFORMATION CONTACT: Maureen T. Pello, Senior Marketing Specialist, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 2202 Monterey Street, suite 102B, Fresno, California 93721; telephone: (559) 487–5901, Fax: (559) 487–5906; or George Kelhart, Technical Advisor, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW STOP 0237, Washington, DC 20250–0237; telephone: (202) 720–2491, Fax: (202) 720–5698.

Small businesses may request information on complying with this regulation by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW STOP 0237, Washington, DC 20250–0237; telephone: (202) 720–2491, Fax: (202) 720–5698, or e-mail: *Jay.Guerber@usda.gov*.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement and Order No. 989 (7 CFR part 989), both as amended, regulating the handling of raisins produced from grapes grown in California, hereinafter referred to as the "order." The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

The Department of Agriculture (USDA) is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is not intended to have retroactive effect. This rule will not preempt any State or local laws, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This rule reduces the production cap for the 2002 RDP for NS raisins from 2.75 to 2.0 tons per acre. The cap is specified in the order. Under an RDP, producers receive certificates from the RAC for curtailing their production to reduce burdensome supplies. The certificates represent diverted tonnage. Producers sell the certificates to handlers who, in turn, redeem the certificates with the RAC for raisins from the prior year's reserve pool. The production cap limits the yield per acre that a producer can claim in an RDP. Reducing the cap for the 2002 RDP will bring the figure in line with 2001 crop yields. This action was recommended by the RAC at a meeting on November 13, 2001.

Volume Regulation Provisions

The order provides authority for volume regulation designed to promote orderly marketing conditions, stabilize prices and supplies, and improve producer returns. When volume regulation is in effect, a certain percentage of the California raisin crop may be sold by handlers to any market (free tonnage) while the remaining percentage must be held by handlers in a reserve pool (reserve) for the account of the RAC. Reserve raisins are disposed of through various programs authorized under the order. For example, reserve raisins may be sold by the RAC to handlers for free use or to replace part of the free tonnage they exported; carried over as a hedge against a short crop the following year; or may be disposed of in other outlets not competitive with those for free tonnage raisins, such as government purchase,

VOL
67

2002
UMI

distilleries, or animal feed. Net proceeds from sales of reserve raisins are ultimately distributed to producers.

Raisin Diversion Program

The RDP is another program concerning reserve raisins authorized under the order and may be used as a means for controlling overproduction. Authority for the program is provided in § 989.56 of the order, and additional procedures are specified in § 989.156 of the order's administrative rules and regulations.

Pursuant to these sections, the RAC must meet by November 30 each crop year to review raisin data, including information on production, supplies, market demand, and inventories. If the RAC determines that the available supply of raisins, including those in the reserve pool, exceeds projected market needs, it can decide to implement a diversion program, and announce the amount of tonnage eligible for diversion during the subsequent crop year. Producers who wish to participate in the RDP must submit an application to the RAC. Such producers curtail their production by vine removal or some other means established by the RAC and receive a certificate from the RAC which represents the quantity of raisins diverted. Producers sell these certificates to handlers who pay producers for the free tonnage applicable to the diversion certificate minus the established harvest cost for the diverted tonnage. Handlers redeem the certificates by presenting them to the RAC and paying an amount equal to the established harvest cost plus payment for receiving, storing, fumigating, handling, and inspecting the tonnage represented on the certificate. The RAC then gives the handler raisins from the prior year's reserve pool in an amount equal to the tonnage represented on the diversion certificate. The new crop year's volume regulation percentages are applied to the diversion tonnage acquired by the handler (as if the handler had bought raisins directly a producer).

Production Cap

Section 989.56(a) of the order specifies a production cap of 2.75 tons per acre for any production unit of a producer approved for participation in an RDP. The RAC may recommend, subject to approval by USDA, reducing the 2.75 tons per acre production cap. The production cap limits the yield that a producer can claim. Producers who historically produce yields above the production cap can choose to produce a crop rather than participate in the diversion program. No producer is required to participate in an RDP.

Pursuant to § 989.156, producers who wish to participate in a program must submit an application to the RAC by December 20. Producers must specify, among other things, the raisin production and the acreage covered by the application. RAC staff verifies producers production claims using handler acquisition reports and other available information. However, a producer could misrepresent production by claiming that some raisins produced on one ranch were produced on another, and use an inflated yield on the RDP application. Thus, the production cap limits the amount of raisins for which a producer participating in an RDP may be credited, and protects the program from overstated yields.

RAC Recommendation

The RAC met on November 13, 2001, and recommended reducing the production cap from 2.75 to 2.0 tons per acre. With 2001 raisin-type variety grape production down by 31 percent, according to the California Agricultural Statistics Service, the RAC recommended reducing the production cap by about 30 percent to reflect 2001 crop yields. Paragraph (t) in § 989.156 of the order's rules and regulations is revised accordingly.

On November 28, 2001, the RAC met and reviewed data relating to the quantity of reserve raisins and anticipated market needs. With a 2001–02 NS crop estimated at 359,341 tons, and a computed trade demand (comparable to market needs) of 235,850 tons, the RAC projects a reserve pool of 123,491 tons of NS raisins. With such a large anticipated reserve, the RAC announced that 45,182 tons of NS raisins would be eligible for diversion under the 2002 RDP. Of the 45,182 tons, 40,182 tons will be made available to approved producers who submitted applications to the RAC by December 20, 2001, with producers who plan to remove vines receiving priority over those who plan to curtail (abort) production through spur pruning or other means. Section 989.156(d) requires the RAC to give priority to applicants who agree to remove vines. Another 5,000 tons will be made available to approved producers who submit applications to the RAC from December 21, 2001, through May 1, 2002, and plan to remove vines. Authority for this additional opportunity for vine removal is provided in § 989.156(s).

Initial Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities. Accordingly, AMS has prepared this initial regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 20 handlers of California raisins who are subject to regulation under the order and approximately 4,500 raisin producers in the regulated area. Small agricultural firms are defined by the Small Business Administration (13 CFR 121.201) as those having annual receipts of less than $5,000,000, and small agricultural producers are defined as those having annual receipts of less than $750,000. Thirteen of the 20 handlers subject to regulation have annual sales estimated to be at least $5,000,000, and the remaining 7 handlers have sales less than $5,000,000. No more than 7 handlers, and a majority of producers, of California raisins may be classified as small entities.

This rule revises § 989.156(t) of the order's rules and regulations regarding the RDP. Under an RDP, producers receive certificates from the RAC for curtailing their production to reduce burdensome supplies. The certificates represent diverted tonnage. Producers sell the certificates to handlers who, in turn, redeem the certificates with the RAC for raisins from the prior year's reserve pool. The order specifies a production cap limiting the yield per acre that a producer can claim in an RDP. This rule reduces the cap from 2.75 to 2.0 tons per acre to accurately reflect 2001 crop yields. Authority for this action is provided in § 989.56(a) of the order.

Regarding the impact of this action on affected entities, producers who participate in the 2002 RDP will have the opportunity to earn some income for not harvesting a 2002–03 crop. Producers will sell the certificates to handlers next fall and be paid for the free tonnage applicable to the diversion certificate minus the harvest cost for the diverted tonnage. Applicable harvest costs for the 2002 RDP were established by the RAC at $340 per ton.

Reducing the production cap will have little impact on raisin handlers. Handlers will pay producers for the free tonnage applicable to the diversion certificate minus the $340 per ton harvest cost. Handlers will redeem the certificates for 2001–02 crop NS reserve raisins and pay the RAC the $340 per ton harvest cost plus payment for bins ($20 per ton) and for receiving, storing, fumigating, handling (currently totaling $46 per ton), and inspecting (currently $9.00 per ton) the tonnage represented on the certificate. Reducing the production cap will have little impact on handler payments for reserve raisins under the 2001 RDP.

Alternatives to the recommended action include leaving the production cap at 2.75 tons per acre or reducing it to another figure besides 2.0 tons per acre. However, the majority of RAC members believe that a cap of 2.0 tons per acre more accurately reflects 2001 yields.

There was some discussion at the RAC's meeting that the 2.0-ton per acre production cap was too low and would discriminate against producers with high yields. In recent years, cultural practices have evolved to where some producers' yield per acre is reportedly as high as 4 tons. However, as previously stated, the program is voluntary and producers whose vines can produce 4 tons per acre have the option to produce a raisin crop rather than apply for the RDP and be subject to the production cap.

This rule imposes no additional reporting or recordkeeping requirements on either small or large raisin handlers. In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the information collection requirement referred to in this rule (i.e., the application) has been approved by the Office of Management and Budget (OMB) under OMB Control No. 0581–0178. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies. Finally, USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule.

Further, the RAC's meeting on November 13, 2001, the RAC's Administrative Issues Subcommittee meeting on that same day but prior to the RAC meeting where this action was deliberated, and the RAC's meeting on November 28, 2001, where a diversion program was announced, were all public meetings widely publicized throughout the raisin industry. All interested persons were invited to attend the meetings and participate in the industry's deliberations. Finally, all interested persons are invited to submit information on the regulatory and information impact of this action on small businesses.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: *http://www.ams.usda.gov/fv/moab.html*. Any questions about the compliance guide should be sent to Jay Guerber at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

A 15-day comment period is provided to allow interested persons to respond to this rule. A 15-day comment period is deemed appropriate because producer applications were due to the RAC by December 20, 2001, and therefore the 2.0 tons per acre production cap should be in place as soon as possible.

After consideration of all relevant material presented, including the information and recommendation submitted by the RAC and other available information, it is hereby found that this rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined upon good cause that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice prior to putting this rule into effect, and that good cause exists for not postponing the effective date of this rule until 30 days after publication in the **Federal Register** because: (1) The submission deadline for producer applications for the 2002 RDP was December 20, 2001; (2) producers are aware of this action which was recommended by the RAC at a public meeting; (3) the program is voluntary, and any producer can choose to produce a raisin crop for delivery in 2002; and (4) this interim final rule provides a 15-day comment period for written comments and all comments timely received will be considered prior to finalization of this rule.

List of Subjects in 7 CFR Part 989

Grapes, Marketing agreements, Raisins, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 989 is amended as follows:

PART 989 — RAISINS PRODUCED FROM GRAPES GROWN IN CALIFORNIA

1. The authority citation for 7 CFR part 989 continues to read as follows:

Authority: 7 U.S.C. 601–674.

2. In § 989.156, paragraph (t) is revised to read as follows:

§ 989.156 Raisin diversion program.

* * * * *

(t) Pursuant to § 989.56(a), the production cap for the 2002 raisin diversion program for the Natural (sun-dried) Seedless varietal type is 2.0 tons of raisins per acre.

Dated: March 11, 2002.

[Docket No. 99–053–2]

Origin Health Certificates for Livestock Exported From the United States

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the regulations pertaining to animal exports and the standards for accredited veterinarians to allow origin health certificates for animals intended for export from the United States to be valid for more than 30 days in some cases, depending on the testing requirements of the country of destination. This change will align our requirements for export origin health certificates with the testing requirements of importing countries. This action will eliminate the need for exporters to obtain another certificate when animals arrive at the port of embarkation after more than 30 days have elapsed, thereby reducing costs and delays for U.S. livestock exporters who ship animals to certain countries. This change will not increase the risk of infected or exposed animals being exported, since all animals are inspected an additional time before leaving the United States.

EFFECTIVE DATE: April 1, 2002.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR part 91, referred to below as the regulations, prescribe conditions for exporting animals from the United States. Among other things, § 91.3(a) provides that all animals intended for exportation be accompanied from the State of origin to the port of embarkation or border by an origin health certificate issued by an Animal and Plant Health Inspection Service (APHIS) representative or an accredited veterinarian. Origin health certificates attest that the animals in a shipment were inspected prior to export and were found free from any evidence of or exposure to communicable disease. The certificates also include identifying information pertaining to the individual animals in the shipment, as well as all test results, certifications, or other statements required by the country of destination.

The regulations in § 91.3(c) further require that all samples for tests be taken by an APHIS inspector or accredited veterinarian in the State of origin of the export movement and that, with certain exceptions, such sampling and testing be conducted within 30 days prior to the date of the export movement. Exceptions include cases in which the country of destination requires testing more than 30 days prior to the date of export. The regulations in 9 CFR part 161 contain requirements and standards for accredited veterinarians. Accredited veterinarians are authorized by APHIS to perform various types of work such as testing and inspecting animals for and issuing origin health certificates—on behalf of the Federal Government. Section 161.3, paragraph (b), states the length of time that certificates and other documents issued by an accredited veterinarian shall be valid. Prior to this final rule, the timeframe was 30 days from the date of inspection of the animal identified on the document, without exception. This meant that animals intended for export had to be inspected for purposes of the origin health certificate within 30 days prior to the date of export, even when sampling and testing could be conducted earlier.

On April 17, 2000, we published in the **Federal Register** (65 FR 20384–20387, Docket No. 99–053–1) a proposal to amend § 91.3(a) to allow animals intended for exportation to be inspected for origin health certificates more than 30 days prior to the date of export, in accordance with the testing requirements of the country of destination. In conjunction with this proposed action, we also proposed to amend the language in § 91.3(c) to provide that sampling and testing may be conducted more than 30 days prior to the date of export in instances where a receiving country allows rather than just requires, as the regulations previously stated this to occur. In addition, we proposed replacing the phrase "the date of the movement of the animals for export" with "the date of export" in both 91.3(a) and (c). We proposed this change to clarify that animals must be tested and inspected for origin health certificates 30 days or more, if the receiving country requires or allows it prior to the date they are actually exported, rather than 30 days from the date the animals started in transit to the port of embarkation or border. We further proposed to amend § 161.3(b) to allow origin health certificates issued by accredited veterinarians to be valid for more than 30 days in cases where the Administrator allows the animals identified on the document to be inspected more than 30 days prior to the date of export.

We solicited comments concerning our proposal for 60 days ending June 16, 2000. We received five comments by that date—four from livestock exporters, and one from a representative of a livestock export industry association. All supported the proposed rule, stating that, among other things, the proposed changes would improve their efficiency, eliminate costly delays, and help expedite livestock shipments.

However, two of the commenters indicated that, while our action was a step in the right direction, we did not go far enough. These commenters asserted that APHIS should change the validity timeframe of all U.S. origin health certificates and test results from 30 days to 45 days, unless otherwise required by the importing country. These commenters stated that 30 days is an insufficient amount of time to address the numerous problems that may arise during the export process; for example, if reactor animals need to be retested, or if mistakes or delays occur at the diagnostic laboratory. One of these commenters also asserted that extending the validity of origin health certificates for another 15 days would, in serious outbreak situations, give exporters time to avoid flight cancellation fees imposed by the airlines, and give importers time to reschedule quarantine space without incurring penalties. Moreover, this commenter stated that such a change would give APHIS' National Veterinary Services Laboratories (NVSL) more time to perform the necessary export tests.

One of the commenters also objected to our proposal to change the phrase "date of movement for export" in the regulations to "date of export." This commenter stated that the "previous interpretation" that tests and origin health certificates remained valid if the animals had started in transit to the port of embarkation or border prior to 30 days from the date of the first test or the date of issuance of the certificate had assisted in facilitating livestock shipments on many occasions. The commenter also asserted that this change would likely contribute to the time problems faced by exporters.

We are making no changes to the final rule based on these comments. We agree that 30 days can be a short amount of time in which to complete the numerous steps involved in the export certification process. More to the point, however, the countries of destination—not APHIS— determine and enforce their own import health requirements, including the timeframes within which test results and export origin health certificates are considered valid.

As stated previously, while we recognize that problems and delays can occur with regard to obtaining the necessary tests, inspection, and other documentation required to certify animals for export, our experience shows that 30 days is not an unreasonable amount of time in most cases to complete the steps involved. For example, it typically takes only about 7 to 10 days to obtain test results for brucellosis, as well as for many of the other diseases of concern to importing countries. Nevertheless, APHIS' NVSL has undertaken a number of initiatives to improve its ability to provide efficient and expeditious service to exporters and other customers. For example, NVSL officials have developed guidelines that address the specific test requirements for exporting swine to China. NVSL officials have also developed a booklet that contains information about all currently available tests and reagents, including the length of time required to conduct each test. This document is available on the NVSL website at *http://www.aphis.usda.gov/vs/nvsl*. To avoid delays in processing the diagnostic tests necessary for export health certification, exporters are also encouraged to contact NVSL and/or the APHIS area veterinarian in charge in the State of origin to make arrangements for testing well in advance of planned shipping dates. Advance notification is particularly important for tests that are not run on a routine basis, such as those for diseases like *Salmonella abortus-equi*.

It is ultimately the exporters' responsibility to ensure that he or she complies with all requirements for testing and obtaining the appropriate health certification for animals intended for export. Accordingly, while we recognize that flight and quarantine space cancellations caused by delays in completing the steps involved in the export process can be costly to both exporters and importers, such issues are beyond the scope of APHIS' jurisdiction and this rulemaking action. Finally, it was always our intent that the actual date of export—not the date when animals start in transit to the port of embarkation or border—determine the timeframe within which origin health certificates and test results are deemed valid.

Therefore, for the reasons given in the proposed rule and in this document, we are adopting the proposed rule as a final rule, without change.

Effective Date

This is a substantive rule that relieves restrictions and, pursuant to the provisions of 5 U.S.C. 553, may be made effective less than 30 days after publication in the **Federal Register**. By extending the validity for origin health certificates issued for animals being exported to certain countries, this rule will make the export process less time consuming and expensive for livestock exporters and marketers. We have determined that approximately 2 weeks are needed to ensure that APHIS field personnel receive official notice of this change in the regulations. Therefore, the Administrator of APHIS has determined that this rule should be made effective 15 days after publication in the **Federal Register**.

Executive Order 12866 and Regulatory Flexibility Act

This rule has been reviewed under Executive Order 12866. The rule has been determined to be not significant for the purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

This rule amends the regulations in 9 CFR part 91 to allow animals to be inspected for an origin health certificate as early as the country of destination allows or requires sampling or testing to be performed. We are also amending 9 CFR part 161 to allow an origin health certificate to be valid for more than 30 days when animals are allowed to be inspected more than 30 days prior to the date of movement for export in accordance with § 91.3.

Costs

Formerly, exporters who had their animals inspected and obtained an origin health certificate more than 30 days prior to the date of export had to obtain a new origin health certificate when the animals arrived at the port of embarkation or the border. On average, it costs $150 per shipment to have a veterinarian inspect animals for export and issue an origin health certificate. When this final rule becomes effective, the original origin health certificate will still be valid when the animals arrive at the port of embarkation or the border, and the exporter will not incur the costs of obtaining an additional origin health certificate.

Live Animal Exports

United Nations trade data show that U.S. exports of live animals are worth more than $1½ billion dollars a year (see tables 1 and 2). On average, U.S. exports of live animals from 1993 through 1999 were distributed as follows: More than 40 percent went to Mexico and Canada, approximately 13.5 percent went to Japan, 2 percent went to Brazil, 1.1 percent went to the Republic of Korea (South Korea), and less than 1 percent went to Turkey, Egypt, or Taiwan. Of these countries, Brazil, Egypt, Japan, South Korea, Taiwan, and Turkey provide for sampling and testing of live animals more than 30 days prior to exportation from the country of origin.

1998	20.3	19.9	1.5	0.8	10.7	0.6	0.3	1.4
1999	15.8	27.4	1.5	0.6	11.4	1.0	0.4	0.6

Kazakhstan, Turkmenistan, and Uzbekistan also provide for sampling and testing of live animals more than 30 days prior to exportation from the country of origin. These three Central Asian countries imported relatively few live animals from 1993 through 1998 and none from the United States; 1999 import data are not currently available. Table 3 shows the value of live animals imported into these three countries and

the rest of the world, based on United Nations data.

TABLE 3.—IMPORTS OF LIVE ANIMALS

[In $1,000]

Year	Kazakhstan	Turkmenistan	Uzbekistan	All countries
1993	$600	$551	.....	$8,965,958
1994	29	.....	$400	9,556,484
1995	427	.....	200	10,020,452
1996	137	.....	200	9,925,704
1997	231	.....	200	8,991,483
1998	433	.....	200	8,991,071
1999	.....	.....	.....	.....

This final rule will facilitate live animal exports from the United States to Brazil, Egypt, Japan, Kazakhstan, Korea, Taiwan, Turkey, Turkmenistan, Uzbekistan, and other countries that may allow or require animals to be tested, or samples to be taken for testing, more than 30 days prior to export from the United States. Approximately 17.5 percent of live animal exports from the United States went to these countries in the years 1993 through 1999. We do not know how many of these shipments were made by small entities. However, all U.S. entities, including small entities, who export live animals to these countries will benefit from this rule, albeit in a relatively small way, by not having to bear the costs of an additional origin health certificate, estimated at approximately $150 per shipment.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

Executive Order 12988

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule: (1) Preempts all State and local laws and regulations that are inconsistent with this rule; (2) has no retroactive effect; and (3) does not require administrative proceedings before parties may file suit in court challenging this rule.

Paperwork Reduction Act

This final rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

List of Subjects

9 CFR Part 91

Animal diseases, Animal welfare, Exports, Livestock, Reporting and recordkeeping requirements, Transportation.

9 CFR Part 161

Reporting and recordkeeping requirements, Veterinarians.

Accordingly, we are amending 9 CFR parts 91 and 161 as follows:

PART 91—INSPECTION AND HANDLING OF LIVESTOCK FOR EXPORTATION

1. The authority citation for part 91 is revised to read as follows:

Authority: 21 U.S.C. 105, 112, 113, 114a, 120, 121, 134b, 134f, 136, 136a, 612, 613, 614, and 618; 46 U.S.C. 3901 and 3902; 49 U.S.C. 1509(d); 7 CFR 2.22, 2.80, and 371.4.

2. In § 91.3, paragraph (a) and the second sentence in paragraph (c) are revised to read as follows:

§ 91.3 General export requirements.

(a) All animals intended for exportation to a foreign country, except by land to Mexico or Canada, must be accompanied from the State of origin of the export movement to the port of embarkation by an origin health certificate. All animals intended for exportation by land to Mexico or Canada must be accompanied from the State of origin of the export movement to the border of the United States by an origin health certificate. The origin health certificate must certify that the animals were inspected within the 30 days prior to the date of export, except as follows: When the Administrator allows sampling or testing to be done more than 30 days prior to the date of export, in accordance with paragraph (c) of this section, then the animals also may be inspected within that same time period, and the origin health certificate will remain valid for that time period. The origin health certificate must certify that the animals were found upon inspection to be healthy and free from evidence of communicable disease and exposure to communicable disease. The origin health certificate must be endorsed by an authorized APHIS veterinarian in the State of origin and must include any test results added by the authorized APHIS veterinarian pursuant to § 161.3(k) of this chapter (any added test results must be initialed by the authorized veterinarian). The origin health certificate must individually identify the animals in the shipment as to species, breed, sex, and age and, if applicable, must also show registration name and number, tattoo markings, or other natural or acquired markings. The origin health certificate must include all test results, certifications, or other statements required by the country of destination.

* * * * *

(c) * * * The samples must be taken and tests must be made within the 30 days prior to the date of export, except that the Administrator may allow such sampling or testing to be conducted more than 30 days prior to the date of export if required or allowed by the receiving country, and the tuberculin test may be conducted within the 90 days prior to the date of export. * * *

* * * * *

PART 161—REQUIREMENTS AND STANDARDS FOR ACCREDITED VETERINARIANS AND SUSPENSION OR REVOCATION OF SUCH ACCREDITATION

3. The authority citation for part 161 continues to read as follows:

Authority: 15 U.S.C. 1828; 21 U.S.C. 105, 111–114, 114a, 114a–1, 115, 116, 120, 121, 125, 134b, 134f, 612, and 613; 7 CFR 2.22, 2.80, and 371.4.

4. In § 161.3, the last two sentences in paragraph (b) are revised to read as follows.

§ 161.3 Standards for accredited veterinarian duties.

* * * * *

(b) * * * Certificates, forms, records, and reports shall be valid for 30 days following the date of inspection of the animal identified on the document, except that origin health certificates may be valid for a longer period of time as provided in § 91.3(a) of this chapter. The accredited veterinarian must distribute copies of certificates, forms, records, and reports according to instructions issued to him or her by the Veterinarian-in-Charge.

[Docket No. 00–028–2]

Importation of Horses, Ruminants, Swine, and Dogs; Inspection and Treatment for Screwworm

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are adopting as a final rule, with two changes, an interim rule that amended the animal import regulations to require horses, ruminants, and swine that are imported from regions of the world where screwworm is considered to exist to be inspected and treated, under certain conditions, for screwworm. In the interim rule, we also amended the regulations to require dogs that are imported from regions of the world where screwworm is considered to exist to be inspected, and if necessary, treated for screwworm. The interim rule was necessary to prevent the introduction of screwworm into the United States.

EFFECTIVE DATE: March 15, 2002.

FOR FURTHER INFORMATION CONTACT: Dr. Glen I. Garris, Senior Staff Officer, Invasive Species Team, Animal Health Programs, VS, APHIS, 4700 River Road Unit 33, Riverdale, MD 20737–1231; (301) 734–8093.

SUPPLEMENTARY INFORMATION:

Background

Screwworm is a pest native to tropical areas of South America, the Indian subcontinent, Southeast Asia, tropical and sub-Saharan Africa, and the Arabian peninsula that causes extensive damage to livestock and other warmblooded animals. The adult female screwworm typically lays her eggs in open wounds on warmblooded host animals. Screwworm larvae hatch in as little as 12 hours and begin to feed on the flesh of the host animal; they are fully grown within 5 to 7 days after hatching. The fully grown larvae then drop from the host and tunnel into the soil, where they form protective cases to house themselves while they pupate. Adult screwworm flies emerge from these pupal cases and are ready to mate again within 3 to 5 days.

Screwworm was eradicated from the United States in 1966. However, in July of 1999, and again in February and March of 2000, screwworm larvae were found in horses that were imported into the United States from Venezuela and Argentina.

The regulations in 9 CFR part 93 (referred to below as the regulations) prohibit or restrict the importation of certain animals and birds into the United States to prevent the introduction of communicable diseases of livestock and poultry. Subparts C, D, E, and F of the regulations govern the importation of horses, ruminants, swine, and dogs, respectively.

In an interim rule effective and published in the **Federal Register** on November 13, 2000 (65 FR 67617–67624, Docket No. 00–028–1), we amended the regulations to require horses, ruminants, and swine that are imported from regions of the world where screwworm is considered to exist to be inspected and treated, under certain conditions, for screwworm. We also amended the regulations to require dogs that are imported from regions of the world where screwworm is considered to exist to be inspected, and if necessary, treated for screwworm. The interim rule was necessary to prevent the introduction of screwworm into the United States.

We solicited comments concerning the interim rule for 60 days ending January 12, 2001. We received five comments by that date. They were from foreign and State governments, a trade association, and a U.S. veterinary medical association. We have carefully considered all of the comments we received. They are discussed below by topic.

Note: As explained below, we are amending the regulations in this final rule to require that horses that are imported from screwworm-affected regions must be tranquilized or sedated, rather than anesthetized, for the final examination so that the veterinarian performing that examination can thoroughly examine the horses' external genitalia. We are also amending the regulations to clarify that only male horses must be tranquilized or sedated for the purposes of the final examination. For consistency's sake, in the preamble of this final rule, we use the terms "sedate or tranquilize" in place of "anesthetize" in discussing the comments submitted by the public when it is consistent with the intent of the issues raised.

Anesthetization Requirement

In the interim rule, we set out inspection and treatment requirements for horses, ruminants, swine, and dogs imported from any region of the world where screwworm is considered to exist. Among other requirements, the interim rule established that horses that are imported from screwworm-affected regions be quarantined for a minimum of 7 days upon arrival in the United States at an Animal and Plant Health Inspection Service (APHIS) animal import center. On the seventh day of quarantine, prior to a horse's release, a veterinarian must examine the horse for screwworm at the expense of the owner or broker. For this final examination, the interim rule provided that the veterinarian must anesthetize the horse so that he or she can thoroughly examine the horse's external genitalia. If screwworms are found during this examination, the horse must be held in quarantine and treated until free.

Several commenters took issue with requiring that horses imported from screwworm-affected regions be anesthetized for the final examination. These commenters stated that anesthesia is unnecessary and that tranquilization or sedation will be sufficient in order to perform the final examination. Two of these commenters expressed concern over the physical risk associated with the use of anesthetics. One commenter recommended that if APHIS finds it necessary to examine the horses for screwworm during quarantine, then that examination could be performed on the final day of quarantine without anesthetization. This commenter suggested that if the veterinarian performing the final examination determined that further examination requiring anesthetization was necessary, then the horse could be held and examined at a later point in time.

We agree with these commenters that sedating or tranquilizing the horses will

VOL
67
ISS
51
MR
15
2002
UMI

be sufficient so that the veterinarian performing the final examination can thoroughly examine the horses' external genitalia. Many of the horses imported into or entering the United States from screwworm-affected regions are valuable purebred horses. Tranquilizing or sedating the male horses will help to ensure the safety of the horses and the veterinarian during the examination. Therefore, we are amending the regulations to require that horses that are imported from screwworm-affected regions be tranquilized or sedated, rather than anesthetized, for the final examination so that the horses' external genitalia can be thoroughly examined by the veterinarian.

Horses Subject to the Sedation or Tranquilization Requirement

One commenter stated that, while it has been assumed that the tranquilization or sedation requirement applies only to male horses because of the difficulties in examining their external genitalia, the interim rule does not specify only male horses are subject to this requirement. This commenter recommended that we specify that male horses must be tranquilized or sedated for the final examination.

We appreciate this commenter's suggestion. The interim rule required that horses be tranquilized or sedated for the final examination so that the external genitalia of the horses can be thoroughly examined. However, we did not state that this requirement only pertains to male horses. For greater clarity, we are amending the regulations in § 93.301(j)(7) in this final rule to specify that only male horses are subject to this requirement.

Different Examination Requirements for Horses Than for Ruminants and Swine

Two commenters questioned the rationale for requiring the tranquilization or sedation of only horses for the final examination; both commenters noted that there is no similar requirement for ruminants or swine. One of these commenters asked if APHIS had determined that tranquilizing or sedating ruminants and swine is unnecessary to thoroughly examine their external genitalia, or if APHIS had gathered information from other countries confirming that screwworm infestations are not found on the prepuce of ruminants and swine. Another commenter stated that if horses are tranquilized or sedated for the final examination so that the veterinarian can thoroughly examine the horses' external genitalia, then the genitals of all species should be examined because screwworm infestations do not occur exclusively on the prepuce of horses. This commenter also stated that, because of the final examination requirement and extended quarantine period for horses that are imported from screwworm-affected regions, the interim rule placed a greater regulatory burden on the horse industry than on importers of other species mentioned in the rule.

Protocol requirements for ruminants and swine are the same as for horses, other than for the 7-day quarantine and final examination of the tranquilized or sedated animal. Due to the life cycle of screwworm, a minimum quarantine period of 7 days is necessary to ensure the detection of screwworm infestations in animals that were infested just prior to their export to the United States. Because ruminants and swine are already required under the regulations to be quarantined for at least 7 days, it was not necessary to adjust the length of time those animals must be held in quarantine. It was necessary, however, to extend to 7 days the length of time that horses, when imported from screwworm-affected regions, must be held in quarantine, given the life cycle of the pest.

After hatching, screwworm larvae are fully grown within 5 to 7 days. Because horses are released from quarantine close to the time that any screwworm infestations that may have occurred just prior to export would mature and become visible upon inspection, it is necessary to perform an examination on the final day of quarantine to ensure that any infestations are detected and eliminated. Due to the difficulties in examining the external genitalia of male horses, those animals must be tranquilized or sedated for that examination so that the veterinarian can thoroughly examine the external genitalia while ensuring his or her own safety, as well as the safety of the horses.

Screwworm infestations can be detected on the prepuce of ruminants and swine. However, except for those ruminants imported from Central America and the West Indies, ruminants and swine are already required under §§ 93.411 and 93.510 of the regulations to be quarantined for 15 and 30 days, respectively. During this period, the animals are observed for disease or infestation with animal pests. These quarantine and inspection requirements provide ample time and opportunity to detect and eliminate any screwworm infestations on these animals. Therefore, a final examination for these animals is unnecessary.

Ruminants from Central America and the West Indies are subject to different importation requirements than ruminants from all other regions. Out of those countries and regions that constitute Central America and the West Indies, only Panama is affected by screwworm. Panama does not have a history of ruminant exports to the United States; within the last 10–15 years, only one ruminant, a prized bull, was imported from Panama into the United States. In the event that ruminants were imported from Panama, or in the event that ruminants were imported from any other region in Central America or the West Indies that becomes affected by screwworm, the ruminants are required under § 93.423 to be quarantined for 7 days upon arrival in the United States, during which time they are subject to dippings and blood tests or other tests necessary to determine if these animals are free from communicable diseases. We believe that these requirements are sufficient to prevent the introduction of screwworm from ruminants imported from those regions.

Treatment Protocols

Several commenters questioned the need to quarantine horses for 7 days before performing the final examination for screwworm infestation and recommended alternative treatment protocols. One of these commenters suggested that if ivermectin was administered at recommended doses 2 weeks prior to export and again 24 hours prior to export, there would be sufficient tissue concentration of the drug to ensure that any larvae present are killed. Another commenter questioned whether the 7-day quarantine could be cut to 5 days with a second administration of ivermectin upon arrival in the United States.

Research has shown that ivermectin is effective within 3 to 5 days after treatment against the early stages of screwworm infestation, which are difficult to observe during visual inspection of the animals. Screwworm larvae hatch in as little as 12 hours and are fully grown within 5 to 7 days after hatching. Although additional doses of ivermectin administered just prior to export or upon arrival in the United States would reduce the risk of the horses becoming infested with screwworm, a 7-day quarantine is necessary to allow time for any screwworms that infested the animals just prior to export to the United States to mature and for any infestations to become visible upon inspection.

Cancellation of Reservations at APHIS Quarantine Facilities

One commenter expressed concern over the cancellation policy for reservations at quarantine facilities maintained by APHIS. This commenter stated that reservation fees should not be forfeited if services provided by carriers are unavailable within the required period because of unforseen circumstances. In particular, this commenter was concerned that transportation services for livestock from Argentina to the United States are unreliable due to a limited number of regularly scheduled flights and frequent, unscheduled delays that exceed 24 hours.

The regulations in § 93.304(a)(3) set out the reservation fee requirements for securing space at quarantine facilities for horses. The importer or importer's agent must pay or ensure payment of a reservation fee for each lot of horses to be quarantined in a facility maintained by APHIS. With certain exceptions, reservation fees will be forfeited if the importer or the importer's agent fails to present for entry, within 24 hours following the designated time of arrival, the horse for which the reservation was made. The reservation system is necessary in order to ensure that there is sufficient space in the quarantine facilities and that APHIS recovers its expenses for providing these services. Because this system is necessary and applies to all horses quarantined at an APHIS quarantine facility, not just those horses imported from screwworm affected regions, and because the interim rule did not make any changes to the reservation system, this comment falls outside the scope of this rulemaking. Therefore, we are not making any changes to the rule as a result of this comment.

Exemptions for the 7-Day Quarantine Requirement

One commenter requested that APHIS consider allowing registered thoroughbred horses imported temporarily into the United States and registered thoroughbred horses returning to the United States from screwworm-affected regions to enter the United States without meeting the extended 7-day quarantine requirement. This commenter argued that the risk of screwworm being introduced into the United States would be negligible provided that these horses are kept under intensely managed and controlled conditions while in the screwworm-affected region.

We are not making changes in this final rule as a result of this comment. We do not currently have an assessment of the risk associated with the importation of horses under the conditions described by the commenter and, therefore, cannot confirm that importing horses under those conditions would ensure against the further introduction of screwworm into the United States. However, we may consider amending the regulations in future rulemaking to address the issues raised by this commenter.

Approved 7-Day Quarantine Facilities

Two commenters expressed concern over the lack of space in, and the limited numbers of, APHIS animal import centers approved as 7-day quarantine facilities. One of these commenters was concerned that, because the quarantine facility located at Hollywood Park, CA, is not approved as a 7-day quarantine center, horses entering the United States to race at Hollywood Park from screwworm-affected countries must be quarantined at another facility approved as a 7-day quarantine facility. The other commenter argued that no scientific rationale supports limiting approved quarantine centers to APHIS-owned facilities. This commenter requested that APHIS consider authorizing those public or private quarantine facilities that are equipped to undertake the required inspection and testing protocols for screwworm as approved 7-day quarantine centers.

Authorizing public or private quarantine facilities as approved 7-day quarantine centers is outside the scope of this rulemaking. Therefore, we are not making any changes to the rule based on this comment. However, because recent demand for quarantine services for horses has exceeded the space available at existing facilities, we are considering developing standards for allowing the establishment of permanent, privately owned quarantine facilities.

Increases in User Fees for Quarantine Services

In a final rule published in the **Federal Register** on August 28, 2000 (65 FR 51997–52010, Docket No. 97–058–2), we changed our user fees for import- and export-related services for animals, animal products, birds, germ plasm, organisms, and vectors. That final rule increased user fees for quarantine services, among other services, for fiscal years 2001 through 2004. One commenter requested that APHIS review those increases in user fees for quarantine services in light of the increased costs associated with the additional inspection and quarantine requirements for horses imported from screwworm-affected countries.

The annual increases in user fees for quarantine services set out in the August 2000 final rule mentioned above reflect standard annual increases in expenses and are necessary for APHIS to recover the anticipated cost of providing those services each year. Because the user fees must be adjusted annually for APHIS to recover its expenses, and because the interim rule did not make any changes to the user fees, reviewing or making changes to the user fees charged for quarantine services falls outside the scope of this rulemaking.

Emergency Action and Opportunity to Comment on Rulemaking

One commenter objected to the issuance of an interim rule "without sufficient time to consider the issues." This commenter stated that, at the time of publication, the United States was not facing such emergency conditions that would have warranted an interim rule.

We disagree with this comment. Screwworm was eradicated from the United States in 1966. However, in July 1999, and again in February and March 2000, screwworm larvae were found in horses imported into the United States from Argentina and Venezuela. The Administrator of APHIS determined that immediate action was necessary to prevent further introductions of screwworm into the United States. Prior notice was impracticable and contrary to public interest under these circumstances. The preembarkation requirements for ruminants, swine, and dogs and preembarkation and postarrival requirements for horses imported from any region of the world where screwworm is considered to exist were considered necessary on an emergency basis to safeguard the United States from screwworm.

Economic Effects

One commenter stated that the economic information presented in the interim rule underestimated the number of horses exported from the United Arab Emirates to the United States between 1995 and 1998. In the interim rule, we stated that, out of those screwworm-affected regions where other diseases that would require at least a 7-day quarantine are not known to exist, only Argentina is a significant source of horses imported into the United States. To support this point, we stated that China, the Philippines, Taiwan, and the United Arab Emirates also exported horses to the United States during the period 1995–1998, but collectively they exported only 5 horses in 1995, 9 horses in 1996, 14 horses in 1997, and 13 horses in 1998. The commenter stated that the number of horses exported from the United Arab Emirates alone in each of those years exceeded the collective

VOL
67
ISS
51
MR
15
2002
UMI

number of horses exported from China, the Phillippines, Taiwan, and the United Arab Emirates cited in the interim rule.

This commenter is indeed correct; while the interim rule's economic analysis accurately estimated the number of horses imported permanently into the United States from those regions, it did not account for horses imported under temporary permits, such as competition or race horses. Out of all breeding, commercial, competition, purebred, and race horses imported, both permanently and temporarily, from screwworm-affected regions, Argentina accounted for 83 percent (1,730 of 2,094) of horses imported between 1996 and 2001. The United Arab Emirates supplied 14 percent (299 of 2,094) of horses imported from affected regions during the same 6-year period. The remaining 3 percent of horses imported from screwworm-affected regions were from China, India, Malaysia, Philippines, Qatar, Singapore, Taiwan, and Thailand. However, because only 2 percent (1,952 of 94,729) of all horses imported into the United States between 1996 and 2001 were from screwworm-affected regions, we continue to expect that the interim rule will not have a significant economic effect on a substantial number of small entities.

Several commenters expressed concern that the economic effects of the interim rule on the horse industry were underestimated in the interim rule's economic analysis. Several commenters stated that the costs associated with the additional inspection and quarantine requirements for horses imported from screwworm-affected regions will have a significant impact on the U.S. horse industry, especially in light of the increase in quarantine fees at APHIS quarantine facilities. Several commenters also opposed the additional inspection and quarantine requirements because the resulting cost increases, along with reservation deposits, time away from training for horses, additional post-quarantine time to allow for drug residues to be eliminated prior to competition, and any potential complications, will inhibit the movement of foreign horses to and from the United States. For example, one commenter stated that these costs alone exceed the value of a green polo pony from Argentina.

The additional inspection requirement for horses contained in the interim rule affects only those importers moving horses into the United States from regions of the world where screwworm is considered to exist. In addition, the quarantine period is extended to 7 days only for those horses that are imported from screwworm-affected regions where other diseases that require at least a 7-day quarantine are not known to exist. These requirements affect a limited number of regions. As mentioned above, Argentina and the United Arab Emirates accounted for 83 percent and 14 percent, respectively, of horses imported from regions subject to these requirements during the period 1996–2001. The remaining 3 percent of horse imports from affected regions were from China, India, Malaysia, Philippines, Qatar, Singapore, Taiwan, and Thailand during that same 6-year period. Furthermore, the additional costs borne by importers moving horses into the United States from screwworm-affected regions as a result of the additional inspection and treatment requirements are small when compared to the import value of the horses. For example, the average value of purebred horses imported from screwworm-affected countries in the Western Hemisphere, excluding Argentina, between 1998 and 2000 was $10,697. The costs for the preembarkation inspection of and treatment for screwworm represent 1 to 2 percent of this average value.

For horses imported from screwworm-affected regions that are not already affected by other diseases that require at least a 7-day quarantine, the additional cost will have a larger impact. Between 1998 and 2000, the average value of purebred horses imported from Argentina was $6,625; the preembarkation inspection and treatment costs for screwworm, as well as the 4 additional days in quarantine, are about 13 to 14.6 percent of the average value of these horses.[1] However, a relatively small percentage of horses imported into the United States are expected to be affected. Out of 94,729 horses imported into the United States between 1996 and 2001, only 2 percent (1,952 of 94,729) were from screwworm-affected regions.

As only a small percentage of horses are imported into the United States from screwworm-affected regions, it can be concluded that the additional requirements set out in the interim rule will not significantly impact the entire U.S. horse industry nor inhibit the movement of foreign horses to and from the United States. The largest impact will be borne by the importers of horses from Argentina and other countries that must quarantine their animals for 4 additional days. Nonetheless, we continue to expect that the interim rule will not have a significant economic effect on a substantial number of small entities.

In addition to the changes mentioned above, we are adding, to §§ 93.301, 93.405, 93.505, and 93.600, the Office of Management and Budget control numbers assigned to the information collection requirements associated with the interim rule, as required by the Paperwork Reduction Act.

Therefore, for the reasons given in the interim rule and in this document, we are adopting the interim rule as a final rule, with the changes discussed in this document.

This final rule also affirms the information contained in the interim rule concerning Executive Order 12866 and the Regulatory Flexibility Act, Executive Orders 12372 and 12988, and the Paperwork Reduction Act.

Effective Date

Pursuant to the administrative procedure provisions in 5 U.S.C. 553, we find good cause for making this rule effective less than 30 days after publication in the **Federal Register**. The interim rule adopted as final by this rule was effective on November 13, 2000. This rule provides that horses that are imported from regions of the world where screwworm is considered to exist must be sedated or tranquilized, rather than anesthetized, for the purposes of the examination on the seventh day of quarantine. In addition, this rule specifies that only male horses must be sedated or tranquilized during that examination. Immediate action is necessary to provide for the use of an appropriate level of chemical restraint and clarify that female horses do not require such restraint. These changes are, therefore, necessary to relieve requirements that we no longer find warranted. Therefore, the Administrator of the Animal and Plant Health Inspection Service has determined that this rule should be effective upon publication in the **Federal Register**.

List of Subjects in 9 CFR Part 93

Animal diseases, Imports, Livestock, Poultry and poultry products, Quarantine, Reporting and recordkeeping requirements.

Accordingly, the interim rule amending 9 CFR part 93 that was published at 65 FR 67617–67624 on November 13, 2000, is adopted as a final rule with the following changes:

[1] The cost estimates quoted in the interim rule for horse imports have been updated here to incorporate up-to-date import figures for 1999 through 2001 and reflect the annual cost increases in user fees for quarantine services provided by APHIS.

PART 93—IMPORTATION OF CERTAIN ANIMALS, BIRDS, AND POULTRY, AND CERTAIN ANIMAL, BIRD, AND POULTRY PRODUCTS; REQUIREMENTS FOR MEANS OF CONVEYANCE AND SHIPPING CONTAINERS

1. The authority citation for part 93 continues to read as follows:

Authority: 7 U.S.C. 1622; 19 U.S.C. 1306; 21 U.S.C. 102–105, 111, 114a, 134a, 134b, 134c, 134d, 134f, 136, and 136a; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.4.

2. In § 93.301, paragraph (j)(7) is revised to read as follows:

§ 93.301 General prohibitions; exceptions.

* * * * *

(j) * * *

(7) Horses must be held at the animal import center for a minimum of 7 days. On day 7, prior to the horses' release, the horses must be examined by a veterinarian at the expense of the owner or broker. For this examination, male horses must be tranquilized or sedated so that the external genitalia of the horses can be thoroughly examined. If screwworm is found during this examination, the horses must be held in quarantine and treated until free of infestation. (Approved by the Office of Management and Budget under control numbers 0579–0040 and 0579–0165)

§ 93.405 [Amended]

3. Section 93.405 is amended by revising the OMB control number citation at the end of the section to read as follows: "(Approved by the Office of Management and Budget under control numbers 0579–0040 and 0579–0165)".

§ 93.505 [Amended]

4. Section 93.505 is amended by adding, at the end of the section, the following: "(Approved by the Office of Management and Budget under control number 0579–0165)".

§ 93.600 [Amended]

5. Section 93.600 is amended by adding, at the end of the section, the following: "(Approved by the Office of Management and Budget under control number 0579–0165)".

Done in Washington, DC, this 11th day of March 2002.

W. Ron DeHaven,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 02–6268 Filed 3–14–02; 8:45 am]

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Part 97

[Docket No. 01–125–1]

Commuted Traveltime Periods: Overtime Services Relating to Imports and Exports

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the regulations concerning overtime services provided by employees of Veterinary Services by adding a commuted traveltime allowance for travel between Olympia and Sumas in the State of Washington. Commuted traveltime allowances are the periods of time required for Veterinary Services employees to travel from their dispatch points and return there from the places where they perform Sunday, holiday, or other overtime duty. The Government charges a fee for certain overtime services provided by Veterinary Services employees and, under certain circumstances, the fee may include the cost of commuted traveltime. This action is necessary to inform the public of the commuted traveltime between the dispatch and service locations.

EFFECTIVE DATE: March 15, 2002.

FOR FURTHER INFORMATION CONTACT: Ms. Inez D. Hockaday, Acting Director, Management Support Staff, VS, APHIS, 4700 River Road Unit 44, Riverdale, MD 20737–1231; (301) 734–7517.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR, chapter I, subchapter D, and 7 CFR, chapter III, require inspection, laboratory testing, certification, or quarantine of certain animals, animal products, plants, plant products, or other commodities intended for importation into, or exportation from, the United States.

When these services must be provided by an employee of the Animal and Plant Health Inspection Service's Veterinary Services (VS) program on a Sunday, holiday, or at any other time outside the VS employee's regular duty hours, the Government charges a fee for the services in accordance with 9 CFR part 97. Under circumstances described in § 97.1(a), this fee may include the cost of commuted traveltime. Section 97.2 contains administrative instructions prescribing commuted traveltime allowances, which reflect, as nearly as practicable, the periods of time required for VS employees to travel from their dispatch points and return there from the places where they perform Sunday, holiday, or other overtime duty.

We are amending § 97.2 of the regulations by adding a commuted traveltime allowance for travel between Olympia and Sumas in the State of Washington. The new allowance is set forth in the rule portion of this document. This action is necessary to inform the public of the commuted traveltime between the dispatch and service locations.

Effective Date

The commuted traveltime allowances appropriate for employees performing services at ports of entry, and the features of the reimbursement plan for recovering the cost of furnishing port of entry services, depend upon facts within the knowledge of the Department of Agriculture. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, pursuant to the administrative procedure provisions in 5 U.S.C. 553, we find upon good cause that prior notice and other public procedure with respect to this rule are impracticable and unnecessary; we also find good cause for making this rule effective less than 30 days after publication of this document in the **Federal Register**.

Executive Order 12866 and Regulatory Flexibility Act

This final rule has been reviewed under Executive Order 12866. For this action, the Office of Management and Budget has waived its review process required by Executive Order 12866.

The number of requests for overtime services of a VS employee at the locations affected by this rule represents an insignificant portion of the total number of requests for these services in the United States.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12988

This final rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is intended to have preemptive effect with respect to any State or local laws, regulations, or policies that conflict with its provisions or that would otherwise impede its full implementation. This rule is not

intended to have retroactive effect. There are no administrative procedures that must be exhausted prior to any judicial challenge to the provisions of this rule or the application of its provisions.

Paperwork Reduction Act

This rule contains no new information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

List of Subjects in 9 CFR Part 97

Exports, Government employees, Imports, Livestock, Poultry and poultry products, Travel and transportation expenses.

Accordingly, we are amending 9 CFR part 97 as follows:

PART 97—OVERTIME SERVICES RELATING TO IMPORTS AND EXPORTS

1. The authority citation for part 97 continues to read as follows:

Authority: 7 U.S.C. 2260; 49 U.S.C. 1741; 7 CFR 2.22, 280, and 371.4.

2. In § 97.2, the table is amended by revising, under the State of Washington, the entry for Sumas to read as follows:

§ 97.2 Administrative instructions prescribing commuted traveltime.

* * * * *

BILLING CODE 3410–34–U

NUCLEAR REGULATORY COMMISSION

10 CFR Part 72

RIN 3150–AG94

List of Approved Spent Fuel Storage Casks: NAC–MPC Revision

AGENCY: Nuclear Regulatory Commission.

ACTION: Direct final rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is amending its regulations revising the NAC International Multi-Purpose Canister (NAC–MPC) cask system listing within the "List of Approved Spent Fuel Storage Casks" to include Amendment 2 to Certificate of Compliance (CoC) Number 1025. This amendment will allow for modification of the design of the cask system to accommodate a new type of fuel. The NAC–MPC system component modifications include increased length of the fuel basket and canister, transfer cask, and vertical concrete cask. Changes also include a redesigned fuel basket to accommodate 26 fuel assemblies, with an alternate 24-fuel assembly configuration and increased transfer cask radial shielding. The CoC has been revised in its entirety to include a reference to the new type of fuel and a revised format. The Technical Specifications (TS) have also been revised in their entirety to include specifications for the new type of fuel, new operational limits, and to incorporate a revised format for the TS.

DATES: The final rule is effective May 29, 2002, unless significant adverse comments are received by April 15, 2002. A significant adverse comment is a comment where the commenter explains why the rule would be inappropriate, including challenges to the rule's underlying premise or approach, or would be ineffective or unacceptable without a change. If the rule is withdrawn, timely notice will be published in the **Federal Register**.

ADDRESSES: Submit comments to: Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attn: Rulemakings and Adjudications Staff. Deliver comments to 11555 Rockville Pike, Rockville, MD, between 7:30 a.m. and 4:15 p.m. on Federal workdays.

Certain documents related to this rulemaking, as well as all public comments received on this rulemaking, may be viewed and downloaded electronically via the NRC's rulemaking Web site at *http://ruleforum.llnl.gov*. You may also provide comments via this Web site by uploading comments as files (any format) if your web browser supports that function. For information about the interactive rulemaking site, contact Ms. Carol Gallagher, (301) 415–5905; e-mail *CAG@nrc.gov*.

Certain documents related to this rule, including comments received by the NRC, may be examined at the NRC Public Document Room, 11555 Rockville Pike, Rockville, MD. For more information, contact the NRC Public Document Room (PDR) Reference staff at 1–800–397–4209, 301–415–4737 or by e-mail to *pdr@nrc.gov*.

Documents created or received at the NRC after November 1, 1999, are also available electronically at the NRC's Public Electronic Reading Room on the Internet at *http://www.nrc.gov/reading-rm/adams.html*. From this site, the public can gain entry into the NRC's Agencywide Documents Access and Management System (ADAMS), which provides text and image files of NRC's public documents. An electronic copy of the proposed CoC and preliminary safety evaluation report (SER) can be found under ADAMS Accession No. ML013480571. If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the NRC PDR Reference staff at 1–800–397–4209, 301–415–4737 or by e-mail to *pdr@nrc.gov*.

CoC No. 1025, the revised Technical Specifications, the underlying Safety Evaluation Report for Amendment 2, and the Environmental Assessment, are available for inspection at the NRC Public Document Room, 11555 Rockville Pike, Rockville, MD. Single copies of these documents may be obtained from Roger W. Broseus, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone (301) 415–7608, e-mail *RWB@nrc.gov*.

FOR FURTHER INFORMATION CONTACT: Roger W. Broseus, telephone (301) 415–7608, e-mail *RWB@nrc.gov*, of the Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION:

Background

Section 218(a) of the Nuclear Waste Policy Act of 1982, as amended (NWPA), requires that "[t]he Secretary [of the Department of Energy (DOE)] shall establish a demonstration program, in cooperation with the private sector, for the dry storage of spent nuclear fuel at civilian nuclear power reactor sites, with the objective of establishing one or more technologies that the [Nuclear Regulatory] Commission may, by rule, approve for use at the sites of civilian nuclear power reactors without, to the maximum extent practicable, the need for additional site-specific approvals by the Commission." Section 133 of the NWPA states, in part, that "[t]he Commission shall, by rule, establish procedures for the licensing of any technology approved by the Commission under section 218(a) for use at the site of any civilian nuclear power reactor."

To implement this mandate, the NRC approved dry storage of spent nuclear fuel in NRC-approved casks under a general license by publishing a final rule in 10 CFR part 72 entitled, "General License for Storage of Spent Fuel at Power Reactor Sites" (55 FR 29181; July 18, 1990). This rule also established a new subpart L within 10 CFR part 72, entitled "Approval of Spent Fuel Storage Casks" containing procedures and criteria for obtaining NRC approval of spent fuel storage cask designs. The NRC subsequently issued a final rule on March 9, 2000 (65 FR 12444) that approved the NAC–MPC cask design and added it to the list of NRC-approved cask designs in § 72.214 as CoC No. 1025.

Discussion

NAC International, the certificate holder for CoC No. 1025, submitted an application to the NRC to amend the CoC on May 19, 2000; supplemental information to support the application was submitted on September 6, October 2, and 12, 2000; and April 13, September 6, October 5, 10, and 15, and November 21, 2001. The applicant requested an amendment to permit a part 72 licensee to store a new type of fuel in the NAC–MPC. The NAC–MPC system component modifications include increased length of the fuel basket and canister, transfer cask, and vertical concrete cask. Changes include a redesigned fuel basket to accommodate 26 fuel assemblies, with an alternate 24-fuel assembly configuration and increased transfer cask radial shielding. The CoC has been revised in its entirety to include a reference to the new type of fuel and a revised format. No other changes to the NAC–MPC cask system design were requested in this application. The NRC staff performed a detailed safety evaluation of the proposed CoC amendment request and found that an acceptable safety margin is maintained. In addition, the NRC staff has determined that there is still reasonable assurance that public health and safety and the environment will be adequately protected.

This direct final rule revises the NAC–MPC cask design listing in § 72.214 by adding Amendment 2 to CoC No. 1025. The amendment includes a revision of the TS in their entirety to revise the format of the TS and to include specifications for the new type of fuel and new operational limits. Details on specific changes to the TS are discussed in the SER.

The redesigned NAC–MPC cask system, when used in accordance with the conditions specified in the CoC, the TS, and NRC regulations, will meet the requirements of Part 72; thus, adequate protection of public health and safety will continue to be ensured.

Discussion of Amendments by Section

§ 72.214 List of approved spent fuel storage casks.

Certificate No. 1025 is revised by adding the effective date of Amendment 2.

Procedural Background

This rule is limited to the changes contained in Amendment 2 to CoC No. 1025 and does not include other aspects of the NAC–MPC cask system design. The NRC is using the "direct final rule procedure" to issue this amendment because it represents a limited and routine change to an existing CoC that is expected to be noncontroversial. Adequate protection of public health and safety continues to be ensured. The amendment to the rule will become effective on May 29, 2002. However, if the NRC receives significant adverse comments by April 15, 2002, then the NRC will publish a document that withdraws this action and will address the comments received in response to the proposed amendments published elsewhere in this issue of the **Federal Register**. A significant adverse comment is a comment where the commenter explains why the rule would be inappropriate, including challenges to the rule's underlying premise or approach, or would be ineffective or unacceptable without a change. A comment is adverse and significant if:

(1) The comment opposes the rule and provides a reason sufficient to require a substantive response in a notice-and-comment process. For example, in a substantive response:

(a) The comment causes the NRC staff to reevaluate (or reconsider) its position or conduct additional analysis;

(b) The comment raises an issue serious enough to warrant a substantive response to clarify or complete the record; or

(c) The comment raises a relevant issue that was not previously addressed or considered by the NRC staff.

(2) The comment proposes a change or an addition to the rule, and it is apparent that the rule would be ineffective or unacceptable without incorporation of the change or addition.

(3) The comment causes the NRC staff to make a change (other than editorial) to the CoC or TS.

These comments will be addressed in a subsequent final rule. The NRC will not initiate a second comment period on this action. However, if the NRC receives significant adverse comments by April 15, 2002, then the NRC will publish a document that withdraws this action and will address the comments received in response to the proposed amendments published elsewhere in this issue of the **Federal Register**.

Agreement State Compatibility

Under the "Policy Statement on Adequacy and Compatibility of Agreement State Programs" approved by the Commission on June 30, 1997, and published in the **Federal Register** on September 3, 1997 (62 FR 46517), this rule is classified as compatibility

VOL
67
ISS
51
MR
15
2002
UMI

Category "NRC." Compatibility is not required for Category "NRC" regulations. The NRC program elements in this category are those that relate directly to areas of regulation reserved to the NRC by the Atomic Energy Act of 1954, as amended (AEA) or the provisions of the Title 10 of the Code of Federal Regulations. Although an Agreement State may not adopt program elements reserved to NRC, it may wish to inform its licensees of certain requirements via a mechanism that is consistent with the particular State's administrative procedure laws, but does not confer regulatory authority on the State.

Plain Language

The Presidential Memorandum dated June 1, 1998, entitled "Plain Language in Government Writing" directed that the Government's writing be in plain language. The NRC requests comments on this direct final rule specifically with respect to the clarity and effectiveness of the language used. Comments should be sent to the address listed under the heading **ADDRESSES** above.

Voluntary Consensus Standards

The National Technology Transfer Act of 1995 (Pub. L. 104–113) requires that Federal agencies use technical standards that are developed or adopted by voluntary consensus standards bodies unless the use of such a standard is inconsistent with applicable law or otherwise impractical. In this direct final rule, the NRC would revise the NAC–MPC cask system design listed in § 72.214 (List of NRC-approved spent fuel storage cask designs). This action does not constitute the establishment of a standard that establishes generally applicable requirements.

Finding of No Significant Environmental Impact: Availability

Under the National Environmental Policy Act of 1969, as amended, and the NRC regulations in subpart A of 10 CFR part 51, the NRC has determined that this rule, if adopted, would not be a major Federal action significantly affecting the quality of the human environment and, therefore, an environmental impact statement is not required. The rule would amend the CoC for the NAC–MPC cask system within the list of approved spent fuel storage casks that power reactor licensees can use to store spent fuel at reactor sites under a general license. Amendment 2 will allow for modification of the design of the cask system to accommodate a new type of fuel. The NAC–MPC system component modifications include increased length of the fuel basket and canister, transfer cask, and vertical concrete cask. Changes also include a redesigned fuel basket to accommodate 26 fuel assemblies, with an alternate 24-fuel assembly configuration and increased transfer cask radial shielding. The CoC has been revised in its entirety to include a reference to the new type of fuel and a revised format. The Technical Specifications (TS) have also been revised in their entirety to include specifications for the new type of fuel, new operational limits, and to incorporate a revised format for the TS. The environmental assessment and finding of no significant impact on which this determination is based are available for inspection at the NRC Public Document Room, 11555 Rockville Pike, Rockville, MD. Single copies of the environmental assessment and finding of no significant impact are available from Roger W. Broseus, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone (301) 415–7608, e-mail *RWB@nrc.gov*.

Paperwork Reduction Act Statement

This direct final rule does not contain a new or amended information collection requirement subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.). Existing requirements were approved by the Office of Management and Budget, Approval Number 3150–0132.

Public Protection Notification

If a means used to impose an information collection does not display a currently valid OMB control number, the NRC may not conduct or sponsor, and a person is not required to respond to, the information collection.

Regulatory Analysis

On July 18, 1990 (55 FR 29181), the NRC issued an amendment to 10 CFR part 72 to provide for the storage of spent nuclear fuel under a general license in cask designs approved by the NRC. Any nuclear power reactor licensee can use NRC-approved cask designs to store spent nuclear fuel if it notifies the NRC in advance, spent fuel is stored under the conditions specified in the cask's CoC, and the conditions of the general license are met. A list of NRC-approved cask designs is contained in § 72.214. On March 9, 2000 (65 FR 12444), the NRC issued an amendment to part 72 that approved the NAC–MPC cask design by adding it to the list of NRC-approved cask designs in § 72.214. On May 19, 2000, the certificate holder, NAC International, submitted an application to the NRC to amend CoC No. 1025; supplemental information to support the application was submitted on September 6, October 2, and 12, 2000; and April 13, September 6, October 5, 10, and 15, and November 21, 2001. Amendment 2 will allow for modification of the design of the cask system to accommodate a new type of fuel. The MPC system component modifications include increased length of the fuel basket and canister, transfer cask, and vertical concrete cask. Changes also include a redesigned fuel basket to accommodate 26 fuel assemblies, with an alternate 24-fuel assembly configuration and increased transfer cask radial shielding. The CoC has been revised in its entirety to include a reference to the new type of fuel and a revised format. The Technical Specifications (TS) have also been revised in their entirety to include specifications for the new type of fuel, new operational limits, and to incorporate a revised format for the TS.

The alternative to this action is to withhold approval of this amended cask system design and issue an exemption to each general license. This alternative would cost both the NRC and the utilities more time and money because each utility would have to pursue an exemption.

Approval of the direct final rule will eliminate this problem and is consistent with previous NRC actions. Further, the direct final rule will have no adverse effect on public health and safety. This direct final rule has no significant identifiable impact or benefit on other Government agencies. Based on this discussion of the benefits and impacts of the alternatives, the NRC concludes that the requirements of the direct final rule are commensurate with the NRC's responsibilities for public health and safety and the common defense and security. No other available alternative is believed to be as satisfactory, and thus, this action is recommended.

Regulatory Flexibility Certification

In accordance with the Regulatory Flexibility Act of 1980 (5 U.S.C. 605(b)), the NRC certifies that this rule will not, if issued, have a significant economic impact on a substantial number of small entities. This direct final rule affects only the licensing and operation of nuclear power plants, independent spent fuel storage facilities, and NAC International. The companies that own these plants do not fall within the scope of the definition of "small entities" set forth in the Regulatory Flexibility Act or the Small Business Size Standards set out in regulations issued by the Small Business Administration at 13 CFR part 121.

Backfit Analysis

The NRC has determined that the backfit rule (10 CFR 50.109 or 10 CFR 72.62) does not apply to this direct final rule because this amendment does not involve any provisions that would impose backfits as defined. Therefore, a backfit analysis is not required.

Small Business Regulatory Enforcement Fairness Act

In accordance with the Small Business Regulatory Enforcement Fairness Act of 1996, the NRC has determined that this action is not a major rule and has verified this determination with the Office of Information and Regulatory Affairs, Office of Management and Budget.

List of Subjects In 10 CFR Part 72

Administrative practice and procedure, Criminal penalties, Manpower training programs, Nuclear materials, Occupational safety and health, Penalties, Radiation protection, Reporting and recordkeeping requirements, Security measures, Spent fuel, Whistleblowing.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended; the Energy Reorganization Act of 1974, as amended; and 5 U.S.C. 552 and 553; the NRC is adopting the following amendments to 10 CFR part 72.

PART 72—LICENSING REQUIREMENTS FOR THE INDEPENDENT STORAGE OF SPENT NUCLEAR FUEL AND HIGH-LEVEL RADIOACTIVE WASTE

1. The authority citation for Part 72 continues to read as follows:

Authority: Secs. 51, 53, 57, 62, 63, 65, 69, 81, 161, 182, 183, 184, 186, 187, 189, 68 Stat. 929, 930, 932, 933, 934, 935, 948, 953, 954, 955, as amended, sec. 234, 83 Stat. 444, as amended (42 U.S.C. 2071, 2073, 2077, 2092, 2093, 2095, 2099, 2111, 2201, 2232, 2233, 2234, 2236, 2237, 2238, 2282); sec. 274, Pub. L. 86–373, 73 Stat. 688, as amended (42 U.S.C. 2021); sec. 201, as amended, 202, 206, 88 Stat. 1242, as amended, 1244, 1246 (42 U.S.C. 5841, 5842, 5846); Pub. L. 95–601, sec. 10, 92 Stat. 2951 as amended by Pub. L. 102–486, sec. 7902, 106 Stat. 3123 (42 U.S.C. 5851); sec. 102, Pub. L. 91–190, 83 Stat. 853 (42 U.S.C. 4332); secs. 131, 132, 133, 135, 137, 141, Pub. L. 97–425, 96 Stat. 2229, 2230, 2232, 2241, sec. 148, Pub. L. 100–203, 101 Stat. 1330–235 (42 U.S.C. 10151, 10152, 10153, 10155, 10157, 10161, 10168).

Section 72.44(g) also issued under secs. 142(b) and 148(c), (d), Pub. L. 100–203, 101 Stat. 1330–232, 1330–236 (42 U.S.C. 10162(b), 10168(c),(d)). Section 72.46 also issued under sec. 189, 68 Stat. 955 (42 U.S.C. 2239); sec. 134, Pub. L. 97–425, 96 Stat. 2230 (42 U.S.C. 10154). Section 72.96(d) also issued under sec. 145(g), Pub. L. 100–203, 101 Stat. 1330–235 (42 U.S.C. 10165(g)). Subpart J also issued under secs. 2(2), 2(15), 2(19), 117(a), 141(h), Pub. L. 97–425, 96 Stat. 2202, 2203, 2204, 2222, 2244, (42 U.S.C. 10101, 10137(a), 10161(h)). Subparts K and L are also issued under sec. 133, 98 Stat. 2230 (42 U.S.C. 10153) and sec. 218(a), 96 Stat. 2252 (42 U.S.C. 10198).

2. In § 72.214, Certificate of Compliance 1025 is revised to read as follows:

§ 72.214 List of approved spent fuel storage casks.

* * * * *

Certificate Number: 1025.
Initial Certificate Effective Date: April 10, 2000.
Amendment Number 1 Effective Date: November 13, 2001.
Amendment Number 2 Effective Date: May 29, 2002.
SAR Submitted by: NAC International.
SAR Title: Final Safety Analysis Report for the NAC-Multipurpose Canister System (NAC–MPC System).
Docket Number: 72–1025.
Certificate Expiration Date: April 10, 2020.
Model Number: NAC–MPC.

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 15

RIN 3038–AB88

Reporting Levels for Large Trader Reports; Security Futures Products

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rules.

SUMMARY: The Commodity Futures Trading Commission (Commission or CFTC) is amending its rules to establish reporting levels for security features products (SFPs) traded on designated contract markets and notice-designated contract markets. The reporting levels are 1000 contracts for an SFP involving an individual security and 200 contracts for an SFP involving a narrow-based index of equity securities.

EFFECTIVE DATE: April 15, 2002.

FOR FURTHER INFORMATION CONTACT: Gary J. Martinaitis, Deputy Associate Director, Market Surveillance Section, or Nancy E. Yanofsky, Assistant Chief Counsel, Division of Economic Analysis, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street, NW., Washington, DC 20581. Telephone: (202) 418–5260. E-mail: [*GMartinaitis@cftc.gov*] or [*NYanofsky@cftc.gov*].

SUPPLEMENTARY INFORMATION: On December 21, 2000, the President signed into law the Commodity Futures Modernization Act of 2000 (CFMA), Pub. L. 106–554, which extensively revised the Commodity Exchange Act (Act). Among other things, the CFMA removed the restriction in the Act on the trading of futures contracts on individual equity securities and narrow-based indices of equity securities.[1] Under the revised law, these products are now referred to as "security futures products" (SFPs)[2] and may be traded on designated contract markets, notice-designated contract markets and registered derivatives transaction execution facilities.

SFPs, like all other commodities traded on Commission-designated markets, will be subject to the Commission's large trader reporting rules. Those rules require futures commission merchants, clearing members and foreign brokers to report to the Commission position information of the largest futures and options traders and require the traders themselves to provide certain identifying information. Reporting levels are set for individual futures and option markets under the authority of sections 4i and 4c of the Act to ensure that the Commission receives adequate information to carry out its market surveillance programs. These market surveillance programs are designed to detect and to prevent market congestion and price manipulation and to enforce speculative position limits. They also provide information regarding the overall hedging and speculative use of, and foreign participation in, the futures

[1] *See* section 251(a) of the CFMA. This trading previously had been prohibited by section 2(a)(1)(B)(v) of the Act.

[2] The term "security futures product" is defined in section 1a(32) of the Act to mean "a security future or any put, call straddle, option, or privilege on any security future." The term "security future" is defined in section 1a(31) of the Act: it generally means a contract of sale for future delivery of a single security or of a narrow-based security index, including any interest therein or based on the value thereof, except exempted securities (with the exclusion of municipal securities) and certain agreements, contracts, or transactions excluded from the Act. Because the CFMA provides that options on security futures cannot be traded until at least December 21, 2003, security futures are the only security futures product that may be made available for trading during the next two years.

VOL 67 ISS 51 MR 15 2002 UMI

markets and other matters of public interest. Generally, large trader reports are filed by the firm carrying the reportable trader's position.[3]

Based upon its experience in administering the large trader reporting system, the Commission proposed establishing a reporting level of 1000 contracts for SFPs involving an individual security[4] and 200 contracts for SFPs involving a narrow-based index of securities.[5] 66 FR 64383 (December 13, 2001). In its proposal, the Commission stated its intent to review these levels an appropriate amount of time after trading in SFPs commences to determine if they provide adequate coverage for effective market surveillance. At that time, the Commission will also consider actual trading experience—including trading volume, open interest and the number and position sizes of individual traders—to determine whether these levels are too high or too low for effective market surveillance.

The Commission noted in its proposal that the rules require the reporting of positions in SFPs on notice-designated contract markets. Notice-designated contract markets are entities that are otherwise regulated by the Securities and Exchange Commission (such as registered national securities exchanges and registered national securities associations) that apply for and, pursuant to a notice-filing procedure, become designated as contract markets by the Commission for the limited purpose of trading SFPs.[6] The Act and the Commission's regulations exempt notice-designated contract markets from certain provisions of the Act and the Commission's regulations; these trading facilities, however, are subject to the Commission's large trader reporting system.[7] Thus, futures commission merchants (whether registered under a full or a notice filing-procedure under rule 3.10[8]), clearing members, foreign brokers and others who have reporting and other obligations under parts 15 through 21 of the Commission's rules will have concomitant obligations with respect to SFPs traded on notice-designated contract markets.

The Commission received two comment letters on its proposal—one from a contract market, the Chicago Mercantile Exchange (CME), and one from a national securities exchange that, in connection with listing and trading SFPs, is required to become a notice-designated contract market, the American Stock Exchange (AMEX). Both the CME and the AMEX generally supported the reporting levels. The CME specifically noted that the levels appropriately balance the protection of market integrity with administrative burdens. AMEX commented that, based on actual trading experience, the Commission may in the future need to establish higher reporting levels. AMEX also suggested that it may be appropriate for the Commission to tier reporting levels to take into account capitalization, trading volume and/or public float of the underlying security.[9]

The Commission is adopting the reporting levels as proposed. As stated in the proposal, and consistent with the comments, the Commission will review these levels an appropriate amount of time after trading in SFPs commences to determine if they provide adequate coverage for effective market surveillance. At that time, the Commission will also consider actual trading experience—including trading volume, open interest and the number and position sizes of individual traders—to determine whether the levels are too high or too low for effective market surveillance. While the Commission does not anticipate tiered reporting levels, due to the administrative difficulties inherent in such a system, the Commission has not ruled out such an approach and will consider it, as appropriate.[10]

IV. Cost Benefit Analysis

Section 15 of the Act, as amended by section 119 of the CFMA, requires the Commission to consider the costs and benefits of its action before issuing a new regulation under the Act. By its terms, section 15 does not require the Commission to quantify the costs and benefits of a new regulation or to determine whether the benefits of the proposed regulation outweigh its costs. Rather, section 15 simply requires the Commission to "consider the costs and benefits" of the subject rule.

Section 15(a) further specifies that the costs and benefits of the proposed rule shall be evaluated in light of five broad areas of market and public concern: (1) Protection of market participants and the public; (2) efficiency, competitiveness, and financial integrity of futures markets; (3) price discovery; (4) sound risk management practices; and (5) other public interest considerations. The Commission may, in its discretion, give greater weight to any one of the five enumerated areas of concern and may, in its discretion, determine that, notwithstanding its costs, a particular rule is necessary or appropriate to protect the public interest or to effectuate any of the provisions or to accomplish any of the purposes of the Act.

The Commission's proposal contained an analysis of its consideration of these costs and benefits and solicited public comment thereon. 66 FR at 64384. The Commission specifically invited commenters to submit any data that they had quantifying the costs and benefits of the proposed rules with their comment letters. The Commission has considered the two comment letters received, neither of which specifically addressed the Commission's analysis of the costs and benefits of the proposed rules.

The Commission has considered the costs and benefits of the proposed rules and has decided to adopt the rules as discussed above.

V. Related Matters

A. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA), 5 U.S.C. 601 *et seq.*, requires that federal agencies, in proposing rules, consider the impact of those rules on small entities. The Commission has previously determined that large traders and FCMs are not "small entities" for purposes of the RFA.[11] The amendment to reporting requirements primarily impacts FCMs. Similarly, foreign brokers and foreign traders report only if carrying or holding reportable, *i.e.*, large positions. The Commission invited comments from any firm believing that these rules would have a significant economic impact on its operations. No comments were received in response to that invitation,

B. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) (PRA), which imposes certain requirements on federal agencies (including the Commission) in connection with their conducting or sponsoring any collection of information as defined by the PRA, does not apply to this rule. The Commission believes that the rule amendment does not contain information requirements which require the approval of the Office of Management and Budget. The purpose of this rule is to establish a specific reporting level for security futures products.

List of Subjects in 17 CFR Part 15

Brokers, Reporting and recordkeeping requirements.

In consideration of the foregoing, and pursuant to the authority contained in the Act, and in particular sections 4g, 4i, 5, 5a and 8a of the Act, 7 U.S.C. 6g, 6i, 7, 7a and 12a, as amended, the Commission hereby proposes to amend Part 15 of Chapter I of Title 17 of the Code of Federal Regulations as follows:

PART 15—REPORTS—GENERAL PROVISIONS

1. The authority citation for part 15 is revised to read as follows:

Authority: 7 U.S.C. 2, 5, 6a, 6c, 6f, 6g, 6i, 6k, 6m, 6n, 7, 7a, 9, 12a, 19, and 21, as amended by the Commodity Futures Modernization Act of 2000, Appendix E of Pub. L. 106–554, 114 Stat. 2763; 5 U.S.C. 552 and 552(b).

2. Section 15.03 is amended by revising paragraph (b) to read as follows:

§ 15.03 Reporting levels.

* * * * *

(b) The quantities for the purpose of reports filed under parts 17 and 18 of this chapter are as follows:

Commodity	Number of contracts
Agricultural:	
Wheat	100
Corn	150
Oats	60
Soybeans	100
Soybean Oil	200
Soybean Meal	200
Cotton	50
Frozen Concentrated Orange Juice	50
Rough Rice	50
Live Cattle	100
Feeder Cattle	50
Lean Hogs	100
Sugar No. 11	400
Sugar No. 14	100
Cocoa	100
Coffee	50
Natural Resources:	
Copper	100
Gold	200
Silver Bullion	150
Platinum	50
No. 2 Heating Oil	250
Crude Oil, Sweet	350
Unleaded Gasoline	150
Natural Gas	175
Financial:	
Municipal Bond Index	300
3-month (13-week) U.S. Treasury Bills	150
30-Year U.S. Treasury Bonds	1,000
10-Year U.S. Treasury Notes	1,000
5-Year U.S. Treasury Notes	800
2-Year U.S. Treasury Notes	500
3-Month Eurodollar Time Deposit Rates	1,000
30-Day Fed Funds	300
1-month LIBOR Rates	300
3-month Euroyen	100
Major-Foreign Currencies	400
Other Foreign Currencies	100
U.S. Dollar Index	50
S&P 500 Stock Price Index	1,000
E-Mini S&P Stock Price Index	300
S&P 400 Midcap Stock Index	100
Dow Jones Industrial Average Index	100
New York Stock Exchange Composite Index	50
Amex Major Market Index, Maxi	100
NASDAQ 100 Stock Index	100
Russell 2000 Stock Index	100
Value Line Average Index	50
NIKKEI Stock Index	100
Goldman Sachs Commodity Index	100
Security Futures Products: Individual Equity Security	1,000
Narrow-Based Index of Equity Securities	100
All Other Commodities	25

Issued in Washington, DC, this 11th day of March, 2002 by the Commission.

Jean A. Webb,

Secretary of the Commission.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 333

[Docket No. 96P–0460]

Topical Antifungal Drug Products for Over-the-Counter Human Use; Amendment of Final Monograph; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a final rule that appeared in the **Federal Register** of February 8, 2002 (67 FR 5942). The document amended the final monograph for over-the-counter (OTC) topical antifungal drug products to add the ingredient clotrimazole as generally recognized as safe and effective for the treatment of athlete's foot, jock itch, and ringworm. The document was inadvertently published with an incorrect docket number. This document corrects that error.

FOR FURTHER INFORMATION CONTACT: Doris B. Tucker, Office of Policy (HF–27), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–827–7010.

In FR Doc. 02–3079, appearing on page 5942 in the **Federal Register** of Friday, February 8, 2002, the following correction is made:

1. On page 5942, in the first column, "[Docket No. 99N–4063]" is corrected to read "[Docket No. 96P–0460]".

Dated: March 7, 2002.

Margaret M. Dotzel,

Associate Commissioner for Policy.

[FR Doc. 02–6180 Filed 3–14–02; 8:45 am]

BILLING CODE 4160–01–S

---

[3] Generally, parts 17 and 18 of the regulations, 17 CFR parts 17 and 18, require reports from firms and traders, respectively, when a trader holds a "reportable position." A reportable position is any open contract position that at the close of the market on any business day equals or exceeds the quantity specified in Commission rule 15.03 in either: (1) Any one future of any commodity on any one contract market, excluding futures contracts against which notices of delivery have been stopped by a trader or issued by the clearing organization of a contract market; or (2) long or short put or call options that exercise into the same future of any commodity on any one contract market. 17 CFR 15.00 and part 150.

The firms which carry accounts for traders holding "reportable positions" are required to identify those accounts by filing a CFTC Form 102 and to report all reportable positions in the accounts to the Commission. The individual trader who holds or controls the reportable position, however, is required to report to the Commission only in response to a special call.

[4] Based on staff discussions with industry participants, the Commission understands that futures contracts on individual securities will specify 100 shares of the underlying security.

[5] This number corresponds to the current reporting level for security options.

[6] *See* section 5f of the Act, 7 U.S.C. 7f.

[7] *See* section 4f[a](4) of the Act, 7 U.S.C. 6f(a)(4); 17 CFR 41.34. The Commission discussed the application of its large trader reporting system to notice-designated contract markets when it adopted its rules governing these markets. *See* 66 FR 44960 (Aug. 27, 2001).

[8] *See* 66 FR 43080 (Aug. 17, 2001).

[9] AMEX also noted its intent to use its current reporting level of 200 (which applies to options positions on stocks, shares of exchange-traded funds and stock indexes) for SFPs.

[10] AMEX noted that some firms are considering submitting their reports through the Security Industry Automation Corporation (SIAC). The Commission and the exchanges are working with SIAC to facilitate this. Whether or not the reports are filed through SIAC, the reporting firm remains responsible for the filing of the report.

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Parts 4022 and 4044

Benefits Payable in Terminated Single-Employer Plans; Allocation of Assets in Single-Employer Plans; Interest Assumptions for Valuing and Paying Benefits

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: The Pension Benefit Guaranty Corporation's regulations on Benefits Payable in Terminated Single-Employer Plans and Allocation of Assets in Single-Employer Plans prescribe interest assumptions for valuing and paying benefits under terminating single-employer plans. This final rule amends the regulations to adopt interest assumptions for plans with valuation dates in April 2002. Interest assumptions are also published on the PBGC's Web site *(http://www.pbgc.gov)*.

EFFECTIVE DATE: April 1, 2002.

FOR FURTHER INFORMATION CONTACT: Harold J. Ashner, Assistant General Counsel, Office of the General Counsel, Pension Benefit Guaranty Corporation, 1200 K Street, NW., Washington, DC 20005, 202–326–4024. (TTY/TDD users may call the Federal relay service toll-free at 1–800–877–8339 and ask to be connected to 202–326–4024.)

SUPPLEMENTARY INFORMATION: The PBGC's regulations prescribe actuarial assumptions—including interest assumptions—for valuing and paying plan benefits of terminating single-employer plans covered by title IV of the Employee Retirement Income Security Act of 1974. The interest assumptions are intended to reflect current conditions in the financial and annuity markets.

Three sets of interest assumptions are prescribed: (1) A set for the valuation of benefits for allocation purposes under section 4044 (found in appendix B to part 4044), (2) a set for the PBGC to use to determine whether a benefit is payable as a lump sum and to determine lump-sum amounts to be paid by the PBGC (found in appendix B to part 4022), and (3) a set for private-sector pension practitioners to refer to if they wish to use lump-sum interest rates determined using the PBGC's historical methodology (found in appendix C to part 4022).

Accordingly, this amendment (1) adds to Appendix B to Part 4044 the interest assumptions for valuing benefits for allocation purposes in plans with valuation dates during April 2002, (2) adds to Appendix B to Part 4022 the interest assumptions for the PBGC to use for its own lump-sum payments in plans with valuation dates during April 2002, and (3) adds to Appendix C to Part 4022 the interest assumptions for private-sector pension practitioners to refer to if they wish to use lump-sum interest rates determined using the PBGC's historical methodology for valuation dates during April 2002.

For valuation of benefits for allocation purposes, the interest assumptions that the PBGC will use (set forth in appendix B to part 4044) will be 5.50 percent for the first 25 years following the valuation date and 4.25 percent thereafter. These interest assumptions represent a decrease (from those in effect for March 2002) of 0.10 percent for the first 25 years following the valuation date and are otherwise unchanged.

The interest assumptions that the PBGC will use for its own lump-sum payments (set forth in appendix B to part 4022) will be 4.25 percent for the period during which a benefit is in pay status, and 4.00 percent during any years preceding the benefit's placement in pay status. These interest assumptions represent a decrease (from those in effect for March 2002) of 0.25 percent for the period during which a benefit is in pay status and are otherwise unchanged.

For private-sector payments, the interest assumptions (set forth in appendix C to part 4022) will be the same as those used by the PBGC for determining and paying lump sums (set forth in appendix B to part 4022).

The PBGC has determined that notice and public comment on this amendment are impracticable and contrary to the public interest. This finding is based on the need to determine and issue new interest assumptions promptly so that the assumptions can reflect, as accurately as possible, current market conditions.

Because of the need to provide immediate guidance for the valuation and payment of benefits in plans with valuation dates during April 2002, the PBGC finds that good cause exists for making the assumptions set forth in this amendment effective less than 30 days after publication.

The PBGC has determined that this action is not a "significant regulatory action" under the criteria set forth in Executive Order 12866.

Because no general notice of proposed rulemaking is required for this amendment, the Regulatory Flexibility Act of 1980 does not apply. See 5 U.S.C. 601(2).

BILLING CODE 7708–01–P

DEPARTMENT OF THE TREASURY

Fiscal Service

31 CFR Part 203

RIN 1510–AA79

Payment of Federal Taxes and the Treasury Tax and Loan Program

AGENCY: Financial Management Service, Fiscal Service, Treasury.

ACTION: Final rule.

SUMMARY: The Department of the Treasury (Treasury) is amending the regulation governing the Treasury Tax and Loan (TT&L) program, to provide the Secretary greater flexibility to adjust the rate of interest we charge on funds loaned through the existing TT&L investment option. In addition, Treasury is making regulatory changes that will allow us to test the feasibility of a new investment option known as the term investment option. The term investment option would provide financial institutions participating in the TT&L investment program with another option for borrowing Treasury funds. Under the term investment option, Treasury may invest excess balances with TT&L participants at a market based rate of interest for a predetermined period of time.

DATES: This final rule is effective April 15, 2002.

ADDRESSES: You can download this final rule at the following web site: *http://www.fms.treas.gov/eftps*. You may also inspect and copy this final rule at: Treasury Department Library, Freedom of Information Act (FOIA) Collection, Room 1428, Main Treasury Building, 1500 Pennsylvania Ave., NW., Washington, DC 20220. Before visiting, you must call (202) 622–0990 for an appointment.

FOR FURTHER INFORMATION CONTACT: Walt Henderson, Senior Financial Program Specialist, at (202) 874–6705 or *walt.henderson@fms.treas.gov;* Ellen Neubauer, Senior Attorney, at (202) 874–6680 or *ellen.neubauer@fms.treas.gov;* or John Galligan, Director, Cash Management Policy and Planning Division, at (202) 874–6590 or *john.galligan@fms.treas.gov*.

SUPPLEMENTARY INFORMATION:

Background on the Treasury Tax and Loan Program

The Treasury Tax and Loan (TT&L) program, 31 CFR part 203 (part 203), encompasses two separate components—a depositary component through which we collect Federal tax deposits and payments from business taxpayers for employee withholding and other types of taxes, and an investment component through which we invest short-term operating balances not needed for immediate cash outlays.

Through the TT&L depositary component, which comprises nearly 10,000 commercial financial institutions and Federal Reserve Banks (FRBs), we collected over $1.6 trillion in Fiscal Year 2001, representing approximately 80 percent of the total Federal annual tax receipts, from approximately 5 million business taxpayers.

Nearly 1,400 of the TT&L depositaries borrow excess short-term Treasury operating funds by participating in the investment component of the TT&L program. Through agreements executed under this Part, participating depositaries borrow Treasury funds in the form of a note secured with collateral pledged to Treasury and pay interest to the Treasury on these balances. In Fiscal Year 2001, we earned nearly $1 billion in interest income through the TT&L investment component.

The Secretary is required to consider the prevailing market in prescribing the rate of interest. (31 U.S.C. 323) In 1978 when the interest rate formula was implemented, the overnight repurchase agreement market was not mature and a published rate was not available. Thus, the TT&L rate was set as an approximation of an overnight repurchase agreement rate. At that time, it was generally believed that the Federal funds rate averaged twenty-five basis points above the volume-weighted average interest rate from overnight repurchase agreements secured by Treasury securities and select Agency securities, and executed by the Federal Reserve Bank of New York for its monetary operations. Historically, the overnight repurchase agreement rate and the Federal funds rate generally have moved broadly in tandem.

On July 30, 1999, we published in the **Federal Register** a notice of proposed rulemaking (NPRM) at 64 FR 41748. The NPRM proposed a change to the interest rate we charge on funds loaned through the TT&L program, including funds loaned through the direct investment and special direct investment programs, from the Federal funds rate less twenty-five basis points to an overnight repurchase agreement rate. The closing date for submission of comments was September 28, 1999. Copies of the comments are available on the Financial Management Service's (FMS) web site at *http://www.fms.treas.gov/eftps*. Based on the comments we received, we have reconsidered that change. Instead, we are amending Part 203 to allow the Secretary the flexibility to adjust the rate of interest, taking into consideration prevailing market conditions.

The NPRM also sought comment on the extent to which TT&L participants were interested in obtaining TT&L funds for a predetermined period of time. Given the level of interest expressed for this concept, Treasury is considering offering an investment option which incorporates a term feature. Amending Part 203 will enable us to proceed with the design and testing of this option. The new TT&L investment option under consideration is called the term investment option and will be designed so that the Treasury may earn a market based rate of return on investments with a fixed term. The term investment option will provide an additional investment option for current TT&L participants and may also increase participation in the TT&L program. Treasury expects that the rate of interest earned on term investments will reflect a market rate of return for similar funds.

At a later date, Treasury will also be publishing an NPRM for Part 203 to reflect terminology changes brought about by the October 2000 implementation of the Treasury Investment Program (TIP), the component of the TT&L program that receives tax collections, invests funds, and monitors collateral pledged to secure invested funds and public money.

Comments on the Proposed Rule

By the close of the comment period on September 28, 1999, we received comment letters on the NPRM from 56 financial institutions and 3 industry trade associations. Following is a discussion of the issues:

Reaction to a Change in the Treasury Tax and Loan Rate of Interest

All of the commenting financial institutions and one industry trade association opposed the change in the TT&L rate of interest proposed in the NPRM. All commenting financial institutions stated that the proposed rate change (from the Federal funds rate less twenty-five basis points to a rate based on the overnight repurchase agreement rate) would decrease the level of participation in the TT&L program. Several financial institutions, including the largest TT&L investment program participants, commented that the proposed TT&L rate of interest did not take into account certain characteristics of the program such as Treasury's ability to place or call funds with little or no notice and prescribed collateral requirements, both of which should be factored into the rate. Also, many commenting financial institutions expressed concerns about the source and availability of the overnight repurchase agreement rate and the lack of historical data associated with this rate.

Adjusting the TT&L Rate of Interest

We agree with the respondents that a TT&L rate based on the overnight repurchase agreement rate does not adequately take into consideration the embedded option to place or call funds with little or no advance notice, nor the administrative costs associated with posting and transferring TT&L collateral. Thus, the proposed rate does not meet our goal of establishing a rate reflective of the prevailing market for a transaction with characteristics economically similar to the TT&L investment program. We have therefore deleted those provisions of the NPRM that would change the TT&L rate of interest to an overnight repurchase rate.

Nevertheless, we have determined that the best way to ensure that the Treasury continues to earn the prevailing market rate of return is to periodically review the TT&L rate of interest and make any necessary adjustments as market conditions dictate. The final rule therefore allows the Secretary to periodically adjust the rate taking into consideration the prevailing market for a transaction with characteristics similar to the TT&L investment program. This will provide Treasury greater flexibility in earning a market based rate of return on investments. The rate will be established through *TT&L Special Notices to Depositaries* and will be published in the **Federal Register** and on the FMS web site. A *TT&L Special Notice to Depositaries* is included herein establishing the TT&L rate of interest as the Federal funds rate less twenty-five basis points.

Obtaining Funds for a Predetermined Period of Time

The NPRM sought comment on the extent to which TT&L participants were interested in obtaining TT&L funds for a predetermined period of time. The majority of commenters noted that the call feature associated with TT&L funds made participation in the program less desirable for financial institutions. Of the 15 commenters who specifically commented on their interest in obtaining TT&L funds for a predetermined period of time, 11 expressed some interest in the concept. In further discussions with financial institutions regarding the benefits of holding funds for a predetermined period of time, financial institutions again generally reacted favorably to the concept. Based upon these comments, we are considering a new investment component of TT&L, referred to as the term investment option.

Description of the Term Investment Option

The term investment option would provide Treasury with an option to invest excess operating funds with participating financial institutions for a predetermined period of time. This option is in the early stages of development and we anticipate that it will be offered initially on a pilot basis. Under this option, Treasury will determine the rate of interest taking into consideration the prevailing market and will either establish a predetermined rate based on a benchmark or establish the rate of interest based on the results of a bidding process. The term investment option may be offered by the Treasury at any time there are excess operating funds, providing an additional cash management tool for placing excess funds. The addition of this option may also expand the total capacity within the TT&L program by providing an additional investment option for financial institutions, and may encourage greater participation. This rule is being amended to give us the flexibility to offer this option on a pilot basis and, after evaluating the pilot, on an ongoing basis if warranted. Additional details regarding the term investment option will be published in procedural instructions provided to financial institutions.

Summary of Changes

Definitions

Main note balance—the phrase main note balance has been added to section 203.2 of the final rule to describe the existing open-ended note balance maintained by financial institutions currently participating in the TT&L investment program. This phrase has been added as a means of differentiating between the existing open-ended note balance and the new *term note balance*. The phrase main note balance is used in §§ 203.3; 203.13; 203.19; 203.21; and 203.23 as necessary to clarify that certain features of the existing investment program, such as how funds move in and out of the main note balance, are not applicable to the new term investment option. The features of the existing investment program are unchanged. Where the phrase note balance is used, it is intended to refer to both the main note balance and the term note balance as, for example, in § 203.24 (g).

Term investment option—the phrase *term investment option* has been added to § 203.2 of the final rule to describe the new investment option introduced in this rule. Through the term investment option, financial institutions will have the ability to hold excess Treasury operating funds for a predetermined period of time. Section 203.23 (f) describes the features of this option.

Term note balance—the phrase *term note balance* has been added to § 203.2 of the final rule to describe the note balance maintained by financial institutions participating in the term investment option.

Treasury Tax and Loan rate of interest—the definition of Treasury Tax and Loan (TT&L) rate of interest has been changed in § 203.2 of the final rule to clarify that the phrase TT&L rate of interest refers only to the rate of interest charged on the main note balance. The phrase TT&L rate of interest does not describe the rate of interest charged on the term note balance which is addressed in § 203.23. The definition of the TT&L rate of interest has also been changed to give the Secretary greater flexibility to change the TT&L rate of interest when market conditions warrant.

Collateral requirements. Section 203.24 (b) describes the collateral requirements for the term note balance. Financial institutions participating in the term investment option will be required to pledge collateral sufficient to cover the total term note balance prior to the time the term investment is placed. Collateral will be pledged in the same manner as collateral for the main note balance, although specific collateral requirements may differ. As with main note balances, types and valuations of acceptable collateral for the term note balance will be published on the Bureau of the Public Debt's web site at www.publicdebt.treas.gov.

TT&L Special Notice to Depositaries

This is notice to Treasury Tax and Loan (TT&L) depositaries regarding the rate of interest the Department of the Treasury charges on TT&L main note balances, including funds invested through the direct investment and special direct investment programs. Effective April 15, 2002, the TT&L rate of interest is the Federal funds rate published weekly by the Board of Governors of the Federal Reserve System less twenty-five basis points.

Executive Order 12866

This final rule does not meet the criteria for a "significant regulatory action" as defined in Executive Order 12866. Therefore, the regulatory review procedures contained therein do not apply.

Regulatory Flexibility Act Analysis

It is herein certified that this final rule will not have a significant economic impact on a substantial number of small entities. The basis for this certification is that this final rule does not require any actions on the part of or impose any new requirements on small entities. Accordingly, a regulatory flexibility analysis is not required.

List of Subjects in 31 CFR Part 203

Banks, Banking, Electronic fund transfers, Taxes.

Authority and Issuance

For the reasons set out in the preamble, 31 CFR part 203 is amended as follows:

PART 203—PAYMENT OF FEDERAL TAXES AND THE TREASURY TAX AND LOAN PROGRAM

1. The authority citation for part 203 continues to read as follows:

Authority: 12 U.S.C. 90, 265–266, 332, 391, 1452(d), 1464(k), 1767, 1789a, 2013, 2122, and 3102; 26 U.S.C. 6302; 31 U.S.C. 321, 323 and 3301–3304.

2. Amend § 203.2 by revising paragraph (g); redesignating paragraphs (w) through (dd) and (ee) through (kk) as paragraphs (x) through (ee) and (hh) through (nn), respectively; adding new paragraph (w); revising newly redesignated paragraphs (x) and (dd); adding new paragraphs (ff) and (gg); and revising newly redesignated paragraph (nn) to read as follows:

§ 203.2 Definitions.

* * * * *

(g) *Direct investment* means placement of Treasury funds with a depositary and a corresponding increase in a depositary's main note balance.

* * * * *

(w) *Main note balance* means an open-ended interest-bearing note balance maintained at the FRB of the district.

(x) *Note option* means that program available to a TT&L depositary under which Treasury invests in obligations of the depositary. The amount of such investments will be evidenced by interest-bearing note balances maintained at the FRB of the district.

* * * * *

(dd) *Special direct investment* means the placement of Treasury funds with a depositary and a corresponding increase in a depositary's main note balance, where the investment specifically is identified as a "special direct investment" and may be secured by collateral retained in the possession of the depositary pursuant to the terms of § 203.24(c)(2)(i).

* * * * *

(ff) *Term investment option* means the program available to financial institutions that offers the ability to borrow excess Treasury operating funds for a predetermined period of time.

(gg) *Term note balance* means an interest-bearing note balance maintained at the FRB of the district for a predetermined period of time.

* * * * *

(nn) *Treasury Tax and Loan (TT&L) rate of interest* means the interest charged on the main note balance. The TT&L rate of interest is the rate prescribed by the Secretary taking into

VOL
67
ISS
51
MR
15
2002
UMI

consideration prevailing market interest rates. The rate and any rate changes will be announced through a *TT&L Special Notice to Depositaries* and will be published in the **Federal Register** and on a web site maintained by Treasury's Financial Management Service at http://www.fms.treas.gov.

3. Amend § 203.3 to revise paragraph (c) to read as follows:

§ 203.3 Financial institution eligibility for designation as a Treasury Tax and Loan depositary.

* * * * *

(c) In order to be designated as a TT&L depositary for the purposes of processing tax deposits in the FTD system, a financial institution shall possess under its charter either general or specific authority permitting the maintenance of the TT&L account, the balance of which is payable on demand without previous notice of intended withdrawal. In addition, note option depositaries shall possess either general or specific authority permitting the maintenance of a note balance. In the case of note option depositaries maintaining main note balances, the authority shall permit the maintenance of a main note balance which is payable on demand without previous notice of intended withdrawal.

4. Amend § 203.13 to revise paragraphs (b), (c)(1), and (d) (1) to read as follows:

§ 203.13 Same-day reporting and payment mechanisms.

* * * * *

(b) *Fedwire value transfer.* To initiate a Fedwire value tax payment, the financial institution shall be a Fedwire participant and shall comply with the FRB's Fedwire format for tax payments. The taxpayer's financial institution shall provide the taxpayer, upon request, the IMAD and the ETA reference numbers for a Fedwire value transfer. The financial institution may obtain the ETA reference number for Fedwire value transfers from its FRB by supplying the related IMAD number. Fedwire value transfers settle immediately to the TGA and thus are not credited to a depositary's main note balance.

(c) * * *

(1) For a note option depositary using a Fedwire non-value transaction, the tax payment amount will be credited to the depositary's main note balance on the day of the transaction.

* * * * *

(d) * * *

(1) For a note option depositary using a Direct Access transaction, the tax payment amount will be credited to the depositary's main note balance on the day of the transaction.

* * * * *

5. Revise § 203.19 to read as follows:

§ 203.19 Note option.

(a) *Late delivery of advices of credit.* If an advice of credit does not arrive at the FRB before the designated cutoff hour for receipt of such advices, the FRB will post the funds to the main note balance as of the next business day after the date on the advice of credit. This is the date on which funds will begin to earn interest for Treasury.

(b) *Transfer of funds from TT&L account to the main note balance.* For a depositary selecting the note option, funds equivalent to the amount of deposits credited by a depositary to the TT&L account shall be withdrawn by the depositary and credited to the main note balance on the business day following the receipt of the tax payment.

6. Revise § 203.21 to read as follows:

§ 203.21 Scope of the subpart.

This subpart provides rules for TT&L depositaries on crediting main note balances under the various payment methods; debiting main note balances; maintaining term note balances; and pledging collateral security.

7. Amend section 203.22 to remove "and" at the end of paragraph (b), revise paragraph (c) and add paragraph (d) to read as follows:

§ 203.22 Sources of balances.

* * * * *

(c) Direct investments and special direct investments pursuant to subpart D of this part; and

(d) Other excess Treasury operating funds.

8. Amend § 203.23 by revising paragraphs (a)(1), (a)(2), (c), (d), and (e); and adding paragraph (f) to read as follows:

§ 203.23 Note balance.

(a)* * *

(1) *FTD system.* A depositary processing tax deposits using the FTD system and electing the note option shall debit the TT&L account and credit its main note balance as stated in § 203.19(b).

(2) *EFTPS*—(i) *ACH debit and ACH credit.* A note option depositary processing EFTPS ACH debit entries and/or ACH credit entries shall credit its main note balance for the value of the transactions on the date that an exchange of funds is reflected on the books of the Federal Reserve Bank of the district. Financial institutions may refer to the procedural instructions for information on how to ascertain the amount of the credit to the main note balance.

(ii) *Fedwire non-value and Direct Access.* A note option depositary processing Fedwire non-value and/or Direct Access transactions pursuant to subpart B of this part shall credit its main note balance and debit its customer's account for the value of the transactions on the date ETA receives and processes the transactions.

* * * * *

(c) *Main note balance withdrawals.* The amount of the main note balance shall be payable on demand without prior notice. Calls for payment on the note will be by direction of the Secretary through the FRBs. On behalf of Treasury, the FRB shall charge the reserve account of the depositary or the depositary's designated correspondent on the day specified in the call for payment.

(d) *Interest.* A main note balance shall bear interest at the TT&L rate. Such interest is payable by a charge to the Federal Reserve account of the depositary or its designated correspondent in the manner prescribed in the procedural instructions.

(e) *Maximum balance*—(1) *Note option depositaries.* A depositary selecting the note option shall establish a maximum for its main note balance by providing notice to that effect in writing to the FRB of the district. The maximum balance is the amount of funds for which a main note option depositary is willing to provide collateral in accordance with § 203.24(c)(1). The depositary shall provide the advance notice required in the procedural instructions before reducing the established maximum balance unless it is a reduction resulting from a collateral re-evaluation as determined by the depositary's FRB. That portion of any advice of credit or EFTPS tax payment, which, when posted at the FRB, would cause the main note balance to exceed the maximum balance amount specified by the depositary, will be withdrawn by the FRB that day.

(2) *Direct investment depositaries.* A main note option depositary that participates in direct investment shall set a maximum for its main note balance for direct investment purposes which is higher than its peak balance normally generated by the depositary's advices of credit and EFTPS tax payment inflow. The direct investment note option depositary shall provide the advance notice required in the procedural instructions before reducing the established maximum balance.

(3) *Special direct investment depositaries.* Special direct investments, when credited to the main note balance, shall not be considered in setting the amount of the maximum balance or in determining the amounts to be withdrawn where a depositary's maximum balance is exceeded.

(f) *Term investment option.* Treasury may, from time to time, invest excess operating funds in obligations of depositaries selecting the term investment option. Such obligations shall be in the form of interest-bearing notes payable upon a predetermined period of time not to exceed 90 days. Such notes shall bear interest at a rate prescribed by the Secretary by auction or otherwise taking into consideration prevailing market interest rates.

9. Amend § 203.24 to revise paragraph (a); redesignate paragraphs (b) through (f) as paragraphs (c) through (g), respectively; add a new paragraph (b); and revise newly redesignated paragraph (d)(1) to read as follows:

§ 203.24 Collateral security requirements.

* * * * *

(a) *Note option—main note balance*—(1) *FTD deposits and EFTPS tax payments.* A depositary shall pledge collateral security in accordance with the requirements of paragraphs (d)(1), (e), and (f) of this section in an amount that is sufficient to cover the pre-established maximum balance for the main note balance, and, if applicable, the closing balance in the TT&L account which exceeds recognized insurance coverage. Depositaries shall pledge collateral for the full amount of the maximum balance at the time the maximum balance is established. If the depositary maintains a TT&L account, the depositary shall pledge collateral security before crediting deposits to the TT&L account.

(2) *Direct investments.* A note option depositary that participates in direct investment is not required to pledge collateral continuously in the amount of the pre-established maximum balance. However, each note option depositary participating in direct investment shall pledge, no later than the day the direct investment is placed, the additional collateral in accordance with paragraphs (d)(1), (e), and (f) of this section to cover the total main note balance including those funds received through direct investment. If a direct investment depositary has a history of frequent collateral deficiencies, it shall fully collateralize its maximum balance at all times.

(3) *Special direct investments.* Before special direct investments are credited to a depositary's main note balance, the note option depositary shall pledge collateral security, in accordance with the requirements of paragraphs (d)(2) and (f) of this section, to cover 100 percent of the amount of the special direct investments to be received.

(b) *Note option—term note balance.* Each note option depositary participating in the term investment program shall pledge, prior to the time the term investment is placed, collateral in accordance with paragraphs (d) (1), (e), and (f) of this section sufficient to cover the total term note balance.

* * * * *

(d) *Deposits of securities.* (1) Collateral security required under paragraphs (a)(1), (2), (b), and (c) of this section shall be deposited with the FRB of the district, or, where appropriate, with a custodian or custodians within the United States designated by the FRB, under terms and conditions prescribed by the FRB.

* * * * *

Dated: October 26, 2001.

Kenneth R. Papaj,

Acting Commissioner.

Coast Guard

33 CFR Part 165

[CGD01–01–162]

RIN 2115–AA97, 2115–AA97, and 2115–AA98

Anchorages, Regulated Navigation Areas, Safety and Security Zones; Boston Marine Inspection Zone and Captain of the Port Zone

AGENCY: Coast Guard, DOT.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is revising a temporary final rule (§ 165.T01–171) published September 27, 2001. This change will extend the effective period for four temporary safety and security zones in this rule until June 30, 2002. allowing us adequate time to conduct a rulemaking to make these four safety and security zones permanent. The anchorage area restrictions (§ 110.T01–162) and regulated navigation areas (§ 165.T01–162) created by the rule published September 27, 2001 will expire as provided in that rule on March 16, 2002.

DATES: Section 165.T01–171 is revised effective March 15, 2002 and will remain effective until June 30, 2002.

ADDRESSES: MSO Boston maintains the public docket for this rulemaking. Comments and material received from the public, as well as documents indicated in this preamble as being available in the docket, will become part of this docket and will be available for inspection or copying at MSO Boston between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: LT Dave Sherry, Maritime Security Operations, MSO Boston, at 617–223–3030.

SUPPLEMENTARY INFORMATION:

Regulatory History

We did not publish a notice of proposed rulemaking (NPRM) for this regulation. Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing an NPRM. On September 11, 2001, two commercial aircraft were hijacked from Logan Airport in Boston, Massachusetts and flown into the World Trade Center in New York, New York inflicting catastrophic human casualties and property damage. A similar attack was conducted on the Pentagon with a plane launched from Newark, NJ on the same day. National security and intelligence officials warn that future terrorist attacks against civilian targets may be anticipated.

For these same reasons, under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. This rulemaking is urgently required to prevent future terrorist strikes within and adjacent to waters within the areas protected by these safety and security zones. The delay inherent in the NPRM process is contrary to the public interest insofar as it may render individuals, vessels and facilities within and adjacent area vulnerable to subversive activity, sabotage or terrorist attack.

Background and Purpose

On September 27, 2001, we published a temporary final rule creating anchorage area restrictions, three regulated navigation areas and five safety and security zones in the Boston Marine Inspection Zone and Captain of the Port Zone. (66 FR 49280). One of the safety and security zones, § 165.T01–171 (a)(4), for Pilgrim Nuclear Power Plant has been removed by a different temporary final rule (67 FR 1607, January 14, 2002), which was followed by an NRPM for a permanent rule (67 FR 4218, January 29, 2002).

We have determined that the anchorage area restrictions and three regulated navigation areas will not be

VOL
67
ISS
51
MR
15
2002
UMI

needed after their current expiration date, March 16, 2002.

As indicated by an NPRM we published last month, and in the reasons supporting our finding of good cause, we do see a need to continued the four remaining safety and security zones in temporary 33 CFR 165.T01–171. (67 FR 8915, February 27, 2002). We are extending the effective period of these zones until June 30, 2002, to allow us to issue a supplemental NPRM with a longer comment period on the proposal to make these safety and security zones permanent.

Safety and Security Zones

The rule extends the effective period for four distinct safety and security zones, having identical boundaries. Three of these zones are being established by reference to a radius around a particular coordinate or easily identifiable landmark. One zone is being established by reference to readily identifiable boundaries. All of the zones are being established in order to protect the waterfront facilities, terminals, power plants, as well as persons and vessels from subversive or terrorist acts. No person or vessel may enter or remain in the prescribed safety and security zones at any time without the permission of the Captain of the Port. Each person or vessel in a safety and security zone shall obey any direction or order of the Captain of the Port.

The Captain of the Port may take possession and control of any vessel in a safety and security zone and/or remove any person, vessel, article or thing from a security zone. No person may board, take or place any article or thing on board any vessel or waterfront facility in a security zone without permission of the Captain of the Port. Any violation of any safety or security zone described herein, is punishable by, among others, civil penalties (not to exceed $25,000 per violation, where each day of a continuing violation is a separate violation), criminal penalties (imprisonment for not more than 10 years and a fine of not more than $100,000), in rem liability against the offending vessel, and license sanctions.

Regulatory Evaluation

This rule is not a "significant regulatory action" under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not "significant" under the regulatory policies and procedures of the Department of Transportation (DOT)(44 FR 11040, February 26, 1979).

We expect the economic impact of this rule to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary. This regulation may have some impact on the public, but these potential impacts will be minimized for the following reasons: there is ample room for vessels to navigate around some of the safety and security zones in Boston Harbor and the zone in Salem Harbor; and the local maritime community will be informed of the zones via marine information broadcasts. While recognizing the potential impacts, the Coast Guard still deems that these safety and security zones are need to protect the ports of Boston and Salem and the public.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this rule would have a significant economic impact on a substantial number of small entities. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this rule does not have a significant economic impact on a substantial number of small entities. This rule may affect the following entities, some of which may be small entities: the owners or operators of vessels intending to transit or anchor in a portion of Boston and Salem Harbor in which entry would be prohibited by safety or security zones.

This rule does not have a significant impact on a substantial number of small entities because the majority of the zones are limited in size, leaving ample room for vessels to navigate around the zones. The zones will not significantly impact commuter and passenger vessel traffic patterns, and mariners will be notified of the zones via local notice to mariners and marine broadcasts. Also, the Captain of the Port will make broad allowances for individuals to enter the zones during periods when the potential threats to the Port of Boston are deemed to be low.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we want to assist small entities in understanding this rule so that they can better evaluate its effects on them and participate in the rulemaking. If this rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact LT Dave Sherry, Maritime Security Operations, Marine Safety Office Boston, at 617–223–3030.

Collection of information

This rule does not call for new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This rule does not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that might disproportionately affect children.

Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. We invite your comments on how this rule might impact tribal governments, even if that impact may not constitute a "tribal implication" under the Order.

Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a "significant energy action" under that order because it is not a "significant regulatory action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. It has not been designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Environment

The Coast Guard considered the environmental impact of this rule and concluded that, under figure 2–1, (34)(g), of Commandant Instruction M16475.lD, this rule is categorically excluded from further environmental documentation. A "Categorical Exclusion Determination" is available in the docket where indicated under **ADDRESSES.**

List of Subjects 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191, 33 CFR 1.05–1(g), 6.04–1, 6.04–6, 160.5; 49 CFR 1.46

2. Revise § 165.T01–171 published at 66 FR 49283–49284 to read as follows:

§ 165.T01–171 Safety and Security Zones: Boston Marine Inspection Zone and Captain of the Port Zone.

(a) *Location.* The following are established as safety and security zones:

(1) All waters of the Mystic River within a five hundred (500) yard radius of the Distrigas terminal pier in Everett, MA.

(2) All waters of Boston Harbor, including the Reserved Channel, west of a line connecting the Southeastern tip of the North Jetty and the Northeastern corner of the Paul W. Conley Marine Terminal pier.

(3) All waters of Boston Inner Harbor within a two hundred (200) yard radius of Pier 2 at the Coast Guard Integrated Support Command Boston, Boston, MA.

(4) All waters of Salem Harbor within a five hundred (500) yard radius of the PG & E U.S. Generating power plant pier in Salem, MA.

(b) *Effective dates.* This section is effective from September 18, 2001 until June 30, 2002.

(c) *Regulations.* (1) The general regulations contained in 33 CFR 165.23 and 165.33 apply.

(2) All persons and vessels shall comply with the instructions of the Coast Guard Captain of the Port or the designated on-scene-patrol personnel. These personnel comprise commissioned, warrant, and petty officers of the Coast Guard. Upon being hailed by a U. S. Coast Guard vessel by siren, radio, flashing light, or other means, the operator of a vessel shall proceed as directed.

Dated: March 12, 2002.

G. N. Naccara,

Rear Admiral, U.S. Coast Guard, District Commander, First U.S. Coast Guard District.

BILLING CODE 1505–01–D

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 70

[IA 150–1150; FRL–7158–6]

Approval of Operating Permit Program; State of Iowa

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is announcing its approval of the amendments to the Iowa Title V operating permit program. EPA announced its proposed approval of these amendments on January 11, 2002. These amendments incorporate existing periodic monitoring guidance and adopt by reference compliance assurance monitoring requirements.

DATES: This rule is effective on April 15, 2002.

FOR FURTHER INFORMATION CONTACT: Lynn M. Slugantz at (913) 551–7883.

SUPPLEMENTARY INFORMATION: Throughout this document whenever "we," "us," or "our" is used, we mean EPA. This section provides additional information by addressing the following questions:

What is the Part 70 operating permit program?

What is the Federal approval process for the Part 70 operating permit program?

What does Federal approval of a state operating permit program mean to me?

What is being addressed in this document?

Have the requirements for approval of a revision to the operating permit program been met?

What action is EPA taking?

What Is the Part 70 Operating Permit Program?

The Clean Air Act (CAA) Amendments of 1990 require all states to develop an operating permit program that meets certain Federal criteria listed

VOL 67 ISS 51 MR 15 2002 UMI

in 40 Code of Federal Regulations (CFR) part 70. In implementing this program, the states are to require certain sources of air pollution to obtain permits that contain all applicable requirements under the CAA. One purpose of the part 70 operating permit program is to improve enforcement by issuing each source a single permit that consolidates all of the applicable CAA requirements into a Federally enforceable document. By consolidating all of the applicable requirements for a facility into one document, the source, the public, and the permitting authorities can more easily determine what CAA requirements apply and how compliance with those requirements is determined.

Sources required to obtain an operating permit under this program include: "major" sources of air pollution and certain other sources specified in the CAA or in our implementing regulations. For example, all sources regulated under the acid rain program, regardless of size, must obtain permits. Examples of major sources include those that emit 100 tons per year or more of volatile organic compounds, carbon monoxide, lead, sulfur dioxide, nitrogen dioxide, or particulate matter that is 10 micrometers in size (PM_{10}); those that emit 10 tons per year of any single hazardous air pollutant (HAP) (specifically listed under the CAA); or those that emit 25 tons per year or more of a combination of HAPs.

Revisions to the state and local agencies' operating permit program are subject to public notice, comment, and our approval.

What Is the Federal Approval Process for the Part 70 Operating Permit Program?

In order for state regulations to be incorporated into the Federally enforceable Title V operating permit program, states must formally adopt the regulations consistent with state and Federal requirements. This process generally includes a public notice, public hearing, public comment period, and a formal adoption by a state-authorized rulemaking body.

Once a state rule, regulation, or control strategy is adopted, the state submits it to us for inclusion into the operating permit program. We must provide public notice and seek additional public comment regarding the proposed Federal action on the state submission. If adverse comments are received, they must be addressed prior to any final Federal action by us.

All state regulations and supporting information approved by EPA under section 502 of the CAA are incorporated into the Federally approved operating permit program. Records of such actions are maintained in the CFR at Title 40, part 70, appendix A, entitled "Approval Status of State and Local Operating Permits Program."

What Does Federal Approval of a State Operating Permit Program Mean to Me?

Enforcement of the state regulation before and after it is incorporated into the Federally approved operating permit program is primarily a state responsibility. However, after the state program is Federally approved, we oversee the program and review proposed permits submitted by the state in accordance with 40 CFR part 70. We are also authorized to enforce the permit program and individual permits issued under the program. Citizens are also offered legal recourse to address violations as described in section 304 of the CAA.

What Is Being Addressed in This Document?

The Iowa Department of Natural Resources (IDNR) has adopted amendments to 567 Iowa Administrative Code (IAC) 22.108(3). The purpose of the amendments is to incorporate IDNR's existing Title V Periodic Monitoring Guidance into its rules. Periodic monitoring is required by 40 CFR 70.6 and 71.6 where the applicable requirement does not require periodic testing or instrumental or noninstrumental monitoring. Also, the amendments to 567 IAC 22.108(3) adopt by reference Compliance Assurance Monitoring (CAM) that is required to be included in 40 CFR part 70 or 71 operating permits for major stationary sources of air pollution that are required to obtain operating permits under Title V of the CAA. Periodic monitoring and CAM are needed to provide reasonable assurance of compliance with applicable requirements under the CAA. The amendments were adopted and filed by the Environmental Protection Commission on June 21, 2001; published on July 11, 2001; and became effective on August 15, 2001.

As a part of our review of these amendments, EPA requested clarification from IDNR regarding the list of factors to be considered in evaluating the type of periodic monitoring appropriate for an applicable requirement, as set forth in the narrative of the June 18, 2001, Periodic Monitoring Guidance. This narrative lists numerous factors to be considered, while Attachment 1 to that guidance contains a decision matrix considering only type of source and whether the source is controlled or uncontrolled. In response to EPA's request, IDNR sent EPA a November 7, 2001, letter in which the state clarified that it has flexibility in deciding to follow the matrix which is found in appendix A to that guidance or to make a case-by-case determination that differs from the periodic monitoring guidance and the matrixes. EPA believes that the state's ability to deviate from the guidance on a case-by-case basis is essential to implementation of this program, and our approval of the state program revisions is based, in part, on the state's assurance that it retains authority to establish appropriate periodic monitoring on a case-by-case basis. EPA reserves our authority to object to permit provisions regarding periodic monitoring if they do not meet the requirements of the CAA or 40 CFR 70.6(a)(3).

On January 11, 2002, we proposed to approve this rule revision. In the proposal, EPA expressly stated its understanding that IDNR retained authority to establish periodic monitoring on a case-by-case basis, and also stated that it retained authority to object to periodic monitoring which did not meet the requirements of the CAA (67 FR 1432). The public comment period was open through February 11, 2002. No comments were received.

This **Federal Register** document takes final action to approve the amendments to Iowa's Title V operating permit program to incorporate existing periodic monitoring guidance and adopt by reference compliance assurance monitoring requirements.

Have the Requirements for Approval of a Revision to the Operating Permit Program Been Met?

Our review of the material submitted indicates the state has amended rules for the Title V program in accordance with the requirements of section 502 of the CAA and the Federal rule, 40 CFR part 70, and met the requirement for a program revision as established in 40 CFR 70.4(i).

What Action Is EPA Taking?

EPA is hereby approving amendments to Iowa rule, 567 IAC 22.108(3), effective August 15, 2001, as supplemented on November 7, 2001, as a revision to the Iowa Title V operating permit program.

Administrative Requirements

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001). This action merely approves state law as meeting Federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule approves pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4).

This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). This action also does not have Federalism implications because it does not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This action merely approves a state rule implementing a Federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the CAA. This rule also is not subject to Executive Order 13045 "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997), because it is not economically significant.

In reviewing Title V operating permit program submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove an operating permit program submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews an operating permit program submission, to use VCS in place of an operating permit program submission that otherwise satisfies the provisions of the CAA. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 14, 2002. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (*See* section 307(b)(2).)

List of Subjects in 40 CFR Part 70

Environmental protection, Administrative practice and procedure, Air pollution control, Intergovernmental relations, Reporting and recordkeeping requirements.

Dated: March 5, 2002.

William Rice,

Acting Regional Administrator, Region 7.

Chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 70—[AMENDED]

1. The authority citation for part 70 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

2. Appendix A to part 70 is amended by adding under "Iowa" paragraph (d) to read as follows:

Appendix A to Part 70—Approval Status of State and Local Operating Permits Programs

* * * * *

Iowa

* * * * *

(d) The Iowa Department of Natural Resources (IDNR) submitted amendments to Iowa Rule, 567 Iowa Administrative Code (IAC) 22.108(3), as a revision to the Iowa Title V operating permits program on August 31, 2001, effective August 15, 2001. The amendments incorporate existing periodic monitoring guidance and adopt by reference compliance assurance monitoring requirements. The IDNR submitted a supplement regarding these amendments on November 7, 2001, clarifying IDNR's authority to establish periodic monitoring on a case-by-case basis. This revision to the Iowa program is effective April 15, 2002.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 1

[Docket No. OST–1999–6189]

Organization and Delegation of Powers and Duties, Update of Secretarial Delegation to the Administrator, Federal Motor Carrier Safety Administration

AGENCY: Office of the Secretary, DOT.

ACTION: Final rule.

SUMMARY: The Office of the Secretary of Transportation (OST) is updating the delegations of authority from the Secretary to the Administrator of the Federal Motor Carrier Safety Administration in response to the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT ACT) Act of 2001.

Section 1012 of the USA PATRIOT ACT amends the United States Code by adding a new section relating to limitations on issuance of licenses to individuals who operate motor vehicles transporting hazardous materials in commerce. By this action, the Secretary delegates the authority to carry out this provision to the FMCSA Administrator.

EFFECTIVE DATE: This final rule is effective on March 15, 2002.

FOR FURTHER INFORMATION CONTACT: Ms. Patricia A. Burke, Office of the Chief Counsel, MC–CC, (202) 366–0834, Federal Motor Carrier Safety Administration, U.S. Department of

SUPPLEMENTARY INFORMATION:

Electronic Access

An electronic copy of this document may be downloaded by using a computer, modem and suitable communications software from the Government Printing Office's Electronic Bulletin Board Service at (202) 512–1661. Internet users may reach the Office of the Federal Register's home page at *http://www.nara.gov/fedreg* and the Government Printing Office's database at: *http://www.access.gpo.gov/nara.*

Background

Section 1012 of the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT ACT) Act of 2001, (Public Law 107–56, 115 Stat. 272 at 396, (October 26, 2001)), amends chapter 51 of title 49 United States Code, by adding a new section 5103a, relating to limitations on issuance of licenses to individuals who operate motor vehicles transporting hazardous materials in commerce. The new provision is best administered by the FMCSA, which is responsible for the commercial driver's license (CDL) program. This delegation broadens the FMCSA Administrator's delegated authority relating to hazardous materials transportation programs.

This final rule updates the delegations of authority from the Secretary to the FMCSA Administrator to reflect the organizational posture of the Department. As such, the final rule is ministerial in nature and relates only to Departmental management, organization, procedure, and practice. Since this amendment relates to departmental organization, procedure and practice, notice and comment are unnecessary under 5 U.S.C. 553(b).

Furthermore, this rule does not impose substantive requirements on the public. Also, this final rule expedites the Department of Transportation's ability to implement section 1012 of the USA PATRIOT ACT. Consequently, the Department finds that there is good cause under 5 U.S.C. 553(d)(3) to make this rule effective on the date of publication in the **Federal Register**.

Regulatory Analyses and Notices

A. Executive Order 12866 and DOT Regulatory Policies and Procedures

The final rule is not considered a significant regulatory action under Executive Order 12866 and the Regulatory Policies and Procedures of the Department of Transportation (44 FR 11034). There are no costs associated with this rule.

B. Executive Order 13132

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 13132, dated August 4, 1999. This final rule does not have a substantial direct effect on, or sufficient federalism implications for, the States, nor would it limit the policymaking discretion of the States. Therefore, the consultation and funding requirements do not apply.

C. Executive Order 13084

This final rule has been analyzed in accordance with the principles and criteria contained in Executive Order 13084 ("Consultation and Coordination with Indian Tribal Governments"). Because this final rule does not significantly or uniquely affect the communities of the Indian tribal governments and does not impose substantial direct compliance costs, the funding and consultation requirements of Executive Order 13084 do not apply.

D. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 et seq.) requires an agency to review regulations to assess their impact on small entities unless the agency determines that a rule is not expected to have a significant impact on a substantial number of small entities. I hereby certify this final rule, which amends the CFR to reflect a delegation of authority from the Secretary to the FMCSA Administrator, will not have a significant economic impact on a substantial number of small businesses.

E. Paperwork Reduction Act

This rule contains no information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

F. Unfunded Mandates Reform Act

The Department has determined that the requirements of Title II of the Unfunded Mandates Reform Act of 1995 do not apply to this rulemaking.

List of Subjects in 49 CFR Part 1

Authority delegations (Government agencies), Organization and functions (Government agencies).

In consideration of the foregoing, Part 1 of Title 49, Code of Federal Regulations, is amended as follows:

PART 1—[AMENDED]

1. The authority citation for part 1 is revised to read as follows:

Authority: 49 U.S.C. 322; 46 U.S.C. 2104(a); 28 U.S.C. 2672; 31 U.S.C. 3711(a)(2); Pub. L. 101–552, 104 Stat. 2736; Pub. L. 106–159, 113 Stat. 1748; Pub. L. 107–56, 115 Stat. 396.

2. In § 1.73, revise paragraph (d)(2) to read as follows:

§ 1.73 Delegation to the Administrator of the Federal Motor Carrier Safety Administration.

* * * * *

(d) * * *

(2) Carry out the functions vested in the Secretary by 49 U.S.C. 5103a relating to limitations on issuance of licenses to operate motor vehicles transporting hazardous materials in commerce; 49 U.S.C. 5112 relating to highway routing of hazardous materials; 49 U.S.C. 5109 relating to motor carrier safety permits, except subsection (f); 49 U.S.C. 5113 relating to unsatisfactory safety ratings of motor carriers; 49 U.S.C. 5125(a) and (c)–(f), relating to preemption determinations or waivers of preemption of hazardous materials highway routing requirements; 49 U.S.C. 5105(e) relating to inspections of motor vehicles carrying hazardous material; and 49 U.S.C. 5119 relating to uniform forms and procedures.

* * * * *

Issued in Washington, DC on March 7, 2002.

Norman Y. Mineta,

Secretary.

[FR Doc. 02–6123 Filed 3–14–02; 8:45 am]

BILLING CODE 4910–62–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Parts 244 and 1106

[FRA Docket No. 1999–4985, Notice No. 4]

Surface Transportation Board

[STB Ex Parte No. 574]

RIN 2130–AB24

Regulations on Safety Integration Plans Governing Railroad Consolidations, Mergers, and Acquisitions of Control; and Procedures for Surface Transportation Board Consideration of Safety Integration Plans in Cases Involving Railroad Consolidations, Mergers, and Acquisitions of Control

AGENCIES: Federal Railroad Administration (FRA), Surface Transportation Board (STB), DOT.

ACTION: Final rules.

SUMMARY: The Federal Railroad Administration ("FRA") and the Surface Transportation Board ("STB" or "Board"), working in conjunction with each other, hereby issue joint final rules establishing procedures for the development and implementation of safety integration plans ("SIPs" or "plans") by a Class I railroad proposing to engage in certain specified merger, consolidation, or acquisition of control transactions with another Class I railroad, or a Class II railroad with which it proposes to amalgamate operations. The scope of the transactions covered under the two rules is the same.

Under FRA's final rule, Class I railroads seeking to consummate a covered transaction must file a proposed SIP with FRA after they seek authority for the transaction from the Board. (A SIP is a written document explaining how each step in implementing a contemplated transaction would be performed safely.) FRA then reviews the proposed SIP and advises the Board as to whether it provides a reasonable assurance of safety for the transaction. The rule further requires that, once the STB has approved a transaction, a railroad must operate over property subject to the transaction in compliance with a SIP approved by FRA, and authorizes FRA to exercise its full enforcement remedies should a railroad fail to implement the terms of an approved plan. Finally, the rule provides that FRA will consult with the STB at all appropriate stages of SIP implementation, assuming FRA approves the SIP and the STB approves the transaction.

Under the STB's final rule, rail carriers seeking to carry out a regulated transaction are required to file a proposed SIP with FRA and the Board 60 days after they seek authority for the transaction. FRA will review the proposed SIP and file written comments with the Board's Section of Environmental Analysis ("SEA"), which is responsible for preparing the Board's environmental documents. SEA will then include the proposed SIP, FRA's written comments on the proposed SIP, and any additions or revisions based on continued discussions with FRA in the Board's draft environmental documentation. After reviewing the proposed SIP, SEA's analysis, and comments provided by interested persons during the STB's environmental review process, the Board will then independently evaluate the transaction and decide whether to approve it. Should the Board approve the transaction and adopt the SIP, it will require compliance with the SIP as a condition to its approval. FRA then will oversee the implementation of the SIP, consult with the Board at all appropriate stages of implementation, and advise the Board when the proposed integration has been safely completed.

The final rules are designed to enable the Board and FRA to ensure adequate and coordinated consideration of safety integration issues in covered rail transactions while minimizing the burdens on the applicants. FRA and the STB believe that the joint rules will serve the public interest in promoting safety in the railroad industry, consistency in decisions, and efficiency in compliance, enabling the agencies to employ their areas of expertise to fulfill their respective statutory objectives in a complementary manner.

DATES: *Effective Date:* The final rules become effective on April 15, 2002.

ADDRESSES: Petitions for reconsideration of FRA's rule should be submitted to Docket Clerk, Office of Chief Counsel, FRA, 1120 Vermont Avenue, NW., Mail Stop 10, Washington, DC 20590. Petitions for reconsideration of the STB's rule should be submitted to Office of the Secretary, STB, 1925 K Street, NW., Washington, DC 20423–0001.

FOR FURTHER INFORMATION CONTACT: Jon Kaplan, Trial Attorney, Office of Chief Counsel, FRA, 1120 Vermont Avenue, NW, Mail Stop 10, Washington, DC 20590 (telephone: (202) 493–6053 and E-mail: jonathan.kaplan@fra.dot.gov); and Evelyn G. Kitay, Office of the General Counsel, STB, 1925 K Street, NW., Washington, DC 20423–0001 (telephone: (202) 565–1563 and e-mail: kitaye@stb.dot.gov). (TDD for the hearing impaired: (202) 565–1695.)

SUPPLEMENTARY INFORMATION:

Joint FRA/STB Introduction

On December 31, 1998, FRA and the STB issued a joint notice of proposed rulemaking ("NPRM") establishing procedures for developing and implementing SIPs by railroads proposing to engage in certain specified merger, consolidation, or acquisition of control transactions with another railroad. 63 FR 72225, Dec. 31, 1998. FRA's proposed rule would have required railroads seeking to consummate any mergers, acquisitions, or consolidations of property involving (i) Class I railroads, (ii) Class II railroads when the railroads would directly interchange freight with each other, (iii) transactions in which the consummation of operations would produce revenue in excess of the Class I threshold, (iv) a passenger railroad (intercity or commuter) with another passenger railroad, a Class I railroad, or a Class II railroad; or (v) start-up operations on a rail line or lines in which the commencement of operations would either involve passenger service or produce revenue in excess of the Class II threshold, to file a proposed SIP for the agency's review and approval. (Class I railroads are rail carriers generating operating revenue, measured in inflation-adjusted 1991 dollars, in excess of $250 million per year for a period of three successive years. Class II railroads are rail carriers generating operating revenue, measured in inflation-adjusted 1991 dollars, between $20 million and $250 million.) Concurrently, the STB's proposed rule would have required railroads seeking to engage in all transactions addressed in FRA's NPRM other than start-up operations to file a SIP with the Board for its review and approval.

The proposed rules set out specific procedures governing the development, approval, and implementation of SIPs, and explained that FRA and the Board are jointly responsible for promoting a safe rail transportation system. Under FRA's proposed rules, railroads seeking to consummate a covered transaction would be required to file a proposed SIP with FRA contemporaneously with the filing of the SIP with the STB. FRA would review the proposed SIP and advise the Board as to whether it provides a reasonable assurance of safety for the transaction. The proposed rule required a railroad to have a SIP approved by FRA before it could execute operations over property subject to the transaction. Where the Board has been involved in authorizing the transaction, FRA would consult with the Board at all appropriate stages of implementation.

Likewise, under the STB's proposed rules, rail carriers seeking to carry out a transaction within the Board's jurisdiction that would require a SIP would file their SIP with the Board and FRA. FRA would review the SIP and file written comments with the Board's SEA. After reviewing the SIP, SEA's analysis, and comments provided by interested persons during the Board's environmental review process, the Board would then independently evaluate the transaction and decide whether to approve it. Should the Board approve the transaction, the railroads would coordinate with FRA in implementing the SIP, including any amendments made to the plan, and FRA would monitor the implementation process and apprise the Board about the railroad's progress in carrying out the plan until FRA advised the Board that the proposed integration had been safely completed. Both FRA and the Board

VOL
67
ISS
51
MR
15
2002
UMI

would be authorized to exercise their full independent enforcement remedies should either FRA or the Board reject the proposed SIP or a railroad fail to implement the terms of an approved SIP.

FRA and the STB received written comments on the proposal from 11 entities and conducted a joint public hearing at the request of one of the commenters in Washington, D.C., on May 4, 1999. Based on the comments received, the testimony at the public hearing, and further analysis of the rules proposed, FRA and the Board now publish these joint final rules. As will be discussed below, both agencies underscore the importance of SIPs when Class I railroads seek to engage in mergers, consolidations, or acquisitions. These are railroads transporting large volumes of freight, frequently including hazardous materials. Given the size and complexity of their operations, careful advance planning is critical to ensure that safety is maintained as the transactions are implemented.

The agencies, however, agree with certain of the comments that the final rules should be limited to consolidations, mergers, or acquisitions of control involving either two or more Class I railroads or a Class I railroad and a Class II railroad with which it proposes to "amalgamate operations" as defined by FRA at 49 CFR 244.9. (*See also* the STB's final rule at 49 CFR 1106.2.) Only the complexity and difficulty of these very large transactions are now believed to present sufficient dangers to merit a SIP under these rules. This substantially comports with the recommendations of some commenters.

In its final rule, FRA has modified the subject matter areas to be addressed in a SIP to cover those disciplines that a regulated transaction affects, and has decided not to require an applicant to file a SIP when a transaction does not involve an amalgamation of operations. In response to the comments, FRA and the Board have "fine tuned" their respective procedures governing the filing, review, and approval of a SIP, and their oversight of an approved plan. The final rules also clarify the respective roles of the two agencies. It is made clearer that (i) the STB is regulating the economic transaction and, in the course of doing so, fulfilling its responsibility to assess environmental impacts, as required by the National Environmental Policy Act ("NEPA"), 42 U.S.C. 4321 *et seq.*, and promote a safe transportation system, and (ii) FRA is regulating the safety of the implementation of any transaction the STB may approve, just as FRA regulates all other aspects of railroad safety. FRA is not approving or disapproving the transaction in any respect, and both agencies state explicitly that FRA has no "veto power," either explicit or implicit as some commenters alleged, over transactions regulated by the STB. If the STB approves a transaction, a railroad must conduct operations over properties that are part of the transaction in compliance with a SIP approved by FRA, just as it must conduct those operations in compliance with the railroad safety statutes and implementing regulations administered by FRA.

Discussion of Comments and Conclusions

FRA and the STB received written comments from various railroads and their representative organizations, labor organizations, and public service organizations. The railroad interests were represented by the Association of American Railroads ("AAR"), American Short Line and Regional Railroad Association ("ASLRRA"), National Railroad Passenger Corporation ("Amtrak"), Guilford Transportation Industries ("GTI"), and the Wheeling & Lake Erie Railway Company ("W&L"). The American Train Dispatchers Department of the International Brotherhood of Locomotive Engineers ("ATDD"), Transportation Trades Department, American Federation of Labor-Congress of Industrial Organizations ("TTD"), Brotherhood of Railway Carmen Division of the Transportation Communications International Union ("BRC"), and Brotherhood of Maintenance of Way Employes ("BMWE") represented the interests of rail labor. The public service organizations were represented by the American Public Transit Association, now the American Public Transportation Association ("APTA"), and the Oklahoma Department of Transportation ("OK DOT"). At the public hearing held on May 4, 1999, two organizations participated: the TTD and the AAR. The commenters raised questions about the proposal itself, suggested alternative language to some of the proposed rule text, and requested clarification about the meaning and application of certain proposed rules. The discussion that follows highlights the principal issues advanced by the commenters and explains how the final rules reflect the comments received. Because many of the comments focus on the rules proposed by one agency and not the other, FRA and the Board present separate sections addressing the comments and each agency's conclusions.

A. FRA's Response to Comments Concerning the Need To Require SIPs for Mergers, Consolidations, and Acquisitions of Control

Several comments addressed the types of transactions that warrant preparation of a SIP under these rules. The ATDD and TTD, for instance, endorsed the breadth of FRA's proposed rule, asserting that that type of rule is necessary to ensure the safety of railroad employees and the public. The ATDD commented that operational changes, *i.e.*, changes in traffic volume and traffic patterns, timetable schedules, and labor reductions, needed to be evaluated for safety concerns. The TTD added that the rulemaking action should be transferred to FRA's Railroad Safety Advisory Committee ("RSAC") to secure fuller labor input in the development of FRA's final rule. Amtrak also supported the proposition of the SIP rules, agreeing that "mega-mergers" present unique safety issues that should be identified and addressed at the application stage to enable FRA and the Board to handle proposed transactions as safely as possible.

GTI disagreed with the premise of the SIP rules. Specifically, GTI claimed that FRA need not issue any regulations governing mergers, consolidations, or acquisitions of control because the agency already has the regulations necessary to ensure safe operations subject to a proposed regulated transaction. GTI further postulated that FRA is without expertise in regulating these transactions and that self-regulation was most appropriate in this instance because merging railroads recognize that unsafe operations lead to increased costs and decreased returns on an investment. In other words, GTI recommended that the agencies terminate this rulemaking action and apply the existing regulations that govern regulated transactions.

The AAR argued that SIPs should be limited to consolidation, merger, and acquisition of control proceedings involving at least two Class I railroads and not to other less complex proceedings. The AAR also argued that only the Board should have approval authority over SIPs and that FRA's role should be limited to advising the Board. According to the AAR, any regulations purporting to vest FRA with authority to approve a SIP would be contrary to law and in derogation of the Board's "exclusive" authority to approve merger transactions under 49 U.S.C. 11321.

FRA strongly endorses the concept of the SIP rules and their importance in

regulating the complex railroad transactions involving mergers, consolidations, and acquisitions of large railroads where operations are amalgamated. As the agencies explained in the NPRM, acquisitions, consolidations, and mergers must be carefully planned and implemented to maintain safety. *See* 63 FR 72226–27. Transactions involving Class I railroads significantly change the carrier landscape and raise potential safety issues relating to integrating operations, facilities, personnel, safety practices, and corporate cultures. The NPRM noted FRA's concerns regarding safety problems that resulted from inadequate safety planning before implementation of the merger of the Union Pacific Railroad Company ("UP") and the Southern Pacific Transportation Company ("SP") (collectively referred to as "UP/SP") and the merger of the Burlington Northern Railroad Company ("BN") and the Atchison, Topeka and Santa Fe Railway Company ("ATSF") (collectively referred to as "BNSF"). *See* 63 FR 72227. The chief executive officers of the Norfolk Southern Railway Company and CSX Transportation, Incorporated, which acquired and divided Consolidated Rail Corporation ("Conrail"), amplified this point when they testified before the STB about the operational and safety difficulties they encountered in implementing their respective transactions, even with the planning and experiences of earlier mergers to guide them and having prepared SIPs. *See Public Views on Major Rail Consolidations*, STB Ex Parte No. 582, slip op. at 4–5 (STB served Mar. 17, 2000).

FRA believes that the final SIP rules accomplish the objective of ensuring safe railroad operations during and after implementation of an approved transaction. First, the regulations set out subject matter areas that are critical to railroad safety that an applicant must address in a proposed SIP. These requirements address safety issues unique to the amalgamation of large, complex railroad operations that are not covered in any existing Federal regulations, necessitating their issuance here. Second, FRA has the necessary expertise in railroad safety to review, analyze, approve, and oversee the implementation of a proposed SIP. FRA has officials and inspectors with knowledge, training, and experience in five railroad disciplines—operating practices, motive power and equipment, signal and train control, track safety, and hazardous materials—that cover the ambit of railroad operations. Therefore, the final rules provide for FRA a mechanism to evaluate and approve SIPs and monitor their implementation if the transactions to which they relate are approved by the Board. As discussed in greater detail below, FRA is regulating the safety aspects of how a railroad implements a transaction permitted by the Board and not whether the railroad is permitted to consummate the transaction or on what economic terms. FRA concludes that the SIP rules are a step forward in providing railroad safety and therefore adopts these final rules. Although FRA entertained TTD's suggestion to add this proceeding to those addressed by FRA's RSAC, the agency decided that a joint rulemaking with the Board, using the complementary authority of both agencies, would be the best way to proceed.

B. FRA's Views on Jurisdiction of FRA and the STB To Issue the Final Rules

The AAR and GTI commented that the STB and not FRA is authorized to issue any regulations governing acquisitions, consolidations, and mergers. Relying on statutory authority, 49 U.S.C. 11321, and decisional law, *Schwabacher* v. *United States*, 334 U.S. 182, 197 (1948); *Norfolk & Western Rwy.* v. *ATDA*, 499 U.S. 117, 127–34 (1991); and *City of Auburn* v. *United States*, 154 F.3d 1025 (9th Cir. 1998), *cert. denied*, 527 U.S. 1022 (1999), the AAR claims that the Board is vested with exclusive authority to issue regulations that are within the STB's jurisdictional purview. GTI echoed the AAR's position, maintaining that an application to consummate an acquisition, consolidation, or merger is an economic transaction, which is fully within the Board's authority.

FRA agrees that the Board has sole authority to regulate the economic transactions, but disagrees with these commenters that issuance of FRA's final rule trespasses upon that jurisdiction. FRA believes that it and the STB have so interpreted their respective statutes and jurisdiction as to reconcile them seamlessly, thereby serving the public interest by assuring that all parts of the affected statutes are given effect and the purposes of Congress are fully carried out. *Tyrrell* v. *Norfolk Southern Rwy. Co.*, 248 F.3d 517, 523 (6th Cir. 2001) (FRA's and the STB's "complementary exercise of their statutory authority accurately reflects Congress's intent for the (Interstate Commerce Commission Termination Act) and the (Federal Railroad Safety Act) to be construed *in pari materia*"). The Supreme Court provides that "it is a cardinal principle of construction that * * * when there are two acts upon the same subject, the rule is to give effect to both." *United States* v. *Borden Co.*, 308 U.S. 188, 198 (1939). Congressional intent behind one Federal statute should not be thwarted by the application of another Federal statute if it is possible to give effect to both laws, *id.*, and courts should "construe the relevant statutes in a manner that most fully effectuates the policies to which Congress was committed." *Commonwealth of Pennsylvania* v. *Lynn*, 501 F.2d 848, 857 (D.C. Cir. 1974); *see also Food and Drug Administration* v. *Brown & Williamson Tobacco Corp.*, 529 U.S. 120, 134 (2000) (a reviewing court should "examin[e] a particular statutory provision * * * (in) context and with a view to [its] place in the overall statutory scheme"); *Blanchette* v. *Connecticut General Ins. Corp.*, 419 U.S. 102, 133–34 (1974) (statutory repeals by implication are disfavored). The agencies have done so in a manner entirely consistent with the cases cited by the commenters. *Tyrrell*, 248 F.3d at 523 ("while recognizing their joint responsibility for promoting rail safety in their 1998 Safety Integration Plan rulemaking, FRA exercised primary authority over rail safety matters under 49 U.S.C. 20101 *et seq.*, while the STB handled economic regulation and environmental impact assessment(,)" citing the NPRM at n.2).

As FRA and the Board explained in the NPRM:

FRA and STB are jointly responsible for promoting a safe rail transportation system.

Under Federal law, primary jurisdiction, expertise and oversight responsibility in rail safety matters are vested in the Secretary of the Department of Transportation, and delegated to the Federal Railroad Administrator. 49 U.S.C. 20101 *et seq.*; 49 CFR 1.49. FRA has authority to issue regulations to promote safety in every area of railroad operations and reduce railroad-related accidents and injuries. 49 U.S.C. 20101 and 20102. FRA has exercised its jurisdiction to protect the safety of railroad operations through the issuance and enforcement of regulations, partnering with railroad labor organizations and management of particular railroads to identify and develop solutions to safety problems, actively participating in STB rail proceedings, and monitoring railroad operations during the implementation of STB-approved transactions.

The Board is also responsible for promoting a safe rail transportation system. The rail transportation policy (RTP), 49 U.S.C. 10101, which was adopted in the Staggers Rail Act of 1980, Pub. L. 96–448, 94 Stat. 1895, and amended in the ICC Termination Act of 1995, Pub. L. 104–88, 109 Stat. 803 (1995), establishes the basic policy directive against which all of the statutory provisions the Board administers must be evaluated. The RTP provides, in relevant part, that, "(i)n regulating the railroad industry, it is the policy of the United States

UMI

Government * * * to promote a safe and efficient rail transportation system" * * * (by allowing rail carriers to) "operate transportation facilities and equipment without detriment to the public health and safety * * *." 49 U.S.C. 10101(8). The rail transportation policy applies to all transactions subject to the Board's jurisdiction.

Thus, both FRA and STB are vested with authority to ensure safety in the railroad industry. Each agency, however, recognizes the other agency's expertise in regulating the industry. FRA has expertise in the safety of all facets of railroad operations. Concurrently, the Board has expertise in economic regulation and assessment of environmental impacts in the railroad industry. Together, the agencies appreciate that their unique experience and oversight of railroads complement each other's interest in promoting a safe and viable industry.

63 FR 72225–26. FRA believes that each agency's interpretation of its statute is reasonable, reflects a plausible construction of the plain language of the statutes, and gives effect to Congress' expressed intent. *Tyrrell*, 248 F.3d at 523 (statutory construction that FRA has primary authority over national rail safety policy and STB is responsible for encouraging "safe and suitable working conditions" properly reflects Congress's purpose in enacting the Federal railway laws).

FRA has "primary jurisdiction, expertise and oversight responsibility in rail safety matters' under 49 U.S.C. 20101 *et seq.*, as delegated by the Secretary of Transportation to the Federal Railroad Administrator at 49 CFR 1.49, and has the authority "to issue regulations to promote safety in every area of railroad operations and reduce railroad-related accidents and injuries" under 49 U.S.C. 20101 and 20102. 63 FR 72225. Specifically, 49 U.S.C. 20103 confers authority on FRA to "prescribe regulations" "for every area of railroad safety," 49 U.S.C. 20103(a), and "in prescribing regulations[,]" FRA "shall consider existing relevant safety information and standards." 49 U.S.C. 20103(c). Congress intended that FRA would possess the authority to regulate "all those means of rail transportation as are commonly included within the term * * * in addition to those areas currently regulated." H.R. No. 91–1194, Federal Railroad Safety and Hazardous Materials Transportation Control Act of 1970, Pub. L. 91–458, *reprinted in* 1970 USCCAN 4104, 4114 (1970). In other words, Congress authorized FRA to promulgate regulations to ensure railroad safety after analyzing safety data.

A key element in the argument of the AAR and other commenters is that, by approving a SIP, FRA is encroaching upon the STB's jurisdiction, supposedly because approving a SIP is equated with approving a transaction and because the NPRM states that the railroad resulting from a covered transaction "shall have an FRA approved Safety Integration Plan before changing its operations to implement a proposed transaction * * *." *See* proposed 49 CFR 244.21(a) at 63 FR 72241. These commenters have misinterpreted both FRA's intentions and the meaning of the text. FRA has amended the text to eliminate the possibility of interpreting it as giving FRA authority to approve a transaction, and to clarify FRA's intentions. *See* the discussion of § 244.21(a) below. This change makes clear that FRA has no intention of approving or disapproving or vetoing a transaction covered by this part. FRA agrees that approving or disapproving a transaction covered by this part is wholly within the jurisdiction of the STB. FRA's role in the STB's process is an advisory one, providing expert advice to the STB on safety issues presented by a transaction. As the STB said in the NPRM, it relies upon FRA's safety expertise, and it is clearly in the public interest that FRA make its expertise available to the STB.

On the other hand, regulation of "every area of railroad safety" is FRA's jurisdiction. In approving or disapproving a SIP under this part, and enforcing one, FRA is regulating *the safety aspects of how* a railroad implements a transaction permitted by the STB and *not whether* the railroad is permitted to consummate the transaction or on what economic terms. This is an appropriate exercise of the "plenary safety authority with respect to the safety of rail operations—before, during, and after a transaction," which the AAR acknowledges that FRA enjoys. AAR comments at 9. In that regard, approval of a SIP is no different than approval of an engineer certification program under 49 CFR part 240. There is no question that a railroad must have an engineer certification program approved by FRA and operate in accordance with it at all times, whether or not the railroad is involved in a transaction within the STB's jurisdiction. The commenters' view would require a repeal by implication of some portion of the Federal railroad safety laws ("safety laws"), 49 U.S.C. 5101 *et seq.* and 20101 *et seq.*, to except from them railroad operations conducted during implementation of transactions approved by the STB. Such repeals by implication are strongly disfavored. *See Tyrrell*, 248 F.3d at 523. Here, there is obviously no need to infer any such repeal.

In FRA's view, it is necessary for safety purposes for the agency to approve or disapprove SIPs to provide a baseline for enforcement. First, FRA approval or disapproval denotes whether a railroad has submitted a proposed SIP meeting the requirements of the rule. Upon disapproval of a proposed SIP, FRA can take enforcement action if the railroad does not change its SIP to bring it into compliance with the law. Upon approval of a SIP, FRA can take enforcement action if the railroad fails to implement the SIP. Absent FRA approval, it is hard to see how FRA could take enforcement action in this arena.

FRA believes that the suggestion that FRA could veto a transaction by disapproving a proposed SIP is a red herring because only the STB can approve and veto a transaction. In any event, the standard set by the rule for approval of a proposed SIP can easily be met by any Class I or Class II railroad, and FRA cannot arbitrarily or capriciously reject a SIP that meets the standard. If FRA disapproves a proposed SIP because it fails to be thorough, complete, or clear, FRA must articulate to the railroad what is missing or unclear. If FRA disapproves a proposed SIP because it fails to describe a logical and workable transition or because it is insufficiently detailed, FRA must articulate how the proposed SIP is illogical or unworkable or lacking in detail. In either of those cases, upon receiving FRA's reasons for disapproval, a railroad can readily remedy its submission. In practice, FRA will continue to work informally with railroads proposing a covered transaction to assure that their proposed SIPs comply. It should be easy for applicants to secure FRA approval of their proposed SIPs in time for the Board's SEA to include the proposed SIP in the draft environmental documentation for the STB proceeding. FRA has no interest in blocking transactions and has a powerful interest in seeing that transactions are implemented safely.

The text also makes clear that FRA is not prescribing any particular way to implement covered transactions. Instead, FRA is requiring the railroads involved to be thorough and logical, and to maintain a reasonable assurance of safety at every step of the proposed transaction.

Correspondingly, FRA recognizes that the STB is also vested with authority to promote a safe rail transportation system in determining whether a proposed transaction should be permitted and, if so, on what economic terms. As discussed in *Tyrrell* and in the NPRM, the rail transportation policy ("RTP"); 49 U.S.C. 10101, which was adopted in the Staggers Rail Act of 1980, Pub. L. 96–448, 94 Stat. 1895, and amended in the Interstate Commerce Commission Termination Act of 1995 ("ICCTA"), Pub. L. 104–88, 109 Stat. 803 (1995), provides the foundation for which all of the statutory provisions the Board administers must be analyzed. *See Tyrrell*, 248 F.3d at 522–23. The RTP provides, in relevant part, that, "(i)n regulating the railroad industry, it is the policy of the United States Government * * * to promote a safe and efficient rail transportation system" * * * (by allowing rail carriers to) "operate transportation facilities and equipment without detriment to the public health and safety * * *." 49 U.S.C. 10101(8). The STB applies the RTP to all transactions within its jurisdiction, authorizing it to consider the impact a merger, consolidation, or acquisition of control has on safety of railroad operations. *See Major Rail Consolidation Procedures*, STB Ex Parte No. 582 (Sub-No. 1), slip op. at 5 (STB served Mar. 31, 2000) (49 U.S.C. 10101, in part, directs the Board to ensure that safety concerns are addressed in railroad merger cases).

FRA submits that the cases AAR cited are misplaced. Read together, *Schwabacher, ATDA*, and *City of Auburn* stand for the proposition that the STB and its predecessor, the Interstate Commerce Commission, have exclusive authority to examine, condition, and approve mergers, consolidations, or acquisitions of control. The statute at issue, 49 U.S.C. 11321 (formerly, 49 U.S.C. 11341), specifically exempts a railroad from complying with all other laws to the extent "necessary to (let that railroad) carry out an approved transaction," *ATDA*, 499 U.S. at 134, thereby preempting any Federal or state law remedies. *City of Auburn*, 154 F.3d at 1030. FRA's SIP rule will not impede or restrict the Board in approving or rejecting a proposed transaction and, since the STB contemplates requiring a SIP when it approves covered transactions, a railroad could not logically assert that an exemption from FRA's rule would be "necessary to carry out an approved transaction." Instead, the rule provides that FRA will determine whether a SIP provides a reasonable assurance of safety for the subject transaction and provide expert advice to the STB on safety issues presented by a proposed transaction. The Board, in turn, will rule on the application based in part on FRA's recommendations. This process employs FRA's plenary authority over railroad safety and respects and complements the Board's role of determining whether a transaction should be approved. At bottom, FRA believes that it and the Board each are fully exercising their respective statutory authorities by examining a transaction for its safety aspects (FRA), and the impact that safety has on an application as a whole (STB).

In FRA's view, the final SIP rule fulfills this objective. The rule responds to critical safety shortcomings and errors in planning and implementation of significant transactions that may have occurred in the past where no SIP was prepared. FRA documented its concerns in the NPRM by examining the difficulties of the BNSF and UP/SP mergers. *See* 63 FR 72227–28. To illustrate, after the UP/SP merger, five employees were killed in accidents during the Summer of 1997, and employee injuries rose nine percent in 1998. FRA determined that the BNSF and UP/SP mergers faced significant challenges in harmonizing information systems; training dispatchers; modifying operational practices and procedures; implementing personnel policies directed toward safety; determining appropriate staffing requirements; and providing adequate rail facilities, infrastructure and rolling stock and equipment.

Likewise, FRA identified serious safety shortcomings in CSX Transportation, Incorporated's ("CSXT"), and the Norfolk Southern Railway Company's ("NS") initial filings in the *Conrail Acquisition* [1] proceeding before the Board. The agency determined that the railroads had not articulated a detailed plan explaining the manner in which they individually and collectively intended to implement the transaction, and thus they had not thoroughly assessed the safety impacts of the proposed acquisition. As a result, FRA requested that the Board require the carriers to provide information detailing how they proposed to provide for the safe integration of their corporate cultures and operating systems, if the Board were to approve the proposed transaction. The Board agreed with FRA's suggestion and directed the applicants to file detailed SIPs pursuant to guidelines developed by FRA.[2] The railroads complied with the STB's order and after FRA approved the respective SIPs, the Board, concluding that applicants had satisfactorily addressed the safety implementation concerns presented by the transaction to date, approved the transaction in 1998. Nevertheless, FRA, while monitoring the railroads' implementation of their respective SIPs,[3] has concluded that more needs to be done, and that, among other things, the railroads should address information technology problems resulting in a lack of hazardous materials documentation on trains, and conduct more advanced safety training of supervisory and operating personnel at designated terminals to ensure adequate staffing and retention of institutional knowledge. *See Conrail Merger Surveillance: NS, CSXT, and CRCX Second Safety Integration Plan/ Safety Update, pp. 1–3 (June 23, 2000) (hereinafter "SIP Update")*. In short, FRA believes, based on its experience in recent cases, that "mega-mergers," consolidations, or acquisitions of control present safety challenges during implementation, which are best remedied by requiring SIPs for these complex transactions. FRA concludes that SIPs achieve a safety purpose within the purview of 49 U.S.C. 20103, and thus are within FRA's rulemaking authority. *Tyrrell*, 248 F.3d at 523 (FRA's responsibility in the SIP joint rulemaking action focuses on rail safety matters); *see also Brown & Williamson*, 529 U.S. at 134 ("if Congress has not specifically addressed the (precise question at issue), a reviewing court must respect the agency's construction of the statute so long as it is permissible"); *accord Oklahoma Natural Gas Company v. Federal Energy Regulatory Comm'n*, 28 F.3d 1281, 1283–84(D.C. Cir. 1994) (agency is afforded *Chevron* [4] deference in interpreting its statutory authority); *Western Coal Traffic League* v. *Surface Transportation Board*, 216 F.3d 1168, 1171 (D.C. Cir. 2000) (judicial review of agency's statutory jurisdiction is premised on *Chevron* standards);

[1] *CSX Corporation and CSXT Transportation, Inc., Norfolk Southern Corporation and Norfolk Southern Railway Company—Control and Operating Leases/Agreements—Conrail Inc. and Consolidated Rail Corporation*, STB Finance Docket No. 33388 (hereinafter "*Conrail Acquisition*").

[2] *Conroil Acquisition*, STB Decision No. 52, served Nov. 3, 1997.

[3] A detailed explanation of the SIP process in the *Conrail Acquisition*, including the Memorandum of Understanding the Board executed with FRA in establishing an ongoing monitoring process, is set out in the NPRM at 63 FR 72228.

[4] *Chevron* is shorthand for the landmark Supreme Court case *Chevron U.S.A. Inc.* v. *Natural Resources Defense Council*, 467 U.S. 837 (1984), which stands for the proposition that courts must defer to an agency's interpretation of a statute, even if other statutory constructions are more plausible, if the statute is silent or ambiguous with respect to a specific issue.

Transmission Access Policy Study Group v. *Federal Energy Regulatory Comm'n*, 225 F.3d 667, 694 (D.C. Cir. 2000) ("it is the law of (the D.C.) (C)ircuit that the deferential standard of *Chevron* applies to an agency's interpretation of its own statutory jurisdiction" (citing *Oklahoma Natural Gas*)), *affirmed sub nom. New York* v. *FERC*, 2002 U.S. LEXIS 1380 (U.S. Mar. 4, 2002). *See generally Chrysler Corp.* v. *Brown*, 441 U.S. 281, 302 (1979) (regulations issued by an agency must be promulgated pursuant to statutory authority in which "the grant of authority contemplates the regulations issued").

C. FRA's Views on Issuance of a Final Rule v. Guidelines

The AAR commented that the SIP process is best employed through the issuance of policy guidelines adopting the model procedures that were used in the *Conrail Acquisition* and Canadian National Railway Company/Illinois Central Railroad Company [5] control transactions, and embodied in the memoranda of understanding ("MOU") between FRA and the STB entered in these cases. See 63 FR at 72228. Under this approach, the Board would determine when a SIP would be required for a transaction within its jurisdiction.

The AAR based its position on three points. First, this approach would ensure that each agency would respect each other's division of authority and role in overseeing the SIP process. Second, an MOU would offer the flexibility for an applicant to meet changing customer needs and market opportunities, such as staffing levels reached through collective bargaining agreements ("CBAs"), infrastructure improvements for highway-grade crossings, and designating repair facilities and computer software operating systems. Finally, a rule along the lines suggested by the NPRM would, according to AAR, represent government micromanagement of rail operations and implementation programs and could potentially delay integration, leaving an applicant at a competitive disadvantage with other railroads.

FRA respectfully disagrees with the AAR's proposal. The agency believes that the issuance of final rules ensures that all applicants seeking to consummate a regulated transaction will execute a SIP and complete the SIP process as enunciated in the rules. These final rules codify the prescribed requirements and stake out the legal landscape for regulating complex railroad transactions. *See* Attorney General's Manual on the Administrative Procedure Act 14–15 (1947) ("(t)he object of [a] rulemaking proceeding is the implementation or prescription of law or policy for the future * * *."). In other words, the rules will prescribe substantive and procedural standards that will govern each application filed with the STB to carry out a transaction and the safety of operations during implementation of transactions the STB approves. *Cf.* the Administrative Procedure Act, 5 U.S.C. 551(4), which, in part, defines a rule as "the whole or part of an agency statement of general or particular applicability and future effect designed to implement, interpret, or prescribe law or policy." FRA believes that the SIP process should be mandatory in large mergers, acquisitions of control, and consolidations cases because of the unique nature of the transactions involved and the complexity of safely integrating operations that are part and parcel of the transactions.

On the other hand, guidelines are simply recommendations issued by an agency that do not prescribe or mandate any standards on the regulated community. *See Industrial Safety Equipment Ass'n, Inc.* v. *EPA*, 837 F.2d 1115 (D.C. Cir. 1988). Rather than impose a regimen for conduct or action, guidelines do not "change any law or official policy presently in effect," *id.* at 1119–21, nor do they "implement, interpret, or prescribe law or policy." 5 U.S.C. 551(4); *see also National Ornament & Elec. Light Christmas Ass'n* v. *Consumer Product Safety Comm'n*, 526 F.2d 1368 (2d Cir. 1975). Without sufficient "effect" to regulate conduct, guidelines have an "advisory character" without any firm commitment to law or policy. FRA believes that the issuance of guidelines would preclude the agencies from mandating standards or binding applicants to meet these requirements, creating an illusion of adequate safety oversight. FRA, like the Board, is committed to safe integration of complex railroad transactions and believes that these rules can best achieve that objective.

FRA also maintains that these rules enable the agencies to articulate interpretations of their respective statutes and reconcile them effectively, thereby preserving and recognizing each agency's authority to regulate aspects of these transactions. *See Tyrrell*, 248 F.3d at 523. The joint rules ensure that the agencies' roles and responsibilities complement each other in establishing SIP procedures and standards, and complete the rulemaking process announced in the NPRM. Lastly, the final rules will provide uniformity in regulating SIPs and preempt other efforts to regulate the safety of implementing transactions. FRA concludes that the issuance of rules is the most effective instrument in defining each agency's function in the SIP process and requirements a railroad must satisfy for transactions that warrant a SIP.

Concurrently, FRA takes issue with the reasons supporting the AAR's recommendation. First, as previously explained, the final rules cement the division of authority and prescribe textual interface between the agencies in regulating SIPs. Next, FRA believes that the SIP contents and subject matter areas capture the operations that are affected by a complex transaction. Although an applicant may propose a flexible plan to address these topics, the SIP elements themselves should not be compromised to ensure a safe transition of operations.

Finally, FRA rejects the notion that the rules represent government micromanagement of rail operations and implementation programs. The premise of the rules focuses on an applicant's preparation, issuance, and implementation of a plan that provides safe integration of rail operations. FRA's and the STB's individual and collective roles are to review and approve the railroad's SIP, and monitor its implementation. The agencies' oversight is to ensure that the SIP provides a reasonable assurance of safety. It is not to "second guess" the proposed migration or deployment of resources necessary to carry out a plan. Therefore, FRA characterizes its role as that of a "gatekeeper" to cross-check the SIP and its implementation against the safety aspects in integrating operations.

D. FRA's Views on Issues Involving the Framework of the Joint Final Rules

FRA received several comments from interested parties about the framework of the proposed SIP rules. The comments focused on two issues-scope and applicability of the joint rules, and the approval and disapproval process of an application.

FRA proposed to require certain railroads seeking to merge, consolidate, or acquire control of another railroad, or "start-up" operations as a railroad to file proposed SIPs with FRA before consummating the regulated transaction. The NPRM proposed covering the following transactions: (1) A Class I railroad, a railroad providing intercity passenger service such as Amtrak, or a commuter railroad seeking to acquire, merge, or consolidate with a Class I or Class II railroad, a railroad providing intercity passenger service, or a commuter railroad; (2) a Class II railroad proposing to consolidate, merge, or acquire another Class II railroad with which it connects so as to involve the integration of operations; (3) any merger, consolidation, or acquisition resulting in operations that would generate revenue in excess of the Class I railroad threshold, except those transactions involving Class III freight only railroads; and (4) all start-up operations involving the establishment of a new line for passenger or freight service generating revenue that would exceed the Class II railroad threshold. Correspondingly, the Board proposed covering all transactions addressed in FRA's NPRM with the exception of "start-up" operations.

The AAR, Amtrak, and OK DOT commented that the STB lacks jurisdiction to regulate Amtrak or commuter railroads, citing 49 U.S.C. 10501(c) and *Norfolk & Western Railway Company-Petition for Declaratory Order-Lease of Lines*, STB Finance Docket No. 32279 (STB served February 3, 1999), for the proposition that the Board may not regulate any mass transportation provided by any local governmental authority, and arguing that the Amtrak Reform and Accountability Act of 1997, Pub. L. 105–134, 111 Stat. 2570, 2585, amending 49 U.S.C. 24301(c)(1)(C), prohibits the Board from regulating Amtrak. Accordingly, the commenters recommended that the scope of the joint rules be curtailed.

FRA agrees that the scope of the joint rules should be narrowed to cover unique complex transactions. After considering the comments, the agency has determined that acquisitions, consolidations, or mergers involving large railroads present transactions of significant size and complexity that warrant a SIP. These transactions generally involve substantial changes in railroad operations that impact effective communications, coordination, and execution of operations, *i.e.*, all aspects of safety. The final rules narrow the scope and applicability sections to capture these significant transactions because of the correlation between complexity of large rail entities and operational safety. As a result, the joint final rules only apply to transactions in which a Class I railroad proposes to merge, consolidate with, or acquire control of another Class I railroad or a Class II railroad with which it also proposes to amalgamate operations.

Some of the comments addressed each agency's independent approval process for a SIP, and any amendments thereto. The TTD endorsed the proposed two-step disposition process in which FRA and then the Board would review and approve a proposed SIP before an applicant could consummate a transaction. The AAR disagreed, claiming that FRA is without the authority to sanction a transaction that is within the STB's jurisdiction.

FRA believes that the safe transition of integrating operations is best achieved when FRA and the STB work together using their respective jurisdictions. As discussed above and in the NPRM, FRA enjoys primary jurisdiction, expertise, and oversight responsibility in railroad safety matters and is best positioned to ensure that a plan will comply with the safety laws and otherwise provide for safe railroad operations. *See Canadian Pacific Limited, et al.—Purchase and Trackage Rights—Delaware & Hudson Railway Company*, STB Finance Docket No. 31700, slip op. at 1, 5 (served Mar. 2, 2000) (hereinafter "*CP Purchase*") (FRA entitled to "great weight" in identifying potential safety problems before STB imposes conditions on a transaction). At the same time, the Board, which has expertise in economic regulation and assessment of environmental impacts in the railroad industry, *Tyrrell*, 248 F.3d at 523, considers safety in the transactions that it regulates. *Id.* (STB's "duty [is] to encourage "safe and suitable working conditions" for railway employees through its assessment of individual railway proposals subject to its authority"). FRA believes that these final rules meet the safety objectives of both agencies while interpreting their respective jurisdictions in a complementary way that is in the public interest.

E. Foundation of FRA's Final Rule

FRA received comments from three interested parties about the elements set out in the proposed rule. Generally, the labor organizations supported the subject matter areas contained in the regulatory text because they addressed the "four adequates"—adequate work force, adequate training, adequate rest, and adequate familiarity with the subject territory. In fact, the TTD went further, contending that an applicant should detail information in the subject matter areas that are required in a SIP to prevent a railroad from pledging vague commitments in filing a plan.

The AAR, however, objected to the proposed rule's SIP elements on two grounds. First, the AAR asserted that the subject matter areas go beyond the scope of assuring safe integration. The AAR maintained that a SIP should center on railroad lines that will experience changes in motive power and equipment, signal and train control, dispatching operations, highway-rail grade crossings, personnel staffing, capital investment, and relationships between freight and passenger service; and changes in operations or traffic volume that will affect a railroad's systems or programs. These requirements, the AAR posited, should be captured in a SIP to enable FRA to review an applicant's practices and procedures to ensure that they provide a "reasonable assurance of safety." The AAR added that the proposed SIP rules impose new standards on the railroad industry that are not required under the existing regulations and serves as a "back door" vehicle for issuing substantive regulations that impact selected transactions. These rules, the AAR reflects, impose new burdens, costs, and delays on an applicant, which leaves it at a competitive disadvantage with other railroads.

FRA agrees in part and disagrees in part with the AAR's comments. The agency has amended the subject matter areas in its proposed rule to require an applicant to focus its SIP on changes in railroad operations during the integration phase. The agency believes that a plan must analyze the major changes that will occur as railroads subject to a regulated transaction integrate their operations from commencement to completion. Advance planning will require an applicant to consider the nature of operations involved in the transaction and the migration or transition from two or more entities to one entity. The final rule satisfies these concerns.

FRA disagrees with AAR's characterization that the SIP rules are a "back door" approach to regulating subject matter areas that are not already covered under the existing regulations. The integration of very large and complex railroad operations present safety hazards not found (or not found to a degree sufficient to merit regulatory attention) either before a transaction or after operations have been successfully integrated. It is entirely appropriate for FRA to address those hazards in the limited context in which they are found. For example, integrating the operations of two railroads will usually require choosing a set of operating rules that differ in important respects from the operating rules used by one of the

[5] *Canadian National Railway Company, Grand Trunk Corporation, and Grand Trunk Western Railroad Incorporated—Control—Illinois Central Corporation, Illinois Central Railroad Company, Chicago, Central and Pacific Railroad Company, and Cedar River Railroad Company*, STB Finance Docket No. 33556 (STB Decision Nos. 5 and 6, served June 23, 1998, and Aug. 14, 1998) (hereinafter "*CN/IC*").

MR
15
2002
UMI

railroads. The employees of that railroad will have to be trained in the new operating rules and will have to overcome the bias common among railroaders that the railroad on which they started had the best way of running a railroad.

There are several essential tasks that affect railroad safety, *e.g.*, training, qualifications, fatigue, hazardous materials inspection programs, and information system compatibility. Failing to address such issues adequately can jeopardize railroad safety, as some recent mergers have demonstrated. FRA believes that UP/SP, for instance, faced increased exposure to accidents, injuries, and fatalities as overworked officials and employees encountered workforce reductions, inadequate infrastructure and equipment, and service delays and disruptions. Between June 22 and August 31, 1997, UP/SP experienced five major train collisions that resulted in the deaths of five UP/SP employees and two trespassers. These accidents were in addition to a series of yard switching accidents that claimed the lives of four UP/SP train crew employees. In connection with the UP/SP merger, for example, FRA launched a comprehensive review of UP/SP's operations, including its dispatching operations. FRA observed inefficient and unsafe practices by supervisors and dispatchers caused by inadequate training and work overload. FRA made specific recommendations, which UP/SP accepted, such as creating additional dispatch operations, realigning dispatcher territories to better balance the workload, hiring new dispatchers, tripling the number of dispatching supervisors, making improvements to the software in UP/SP's CAD computer system, and forming a working group consisting of representatives of FRA, rail labor, and UP/SP management to continually monitor and address dispatching issues that may arise. As a result of FRA's effort, UP/SP's safety performance recovered rapidly; UP/SP's fatalities due to train collisions dropped from seven in 1997 to none in 1998.

Similarly, FRA believes that most of the other recent mergers involving Class I railroads had safety integration problems. The BNSF merger, for example, resulted in the merged entity having incompatible electronic database systems used by BN and ATSF. This incompatibility resulted in terminal offices generating and transmitting inaccurate and incomplete train consist lists and waybills, which compromised the safety of train crews transporting the shipments. Even at a very simple level, BN and ATSF each had locomotives bearing the same number; this problem was not addressed before integrated operations began, resulting in dangerous confusion for dispatchers and train crews. In NS's and CSXT's acquisition of Conrail, both railroads also grappled with information technology shortcomings in preparing hazardous materials shipping papers, and training deficiencies in the computer software programs and the safety laws.

Based on observation, professional experience and judgment, and empirical evidence, FRA believes that there is a nexus between safe integration of large railroads and the subject matter areas identified in the SIP rule. Although filing a SIP will involve certain costs, burdens, and delays, FRA reasons that the safety benefits that will result from the SIP process outweigh these impediments.

Finally, there was some confusion within the regulated community that the SIP rules would impose explicit standards for the elements the railroads would have to address in their SIPs. FRA therefore clarifies that its rule only requires a railroad to identify measures, efforts, commitments, and targeted completion dates that it will take to completely integrate those elements identified in § 244.13. *See* § 244.11 for the contents required in a SIP. FRA's review and approval is predicated on whether the details in executing the elements in the plan provide "a reasonable assurance of safety." 49 CFR 244.19. As enunciated in the NPRM, FRA reiterates that:

> [I]t has no intention of operating the railroad or questioning management decisions implementing the SIP. Instead, the agency sees it[s] role as conducting a rational basis review of the SIP, meaning that the plan must be reasonable.

63 FR 72234. Provided that the SIP comprehensively explains how an applicant intends to proceed from commencement to completion in executing a transaction, FRA will approve the plan, contingent upon fulfillment of the elements enunciated in the plan and execution of those operations. In summary, a SIP must provide for the safety of operations, systems, practices, and programs that are identified in FRA's final rule before FRA will approve the plan.

FRA's Section-by-Section Analysis of Its Final Rule

The final rule contains significant changes from the proposed rule in response to the written comments received, the testimony at the public hearing, and further review and reflection within FRA. This section of the preamble explains the changes made in the final rule to the provisions of the NPRM. FRA informs interested parties that this section focuses on the specific requirements of FRA's proposed and final rules as applied to the coextensive authority of the STB to regulate the transactions identified, and respectfully refers the regulated community to the agency's Section-by-Section Analysis of the NPRM for a full discussion of those aspects of the proposed rule that remain unchanged in the final rule. *See* 63 FR 72228–35.

Subpart A—General

Section 244.1—Scope, Application, and Purpose

Proposed rule: FRA proposed that a railroad seeking to consummate certain discrete transactions would be required to file a SIP. Section 244.1(a)(1) proposed that a Class I railroad, a railroad providing intercity passenger service, or a commuter railroad seeking to acquire, merge, or consolidate with a Class I or Class II railroad, a railroad providing intercity passenger service, or a commuter railroad would be subject to this part. The rule further proposed that a Class II railroad applying to acquire, consolidate, or merge with another Class II railroad with which it would connect so as to involve the integration of operations would also be required to file a SIP. Additionally, part 244 would apply to any merger, consolidation, or acquisition, excluding a transaction involving a Class III freight-only railroad, that would result in operations generating revenue in excess of the Class I railroad threshold, and all start-up operations as defined in § 244.9.

Paragraph (b) of this section explained that the proposed rule was designed to mandate that a railroad detail a plan before it would merge, consolidate, or acquire another railroad to ensure that safety interests were advanced before integrating operations of complex transactions. Section 244.1(c) informed the regulated community that part 244 applied only to FRA's disposition of an application filed pursuant to this part, and did not apply to the STB's rules, 49 CFR part 1106, governing transactions under the STB's authority.

Comments: FRA received several comments addressing a wide range of views on the proposed scope of the SIP rule. The AAR recommended that the rule should cover only Class I—Class I or Class I—passenger operations transactions because of the magnitude and complexity of these transactions and the lack of evidence that the other proposed transactions demonstrated a compromise to railroad safety. The ASLRRA and W&L suggested that the rule regulate only Class I transactions given that Class II railroad operations are less complex than their Class I counterparts, *e.g.*, lower volume, slower speeds, shorter consists, and more condensed networks, and the weight of the evidence shows that only Class I railroads need to be regulated. The ASLRRA and W&L added that Class II railroads should be regulated on an *ad hoc* basis and that the proposed coverage of start-up operations should be dropped. Amtrak commented on start-ups as well, expressing its position that a SIP should only be required when a start-up involves a new railroad and not existing railroads commencing operations over newly constructed track. APTA opined that the rule should not apply to start-ups covering existing commuter railroads that commence operations over newly constructed track or extending service on existing track.

Conversely, the BMWE, BRC, and TTD suggested that the scope of the rule be expanded to cover Class II and Class III railroads. The BRC, for instance, asserted that although Class III railroads present less complex operations than their Class I counterparts, shortline railroads use less sophisticated roadway equipment and track maintenance practices because of their lower revenue base, and employ workers who may not understand the complexities of Class I rail traffic control systems with which they interchange. The TTD supported its position by claiming that shortline railroads lack sufficient capital resources, training requirements, and staffing levels to execute transactions, and that these railroads have higher casualty and accident rates than Class I railroads.

Final Rule: Having considered the entire spectrum of comments, FRA believes that the SIP rule should apply only whenever a Class I railroad proposes to merge with, consolidate with, or acquire control of another Class I railroad or a Class II railroad with which it also proposes to amalgamate operations. The agency has re-examined the anecdotal and empirical evidence and determined that there is a correlation between large-scale transactions and compromises to railroad safety in the absence of advance planning and the preparation of a SIP. As the recent UP/SP and BNSF mergers illustrated, large-scale transactions present unique challenges in operations that can affect the resulting carrier's ability to conduct business while complying with the safety laws. (Indeed, CSXT and NS may have experienced the same shortcomings in the *Conrail Acquisition* had FRA and the STB not required the railroads to file individual SIPs addressing a systematic plan that assessed the safety effects of the transaction and explaining the manner in which they intended to implement the transaction.) Integrating cultures and differing work rules, migrating work forces, deploying capital resources, and adopting information systems are initial steps that must be planned before consummation and implemented during integration to ensure the safety of railroad employees and the public, and the protection of the environment. Therefore, to combat safety and operational problems associated with complex transactions, FRA is requiring a SIP for Class I—Class I transactions and Class I—Class II transactions when there is an amalgamation of operations. The agency believes that advance safety planning by an applicant will promote safety of its lines and minimize exposure to unnecessary accidents, incidents, injuries, or fatalities.

Although FRA recognizes that transactions not involving Class I railroads (*e.g.*, Class II railroads, passenger railroads, and start-ups) can be sophisticated operations, the agency has decided to withhold regulating these transactions for the time being. Nevertheless, FRA reserves the right to revisit the scope section should evidence or experience warrant expanding the reach of the SIP rule.

FRA also notes that paragraph (b) of this section has been modified from the proposed regulatory text to read, "This part does not preclude a railroad from taking additional measures not inconsistent with this part to provide for safety in connection with a transaction." The meaning and application of this paragraph, however, remains unchanged.

Section 244.3—Preemptive Effect

Proposed Rule: FRA proposed this section to inform the public of its views regarding the preemptive effect of the proposed rule. The rule would provide that 49 U.S.C. 20106 preempts any State regulatory agency rule covering the same subject matter as the regulations proposed with the exception of a provision directed at an essentially local safety hazard.

Comments: The AAR commented that FRA's reading of the preemption provision of the safety laws is incompatible with the STB's exclusive jurisdiction over economic regulation of railroads.

Final Rule: The final rule adopts the proposed rule in full. (The AAR's comments and FRA's response are discussed in the preamble above.)

Section 244.5—Penalties

Proposed Rule: FRA proposed § 244.5 to identify the penalties that the agency may assess upon any person, including a railroad or employees of a carrier, that violated any requirement of this part. The provision would provide that any person who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least $500 and not more than $11,000 per violation, and FRA may assess a penalty of up to $22,000 per violation where a grossly negligent violation or a pattern of repeated violations creates an imminent hazard of death or injury to persons, or causes death or injury. Each day would constitute a separate offense, and the agency could assess civil penalties against individuals for only willful violations of this part. Criminal penalties would be available for persons knowingly and willfully falsifying entries or reports required by the SIP rule.

Paragraph (b) of this section would authorize FRA to exercise any of its other enforcement remedies available under the safety laws if an applicant failed to comply with this part. For instance, FRA could issue an emergency or compliance order or seek the issuance of a mandatory or prohibitory injunction should a railroad violate § 244.21.

Comments: Two parties commented on this section. The TTD suggested that the agency clarify the penalty provision to reflect that an individual may be subject to the maximum penalty under the safety laws. The AAR restated its jurisdictional argument that was discussed earlier, asserting that FRA lacks the authority to assess penalties against an applicant, and that conditions or remedies imposed by the STB, such as a cease and desist order, would suffice to address a noncomplying condition.

Final Rule: FRA adopts the proposed rule in full. FRA refers the TTD to the definition of "person" contained in § 244.9, which covers individuals such as managers, supervisors, officials, or other employees or agents of a railroad, and independent contractors providing goods or services to a railroad. As explained earlier in the preamble, the agency believes that the safety laws authorize the issuance of this final rule and its penalty provisions. FRA further reasons that enforcement is a necessary and effective tool to promote compliance with the safety laws. Such enforcement actions include assessing civil penalties, issuing compliance, disqualification, or emergency orders,

VOL
67
ISS
51
MR

2002
UMI

seeking equitable remedies in Federal court, or referring selected incidents to the Department of Justice for criminal investigation and prosecution. In the SIP rule, these sanctions are necessary to ensure that applicants obtain agency approval of a proposed SIP before implementing a regulated transaction, and execute all measures provided in an approved plan. FRA approval or disapproval of a SIP serves as a baseline for enforcement. Should the agency disapprove of a SIP or portions thereof, this provision provides various remedies if the railroad does not change its SIP to bring it into compliance with the law. Likewise, FRA can take enforcement action if the railroad fails to implement specific requirements of an approved SIP that currently exist under the safety laws. In summary, FRA believes that this section will ensure compliance with the SIP rule by identifying the legal and equitable remedies available.

At this time, FRA has decided not to include a schedule of civil penalties for this rule. The agency received no comments from interested parties about the appropriate penalties corresponding to the sections violated in the rule. Therefore, FRA will reserve Appendix A to 49 CFR part 244 until further notice. Because such penalty schedules are statements of policy, notice and comment are not required before their issuance. *See* 5 U.S.C. 553(b)(3)(A).

Section 244.7—Waivers

Proposed Rule: Proposed § 244.7 would provide the procedures for seeking a waiver of compliance with the requirements of the SIP rule. Any railroad subject to part 244 could petition for such a waiver, and FRA would conduct its own independent investigation to determine whether an exception to the general criteria existed to warrant granting the waiver, provided that the waiver would not compromise or diminish rail safety.

Comments: The AAR suggested that FRA's waiver provision be modified to meld it with the STB's waiver provision.

Final Rule: The proposed rule is adopted with the addition of paragraph (d). FRA believes that its rule text is closely aligned with the STB's counterpart, but informs interested parties that its waiver provision governs only FRA's disposition of a petition for a waiver. An applicant must still seek a waiver from the STB to be free and clear of any SIP requirements under 49 CFR parts 244 and 1106. This caveat is spelled out in paragraph (d) of this section.

Of special note, FRA informs applicants that a petition for a waiver in which a Class I railroad seeks to consummate a transaction with a small Class II railroad with which it proposes to amalgamate operations may be received more favorably than a waiver request in a transaction involving two Class I railroads. Presently, FRA intends to focus its energies on monitoring transactions involving Class I and large-scale Class II railroad operations, *e.g.*, the Canadian National Railway Company's acquisition of the Wisconsin Central Transportation Corporation,[6] where it believes systemic operating deficiencies are most likely to manifest themselves during the integration phase if no SIP is prepared and implemented. Although transactions involving smaller-scale Class II railroads may present safety challenges, FRA opines that not every merger, consolidation, or acquisition covered in this rule should face a comprehensive SIP review. Rather, FRA invites applicants seeking to execute less complex transactions to petition for a waiver of this rule's requirements. FRA will then review the petition on an *ad hoc* basis and may grant it should the agency determine that it is in the public interest and is consistent with rail safety.

FRA reminds the regulated community that it reserves the right to impose any conditions as it believes are necessary to promote rail safety. The agency further advises that it has plenary authority to approve or reject a petition for a waiver of this rule, and its decision is "agency discretion by law." 5 U.S.C. 701(a)(2); *see also Heckler* v. *Chaney*, 470 U.S. 821 (1985).

Section 244.9—Definitions

Proposed Rule: The NPRM proposed an extensive set of definitions that would introduce the regulations. As FRA explained in the proposed rule, the definitions were issued to clarify the meaning of important terms as employed in the rule text and were designed to minimize any possible misinterpretation of the rule. Because the commenters only responded to two proposed definitions, FRA will focus on these terms. The agency refers interested parties to the NPRM for a complete recitation of the meaning and application of those definitions that are adopted as proposed. *See* 63 FR 72230.

FRA proposed defining "corporate culture" to mean the attitudes, commitments, directives, and practices of railroad management with respect to safe railroad operations. The concept was to cover a railroad management's attitudes, directives, planning and resource allocations when safety was at issue. "Best practices" was defined to mean the safest and most efficient rules or instructions governing rail operations that a railroad issued.

Comments: FRA received two comments on "corporate culture." The AAR represented that the definition as applied could not be quantified in an objective fashion to place an applicant on notice about the measures that must be taken to comply with this element. At the same time, the BMWE wanted to expand the definition to include modifications or changes to CBAs that were not negotiated under the Railway Labor Act that the applicants wished to have the STB impose under the authority of 49 U.S.C. 11321 (commonly referred to as "cram downs"). *See* 49 U.S.C. 11324(c).

The AAR also questioned the definition of "best practices," asserting two reservations. First, the AAR asserted that the clause "railroad industry standards" is code for FRA practices. Second, the railroad organization claimed that the proposed definition invited the agency to formulate business decisions. In response, the AAR recommended qualifying the definition to permit an applicant to select the "best practices" of the parties that are subject to the transaction, which would best promote the safety interests.

Final Rule: FRA amends the proposed definitions. "Corporate culture" is now defined as "the totality of the commitments, written and oral directives, and practices that make up the way a railroad's management and its employees operate their railroad." The notion is to capture the business directives issued by a railroad's management and the practices implementing these directives by labor to encompass a wide range of field operations. These activities include the formulation, development, issuance, and execution of measures and programs related to safe railroad operations that involve consultations between railroad management and railroad employees. The heart of the safety issue involved is that FRA has observed (1) that a railroad tends to operate more safely when all of its employees understand that the railroad has a defined way of operating and comply with it and (2) that employees coming from different railroads will tend to continue to do their jobs as they learned them on their first railroad until they are taught to operate differently. This part of the rule is intended to get the railroads subject to a covered transaction to observe their differences, choose how the resulting railroad is to operate, and assure that their employees adopt the chosen culture. FRA does not intend to impose its own choice of corporate safety culture, but insists that the railroad choose and implement its choice.

FRA grappled with "corporate culture" in light of the AAR's comments about how objectively the agency could apply its meaning in evaluating a proposed SIP, and in light of BMWE's suggestion that it be expanded to include "cram downs." FRA believes that "corporate culture" quantifies sufficient elements to provide for meaningful and objective agency review, and given the spirited debate over cram downs, and the recent settlement among most Class I railroads and labor organizations representing most rail employees, including the BMWE, on the issue of CBA overrides, FRA cannot adopt the BMWE's suggestion that cram downs be considered a part of the definition of corporate culture.

"Best practices" is modified to read those "measures that are tried, tested, and proven to be the safest and most efficient rules or instructions governing railroad operations." This amended definition incorporates the change recommended by the AAR. To reiterate, FRA does not intend to substitute its judgment for that of a railroad in determining which legally permissible safety and efficiency measures to use, but instead will defer to a railroad's construction and application of its operating rules and practices that promote these interests. Put another way, the agency believes that the railroad has the prerogative in identifying the best practices to be employed within the law.

Subpart B—Safety Integration Plans

Section 244.11—Contents of a Safety Integration Plan

Proposed Rule: FRA proposed § 244.11 to frame the structure of a SIP that a railroad must file. The section would require an applicant to prepare a roadmap or playbook detailing the practices and procedures, financial commitment, and timetable for integrating or commencing field operations identified as subject matter areas under § 244.13. In particular, the NPRM would require a plan to propose a timetable from commencement to completion to implement the transaction.

Comments: Only one interested party commented on this section. The AAR generally agreed with FRA's proposal with one exception. The railroad organization opposed the timetable provision in paragraph (f) because it was perceived as being too rigid to afford flexibility in reaching proposed milestones in the plan. The AAR countered with its own textual proposal to require a general overview of steps and order in which the steps would be implemented.

Final Rule: The rule is adopted as proposed with minor textual changes and paragraphs (c)–(e) redesignated as paragraphs (d), (e), and (c), respectively. Paragraph (a) replaces the conjunctive clause "and the best practices of these railroads" with "including the rules or instructions governing railroad operations of these railroads," and paragraph (b) adds the text "including a reconciliation of the differing rules or instructions governing railroad operations of the railroads involved in the transaction" at the end of the provision to narrow the scope of the information on integrating operating practices a SIP must provide. Paragraph (f) inserts the word "targeted" in lieu of "stated" to enable an applicant to set benchmarks for completing the specified elements. FRA understands the dynamics of assimilating disparate operating practices and procedures and recognizes the flexibility needed to achieve their integration. The change of the operative word "stated" to "targeted" thus assuages the AAR's concern. FRA intends to hold a railroad accountable for conducting front-end planning measures and executing the same within identified milestones to complete the integration of operations.

FRA believes that the final rule should delineate the SIP contents and SIP subject matter areas as separate regulatory functions. The contents provision provides the basis for identifying and addressing the subject matter areas and facilitates a well organized plan that will articulate the execution and implementation of these elements. Section 244.11 best exemplifies the roadmap or playbook concept necessary to address the subject matter areas provided in § 244.13. Accordingly, the section's regulatory heading and introductory text remain unchanged.

Section 244.13—Subjects To Be Addressed in a Safety Integration Plan Involving an Amalgamation of Operations

FRA received several comments expressing a wide variety of opinions about the contents of § 244.13. To improve the flow of this analysis, each paragraph will be treated as a separate section, summarizing the proposal, comments, and final rule. FRA refers interested parties to the NPRM's Section-by-Section Analysis for the background of the elements identified in this section, and the justification for requiring these subject matter areas for transactions that involve an amalgamation of operations. Because FRA received no comments about the basis for or scope of proposed § 244.13, the introductory text of the regulation is adopted as proposed.

Section 244.13(a)—Corporate Culture

Proposed Rule: FRA proposed paragraph (a) to require an applicant to explain the basis for its safety culture. Specifically, the regulation would require a railroad to identify and describe differences in corporate cultures for each safety-related area; describe how these cultures lead to different practices governing rail operations; and explain how the proposed integration of corporate cultures would result in a system of 'best practices' when the proposed transaction was implemented.

Comments: Management and labor organizations commented on the "corporate culture" provision. APTA wanted "corporate culture" to address the safety of passenger operations, and the TTD suggested that a railroad detail similarities and differences in corporate culture to avoid issuing "boilerplate language" in its proposed SIP. Concurrently, the AAR agreed with the proposed rule text because it provided sufficient flexibility in accounting for different organizational structures, styles, and operations.

Final Rule: The proposed rule is adopted with revisions to § 244.13(a)(1), and (3). Subparagraph (1) is refined to mandate that an applicant "(i)dentify and describe differences for each safety-related area between the corporate cultures of the railroads involved in the transaction(,)" and subparagraph (3) is changed to read that the railroad must "(d)escribe, in step-by-step measures, the integration of these corporate cultures and the manner in which it will produce a system of 'best practices' when the transaction is implemented." These provisions draw a closer nexus between safety and corporate culture

[6] A SIP was prepared and adopted in that case. *See Conadian National Railway Company, et al.—Control—Wisconsin Central Transportation Corporation, et al.*, STB Finance Docket No. 34000, 66 FR 23757 (May 9, 2001) (STB Decision No. 2, served May 9, 2001) (STB order mandates the preparation of a SIP) (hereinafter "*CN/WCTC*"); and *CN/WCTC*, STB Finance Docket No. 34000 (STB Decision No. 10, served Sept. 7, 2001) (STB adopts the SIP and approves the transaction).

UMI

than the proposed rule and require a railroad to detail the incremental measures it will take to integrate disparate cultures that will culminate in adopting safe and efficient standards governing railroad operations.

As FRA explained in the proposed rule, safety culture is an instrumental element in achieving rail safety. Acquisitions, consolidations, and mergers of large rail operations are complicated transactions that require a railroad to adopt an operating structure that underscore safety and good communications among management, employees, and the employees' union representatives. Such a structure should unify the different cultures under which railroads operate that draw upon the best practices of each to facilitate the formulation, development, issuance, and implementation of safety practices and procedures within a seamless merged company.

To carry out this task, an applicant needs to describe how it will successfully integrate the underlying priorities, practices, and philosophies while implementing the transaction. For example, UP recently published a three-step directive to its officials. First, the railroad indicated that it would focus, in part, on adequate staffing levels and predictable work schedules. Second, it would direct its attention to values, leadership development, training, and quality. Finally, the railroad pledged that it would build a new relationship with its employees. At the same time, NS has established a culture that elevates training, professionalism, commonality of purpose, and rules compliance to achieve safety on its railroad. NS has acknowledged that rules compliance is most fundamental to avoid accidents or incidents, and has stressed effective communications between management and the rank-and-file workers to implement this measure. CSXT has amplified the importance of safety culture by establishing a cooperative program comprising management officials and labor union members that educates, counsels, and improves the performance of safety-sensitive employees who commit operating rules violations, and instituting safety culture offices that ensure that safety is foremost in job performance. *See* SIP Update at 22.

At bottom, FRA posits that it will not dictate attitudes, directives, planning, or resource allocation criteria under this part. Rather, the agency intends to defer to proposed and implemented planning processes that promote and value railroad safety. It is incumbent on a railroad to resolve different cultures, direct and carry out programs that emphasize safety practices, and engage management and labor to develop, issue, and implement an iteration process to execute these programs. To this end, FRA endorses the corporate culture concept and incorporates the textual standards accordingly.

Section 244.13(b)—Training

Proposed Rule: The proposed rule would require a railroad to discuss its training and educational programs to ensure that its employees and supervisors who are responsible for field operations would be proficient and qualified. FRA identified the employment crafts that would be covered in the NPRM, which were train and engine service employees, dispatchers or operators, roadway workers, signal employees, mechanical officials, and hazardous materials personnel.

Comments: FRA received diverse comments from interested parties. The TTD, for example, wanted the rule to set minimum qualifications and training requirements, and require an applicant to detail the number of class and on-the-job training hours and file a report on hazardous materials training. At the same time, the BRC wanted to establish qualification and training standards for car inspectors when defect ratios exceed three percent for an applicant, and the ATDD suggested training and qualification requirements for dispatchers. The AAR agreed with the regulatory concept, but opposed new training requirements that are not prescribed under the safety laws because such standards do not present an integration issue.

Final Rule: FRA adopts the proposed rule with some substantive changes to the introductory text and paragraph (b)(6). The rule centers on ensuring that designated employees, including information technology personnel affecting hazardous materials transportation, are proficient, qualified, and familiar with the operating rules and operating tasks of territory assigned when these employees are moved to a new territory or the operating rules on a given territory are changed. Training impacts integration of operations when employees are either transferred to new divisions or subdivisions, or when operating rules, timetables, or timetable special instructions, *e.g.*, superintendent bulletins, are changed in an assigned territory. In other words, when operating circumstances change, the "front line" employees must be familiar with all aspects of their crafts or occupations. A SIP should also include details identifying the scope and depth of the type of training operating personnel will receive, discuss the resources allocated to conduct and complete training, and a proposed schedule for reaching this milestone.

FRA and the AAR are in agreement about the concept of the SIP rule. It is not the agency's intention to prescribe new substantive standards in this rulemaking action. Instead, the rule requires a railroad seeking to consummate a transaction to inaugurate and implement certain programs when integration commences. In this instance, an applicant needs to make certain that its operating employees are conversant in logistics, operations, and equipment handling in unfamiliar localities, and when operating rules, timetables, or timetable special instructions are changed in an assigned territory. Although FRA is receptive to the labor organizations' recommendations, the agency believes that training standards are more appropriate in another rulemaking action and therefore, declines the invitation.

Section 244.13(c)—Operating Practices

Proposed Rule: FRA proposed requiring a railroad to provide operating practices information that would address operating rules, accidents/incidents, hours of service laws, and the alcohol and drug and locomotive engineer qualification and certification programs. The regulation would also require an applicant to discuss the efforts taken to minimize fatigue of covered service employees, *i.e.*, employees who perform train and engine service, dispatching, or signal system service, to enhance safety in the field and reduce the likelihood of committing errors while performing safety-sensitive functions.

Comments: Four parties filed comments on this proposal. The labor union commenters supported the proposal, but suggested changes. The BMWE wanted the rule to also require a railroad to consider fatigue management of roadway workers because of the physical demands of their labor and the travel necessary to carry out their assigned tasks. The BRC recommended that the proposed accident/incident reporting procedures be amended to require an applicant to certify the integrity of electronic data entered and a security system to reflect any amendments to initial data entries. The TTD supported the provision, but suggested four changes. First, the labor organization wanted a railroad to identify the size of current operating crews and detail the injuries, fatalities, and expenditures on safety-related claims. Second, it recommended that an applicant file a compilation of all

alcohol and drug tests performed and their results for the previous three years, and an explanation of its options for substance abuse treatment. Next, it wanted a railroad to specify the measures necessary to minimize employee fatigue. Lastly, the TTD wanted a SIP to identify how an engineer would be qualified on the physical characteristics to operate over any new territory.

The AAR also commented on paragraph (c). The railroad organization agreed with the operating rules provision because of its integral nature in governing operations on a new railroad system, but opposed the accident/incident reporting and alcohol and drug testing provisions on the ground that they are not integration issues unique to regulated transactions.

Final Rule: FRA adopts the proposed rule with two modifications. The agency amends § 244.13(c)(1) to add "freight and passenger service" to the provision requiring a railroad to identify the operating rules, timetables, and timetable special instructions that govern railroad operations. The inclusion of this proviso renders § 244.13(l) redundant, which substantiates its withdrawal from the final rule. FRA also drops proposed paragraph (c)(2) from the final rule, agreeing with the AAR that there is no correlation between accident/incident reporting procedures and safe integration of operations. The agency has determined that accidents/incidents reporting is not a safety problem with the transactions it has reviewed. FRA believes that the current regulations under 49 CFR part 225 achieve the interests of safety for reporting accidents or incidents and establishing an internal control plan under § 225.33. Therefore, the accidents/incidents provision is unnecessary and is withdrawn.

FRA believes that the final rule captures the information a railroad needs to address in a SIP to ensure that operations are performed safely during the integration phase. Although the agency considered expanding the reach of the operating practices area, it decided to focus on those employees and practices that will be most affected by a transaction, particularly those aspects that involve logistics, operations, and equipment handling in unfamiliar territories, and the need to retain institutional knowledge on lines experiencing operational changes. A railroad, for instance, needs to identify the alcohol and drug testing programs that will apply after it consummates operations to facilitate continuity and consistency during the transition period. Again, the rule's objective is to require an applicant to conduct advance planning of operations that impact rail safety. The operating practices enumerated in the rule text are such critical operations that mandate detailed planning. This rationale thus undergirds the requirements contained in this provision.

Section 244.13(d)—Motive Power and Equipment

Proposed Rule: Section 244.13(d) would require an applicant to identify the qualification standards for employees who inspect, maintain, or repair rolling stock and designate the facilities that will repair the rolling equipment, and provide adequate assurances that mechanical officials who are responsible for performing required inspections and tests of the equipment are proficient in mechanical practices to safeguard the use of freight or passenger cars and locomotives on a railroad.

Comments: The AAR, BRC, and TTD shared their respective comments with FRA about the proposed rule. The AAR agreed that the regulation should be adopted with the proviso that a railroad be afforded flexibility to change the designation of repair facilities without the need of agency approval. The BRC took issue with the provision "designation of facilities that will repair such equipment" because it implies that a railroad would be authorized to assign repair facility locations irrespective of safety concerns. The BRC recommended that the sentence read, in part, that an applicant must identify "all facilities being used, and that will be used following consummation of the transaction, to repair such equipment," to enable FRA to determine whether a railroad is eliminating redundant repair facilities or increasing the distance noncomplying cars may be permitted to travel. The TTD also wanted to amend the provision to require a railroad to identify the average and mean age of engines owned by an applicant and the location of new repair facilities.

Final Rule: FRA agrees with the BRC that a SIP must identify all repair facilities that are being used or will be used after a transaction is consummated. The agency is concerned about the safety of rolling stock and believes that the modification will enable it to determine whether an applicant is eliminating redundant repair facilities or increasing the distance in which noncomplying rolling equipment may travel, thereby compromising rail safety. FRA thus rewords the last clause in the provision to read "the designated facilities used, or to be used, to repair such equipment" to reflect this amendment.

Section 244.13(e)—Signal and Train Control

Proposed Rule: The NPRM would require a railroad to identify the signal and train control systems used, and maintenance, capital improvement, and research and development projects planned for signal and train control operations.

Comments: The TTD supported the proposed requirement, but recommended that the rule should also require an applicant to identify signal malfunctions and false signal reports, dark territory, and accidents in signal and non-signal territory. The AAR opposed the TTD's suggestion to require a railroad to identify signal malfunction reports, asserting that it does not present an integration issue.

Final Rule: FRA agrees with the AAR that the TTD's proposal does not present an integration issue but instead, an operational issue affecting the routine movement of engines, equipment, or trains. The TTD's suggestion is therefore not adopted. The final rule tailors the proposed rule text to require a railroad to address "any planned amendments or modifications to capital improvement" to focus an applicant on advance planning of signal systems integration to prevent any incompatibility between signal and train control systems and reconcile or harmonize signal practices and standards when dissimilar systems exist.

Section 244.13(f)—Track Safety Standards and Bridge Structures

Proposed Rule: FRA would require a railroad to identify the maintenance and inspection programs for track and bridges to ensure that its infrastructure was safe or would be repaired, rehabilitated, or replaced, if necessary.

Comments: The labor organizations, led by the BMWE and TTD, wanted the regulation to require an applicant to identify the qualification standards for trackside workers to track the requirements contained in § 244.13(d). The AAR opposed the NPRM, claiming that Track Safety Standards and bridge structures do not present an integration issue.

Final Rule: Based on FRA's recent assessment of the *Conrail Acquisition*, the agency believes that track safety does present an integration issue that should be addressed in the final rule. FRA's audit found that CSXT experienced track maintenance and inspection practices shortcomings after the implementation of the *Conrail Acquisition*. In 1999, FRA determined

VOL
67
ISS
51
MR
15
2002
UMI

that the railroad's track defects ratios did not improve from the previous year, and track-related accidents remained a problem on its lines. These accidents were caused by wide gage and defective switch points and track hardware at turn-outs, which were easily preventable and evidence the need for the railroad to redouble its efforts in upgrading its track program. *See* SIP Update at 24. Because track maintenance and inspection programs are essential elements to promote safe rail operations during integration, FRA believes that the roadway or trackside workers should be qualified in carrying out these tasks. As a result, the final rule adopts the labor organizations' recommendation by requiring a SIP to identify the qualification standards for these workers.

Section 244.13(g)—Hazardous Materials

Proposed Rule: Section 244.13(g) proposed requiring an applicant to address hazardous materials in a SIP. First, a railroad would have to identify a hazardous materials inspection program that covered field inspection practices, communication standards, and emergency response procedures. Second, the applicant would have to discuss its development and deployment of an automated system at designated locations for immediate retrieval of hazardous materials shipping papers.

Comments: Three parties commented on the proposal. The BMWE and TTD wanted an applicant to provide an emergency action hazardous materials plan. Conversely, the AAR opposed the requirement of developing and delivering computer software operating systems because there was insufficient evidence that the regulation would promote the safe integration of hazardous materials safety programs.

Final Rule: FRA has reorganized paragraph (g) by requiring a railroad to identify a hazardous materials inspection program that covers four discrete areas. The first three are identical to the proposed rule. The fourth area reconfigures proposed § 244.13(g)(2) to require the program to address information technology ("IT") systems and employees who are responsible for shipping papers accompanying hazardous materials shipments. The provision also stipulates that a SIP should identify preventive measures that an applicant will use in responding to IT integration and hazardous materials documentation problems.

FRA believes that IT systems that transmit and receive hazardous materials information must employ programs that properly place cars in train consists and identify the contents of hazardous materials shipments to the hostler and train and engine crews. The agency documented several IT deficiencies in implementing the *Conrail Acquisition*, finding improper hazardous materials shipping papers and inaccurate train consists hauling hazardous materials shipments because of, in part, the lack of familiarity with the data systems used to process hazardous materials documentation. *See* SIP Update at 2, 25, and 28. To prevent recurrences, FRA believes that a railroad should test the computer systems that will be responsible for handling hazardous materials paperwork to detect and eliminate any incompatibility problems found and provide for information accuracy. FRA's revision captures the lesson learned from a recent transaction.

Section 244.13(h)—Dispatching Operations

Proposed Rule: Paragraph (h) would require a railroad to identify the dispatching system to be adopted, the migration of the existing system to the adopted one, if applicable, the qualifications for determining duties performed by dispatchers or operators, and the volume of work assigned to the dispatchers or operators.

Comments: The ATDD and AAR provided disparate comments on this proposal. The ATDD opined that a railroad should be required to address the familiarity of the dispatchers with the territory that is subject to the transaction, whereas the AAR opposed this recommendation because no current substantive regulation exists and proper training alone may provide adequate territory familiarization. The AAR also asserted that the dispatching requirements should apply only to operations that are affected by the transaction.

Final Rule: FRA adopts the suggestions that were provided. The proposals are incorporated in § 244.13(b) introductory text and § 244.13(b)(4) by requiring a SIP to identify training programs for dispatchers to ensure familiarity with the operating tasks of the territory assigned when these employees are assigned to a new territory or the rules governing an assigned territory are changed. Otherwise, the term "workload" is added to paragraph (h)(3) and paragraph (h)(4) is withdrawn. This cosmetic change retains the sum and substance of the information on dispatcher workloads in a SIP without setting out a separate regulatory function.

Section 244.13(i)—Highway-Rail Grade Crossing Systems

Proposed Rule: The NPRM would require a SIP to address highway-rail grade crossing signal system safety, emergency response measures, public education initiatives, and proposals to improve grade crossings and grade crossing system warning devices.

Comments: Only one party commented on the proposal. The AAR maintained that the proposed regulation was inappropriate because railroads already discuss grade crossing issues and upgrades with state highway departments, and FRA's insertion into the process may create conflicts with these government agencies and impose unnecessary burdens on an applicant. Alternatively, the AAR suggested that a SIP require a railroad to discuss grade crossing safety programs and the integration of the programs in a transaction.

Final Rule: The final rule adopts the AAR's suggestion in part and breaks out the information required in a SIP in more detail. The regulation mandates that an applicant identify the grade crossings that will experience an increase in traffic as a result of the transaction, the existing grade crossing programs of the railroads as they apply to these crossings, the integration of the grade crossing programs of the railroads that are subject to the transaction to the extent the programs differ, emergency response action plans, measures to avoid blocking or obstructing grade crossing systems, and signs used for changes to rail traffic patterns.

FRA believes that grade crossing safety is a critical element that a SIP must address. As was explained in the NPRM, statistics show that the vast majority of fatalities and injuries during railroad operations occur at grade crossings due to collisions or trespass incidents. 63 FR 72233. A complex transaction presents its own challenges given that a railroad acquiring, consolidating, or merging with another railroad will dedicate traffic on certain corridors or lines. The SIP rule requires an applicant to consider the impact of increased traffic density in a territory on the safety of grade crossings.

Again, FRA's role is not to approve or reject specific measures, such as upgrading grade crossings, a railroad may take during the course of a transaction. Rather, the agency reviews the applicant's proposed plan within the context of providing a "reasonable assurance of safety." FRA does not foresee that such a review process will interfere with a railroad's consultations with a state highway agency or impose

a substantial burden on the railroad. The interests of safety direct an applicant to develop and implement a grade crossing program that will reduce accidents, incidents, injuries, and fatalities that occur at crossings. The grade crossing element is thus retained in the final rule.

The rule also sets out discrete new items-avoidance of blocked crossings and signs used for changes in traffic patterns-that a railroad must address in its grade crossing program. Blocked crossings are of particular concern to FRA and communities that will experience increased rail traffic over its crossings. To illustrate, the agency found that a significant number of NS crossings were blocked for extended periods of time in the State of Ohio during the end of 1999. *See* SIP Update at 20. The agency has determined that this deficiency is more systematic and frequent than previously believed, creating unnecessary challenges for emergency response vehicles and creating congestion at crossings. To reduce the likelihood of similar problems occurring in the future, FRA believes that a railroad should identify in its SIP practices to alleviate blocked crossings, which may include identifying additional sidings required, crew change points, and other actions or construction needed. (The agency notes that this requirement is similar to the STB regulations requiring applicants to submit evidence about potentially blocked grade crossings as a result of anticipated merger-related traffic increases. *See* 49 CFR 1105.7(e)(7) and 49 CFR 1180.1(f)(3)(ii) and 1180.8(a)(2), requiring an applicant to identify specific measures to be employed to avoid blocking crossings that may result otherwise due to the consummation of a transaction, at 66 FR 32582, 32585 and 32589, June 15, 2001.) The SIP must also discuss the signs used for changes in traffic patterns. FRA believes that these signs serve to advise motorists and pedestrians of the frequency of rail traffic traversing crossings to protect them from possible collisions.

Section 244.13(j)—Personnel Staffing

Proposed Rule: Paragraph (j) would require a SIP to cover personnel staffing in terms of the number of employees, both current and proposed, for certain occupations carrying out safety-sensitive service in the railroad industry.

Comments: FRA received two comments to this proposal. The ATDD agreed with the regulatory text as proposed. The AAR wanted to clarify the proposal by authorizing a railroad to file a copy of its Labor Impact Exhibit that is filed with an application to the STB under 49 CFR part 1180 to avoid any redundancies in information provided pursuant to an application.

Final Rule: FRA adopts the proposed rule with one minor modification. An applicant need only address the personnel staffing element when it projects a change of operations that will impact workforce duties or responsibilities. A railroad may omit this section if it expects operations will remain constant after the transaction is consummated. Otherwise, it must address the full litany of job functions that are provided in subparagraphs (1)–(8).

FRA declines to accept AAR's suggestion in authorizing a railroad to file a copy of its Labor Impact Exhibit to satisfy this provision. Under 49 CFR 1180.6(a)(2)(v), also known as the Labor Impact Exhibit requirement, the STB only requires an applicant to address projected changes that a transaction will impact on its employees by class or craft, the geographic locations where the impact will occur, the timeframe of the impact, and whether any employee protection agreements have been reached. The Board's regulation thus does not cover current employees and does not enunciate specific job duties that are prescribed here. Because the two regulations are not congruent, the filing of a Labor Impact Exhibit alone will fall short of the requirements enumerated in this section. Nevertheless, a railroad may use the same information provided in its Labor Impact Exhibit to meet portions of this regulation where appropriate.

Section 244.13(k)—Capital Investment

Proposed Rule: Paragraph (k) would require an applicant to explain its capital investment program by describing its intended investments in the company's infrastructure and addressing changes to existing investment forecasts.

Comments: The TTD agreed with the capital investment proposal.

Final Rule: FRA adopts the rule as proposed.

Section 244.13(l)—Relationship Between Freight and Passenger Service

Proposed Rule: FRA proposed requiring a railroad to describe the relationship of freight and passenger service on railroad lines subject to a transaction.

Comments: The agency received comments from APTA and OK DOT about proposed paragraph (l). APTA requested that the regulation enunciate the schedule changes involving commuter and freight service on operations subject to the transaction. OK DOT, on the other hand, wanted the provision to require an applicant to address the density of combined freight and passenger operations.

Final Rule: Upon further consideration, FRA has concluded that freight and passenger service should be addressed within the context of the operating rules that will govern their operations. The agency reasons that safe integration is premised on identifying those rules and practices that will govern these services on property that is the subject of a transaction. Service alone does not present an integration issue that warrants separate analysis and requiring a railroad to address schedule changes or density concerns serves to "micromanage" an application, which is contrary to the purpose of the SIP rule. Service falls within the rubric of railroad operations that must be evaluated to identify the potential safety impact and the measures directed to minimize any consequences during integration. Based on this analysis, FRA withdraws proposed paragraph (l) and transfers "freight or passenger service" to paragraph (c)(1).

Section 244.13(m) (Now Section 244.13(l))—Information Systems Compatibility

Proposed Rule: Section 244.13(m) proposed requiring a railroad to address the steps it intended to execute to provide a single interface of data on train consists, freight car and locomotive movements and movement history, also known as "wheel reports," dispatching operations, accident/incident reporting and recordkeeping requirements, and emergency cessation of operations.

Comments: Both the BMWE and TTD suggested expanding the regulation to require information systems to address movement and movement history of roadway equipment and hi-rail vehicles.

Final Rule: FRA adopts the proposed rule, now redesignated as § 244.13(l), with two changes. First, the final rule removes proposed subparagraph (4), which addressed accident/incident reporting and recordkeeping requirements within the information systems context. As explained in its discussion of Section 244.13(c)(2) above, FRA has concluded that accidents/incidents reporting is not a problem warranting a SIP. The agency therefore believes that requiring an applicant to explain the transmission and receipt of such information when integrating computer technologies is unnecessary. Consequently, the provision is withdrawn.

VOL
67
ISS
51
MR
15
2002
UMI

Second, this section adds one provision. A SIP must also address the compatibility of information systems that are responsible for transporting hazardous materials to ensure their safe movement while a railroad is switching or converting hardware, software, or program systems. The agency found that both NS and CSXT experienced difficulties in identifying and tracking hazardous materials shipments through their respective computer systems after they switched over from Conrail's "CATS" system in June 1999. *See, e.g.*, SIP Update at 25, 28, and 32. For example, CRCX employees, who work for the Shared Assets Areas in the *Conrail Acquisition*, reportedly had difficulty in obtaining documentation from CSXT and NS computer systems to properly place hazardous materials shipments in train consists. *Id.* at 32. Hazardous materials shipping papers must represent the contents of shipments being transported on the railroad. To this end, the IT systems must be capable of receiving and transmitting accurate hazardous materials documentation to ensure the seamless and efficient flow of information during the interchange of shipments. FRA, however, disagrees with expanding the regulation to include roadway equipment or hi-rail vehicles. There has been no evidence of problems associated with these service vehicles during the integration of complex transactions. Therefore, FRA demurs on the suggestion.

Section 244.15—Subjects To Be Addressed in a Safety Integration Plan Not Involving an Amalgamation of Operations

Proposed Rule: FRA proposed, in part, requiring a railroad engaging in a transaction that did not involve an amalgamation of operations to file a SIP that covered only the training, personnel staffing, and capital investment elements.

Comments: The AAR opposed requiring a SIP for a "paper transaction" because such a transaction does not present operational changes and only serves to impose an unnecessary burden on an applicant without any consummate safety benefit. In response, the AAR proposed revising the provision to require a SIP on an *ad hoc* basis when no operational changes exist.

Final Rule: FRA agrees with the AAR's rationale that a "paper transaction" presents minimal changes in operations that will affect rail safety and revises the regulation as suggested. An applicant seeking to consummate a transaction that does not propose an amalgamation of operations need not file a SIP unless FRA directs the railroad to do so.

As we explained in the NPRM, FRA distinguishes "operational transactions" that present a migration of personnel or equipment, or infrastructure changes from "paper transactions" that are limited to changes in company letterhead. *See* 63 FR 72234. FRA advises interested parties, however, that changes in operating rules, timetables, bulletins, special instructions, or any other written directives that affect the movement of locomotives or rolling stock impact safety and are therefore designated as "operational transactions," requiring the filing of a SIP. FRA thus adopts a broad interpretation of "amalgamation of operations" by mandating a SIP for transactions that propose only changes in practices or procedures governing railroad operations.

Section 244.17—Procedures

Proposed Rule: The NPRM proposed a set of procedures that would govern the filing and handling of an application to carry out a transaction. Section 244.17(a) provided that a railroad would be required to file a SIP with FRA and the STB no later than the date it submitted its request for authority to the Board. Under paragraphs (b) and (c), FRA would review and comment on the proposed SIP, and the railroad would provide additional information supporting its plan should the agency require it. Paragraph (d) proposed requiring FRA to issue its factual findings and conclusions on the proposed SIP to the STB before the Board ruled on the application. Section 244.17(e) would require a railroad to coordinate with FRA in implementing a proposed SIP approved by FRA and the STB until integration was complete. The proposed rule also set out the interplay between FRA and the Board during the implementation phase of the transaction in paragraph (f).

Comments: The AAR maintained that the proposal to require the contemporaneous filing of a proposed SIP and a request for authority with the STB was unrealistic, as the same employees generally would write both the operating plan for the STB application and the SIP. The organization also questioned the proposal because it may compromise the quality of the SIP and was inconsistent with the *Conrail Acquisition* proceeding in which the STB gave NS and CSXT four months to file their separate plans after they filed their respective applications. As an alternative, the AAR proposed that the rule provide a railroad 30–90 days after it files its application with the Board to file a proposed SIP.

The AAR further opposed proposed paragraph (b) on the ground that the regulatory text called for information that was beyond the scope of the rule. The organization recommended amending the text to authorize FRA to obtain additional information on matters that address specific safety concerns. Finally, the AAR requested that proposed paragraph (f) be amended to establish a three-year window of regulatory oversight of a railroad's SIP implementation, and that the section add a provision covering the confidential treatment of information provided by an applicant to the agency to safeguard proprietary and competitively sensitive information.

Final Rule: FRA revises § 244.17 to reflect the proposals advanced by the AAR and to clarify the procedural requirements governing the SIP process. Paragraph (a) is amended to give a railroad up to 60 days after it files an application with the STB to file a proposed SIP with FRA. FRA believes that a two-month interim will provide sufficient time for the company to complete its SIP after filing its operating plan. The agency also adds the phrase "to satisfy the requirements of this part" to paragraph (b) to assuage the AAR's concerns. Restated, the regulation now requires a railroad to provide additional information in a SIP that FRA may require to meet the rule's requirements, such as the operational elements within the framework of the plan's contents as provided in § 244.11. The final rule also has been revised to delete the reference to "exemptions" filed with the STB, because Class I carriers typically file applications in consolidation transactions.

FRA adds paragraph (f) to § 244.17 to require a railroad to communicate with the agency about any changes and refinements to its plan in response to unfolding developments, and file any amendments to its plan with FRA for approval. Proposed paragraph (f) is redesignated paragraph (g), and the last sentence of the proposed provision is amended to reflect that FRA will oversee the implementation of a SIP for a period of five years, for a period prescribed by an order issued by the Board, or when FRA advises the Board in writing that the integration of operations is complete, whichever is shorter. The oversight period is necessary to ensure that the SIP is being implemented as intended, that the railroads are adhering to the representations made in the SIP, that no unforeseen circumstances have arisen

requiring FRA to exercise any of its enforcement remedies, and that the milestones established in the SIP are being met in a timely fashion.

Finally, the agency adds paragraph (h) to provide a procedural mechanism for an applicant to request that advance drafts of a proposed SIP and information filed in support of the proposed or approved plan receive confidential treatment should an outside party submit a request for the documents under the Freedom of Information Act ("FOIA"), 5 U.S.C. 552. The regulation directs the railroad to comply with the procedures enumerated under 49 CFR 209.11 to petition for such treatment. Nevertheless, FRA reminds the regulated community that the agency alone will decide whether to grant or deny a request, but that it will afford a company whose request was denied an opportunity to respond no less than five days before the agency discloses the information. *See* 49 CFR 209.11(e). It should be noted, however, that FRA, like the STB, will not treat a proposed or approved SIP that is filed pursuant to the regulations prescribed under 49 CFR 244.17(a) and 1106.4(a) as confidential because the proposed plan will be incorporated in the Board's environmental documentation, which will be made available for public review and comment.

Section 244.19—Disposition

Proposed Rule: Section 244.19 would enunciate FRA's review and approval process of a proposed SIP. The regulation proposed requiring a plan that detailed a logical and workable transition from conditions existing before the proposed transaction to conditions intended to exist after the transaction was consummated. FRA would review the SIP on a "reasonable assurance of safety" standard, meaning that the agency would conduct rational basis review of the plan to ensure that it was reasonably sufficient to comply with the safety laws, provide for safe railroad operations, and satisfy expectations of integration of operations. The agency would then issue its notice of approval should the SIP prove satisfactory, provided that the railroad implemented the plan as proposed.

The rule also would authorize amendments to a SIP. A railroad could amend its plan as needed with FRA's approval or the agency could mandate changes consistent with rail safety should it identify deficiencies during implementation of an approved plan that were unforeseen while the plan was under review. Again, SIP approval would be contingent on a railroad's fulfillment of the subject matter elements in the plan and the execution of operations necessary to implement the plan.

Comments: The AAR was the only commenter to the proposed section. The railroad organization opposed FRA's formal review and approval process of a SIP, and any amendments thereto, on the grounds of the agency's lack of jurisdiction to consider transactions within the STB's scope of authority, and the need to maximize flexibility in updating and improving safety plans and minimize the burdens imposed by the rule. The AAR proposed four revisions to the section. First, FRA would advise the Board in reviewing a proposed SIP on practices and procedures relating to rail safety, with the STB to determine whether to approve or disapprove of a plan based on its adequacy after FRA comments on it. Second, an applicant would be permitted to file any amendments with FRA and explain the need for the changes should the agency request the same. Third, the section would authorize amendments to take effect within 20 days after they are filed with the agency and remove the review process of amendments. Finally, the AAR recommended modifying paragraph (b) by replacing "later developments" with "amendments to a SIP."

Final Rule: FRA adopts the core of the proposed rule and certain changes advanced by the AAR. Paragraph (a) is rewritten to articulate the standard of review for a proposed SIP, and any amendments thereto, up front. The rule further explains the structure of the plan to be filed, which the NPRM set out. Recast, the SIP must be thorough, complete, and clear; and address a logical and workable transition of railroad operations from conditions before the transaction to conditions intended after the transaction is consummated that provide a reasonable assurance of safety at every step during implementation. FRA intends to work informally with an applicant both before and after the transaction is approved and consummated to ensure that the SIP complies with the regulations and that the transaction is safely implemented.

Consistent with the AAR's proposal, FRA amends paragraph (b) by inserting "any amendments to the plan approved by FRA" in lieu of "all later developments subject to FRA approval that could not be completed before approval of it." This revision clarifies an applicant's role in fulfilling the elements of an approved SIP by requiring it to implement all of the plan's measures and any amendments to the plan. The agency notes that it may approve portions of a SIP while disapproving other portions if it concludes that the actions under the plan can be segregated without jeopardizing safety.

Section 244.19(c) is also amended by requiring a railroad to substantiate any changes to its SIP and communicate with the agency to resolve any comments about the amendments. The regulation also prescribes that any amendments approved by FRA will take effect within 20 days of approval, and the agency may "request" rather than "require" a railroad to amend its approved plan should circumstances dictate. The operative word "request" is inserted to afford the agency discretionary review of the plan while it is being implemented and sufficient leverage to proffer a change that promotes safety interests.

FRA takes issue with the AAR's suggestion that the agency lacks authority to adopt a formal review and approval process of SIPs. As FRA explained earlier, the agency believes that it has the authority to regulate railroad safety during implementation of mergers, consolidations, and acquisitions that are approved by the STB. FRA has always done so for the hazards presented by railroading generally. In this rule, FRA is exercising its existing jurisdiction and expertise in regulating the safety hazards presented by the proposed integration of operations of different railroads. *See* 49 U.S.C. 20103. In short, the transaction that is approved by the STB is the context within which the potential safety hazards are presented and dealt with, but the transaction itself is not regulated by FRA. The rule does not authorize FRA to sanction or veto a transaction subject to STB approval or to impose conditions upon which approval of the transaction is authorized because those functions are exclusively vested with the STB. *See* 49 U.S.C. 11321–24.

FRA believes that there is a need to codify an ongoing SIP approval process to allow for appropriate enforcement. There are two parts to this process. First, a railroad must submit a proposed SIP for agency review and approval to determine whether the plan meets the requirements of the rule. Second, assuming the proposed SIP, including any amendments thereto, is approved, the railroad must implement the SIP as approved. Should FRA disapprove a SIP, or portions thereof, or the railroad fail to implement the SIP, the rule authorizes the agency to take enforcement action to ensure safety. *See* 49 CFR 244.21(b).

Section 244.21—Compliance and Enforcement

Proposed Rule: Proposed § 244.21 would require a railroad to have an FRA-approved SIP before it could change its operations to implement a transaction. Additionally, the rule would authorize the agency to use any of its enforcement remedies available under the safety laws should the railroad either change its operations without an approved plan or fail to execute any measure in an approved plan. The regulation also provided that FRA would consult with the STB at all appropriate stages of SIP implementation for a transaction that involved Board authorization.

Comments: The AAR objected to this proposal, asserting that FRA is not authorized to take any enforcement action against a railroad under this part because the STB is the only agency with jurisdiction to approve or disapprove a proposed SIP.

Final Rule: FRA revises § 244.21(a) to clarify that, in approving a SIP, FRA is regulating the safety of railroad operations and is neither approving nor disapproving the transaction before the STB nor exercising an alleged veto over whether that transaction can be consummated if it should be approved by the STB. FRA also withdraws proposed paragraph (c) because it duplicates the requirements provided under § 244.17(g). The regulation now requires a railroad implementing a transaction to operate in compliance with the SIP approved by FRA until all of its operations are completely integrated. The rule is rewritten in this fashion to eliminate the possibility of interpreting the rule, as some commenters did, to equate FRA's approval or disapproval of a SIP with approving or disapproving an application to the STB to approve a transaction. As explained above, FRA agrees that the STB has exclusive authority to approve or disapprove a transaction covered by this part.

Correspondingly, FRA's role in the STB's process is to advise the Board on safety issues identified in a transaction. Indeed, the Board's own proposed and final rule relies upon the FRA's safety expertise as the Board evaluates the merits of a transaction and disposes of an application. *See* 49 CFR 1106.4; *see also* Tyrrell, 248 F.3d at 523; *CP Purchase*, slip op. at 5–6 (the STB gives "great weight" to FRA's expert view on rail safety in determining whether to impose any conditions on a proceeding).

Briefly stated, regulation of "every area of railroad safety" is FRA's jurisdiction. *Tyrrell*, 248 F.3d at 523 ("FRA exercise[s] primary authority over rail safety matters under 49 U.S.C. 20101 *et seq.*"). In approving or disapproving a SIP under this part, and enforcing one, FRA is regulating *the safety aspects of how* a railroad operates while implementing a transaction permitted by the STB, *not whether* the railroad is permitted to consummate the transaction or on what economic terms. This is an appropriate exercise of the "plenary safety authority with respect to the safety of rail operations-before, during, and after a transaction" which the AAR acknowledges that FRA has. AAR comments at 9. In that regard, approval of a SIP is no different than approval of an engineer certification program under 49 CFR part 240. There is no question that a railroad must have an engineer certification program approved by FRA and operate in accordance with it at all times, whether or not the railroad is involved in a transaction within the STB's jurisdiction.

In summary, FRA is authorized to exercise any of its legal or equitable enforcement remedies should a railroad either not operate in accordance with an approved SIP or not comply with any element provided in that plan.

Regulatory Impact of FRA's Final Rule

Executive Order 12866 and DOT Regulatory Policies and Procedures

FRA is adopting rules that will require merging or acquiring railroads to adopt SIPs before commencing merged operations. Two railroads, NS and CSXT, prepared such plans for their acquisition of the Conrail system. One of those railroads has informed FRA that its SIP cost $300,000, the other said it cost $212,000. The main difference is that the more expensive plan was developed almost exclusively by a contractor, while the other was mostly done in-house. It is unlikely that any SIP would cost much more. It is possible that a SIP for a smaller Class I railroad might cost less. A likely range for the cost of a SIP is $150,000 to $400,000. A SIP for a Class II railroad might cost much less. The Class II railroad's business plan will be smaller, and the safety information will be easier to gather. A SIP for a Class II might cost $25,000 to $100,000. It is a one-time expense for any railroad. The assumed total cost of the SIP rule to a railroad is twice the initial cost of preparing the SIP, to account for such vagaries as SIP modifications and restrictions on training.

Although FRA cannot with certainty say which of the several accidents following mergers were the result of poor planning, it appears extremely likely that at least one of them could have been prevented with a SIP. Assuming that the SIP would prevent two fatalities and $600,000 in damage implies that a SIP for the UP/SP merger would have saved at least $6,000,000 in accident costs. FRA believes that one or more of these accidents could have been prevented based on its findings when it did a detailed analysis of the UP/SP operations. For other railroads the accident savings might vary. For a larger railroad, the accident savings might be twice as much ($12,000,000), while for smaller Class I railroads the safety benefits might be one-fourth that much ($1,500,000). FRA does not have as much information on Class II railroads, but it appears that the accident savings on a Class II railroad might be one percent ($60,000) or as much as twenty percent ($1,200,000) of the savings that would have been available for the UP/SP. These figures are roughly based on ratios of reported accidents, noting that when railroads merge, they become larger entities than they are now.

FRA's careful review of the impacts of mergers that have taken place in the recent past has clearly revealed that mergers and acquisitions disrupt existing safety and operating patterns. Because these transactions are generally justified in significant part by cost savings, there is pressure to close redundant facilities and eliminate positions. This can lead to degradation of safety programs unless formal, written, systematic, and detailed plans are prepared to ensure that safety programs are continued and closely followed. Any less attention to safety could produce catastrophic results, both in terms of economic cost and, more importantly, loss of life.

The final rule will cost $300,000 to $800,000, and will prevent $1,500,000 to $12,000,000 in accident costs for Class I railroads, and will cost $50,000 to $200,000, and will prevent $60,000 to $1,200,000 for Class II railroads. The final rule will not apply to small entities, *i.e.*, the Class III railroads. In addition, the railroad may avoid substantial service difficulties by carrying through the safety planning process. This could save the railroad hundreds of millions or billions of dollars. In the first three quarters of 1998, UP reported losses exceeding $900,000,000 due to service difficulties. The societal losses of these delays is probably much greater, as the figures only account for costs to UP. FRA notes that although numerous parties have submitted data to the STB regarding the impact of the service difficulties, the Board has not attempted to quantify the societal costs of these service problems. *See Rail Service in the Western United States*, STB Ex Parte No. 573 (STB Decision served Feb. 25, 1998).

Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601 *et seq.*, requires an assessment of the impact of rules on "small entities." The final rule relates to acquisitions, consolidations, and mergers involving only Class I railroads and a Class I railroad with a Class II railroad where there is a proposed amalgamation of operations. Given FRA's recently published interim policy establishing "small entities" as being railroads that meet the line haulage revenue requirements of a Class III railroad, FRA certifies that this proceeding will not have a significant economic impact on a substantial number of small businesses. *See* Interim Statement of Policy Concerning Small Entities Subject to the Railroad Safety Laws, 62 FR 43024, Aug. 11, 1997.

Paperwork Reduction Act

The information collection requirements ("ICRs") in this final rule have been submitted for approval to the Office of Management and Budget ("OMB") under the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.* The sections that contain the ICRs and the estimated time to fulfill each requirement are as follows:

CFR Section	Respondent universe	Total annual reponses	Average time per response	Total annual burden (in hours)	Total annual burden cost
244.13—Subjects to be addressed in a Safety Integration Plan (SIP) involving an amalgamation of operations.	8 railroads	1 SIP (plan)	360 hours	360	$22,224
244.17—Procedures	8 railroads	25 reports	40 hours/2 hours	92	$5,152
—Coordinating Implementation of Approved SIP with FRA.	8 railroads	50 phone calls	10 minutes	4	$224
—Request For Confidential Treatment	8 railroads	.5 request	8 hours	8	1,224
244.19—Disposition	8 railroads	2 communications	16 hours	32	1,792

All estimates include the time for reviewing instructions, searching existing data sources, gathering or maintaining the needed data, and reviewing the information. Pursuant to 44 U.S.C. 3506(c)(2)(B), FRA solicits comments concerning whether these ICRs are necessary for the proper performance of the agency's function, including whether the information has practical utility; the accuracy of FRA's estimates of the burden of the information collection requirements; the quality, utility, and clarity of the information to be collected; and whether the burden of collection of information on those who are to respond, including through the use of automated collection techniques or other forms of information technology, may be minimized.

Organizations and individuals desiring to submit comments on the ICRs should direct them to the Office of Management and Budget, FRA Desk Officer, Washington, DC 20503. OMB is required to make a decision concerning the ICRs contained in this final rule between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication.

FRA hereby notices that it cannot impose a penalty on persons for violating ICRs that do not display a current OMB control number, if required. FRA intends to obtain a current OMB control number for any new ICRs resulting from this rulemaking action before the effective date of the agency's final rule. The OMB control number, when assigned, will be announced by separate notice in the **Federal Register**.

Environmental Impact

FRA has evaluated the final rule in accordance with its procedures for ensuring full consideration of the potential environmental impacts of FRA actions, as required by NEPA, other environmental statutes, Executive Orders, and related directives. This rule meets the criteria that establish this action as a non-major action for environmental purposes.

Federalism Implications

The final rule has been analyzed in accordance with the principles and criteria contained in Executive Order 13132, and it has been determined that this action does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Statement of Energy Effects

The final rule has been reviewed in accordance with Executive Order 13211 (66 FR 28355, May 22, 2001), which requires agencies to prepare a Statement of Energy Effects describing the effects of certain regulatory actions on energy supply, distribution, or use when such measures are identified as "significant energy actions." FRA certifies that this rulemaking action is not a significant energy action to warrant the preparation of such a statement.

STB's Statement of Basis

The circumstances that led to the promulgation of these rules are set out in the NPRM. As explained there, in the advance notice of proposed rulemaking ("ANPRM") published in the **Federal Register** on December 4, 1997, at 62 FR 64193, the Board requested comments on the extent to which railroads should be required to provide information pertaining to the manner in which they intend to provide for the safe implementation of merger and acquisition authority granted by the Board. The Board explained that for several years the Board and its predecessor agency, the Interstate Commerce Commission ("ICC"), have considered the issue of safety along with other relevant issues in individual cases. As particularly pertinent here, in the Conrail Acquisition proceeding,[7] the Board for the first time required applicants to submit detailed information on how they proposed to provide for the safe integration of their corporate cultures and operating systems, if the Board were to approve the proposed transaction.[8] (The Board required the same type of showing in the CN/IC merger,[9] which the Board approved on May 25, 1999. A SIP also

[7] *Conrail Acquisition*, STB Finance Docket No. 33388 (STB Decision No. 52, served Nov. 3, 1997).

[8] The Board did so at the suggestion of FRA and rail labor interests.

[9] *CN/IC*, STB Finance Docket No. 33556 (STB Decision Nos. 5 and 6, served June 23, 1998, and Aug. 14, 1998).

was prepared and adopted in the CN/WCTC merger proceeding.[10]

Specifically, the Board's practice in recent railroad merger proceedings involving Class I and Class II railroads has been to require applicants to file detailed SIPs based on guidelines issued by FRA. The railroads' submissions are made part of the environmental record in those proceedings and addressed in the ongoing environmental review process in those proceedings. This allows review and comment by FRA, other interested parties, and the public. The Board's environmental staff, SEA, also independently reviews the plans.

Moreover, the Board has entered into an MOU with FRA, with DOT's concurrence, to establish an ongoing monitoring process during implementation of these transactions. The MOU clarifies the actions that FRA and the Board will take to ensure the successful implementation of the SIP. Under the terms of the MOU, FRA monitors, evaluates, and reviews the applicants' progress in implementing the approved SIP. The MOU provides that FRA may request action by the Board in the exercise of its oversight authority over the applicants to correct safety deficiencies identified and to address other safety-related concerns resulting from the approved transaction. FRA also agrees to report to the Board at least on a biannual basis regarding the applicants' implementation of the SIP. In those circumstances in which FRA informs the Board of safety deficiencies that may require Board action, FRA will identify the deficiencies and provide recommendations for correcting them. FRA's reporting will continue until FRA advises the Board in writing that the proposed integration of operations has been safely completed.

The Board's ANPRM explained that, having developed a vehicle by which to evaluate safety integration issues in the *Conrail Acquisition*, it was appropriate to consider promulgating rules extending this process to other rail transactions subject to the Board's jurisdiction. Accordingly, the Board solicited comments from FRA and any other interested persons on how the Board should proceed to ensure the safe implementation of rail transactions subject to its jurisdiction (*i.e.*, whether the STB should proceed broadly by general rule or exclusively on a case-by-case basis, and whether procedures other than those adopted in *Conrail Acquisition* might be preferable in Board-approved transactions outside the merger area).[11]

Based on the comments received and the Board's experience with the SIP process in *Conrail Acquisition*, the Board issued its decision served on July 27, 1998, finding sufficient merit to warrant further exploration of establishing regulations addressing the safe implementation of Board approved transactions. *Safe Implementation of Board-Approved Transactions*, STB Ex Parte No. 574 (STB served July 27, 1998). The Board directed its staff to develop a joint notice of proposed rulemaking with FRA that would address the issues that have arisen in this proceeding and that are of concern to FRA.

Following the issuance of the Board's July 27, 1998, decision, the Board's staff met informally with FRA staff regarding the development of an appropriate proposal that would accomplish the objectives of both agencies, avoid gaps and inconsistencies in the two agencies' regulatory requirements, and impose as little burden as possible on the participating parties. The NPRM was published in the **Federal Register** on December 31, 1998, at 63 FR 72225. On May 4, 1999, a public hearing was held jointly with FRA to hear testimony on the proposed rules.[12]

As noted, eleven parties representing labor, freight and passenger railroads, and state departments of transportation filed comments on the NPRM. Many of the commenters endorsed the objectives of the SIP rules and indicated that they were generally satisfied with the approach used in the *Conrail Acquisition* and *CN/IC* proceedings.[13] However, they offered a number of recommendations on how the proposed rules could be clarified and improved. In issuing final rules, the Board has taken into account all the concerns raised in the parties' written comments and presented at the hearing. As discussed below, the Board is adopting some of the suggestions offered.

STB's Analysis of the Comments Pertaining to the Scope of the Rules

A number of commenters expressed concerns about the scope of the STB's proposed rules. The AAR and Amtrak asserted that the proposed inclusion of transactions that involve a passenger railroad or commuter service in a metropolitan area would exceed the Board's jurisdiction.[14] (*See* proposed 49 CFR 1106.2.) In response to the comments, the definitions of "applicant" and "transaction" in § 1106.2 have been amended. The new definitions clarify that the SIP requirement applies only to a Class I railroad proposing to merge, consolidate, or acquire another Class I railroad or a Class II railroad with which it proposes to "amalgamate operations," as defined in FRA's regulations at 49 CFR 244.9. (The Board also adds FRA's definition of "amalgamation of operations" to its rule.) The changed definitions coincide with the scope of the transactions covered by FRA's final rule, which will promote consistency and efficiency in the interplay between FRA and the Board.

Rail labor interests took the position that the Board's SIP rule should apply to transactions involving Class III carriers,[15] *i.e.*, those railroads that generate revenue, measured in 1991 dollars, of less than $20 million per year, whereas the railroad interests argued that it is not necessary to require the preparation of a SIP for transactions that do not involve two or more Class I railroads.[16] Commenters also suggested that freight traffic density or combined freight and passenger traffic (rather than the Class of railroad) could

[10] *See CN/WCTC*, STB Finance Docket No. 34000 (STB Decisions Nos. 2, 9, and 10 served May 9, August 2, and September 7, 2001, respectively) (hereinafter "*CN/WCTC Decisions*").

[11] The administrative process permits the Board to proceed either on a case-by-case basis or by rule, and to address some kinds of transactions by rule and some by reliance on the development of precedent.

[12] AAR and TTD presented testimony at the oral hearing. AAR filed supplemental comments following the hearing.

[13] *See also Major Rail Consolidation Procedures*, STB Ex Parte No. 582 (Sub-No. 1) (STB served June 11, 2001) ("*Major Rail Consolidation Procedures*"), slip op. at 36–37 (practice of requiring applicants to work with FRA to formulate SIPs in major mergers received wide public support, and no opposition, in proceeding adopting new rules for major rail consolidations). Indeed, some commenters including the AAR questioned whether formal rules in this area were necessary because the Board could continue to work with FRA on a case-by-case basis, as in the *Conrail Acquisition* and *CN/IC* proceedings. The Board agrees with the AAR that the SIP process used in these proceedings generally has been successful and is publishing final rules to codify existing practices and FRA's role in advising the Board on safety integration matters in transactions that the Board regulates.

[14] Under 49 U.S.C. 10501(c), the Board does not have jurisdiction over mass transportation (commuter service) provided by a local governmental entity. Thus, a transaction involving a railroad subject to the STB's jurisdiction and a commuter railroad "is now a one-railroad transaction over which [the Board does] not have jurisdiction under 49 U.S.C. 11323." *Norfolk & Western Railway Company—Petition for Declaratory Order—Lease of Line in Cook & Will Counties, IL. To Commuter Rail Division of the Regional Transp. Auth. of Northeast Illinois*, STB Finance Docket No. 32279 (STB served Feb. 3, 1999). Moreover, except for certain provisions not relevant here, Amtrak is not subject to the Board's jurisdiction. 49 U.S.C. 24301(c).

[15] *See* the comments of TTD, ATDD, BRC, and BMWE.

[16] *See* the comments of AAR, ASLRRA, and W&LE.

serve as a benchmark for determining the necessity of a SIP.[17]

The Board's final rule covers Class I railroads and Class II railroads that will have their operations amalgamated by a Class I railroad. The Board believes that this scope of coverage is reasonable because it is consistent with the scope of FRA's rule and Congress has treated Class II railroads more like Class I railroads than like Class III railroads in ICCTA.[18] The Board believes that it would be unduly burdensome to expand the proposed rules to cover transactions involving Class II railroads or Class III railroads as a matter of course. Under §§ 1106.5 and 1106.6 of the final rule, however, the Board retains the flexibility to require a SIP for such transactions if warranted, or to waive or modify SIP requirements on a case-by-case basis, if it concludes that doing so is appropriate for particular transactions.[19]

AAR indicated that the Board should allow an additional 30 to 90 days for preparing and filing a proposed SIP, rather than requiring the SIP to be submitted simultaneously with the application. This request is reasonable. Therefore, section 1106.4(a) of the STB's final rule provides 60 days from the date of the application[20] for the filing of a proposed SIP.

The BMWE urged that the Board clarify proposed § 1106.4(b)(4), which, it argued, could be construed to give the Board discretion to approve a transaction without a SIP or without requiring compliance with the SIP. To eliminate any possible confusion, the Board's final rule has been clarified to specifically state that, if the Board approves the transaction and adopts the SIP, the Board will require compliance with the SIP as a condition to its approval of the transaction.

STB's Section-By-Section Analysis of Its Final Rule

§ 1106.1 Purpose.

The regulations are designed to assure adequate and coordinated consideration of safety integration issues by the Board and FRA in implementing certain transactions subject to the Board's jurisdiction.

§ 1106.2 Definitions.

This section sets forth definitions used in this part; these definitions are self explanatory.

§ 1106.3 Actions for Which Safety Integration Plan is Required.

This section explains which transactions require a railroad to file a SIP with the Board. As noted above, a Class I railroad proposing to merge, consolidate, or acquire another Class I railroad, or a Class II railroad with which it proposes to amalgamate operations, as defined in FRA's rule at 49 CFR 244.9, will be subject to the requirements of this rule. Where the filing of a SIP is required by the Board's rules, the Board will enforce the requirement with appropriate sanctions, including suspending the processing of the application or, in extreme cases, dismissing the application itself.

§ 1106.4 The Safety Integration Plan Process

Section 1106.4 sets out the procedures for an applicant to file a proposed SIP, and the procedures by which the Board will consider a proposed SIP in connection with its approval of transactions for which the Board has concluded such consideration is required. A railroad seeking to carry out a covered transaction must file a proposed SIP prepared in accordance with FRA's regulations with the STB's SEA and FRA no later than 60 days from the date the application is filed with the Board. The proposed SIP will become part of the environmental documentation in the Board proceeding, and will be considered in the Board's environmental review process conducted in accordance with NEPA and the Board's environmental rules at 49 CFR part 1105. Generally, covered transactions will be subject to environmental review because the nature of the transaction involves operational changes that exceed the regulatory thresholds established under 49 CFR 1105.7(e)(4) or (5). *See* 49 CFR 1105.6(b)(4)(i). In the event that a SIP should be required in a transaction that would not be subject to environmental review, *see* 49 CFR 1105.6(c)(2), the Board intends to develop appropriate case-specific SIP procedures.[21]

After FRA reviews the proposed SIP, FRA will issue its findings and conclusions on the adequacy of the plan and will provide its analysis of the proposed SIP early enough to permit incorporation in the Board's draft environmental assessment or draft environmental impact statement. Nevertheless, recognizing that the SIP is an ongoing and fluid process, as in the *Conrail Acquisition* proceeding, FRA may comment on the plan and on an applicant's progress in completing a SIP, without endorsing the plan in full. The Board agrees with FRA that flexible procedures for FRA's response are necessary to enable an applicant to complete a comprehensive plan.

Additionally, this approach will enable the Board to incorporate FRA's comments in its draft environmental documentation, which, in turn, will encourage the public to review and comment on the proposed SIP. SEA will then independently review the proposed SIP and respond to comments received on the plan in its final environmental documentation. Finally, the Board will consider the entire environmental record, including information concerning the SIP, in deciding whether to approve the proposed transaction. Should the Board approve the transaction and adopt the SIP, it will require that the applicants comply with the SIP as a condition to its approval and require each applicant to coordinate with FRA in implementing the SIP, including any amendments to the plan, if necessary. (*See* FRA's Section-By-Section Analysis

[17] *For example*, OK DOT notes that the Board's environmental regulations at 49 CFR 1105.7(e)(5) consider the amount of increased traffic on a line in determining whether there is a need for environmental review.

[18] The Board's recently adopted new rules for major railroad mergers and consolidations involving two or more Class I railroads, published at 66 FR 32582, June 15, 2001, require Class I applicants to bear a substantially heavier burden in demonstrating that a merger proposal is in the public interest. The agency concluded that the current merger regulations at 49 CFR part 1180, subpart A, are not adequate to address future major rail merger proposals that, if approved, would likely result in the creation of two North American transcontinental railroads. But although the economic and service issues that drove the Board's action in *Major Rail Consolidation Procedures* are of concern principally when two Class I railroads merge, the safety considerations underlying SIPs also apply to mergers, consolidations, and acquisitions involving a Class I railroad and a Class II railroad with which it proposes to amalgamate operations.

[19] In the NPRM, the Board specifically solicited comments from interested parties as to whether the final rule should cover Class III railroads. The comments did not persuade the Board that transactions involving Class III railroads typically create sufficient safety problems to warrant requiring the preparation of a SIP. However, the Board's final rule at 49 CFR 1106.6 would allow the agency to require a SIP in particular cases involving Class III railroads if it concluded that doing so is necessary in its proper consideration of the proposed transaction.

[20] Because the Board is narrowing the scope of transactions that require a SIP to those filed under 49 U.S.C. 11323(a) involving Class I railroads and Class II railroads that will have their operations amalgamated with Class I railroads, the final rule eliminates the reference to "exemptions" in § 1106.4(a)(1). The reference to "applications" and "other requests for authority" in the definition of "transaction" in § 1106.2, and in the reservation of jurisdiction provision in § 1106.6, however, give the Board the flexibility to require a SIP in cases filed by exemption as well as by application should it be appropriate to do so.

[21] *See CN/WCTC Decisions*, STB Finance Docket No. 34000 (STB Decision Nos. 2 and 9, served May 9 and Aug. 2, 2001, respectively) (SIP prepared even though no environmental review was required).

15
2002
UMI

discussing amendments to 49 CFR 244.17 for a more complete discussion.)

As explained in FRA's Section-By-Section Analysis of § 244.17(g), FRA will advise the Board about its findings on the ongoing implementation process in accordance with an agreement that the agencies will enter into and execute (1) over a five-year period, (2) during any other oversight period for the transaction established by the Board, or (3) until FRA advises the Board that, in its view, the proposed integration of the applicants' operations has been safely completed, whichever is shortest.[22] Should FRA identify shortcomings or deficiencies during the integration process, the Board reserves jurisdiction to reopen the proceeding and impose terms and conditions on the transaction to ensure that the transaction is safely implemented.

§ 1106.5 Waiver.

The Board can waive or modify the requirements of this part where a carrier shows that relief is warranted or appropriate.

§ 1106.6 Reservation of Jurisdiction.

The Board reserves the right to require the filing of a SIP in transactions other than those provided in this part or to adopt modified SIP requirements in individual cases if it concludes that doing so is necessary to properly consider an application or other request for authority.

Regulatory Flexibility Act

The Board certifies that its decision to adopt regulations requiring Class I and Class II railroads to prepare safety integration plans under certain circumstances will not have a significant effect on a substantial number of small entities.

Environmental Impact

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

Statement of Energy Effects

Even though the Board is an independent regulatory agency, it recognizes the importance of the policy objective in Executive Order 13212 to expedite consideration of projects that would increase the production, transmission, or conservation of energy. The SIP rulemaking action, however, should not affect the production, transmission, or conservation of energy.

[22] The Board's new rules at 49 CFR 1180.1(g) provide for at least a five-year oversight period for major railroad mergers and consolidations involving two or more Class I railroads.

Federal Railroad Administration 49 CFR Chapter II

List of Subjects in 49 CFR Part 244

Administrative penalties, practice and procedure, Railroad safety, Railroads, Safety Integration Plans.

In consideration of the foregoing, FRA amends chapter II of title 49, Code of Federal Regulations, to read as follows:

1. Part 244 is added to read as follows:

PART 244—REGULATIONS ON SAFETY INTEGRATION PLANS GOVERNING RAILROAD CONSOLIDATIONS, MERGERS, AND ACQUISITIONS OF CONTROL

Subpart A—General

Sec.
244.1 Scope, application, and purpose.
244.3 Preemptive effect.
244.5 Penalties.
244.7 Waivers.
244.9 Definitions.

Subpart B—Safety Integration Plans

244.11 Contents of a Safety Integration Plan.
244.13 Subjects to be addressed in a Safety Integration Plan involving an amalgamation of operations.
244.15 Subjects to be addressed in a Safety Integration Plan not involving an amalgamation of operations.
244.17 Procedures.
244.19 Disposition.
244.21 Compliance and Enforcement.

Appendix A to Part 244—Schedule of Civil Penalties [Reserved]

Authority: 49 U.S.C. 20103, 20107, 21301; 5 U.S.C. 553 and 559; Sec. 31001(s)(1), Pub. L. 104–134, 110 Stat. 1321–373 (28 U.S.C. 2461 note); and 49 CFR 1.49.

Subpart A—General

§ 244.1 Scope, application, and purpose.

(a) This part prescribes requirements for filing and implementing a Safety Integration Plan with FRA whenever a Class I railroad proposes to consolidate with, merge with, or acquire control of another Class I railroad, or with a Class II railroad where there is a proposed amalgamation of operations.

(b) The purpose of this part is to achieve a reasonable level of railroad safety during the implementation of transactions described in paragraph (a) of this section. This part does not preclude a railroad from taking additional measures not inconsistent with this part to provide for safety in connection with a transaction.

(c) The requirements prescribed under this part apply only to FRA's disposition of a regulated transaction filed by an applicant. The transactions covered by this part also require separate filing with and approval by the Surface Transportation Board. *See* 49 CFR part 1106.

§ 244.3 Preemptive effect.

Under 49 U.S.C. 20106, issuance of these regulations preempts any State law, regulation, or order covering the same subject matter, except an additional or more stringent law, regulation, or order that:

(a) Is necessary to eliminate or reduce an essentially local safety hazard;

(b) Is not incompatible with a law, regulation, or order of the United States Government; and

(c) Does not unreasonably burden interstate commerce.

§ 244.5 Penalties.

(a) Any person who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least $500, but not more than $11,000 per day, except that: Penalties may be assessed against individuals only for willful violations, and, where a grossly negligent violation or a pattern of repeated violations has created an imminent hazard of death or injury to persons, or has caused death or injury, a penalty not to exceed $22,000 per violation may be assessed. Each day a violation continues shall constitute a separate offense.

(b) As specified in § 244.21, FRA may also exercise any of its other enforcement remedies if a railroad fails to comply with § 244.21.

(c) Any person who knowingly and willfully makes a false entry in a record or report required by this part shall be subject to criminal penalties under 49 U.S.C. 21311.

§ 244.7 Waivers.

(a) A person subject to a requirement of this part may petition the Administrator for a waiver of compliance with any requirement of this part. The filing of such a petition does not affect that person's responsibility for compliance with that requirement pending action on such a petition.

(b) Each petition for a waiver under this section must be filed in the manner and contain the information required by part 211 of this chapter.

(c) If the Administrator finds that a waiver of compliance is in the public interest and is consistent with railroad safety, the Administrator may grant the waiver subject to any conditions the Administrator deems necessary.

(d) The procedures governing a petition for a waiver that are prescribed under this part apply only to FRA's disposition of such a petition. A person seeking a waiver of a Surface Transportation Board regulation would need to file a petition for a waiver with the Board. (*See* 49 CFR 1106.5.)

§ 244.9 Definitions.

As used in this part—

Administrator means the Administrator of the Federal Railroad Administration or the Administrator's delegate.

Amalgamation of operations means the migration, combination, or unification of one set of railroad operations with another set of railroad operations, including, but not limited to, the allocation of resources affecting railroad operations (*e.g.*, changes in personnel, track, bridges, or communication or signal systems; or use or deployment of maintenance-of-way equipment, locomotives, or freight or passenger cars).

Applicant means a Class I railroad or a Class II railroad engaging in a transaction subject to this part.

Best practices means measures that are tried, tested, and proven to be the safest and most efficient rules or instructions governing railroad operations.

Class I or Class II railroad has the meaning assigned by regulations of the Surface Transportation Board (49 CFR Part 1201; General Instructions 1–1), as those regulations may be revised by the Board (including modifications in class thresholds based on the revenue deflator formula) from time to time.

Corporate culture means the totality of the commitments, written and oral directives, and practices that make up the way a railroad's management and its employees operate their railroad.

Control means actual control, legal control, or the power to exercise control through:

(1) Common directors, officers, stockholders, a voting trust, or a holding or investment company, or

(2) Any other means. *See* 49 U.S.C. 10102.

Consolidation means the creation of a new Class I railroad by combining existing Class I railroads or a Class I railroad and a Class II railroad where there is an amalgamation of operations, or by a railroad or a corporate parent of a Class I railroad taking over the assets or assuming the liabilities, or both, of another Class I railroad such that the resulting unified entity has the combined capital, powers, and subsidiaries and affiliates, if applicable, of all of its constituents.

Environmental documentation means either an Environmental Assessment or Environmental Impact Statement prepared in accordance with the Surface Transportation Board's environmental rules at 49 CFR part 1105.

Merger means the acquisition of one Class I railroad or Class II railroad where there is amalgamation of operations by a Class I railroad such that the acquiring railroad or a corporate parent of that railroad acquires the stock, assets, liabilities, powers, subsidiaries and affiliates of the railroad acquired.

Person means an entity of any type covered under 1 U.S.C. 1, including the following: A railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

Railroad means any form of non-highway ground transportation that runs on rails or electromagnetic guideways, including:

(1) Commuter or other short-haul rail passenger service in a metropolitan or suburban area; and

(2) High speed ground transportation systems that connect metropolitan areas, without regard to whether those systems use new technologies not associated with traditional railroads. The term does not include rapid transit operations in an urban area that are not connected to the general railroad system of transportation.

Safety Integration Plan means a comprehensive written plan submitted to and approved by FRA in compliance with this part that demonstrates in required detail how an applicant will provide for safe railroad operations during and after any transaction covered by this part, and otherwise assure compliance with the Federal railroad safety laws.

Section of Environmental Analysis or "SEA" means the Section of the Surface Transportation Board that prepares its environmental documentation and analyses.

Transaction means a consolidation, merger, or acquisition of control subject to the requirements of this part.

Subpart B—Safety Integration Plans

§ 244.11 Contents of a Safety Integration Plan.

Each Safety Integration Plan shall contain the following information for each subject matter identified in § 244.13 or § 244.15:

(a) A detailed description of how the applicant differs from each railroad it proposes to acquire or with which the applicant proposes to consolidate or merge, including the rules or instructions governing railroad operations of these railroads;

(b) A detailed description of the proposed manner of operations of the resulting railroad, including a reconciliation of the differing rules or instructions governing railroad operations of the railroads involved in the transaction;

(c) The measures to be taken to comply with applicable Federal railroad safety laws and regulations;

(d) The proposed specific measures, expressed step-by-step, for each relevant subject matter that the applicant believes will result in safe implementation of the proposed transaction consistent with the requirements of this part;

(e) The allocation of resources, expressed as human and capital resources within designated operating budgets, directed to complete safety-relevant operations subject to the transaction; and

(f) The timetable, targeted in specific terms from commencement to completion, for implementing paragraphs (c), (d) and (e) of this section.

§ 244.13 Subjects to be addressed in a Safety Integration Plan involving an amalgamation of operations.

Each Safety Integration Plan involving an amalgamation of operations shall address the following subjects for railroad operations conducted on property subject to the transaction:

(a) *Corporate culture.* Each applicant shall:

(1) Identify and describe differences for each safety-related area between the corporate cultures of the railroads involved in the transaction;

(2) Describe how these cultures lead to different practices governing rail operations; and

(3) Describe, in step-by-step measures, the integration of these corporate cultures and the manner in which it will produce a system of "best practices" when the transaction is implemented.

(b) *Training.* Each applicant shall identify classroom and field courses, lectures, tests, and other educational or instructional forums designed to ensure the proficiency, qualification, and familiarity with the operating rules and operating tasks of territory assigned of the following employees, either when these employees are assigned to a new territory or the operating rules on a given territory are changed:

(1) Employees who perform train and engine service;

VOL
67
ISS
51
MR
15
2002
UMI

(2) Employees who inspect and maintain track and bridges;
(3) Employees who inspect, maintain and repair any type of on-track equipment, including locomotives, passenger cars, and freight cars of all types;
(4) Dispatchers or operators;
(5) Employees who inspect and maintain signal and train control devices and systems;
(6) Hazardous materials personnel, including information technology personnel who affect the transportation of hazardous materials;
(7) Employees who maintain or upgrade communication systems affecting rail operations; and
(8) Supervisors of employees enumerated in paragraphs (b)(1) through (7) of this section.

(c) *Operating practices.*

(1) *Operating rules.* Each applicant shall identify the operating rules, timetables, and timetable special instructions to govern railroad operations, including yard or terminal operations and freight or passenger service.

(2) *Alcohol and drug.* Each applicant shall identify the post-accident toxicological testing, reasonable cause testing, and random alcohol and drug testing programs as required under 49 CFR part 219.

(3) *Qualification and certification of locomotive engineers.* Each applicant shall identify the program for qualifying and certifying locomotive engineers under 49 CFR part 240.

(4) *Hours of service laws.* Each applicant shall identify the procedures for complying with the Federal hours of service laws and related measures to minimize fatigue of employees covered by 49 U.S.C. chapter 211.

(d) *Motive power and equipment.* Each applicant shall identify the qualification standards for employees who inspect, maintain, or repair railroad freight or passenger cars and locomotives, and the designated facilities used, or to be used, to repair such equipment.

(e) *Signal and train control.* Each applicant shall identify the signal and train control systems governing railroad operations and maintenance, and any planned amendments or modifications to capital improvement and research and development projects for signal and train control operations.

(f) *Track Safety Standards and bridge structures.* Each applicant shall identify the maintenance and inspection programs for track and bridges, and the qualification standards for roadway workers.

(g) *Hazardous Materials.* Each applicant shall identify an inspection program covering the following areas:
(1) Field inspection practices;
(2) Hazardous materials communication standards;
(3) Emergency response procedures; and
(4) Information technology systems and personnel employed for transmitting or receiving information accompanying hazardous materials shipments. The inspection program should identify preventive measures that will be employed to respond to potential information technology integration and hazardous materials documentation deficiencies.

(h) *Dispatching operations.* Each applicant shall identify:
(1) The railroad dispatching system to be adopted;
(2) The migration of the existing dispatching systems to the adopted system, if applicable; and
(3) The criteria used to determine workload and duties performed by operators or dispatchers employed to execute operations.

(i) *Highway-rail grade crossing systems.* Each applicant shall identify a program, including its development and implementation, covering the following:
(1) Identification of the highway-rail grade crossings at which there will be an increase in rail traffic resulting from the transaction;
(2) An applicant's existing grade-crossing programs as they apply to grade crossings identified in paragraph (i)(1) of this section;
(3) Integration of the grade crossing programs of the railroads subject to the transaction to the extent the programs may be different;
(4) Emergency response actions;
(5) Avoidance of blocked or obstructed highway-rail crossing systems by trains, locomotives, railroad cars, or other pieces of rolling equipment; and
(6) Signs employed for changes in rail traffic patterns.

(j) *Personnel staffing.* Each applicant shall identify the number of employees by job category, currently and proposed, to perform each of the following types of function when there is a projected change of operations that will impact workforce duties or responsibilities:
(1) Train and engine service;
(2) Yard and terminal service;
(3) Dispatching operations;
(4) Roadway maintenance;
(5) Freight car and locomotive maintenance;
(6) Maintenance of signal and train control systems, devices, and appliances;
(7) Hazardous materials operations; and
(8) Managers responsible for oversight of safety programs.

(k) *Capital investment.* Each applicant shall identify the capital investment program, clearly displaying planned investments in track and structures, signals and train control, and locomotives and equipment. The program shall describe any differences from the program currently in place on each of the railroads involved in the transaction.

(l) *Information systems compatibility.* Each applicant shall identify measures providing for a seamless interchange of information relating to the following subject matters:
(1) Train consists;
(2) Movements and movement history of locomotives and railroad freight cars;
(3) Dispatching operations;
(4) Emergency termination of operations; and
(5) Transportation of hazardous materials.

§ 244.15 Subjects to be addressed in a Safety Integration Plan not involving an amalgamation of operations.

If an applicant does not propose an amalgamation of operations conducted on properties subject to the transaction, the applicant shall not be required to file a Safety Integration Plan unless directed to do so by FRA.

§ 244.17 Procedures.

(a) Each applicant shall file one original of a proposed Safety Integration Plan with the Associate Administrator for Safety, FRA, 1120 Vermont Avenue, NW., Mail Stop 25, Washington, DC, 20590, no later than 60 days after the date it files its application with the Surface Transportation Board.

(b) The applicant shall submit such additional information necessary to support its proposed Safety Integration Plan as FRA may require to satisfy the requirements of this part.

(c) The applicant shall coordinate with FRA to resolve FRA's comments on the proposed Safety Integration Plan until such plan is approved.

(d) FRA will file its findings and conclusions on the proposed Safety Integration Plan with the Board's Section of Environmental Analysis at a date sufficiently in advance of the Board's issuance of its draft environmental documentation in the case to permit incorporation in the draft environmental document.

(e) Assuming FRA approves the proposed Safety Integration Plan and the Surface Transportation Board approves the transaction and adopts the Plan, each applicant involved in the transaction shall coordinate with FRA in implementing the approved Safety Integration Plan.

(f) During implementation of an approved Safety Integration Plan, FRA expects that an applicant may change and refine its Safety Integration Plan in response to unforeseen developments. An applicant shall communicate with FRA about such developments and submit amendments to its Safety Integration Plan to FRA for approval.

(g) During implementation of an approved Safety Integration Plan, FRA will inform the Surface Transportation Board about implementation of the plan at times and in a manner designed to aid the Board's exercise of its continuing jurisdiction over the approved transaction in accordance with an agreement that FRA and the Board will enter into and execute. Pursuant to such agreement, FRA will consult with the Board at all appropriate stages of implementation, and will advise the Board on the status of the implementation process:
(1) For a period of no more than five years after the Board approves the transaction,
(2) For an oversight period for the transaction established by the Board, or
(3) Until FRA advises the Board in writing that the integration of operations subject to the transaction is complete, whichever is shorter.

(h) *Request for Confidential Treatment.* Each applicant requesting that advanced drafts of the proposed Safety Integration Plan and information in support of the proposed and approved plan that are filed with FRA receive confidential treatment shall comply with the procedures enumerated at 49 CFR 209.11.

§ 244.19 Disposition.

(a) *Standard of review.* FRA reviews an applicant's Safety Integration Plan, and any amendments thereto, to determine whether it provides a reasonable assurance of safety at every step of the transaction. In making this determination, FRA will consider whether the plan:
(1) Is thorough, complete, and clear; and
(2) Describes in adequate detail a logical and workable transition from conditions existing before the transaction to conditions intended to exist after consummation of the transaction.

(b) *Approval of the Safety Integration Plan and Amendments Thereto.* FRA approves a Safety Integration Plan, and any amendments thereto, that meets the standard set forth in paragraph (a) of this section. The approval will be conditioned on an applicant's execution of all of the elements contained in the plan, including any amendments to the plan approved by FRA.

(c) *Amendment.*—(1) *By the applicant.* The applicant may amend its Safety Integration Plan, from time to time, provided it explains the need for the amendment. Any amendment is subject to the approval of FRA as prescribed in paragraph (b) of this section, and shall take effect within 20 days of approval. The applicant shall communicate with FRA to resolve any FRA comments on the proposed amendment until it is approved.

(2) *By FRA.* FRA may request an applicant to amend its approved Safety Integration Plan from time to time should circumstances warrant.

§ 244.21 Compliance and Enforcement.

(a) After the Surface Transportation Board has approved a transaction subject to this part, a railroad implementing a transaction subject to this part shall operate in accordance with the Safety Implementation Plan approved by FRA until the properties involved in the transaction are completely integrated into the form contemplated in the Surface Transportation Board's approval of the transaction.

(b) FRA may exercise any or all of its enforcement remedies authorized by the Federal railroad safety laws if a railroad fails to comply with paragraph (a) of this section or to execute any measure contained in a Safety Implementation Plan approved by FRA.

Appendix A to Part 244—Schedule of Civil Penalties [Reserved]

Issued in Washington, DC, on March 8, 2002.

Allan Rutter,

Federal Railroad Administrator.

Surface Transportation Board 49 CFR Chapter X

List of Subjects in 49 CFR Part 1106

Railroad Safety, Railroads, Safety Integration Plans.

For the reasons set forth in the preamble, in title 49, subtitle IV, part 1106 is added to read as follows:

PART 1106—PROCEDURES FOR SURFACE TRANSPORTATION BOARD CONSIDERATION OF SAFETY INTEGRATION PLANS IN CASES INVOLVING RAILROAD CONSOLIDATIONS, MERGERS, AND ACQUISITIONS OF CONTROL

Sec.
1106.1 Purpose.
1106.2 Definitions.
1106.3 Actions for which Safety Integration Plan is Required.
1106.4 The Safety Integration Plan Process.
1106.5 Waiver.
1106.6 Reservation of jurisdiction.

Authority: 5 U.S.C. 553; 5 U.S.C. 559; 49 U.S.C. 721; 49 U.S.C. 10101; 49 U.S.C. 11323–11325; 42 U.S.C. 4332.

§ 1106.1 Purpose.

This part is designed to ensure adequate and coordinated consideration of safety integration issues, by both the Board and the Federal Railroad Administration, the agency within the Department of Transportation responsible for the enforcement of railroad safety, in the implementation of rail transactions subject to the Board's jurisdiction. It establishes the procedures by which the Board will consider safety integration plans in connection with its approval and authorization of transactions for which the Board has concluded such consideration is required.

§ 1106.2 Definitions.

The following definitions apply to this part:

Act means the ICC Termination Act of 1995, Pub. L. 104–88, 109 Stat. 803 (1995).

Amalgamation of operations, as defined by the Federal Railroad Administration at 49 CFR 244.9, means the migration, combination, or unification of one set of railroad operations with another set of railroad operations, including, but not limited to, the allocation of resources affecting railroad operations (*e.g.*, changes in personnel, track, bridges, or communication or signal systems; or use or deployment of maintenance-of-way equipment, locomotives, or freight or passenger cars).

Applicant means a Class I railroad or a Class II railroad engaging in a transaction subject to this part.

Board means the Surface Transportation Board.

Class I or Class II railroad has the meaning assigned by the Board's regulations (49 CFR part 1201; General Instructions 1–1), as those regulations may be revised by the Board (including modifications in class thresholds based on the revenue deflator formula) from time to time.

Environmental documentation means either an Environmental Assessment or an Environmental Impact Statement prepared in accordance with the National Environmental Policy Act and Board's environmental rules at 49 CFR part 1105.

Federal Railroad Administration ("FRA") means the agency within the

Department of Transportation responsible for railroad safety.

Safety Integration Plan ("SIP") means a comprehensive written plan, prepared in accordance with FRA guidelines or regulations, explaining the process by which Applicants intend to integrate the operation of the properties involved in a manner that would maintain safety at every step of the integration process, in the event the Board approves the transaction that requires a SIP.

Section of Environmental Analysis ("SEA") means the Section that prepares the Board's environmental documents and analyses.

Transaction means an application by a Class I railroad that proposes to consolidate with, merge with, or acquire control under 49 U.S.C. 11323(a) of another Class I railroad, or with a Class II railroad where there is a proposed amalgamation of operations, as defined by FRA's regulations at 49 CFR 244.9. "Transaction" also includes a proceeding other than those specified above if the Board concludes that a SIP is necessary in its proper consideration of the application or other request for authority.

§ 1106.3 Actions for which Safety Integration Plan is required.

A SIP shall be filed by any applicant requesting authority to undertake a transaction as defined under § 1106.2 of this part.

§ 1106.4 The Safety Integration Plan process.

(a) Each applicant in a transaction subject to this part shall file a proposed SIP in accordance with the informational requirements prescribed at 49 CFR part 244, or other FRA guidelines or requirements regarding the contents of a SIP, with SEA and FRA no later than 60 days from the date the application is filed with the Board.

(b) The proposed SIP shall be made part of the environmental record in the Board proceeding and dealt with in the ongoing environmental review process under 49 CFR part 1105. The procedures governing the process shall be as follows:

(1) In accordance with 49 CFR 244.17, FRA will provide its findings and conclusions on the adequacy of the proposed SIP (*i.e.*, assess whether the proposed SIP establishes a process that provides a reasonable assurance of safety in executing the proposed transaction) to SEA at a date sufficiently in advance of the Board's issuance of its draft environmental documentation in the case to permit incorporation in the draft environmental document.

(2) The draft environmental documentation shall incorporate the proposed SIP, any revisions or modifications to it based on further consultations with FRA, and FRA's written comments regarding the SIP. The public may review and comment on the draft environmental documentation within the time limits prescribed by SEA.

(3) SEA will independently review each proposed SIP. In its final environmental documentation, SEA will address written comments on the proposed SIP received during the time established for submitting comments on the draft environmental documentation. The Board then will consider the full environmental record, including the information concerning the SIP, in arriving at its decision in the case.

(4) If the Board approves the transaction and adopts the SIP, it will require compliance with the SIP as a condition to its approval. Each applicant involved in the transaction then shall coordinate with FRA in implementing the approved SIP, including any amendments thereto. FRA has provided in its rules at 49 CFR 244.17(g) for submitting information to the Board during implementation of an approved transaction that will assist the Board in exercising its continuing jurisdiction over the transaction. FRA also has agreed to advise the Board when, in its view, the integration of the applicants' operations has been safely completed.

(c) If a SIP is required in transactions that would not be subject to environmental review under the Board's environmental rules at 49 CFR part 1105, the Board will develop appropriate case-specific SIP procedures based on the facts and circumstances presented.

§ 1106.5 Waiver.

The SIP requirements established by this part may be waived or modified by the Board where a railroad shows that relief is warranted or appropriate.

§ 1106.6 Reservation of Jurisdiction.

The Board reserves the right to require a SIP in cases other than those enumerated in this part, or to adopt modified SIP requirements in individual cases, if it concludes that doing so is necessary in its proper consideration of the application or other request for authority.

Decided: March 6, 2002.

By the Board, Chairman Morgan and Vice Chairman Burkes.

Vernon A. Williams,

Secretary.

[FR Doc. 02–6046 Filed 3–14–02; 8:45 am]

BILLING CODE 4910–06–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 011218304–1304–01; I.D. 031202A]

Fisheries of the Exclusive Economic Zone Off Alaska; Pollock in Statistical Area 610 of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Closure.

SUMMARY: NMFS is prohibiting directed fishing for pollock in Statistical Area 610 of the Gulf of Alaska (GOA). This action is necessary to prevent exceeding the B season allowance of the pollock total allowable catch (TAC) for Statistical Area 610 of the GOA.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), March 12, 2002, until 1200 hrs, A.l.t., August 25, 2002.

FOR FURTHER INFORMATION CONTACT: Mary Furuness, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

Within any fishing year, underage or overage of a seasonal allowance may be added to or subtracted from subsequent seasonal allowances in a manner to be determined by the Administrator, Alaska Region, NMFS (Regional Administrator), provided that the sum of the revised seasonal allowances does not exceed 30 percent of the annual TAC apportionment for the Central and Western Regulatory Areas in the GOA (§ 679.20 (a)(5)(ii)(C)). For 2002, 30 percent of the annual TAC for the Central and Western Regulatory Areas is 15,187 mt. For 2002, the Regional Administrator has determined that within each area for which a seasonal allowance is established, any overage or underage of harvest at the beginning of the next season(s) shall be subtracted from or added to the following season provided that the resulting sum of seasonal allowances in the Central and Western Regulatory Areas does not exceed 15,187 mt in any single season. The B season allowance of the pollock TAC in Statistical Area 610 of the GOA is 2,916 metric tons (mt) as established by an emergency rule implementing 2002 harvest specifications and associated management measures for the groundfish fisheries off Alaska (67 FR 956, January 8, 2002). The Regional Administrator hereby reduces the B season pollock TAC by 141 mt. This amount is the A season pollock over harvest in Statistical Area 610 and provides for an aggregate B season allowance in the Central and Western Regulatory Areas that does not exceed 15,187 mt. In accordance with § 679.20 (a)(5)(ii)(C), the B season allowance of pollock TAC in Statistical Area 610 is 2,775 mt.

In accordance with § 679.20(d)(1)(i), the Regional Administrator has determined that the B season allowance of the pollock TAC in Statistical Area 610 will soon be reached. Therefore, the Regional Administrator is establishing a directed fishing allowance of 2,725 mt, and is setting aside the remaining 50 mt as bycatch to support other anticipated groundfish fisheries. In accordance with § 679.20 (d)(1)(iii), the Regional Administrator finds that this directed fishing allowance will soon be reached. Consequently, NMFS is prohibiting directed fishing for pollock in Statistical Area 610 of the GOA.

Maximum retainable bycatch amounts may be found in the regulations at § 679.20(e) and (f).

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA, finds that the need to immediately implement this action to prevent exceeding the amount of the 2002 B season pollock TAC specified for Statistical Area 610 of the GOA constitutes good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553 (b)(3)(B) and 50 CFR 679.20 (b)(3)(iii)(A), as such procedures would be unnecessary and contrary to the public interest. Similarly, the need to implement these measures in a timely fashion to prevent exceeding the 2002 B season pollock TAC specified for Statistical Area 610 of the GOA constitutes good cause to find that the effective date of this action cannot be delayed for 30 days. Accordingly, under 5 U.S.C. 553(d), a delay in the effective date is hereby waived.

This action is required by § 679.20 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 12, 2002.

Bruce C. Morehead,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Proposed Rules

Federal Register
Vol. 67, No. 51
Friday, March 15, 2002

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 305

[Docket No. 98–030–3]

RIN 0579–AA97

Irradiation Phytosanitary Treatment of Imported Fruits and Vegetables

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule; supplemental.

SUMMARY: We are proposing additional changes related to an earlier proposed rule to establish regulations providing for use of irradiation as a phytosanitary treatment for fruits and vegetables imported into the United States. The irradiation treatment provides protection against fruit flies and the mango seed weevil. This supplemental proposed rule concerns the use of radiation indicators on packaging of irradiated articles and additional provisions for monitoring foreign irradiation facilities.

DATES: We will consider all comments we receive that are postmarked, delivered, or e-mailed by April 15, 2002.

ADDRESSES: You may submit comments by postal mail/commercial delivery or by e-mail. If you use postal mail/commercial delivery, please send four copies of your comment (an original and three copies) to: Docket No. 98–030–3, Regulatory Analysis and Development, PPD, APHIS, Station 3C71, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. 98–030–3. If you use e-mail, address your comment to *regulations@aphis.usda.gov*. Your comment must be contained in the body of your message; do not send attached files. Please include your name and address in your message and "Docket No. 98–030–3" on the subject line.

You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming.

APHIS documents published in the **Federal Register**, and related information, including the names of organizations and individuals who have commented on APHIS dockets, are available on the Internet at *http://www.aphis.usda.gov/ppd/rad/webrepor.html*.

FOR FURTHER INFORMATION CONTACT: For general information on program and phytosanitary issues, contact Donna L. West, Import Specialist, Phytosanitary Issues Management, PPQ, APHIS, 4700 River Road Unit 140, Riverdale, MD 20737–1236; (301) 734–6799. For information on technical irradiation issues, contact Dr. Arnold Foudin, Assistant Director, Scientific Services, PPQ, APHIS, 4700 River Road Unit 147, Riverdale, MD 20737–1237; (301) 734–7710.

SUPPLEMENTARY INFORMATION:

Background

In a proposed rule published in the **Federal Register** on May 26, 2000 (65 FR 34113–34125, Docket No. 98–030–1), we proposed a framework for the use of irradiation as a phytosanitary treatment for imported fruits and vegetables, and proposed specific standards for an irradiation treatment for fruit flies and the mango seed weevil in imported fruits and vegetables. We solicited comments concerning our proposed rule for a period of 60 days, ending July 25, 2000. On August 4, 2000, we published a **Federal Register** notice that reopened and extended the comment period until August 21, 2000 (65 FR 47908, Docket No. 98–030–2). We received 2,212 comments by the end of the comment period, including many form letters and form postcards.

Several of those comments suggested that the proposed rule establish certain requirements not included in the proposal. We are publishing this supplemental proposed rule to allow an opportunity for public comment on these issues that were not included in the earlier proposed rule. After evaluating any comments received on this supplemental proposal, we will publish a final rule addressing comments received on both the earlier proposed rule and this supplemental proposed rule.

Monitoring of Foreign Irradiation Facilities by Foreign Plant Protection Organizations and by APHIS

Several commenters suggested that effective monitoring of operations at foreign facilities where treatments are conducted is crucial to ensure that treatments are safe and effective. These commenters pointed out that in some countries the national plant protection organization could provide most of this monitoring, while in others APHIS would have to provide most of the monitoring, depending on different situations in different countries. They suggested that the section of the rule dealing with monitoring should be flexible enough to let APHIS vary its level of monitoring as needed, based on the infrastructure and capabilities of plant protection organizations in different countries. They also suggested that the activities that foreign plant protection services would conduct to enforce the regulations and monitor compliance should be recorded in an agreement between the foreign plant protection service and APHIS.

Furthermore, commenters suggested that APHIS should develop documentation to demonstrate that the requirements APHIS imposes for importation of irradiated articles are consistent from country to country, and are consistent with the requirements other countries apply to imported irradiated articles, in accordance with the equivalence principle of the World Trade Organization Agreement on the Application of Sanitary and Phytosanitary Measures. They suggested that, in addition to establishing the level of monitoring required at individual foreign irradiation facilities, APHIS should sign work plans with foreign plant protection services to clearly state what regulatory requirements and levels of inspection, monitoring, and other activities apply to importation of irradiated articles into the United States and into the signatory foreign country.

We agree with these comments, and have decided that the monitoring section of the rule should allow APHIS to target its monitoring as needed and provide the appropriate level of monitoring, ranging from intermittent

monitoring of operations and inspection of records to a continual APHIS presence at facilities and regular inspection of untreated and treated articles for target and nontarget pests. We also believe that providing this level of monitoring may require APHIS to arrange for foreign plant protection services to deposit monies into a trust fund to reimburse APHIS for services, as is common practice under many other APHIS import regulations (*e.g.*, importing Fuji apples from Japan and the Republic of Korea under § 319.56–2cc, or importing Hass avocados from Mexico under § 319.56–2ff).

We also agree that the activities of foreign plant protection services with regard to irradiation facilities in their countries in support of the regulations should be recorded in a work plan that the foreign plant protection service submits to APHIS. We further agree that, in support of the equivalence principle, APHIS and each foreign plant protection service should sign an irradiation treatment framework equivalency work plan that clearly states what legislative, regulatory, and other requirements must be met, and what monitoring and other activities must occur, for irradiated articles to be imported into the United States, or into the foreign country.

We propose to revise the monitoring section of the proposed rule, § 305.2(f), published on May 26, 2000, at 65 FR 49770, to allow APHIS to provide an appropriate level of monitoring at irradiation facilities, depending on the situations in different countries, to require that APHIS and foreign plant protection services sign work plans, and to establish trust fund agreements with national plant protection organizations to reimburse APHIS expenses. The new proposed paragraph (f) would read as follows:

(f) *Monitoring and interagency agreements.* Treatment must be monitored by an inspector. This monitoring must include inspection of treatment records and unannounced inspections of the facility by an inspector, and may include inspection of articles prior to or after irradiation. Facilities that carry out irradiation treatment operations must notify the Director of Preclearance, PPQ, APHIS, 4700 River Road Unit 140, Riverdale, MD 20737–1236, of scheduled operations at least 30 days before operations commence, except where otherwise provided in the facility preclearance work plan. To ensure the appropriate level of monitoring, before articles may be imported in accordance with this section, the following agreements must be signed:

(1) *Irradiation treatment framework equivalency work plan.* The plant protection service of a country from which articles are to be imported into the United States in accordance with this section must sign a framework equivalency work plan with APHIS. In this plan, both the foreign plant protection service and APHIS will specify the following items for their respective countries:

(i) Citations for any requirements that apply to the importation of irradiated fruits and vegetables into that country;

(ii) The type and amount of inspection, monitoring, or other activities that will be required in connection with allowing the importation of irradiated fruits and vegetables into that country; and

(iii) Any other conditions that must be met to allow the importation of irradiated fruits and vegetables into that country.

(2) *Facility preclearance work plan.* Prior to commencing importation into the United States of articles treated at a foreign irradiation facility, APHIS and the plant protection service of the country from which articles are to be imported must jointly develop a preclearance work plan that details the activities that APHIS and the foreign plant protection service will carry out in connection with each irradiation facility to verify the facility's compliance with the requirements of this section. Typical activities to be described in this work plan may include frequency of visits to the facility by APHIS and foreign plant protection inspectors, methods for reviewing facility records, and methods for verifying that facilities are in compliance with the separation of articles, packaging, labeling, and other requirements of this section. This facility preclearance work plan will be reviewed and renewed by APHIS and the foreign plant protection service on an annual basis.

(3) *Trust fund agreement.* Irradiated articles may be imported into the United States in accordance with this section only if the plant protection service of the country in which the irradiation facility is located has entered into a trust fund agreement with APHIS. That agreement requires the plant protection service to pay, in advance of each shipping season, all costs that APHIS estimates it will incur in providing inspection and treatment monitoring services at the irradiation facility during that shipping season. Those costs include administrative expenses and all salaries (including overtime and the Federal share of employee benefits), travel expenses (including per diem expenses), and other incidental expenses incurred by APHIS in performing these services. The agreement will describe the general nature and scope of APHIS services provided at irradiation facilities covered by the agreement, such as whether APHIS inspectors will monitor operations continuously or intermittently, and will generally describe the extent of inspections APHIS will perform on articles prior to and after irradiation. The agreement requires the plant protection service to deposit a certified or cashier's check with APHIS for the amount of those costs, as estimated by APHIS. If the deposit is not sufficient to meet all costs incurred by APHIS, the agreement further requires the plant protection service to deposit with APHIS a certified or cashier's check for the amount of the remaining costs, as determined by APHIS, before any more articles irradiated in that country may be imported into the United States. After a final audit at the conclusion of each shipping season, any overpayment of funds would be returned to the plant protection service or held on account until needed, at the option of the plant protection service.

Much of this language is similar to the language already contained in APHIS regulations for programs where it has been necessary to establish trust fund agreements with foreign plant protection services to reimburse APHIS for inspection and monitoring activities necessary to allow importation of fruits and vegetables into the United States.

Indicators and Tests To Identify Irradiated Fruit

Several commenters suggested that we should require that, prior to treatment, irradiation indicators be attached to cartons of articles. These indicators would change color, or undergo some other obvious change, when exposed to irradiation in the required dose range for regulated articles. The commenters stated that these indicators would be a very useful safeguard, and could be used by enforcement personnel and others as a quick check to confirm that a particular carton had in fact been exposed to the required level of radiation. Commenters identified several inexpensive devices and dye-impregnated labels that react to radiation at various doses in the 100–250 gray range. Such tools could aid Federal and State inspectors who may find live larvae in shipments where the accompanying paperwork claims the shipment was irradiated.

We agree that carton indicators could be a useful enforcement tool. They could not serve as primary documentation that articles have been irradiated in accordance with the regulations, because such indicators are not as sensitive or accurate as the dosimetry systems required by the regulations, and because it would be relatively easy to produce fraudulent indicators (*e.g.*, by subjecting a large number of indicators to irradiation and then attaching them to cartons that have not been irradiated). However, we believe that such indicators can be useful when used in conjunction with the other documentation and system controls required by the regulations. In particular, they can be a useful "cross check" when personnel at irradiation facilities are distinguishing irradiated cartons from non-irradiated cartons, and when inspectors at ports of entry are correlating the required import documents with the cartons referred to in the documents.

Therefore, we propose to add additional language to § 305.2(g)(1) of

VOL
67
ISS
51
MR
15
2002
UMI

the proposed rule published on May 26, 2000, at 65 FR 49770, to state that "each carton must bear an indicator device, securely attached prior to irradiation, that changes color or provides another clear visual change when it is exposed to radiation in the dose range required by this section for the pests for which the articles are being treated."

Executive Order 12866 and Regulatory Flexibility Act

This proposed rule has been reviewed under Executive Order 12866. The rule has been determined to be not significant for the purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

This action supplements a proposed rule published in the **Federal Register** on May 26, 2000, that proposed to establish regulations providing for use of irradiation as a phytosanitary treatment for fruits and vegetables imported into the United States. The economic analysis for the earlier proposed rule was set forth in that proposed rule. It included a cost-benefit analysis as required by Executive Order 12866 and an analysis of the potential economic effects on small entities as required by the Regulatory Flexibility Act.

The economic effects of this supplemental proposed rule lie in two areas: The establishment of trust fund agreements to reimburse APHIS for its activities monitoring irradiation facilities in foreign countries and the requirement for radiation indicators to be attached to cartons holding irradiated articles.

Trust Fund Agreements

APHIS proposes that the inspection and monitoring activities performed by a foreign plant protection service at irradiation facilities located overseas be recorded in an agreement signed by the foreign service and APHIS. The purpose of the agreement would be to ensure appropriate levels of inspection and monitoring at the facilities, thereby reducing any pest risk due to misunderstandings or shortcomings in the oversight of irradiation and related processes at facilities.

When a foreign plant protection service establishes a trust fund agreement to reimburse APHIS for expenses, that service may or may not pass along the cost of depositing those funds to producers in that country, depending on the service's funding mechanisms. If it passes along that cost to foreign producers, those producers will likely raise the price of fruits and vegetables exported to the United States to cover the costs. In this sense, the trust fund requirement would have an adverse differential effect on foreign producers relative to domestic producers. However, the cost of the trust fund agreement for APHIS services could be distributed among many foreign producers treating a large volume of products, and would probably result in a price increase for imported articles of only a few cents per pound. Therefore, trust fund agreement costs are expected to have a negligible effect on the prices paid by U.S. merchants and consumers for the imported produce.

Irradiated Carton Indicators

APHIS proposes that indicators be put on cartons to show that irradiation has taken place. Prototypes that have already been developed are based on dosimeter technology, but are much less expensive to manufacture than dosimeters because no precise measurement is involved, only an indication that irradiation has occurred.

A phosphor-based technology for irradiation indication produces an invisible fluorescence that can be easily detected by an inexpensive hand-held "light-pen" reader. According to the manufacturer, a "light-pen" reader can be thought of as a hand-held product similar to a common barcode reader. When the indicator has received a dose above 100 Gy, the hand held "light-pen" reader will activate a signal, such as an audible beep or a light. The indicator is able to be read easily and inexpensively.

Indicators could also be incorporated into a white-on-white bar code that would only become apparent (darkened background) after irradiation. Bar code information could record lot number or other marketing information that could prove useful in tracing a carton back to its source. As a safeguard against repeated use of the same indicator, they could be applied with one-time-only adhesive. Or, as an alternative, an indicator might not provide any visual indication at all that the carton has been irradiated, thereby reducing any chance of counterfeited indicators.

The manufacturer expects to be able to produce indicators in large quantities at a low unit cost—pennies per indicator—with a reader cost comparable to that of hand-held barcode readers. The cost of the indicators, once they are produced in volume, would be negligible compared to the value of the produce shipped, and would add at most a few cents per pound to the retail price of the irradiated fruits and vegetables.

Costs and Benefits

As discussed above, the proposed trust fund and carton indicator requirements contained in this supplemental proposed rule involve moderate costs distributed among many importers, with an end result of an increase of a few cents per pound in the retail price of irradiated articles. The benefits of the proposed changes accrue because the proposed changes would increase the reliability of irradiation as a phytosanitary treatment. Thus, benefits are evaluated in terms of preventing potential economic losses in U.S. fruit and vegetable markets that could occur if pests should enter the United States with articles that were not properly irradiated, either because trust fund agreements to monitor treatments were not in effect, or because carton indicators were not employed as a monitoring tool. These benefits cannot be readily quantified. As an example, however, averting the costs associated with a single fruit fly outbreak in the United States would save more than the total costs for trust fund agreements and indicators over several years.

The Regulatory Flexibility Act requires that agencies consider the economic effects of their rules on small businesses, organizations, and governmental jurisdictions. In this case, entities that would be most affected by the proposed rule are the operators of foreign irradiation facilities. Under the Small Business Administration's Standard Industry Classification (SIC) category 0723 (Crop Preparation Services, except Cotton Ginning), a firm would qualify as a small entity if it had annual revenues of $5 million or less. None of the foreign irradiation companies that have submitted comments on previous irradiation proposed rules, or that have expressed interest in the current rulemaking, are small by this standard.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Executive Order 12988

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. If this proposed rule is adopted: (1) All State and local laws and regulations that are inconsistent with this rule would be preempted; (2) no retroactive effect would be given to this rule; and (3) administrative proceedings would not be required before parties may file suit in court challenging this rule.

Paperwork Reduction Act

In accordance with section 3507(d) of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the information collection or recordkeeping requirements included in this proposed rule have been submitted for approval to the Office of Management and Budget (OMB). Please send written comments to the Office of Information and Regulatory Affairs, OMB, Attention: Desk Officer for APHIS, Washington, DC 20503. Please state that your comments refer to Docket No. 98–030–3. Please send a copy of your comments to: (1) Docket No. 98–030–3, Regulatory Analysis and Development, PPD, APHIS, Station 3C71, 4700 River Road Unit 118, Riverdale, MD 20737–1238, and (2) Clearance Officer, OCIO, USDA, room 404–W, 14th Street and Independence Avenue SW., Washington, DC 20250. A comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication of this proposed rule.

We are proposing to require that the national plant protection service of each country from which irradiated articles are imported into the United States must sign a trust fund agreement with APHIS, and must submit an annual work plan to APHIS describing the activities the plant protection service will carry out to meet the requirements of the regulations. These documents would be drafted jointly by the foreign plant protection service and APHIS. We estimate that developing and approving each document would require about 20 hours of development and review time by the submitting foreign plant protection service.

These information collection requirements would be in addition to information collection activities that we described in the original proposal published August 21, 2000 (65 FR 47908, Docket No. 98–030–1), including a compliance agreement, labeling requirements, 24-hour notification, dosimetry recordings, requests for dosimetry device approval, recordkeeping requirements, and requests for facility approval.

We are soliciting comments from the public (as well as affected agencies) concerning our proposed information collection and recordkeeping requirements. These comments will help us:

(1) Evaluate whether the proposed information collection is necessary for the proper performance of our agency's functions, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the proposed information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the information collection on those who are to respond, such as through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Estimate of burden: Public reporting burden for this collection of information is estimated to average 0.08411 hours per response.

Respondents: Foreign plant protection services, irradiation facility personnel.

Estimated annual number of respondents: 124.77.

Estimated annual number of responses per respondent: 1001.

Estimated annual number of responses: 124,895.

Estimated total annual burden on respondents: 10,505 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

Copies of this information collection can be obtained from Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 734–7477.

List of Subjects in 7 CFR Part 305

Irradiation, Phytosanitary treatment, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, we propose to amend part 305 as set out in the proposed rule published on May 26, 2000 (65 FR 34113–34125), as follows:

1. The authority citation for part 305 would be revised to read as follows:

Authority: 7 U.S.C. 166, 450, 7711–7714, 7718, 7731, 7732, and 7751–7754; 21 U.S.C. 136 and 136a; 7 CFR 2.22, 2.80, and 371.3.

2. In § 305.2, paragraphs (f) and (g)(1) are revised to read as follows:

§ 305.2 Irradiation treatment of imported fruits and vegetables for certain fruit flies and mango seed weevils.

* * * * *

(f) *Monitoring and interagency agreements.* Treatment must be monitored by an inspector. This monitoring must include inspection of treatment records and unannounced inspections of the facility by an inspector, and may include inspection of articles prior to or after irradiation. Facilities that carry out irradiation operations must notify the Director of Preclearance, PPQ, APHIS, 4700 River Road Unit 140, Riverdale, MD 20737–1236, of scheduled operations at least 30 days before operations commence, except where otherwise provided in the facility preclearance work plan. To ensure the appropriate level of monitoring, before articles may be imported in accordance with this section, the following agreements must be signed:

(1) *Irradiotion treatment framework equivalency work plan.* The plant protection service of a country from which articles are to be imported into the United States in accordance with this section must sign a framework equivalency work plan with APHIS. In this plan, both the foreign plant protection service and APHIS will specify the following items for their respective countries:

(i) Citations for any requirements that apply to the importation of irradiated fruits and vegetables;

(ii) The type and amount of inspection, monitoring, or other activities that will be required in connection with allowing the importation of irradiated fruits and vegetables into that country; and

(iii) Any other conditions that must be met to allow the importation of irradiated fruits and vegetables into that country.

(2) *Facility preclearance work plan.* Prior to commencing importation into the United States of articles treated at a foreign irradiation facility, APHIS and the plant protection service of the country from which articles are to be imported must jointly develop a preclearance work plan that details the activities that APHIS and the foreign plant protection service will carry out in connection with each irradiation facility to verify the facility's compliance with the requirements of this section. Typical activities to be described in this work plan may include frequency of visits to the facility by APHIS and foreign plant protection inspectors, methods for reviewing facility records, and methods for verifying that facilities are in compliance with the separation of articles, packaging, labeling, and other requirements of this section. This facility preclearance work plan will be reviewed and renewed by APHIS and the foreign plant protection service on an annual basis.

(3) *Trust fund agreement.* Irradiated articles may be imported into the United States in accordance with this section only if the plant protection service of the country in which the irradiation facility is located has entered into a trust fund agreement with APHIS. That

VOL
67

agreement requires the plant protection service to pay, in advance of each shipping season, all costs that APHIS estimates it will incur in providing inspection and treatment monitoring services at the irradiation facility during that shipping season. Those costs include administrative expenses and all salaries (including overtime and the Federal share of employee benefits), travel expenses (including per diem expenses), and other incidental expenses incurred by APHIS in performing these services. The agreement will describe the general nature and scope of APHIS services provided at irradiation facilities covered by the agreement, such as whether APHIS inspectors will monitor operations continuously or intermittently, and will generally describe the extent of inspections APHIS will perform on articles prior to and after irradiation. The agreement requires the plant protection service to deposit a certified or cashier's check with APHIS for the amount of those costs, as estimated by APHIS. If the deposit is not sufficient to meet all costs incurred by APHIS, the agreement further requires the plant protection service to deposit with APHIS a certified or cashier's check for the amount of the remaining costs, as determined by APHIS, before any more articles irradiated in that country may be imported into the United States. After a final audit at the conclusion of each shipping season, any overpayment of funds would be returned to the plant protection service or held on account until needed, at the option of the plant protection service.

(g) * * *

(1) All fruits and vegetables treated with irradiation must be shipped in the same cartons in which they are treated. Irradiated fruits and vegetables may not be packaged for shipment in a carton with nonirradiated fruits and vegetables. Each carton must bear an indicator device, securely attached prior to irradiation, that changes color or provides another clear visual change when it is exposed to radiation in the dose range required by this section for the pests for which the articles are being treated.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 915

[Docket No. FV02–915–2 PR]

Avocados Grown in South Florida; Increased Assessment Rate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This rule would increase the assessment rate established for the Avocado Administrative Committee (Committee) for the 2002–03 and subsequent fiscal periods from $0.19 per 55-pound bushel container or equivalent to $0.20 per 55-pound bushel container or equivalent of avocados handled. The Committee locally administers the marketing order which regulates the handling of avocados grown in South Florida. Authorization to assess avocado handlers enables the Committee to incur expenses that are reasonable and necessary to administer the program. The fiscal period begins April 1 and ends March 31. The assessment rate would remain in effect indefinitely unless modified, suspended, or terminated.

DATES: Comments must be received by April 15, 2002.

ADDRESSES: Interested persons are invited to submit written comments concerning this rule. Comments must be sent to the Docket Clerk, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW STOP 0237, Washington, DC 20250–0237; Fax: (202) 720–8938, or E-mail: *moab.docketclerk@usda.gov*. Comments should reference the docket number and the date and page number of this issue of the **Federal Register** and will be available for public inspection in the Office of the Docket Clerk during regular business hours, or can be viewed at: *http://www.ams.usda.gov/fv/moab.html*.

FOR FURTHER INFORMATION CONTACT: Doris Jamieson, Marketing Specialist, Southeast Marketing Field Office, Fruit and Vegetable Programs, AMS, USDA, 799 Overlook Drive, Suite A, Winter Haven, Florida 33884: telephone: (863) 324–3375, Fax: (863) 325–8793; or George Kelhart, Technical Advisor, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW STOP 0237, Washington, DC 20250–0237; telephone: (202) 720–2491, Fax: (202) 720–8938.

Small businesses may request information on complying with this regulation by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW STOP 0237, Washington, DC 20250–0237; telephone: (202) 720–2491, Fax: (202) 720–8938, or E-mail: *Jay.Guerber@usda.gov*.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement No. 121 and Order No. 915, both as amended (7 CFR part 915), regulating the handling of avocados grown in South Florida, hereinafter referred to as the "order." The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

The Department of Agriculture (USDA) is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. Under the marketing order now in effect, Florida avocado handlers are subject to assessments. Funds to administer the order are derived from such assessments. It is intended that the assessment rate as proposed herein would be applicable to all assessable avocados beginning on April 1, 2002, and continue until amended, suspended, or terminated. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This rule would increase the assessment rate established for the Committee for the 2002–03 and subsequent fiscal periods from $0.19 per 55-pound bushel container or equivalent to $0.20 per 55-pound bushel container or equivalent of avocados.

The Florida avocado marketing order provides authority for the Committee, with the approval of USDA, to formulate an annual budget of expenses and collect assessments from handlers to administer the program. The members of the Committee are producers and handlers of Florida avocados. They are familiar with the Committee's needs and with the costs for goods and services in their local area and are thus in a position to formulate an appropriate budget and assessment rate. The assessment rate is formulated and discussed in a public meeting. Thus, all directly affected persons have an opportunity to participate and provide input.

For the 2000–01 and subsequent fiscal periods, the Committee recommended, and USDA approved, an assessment rate that would continue in effect from fiscal period to fiscal period unless modified, suspended, or terminated by USDA upon recommendation and information submitted by the Committee or other information available to USDA.

The Committee met on January 9, 2002, and unanimously recommended 2002–03 expenditures of $211,082 and an assessment rate of $0.20 per 55-pound bushel container or equivalent of avocados. In comparison, last year's budgeted expenditures were $187,384. The assessment rate of $0.20 is $0.01 higher than the rate currently in effect.

The Florida Lime Administrative Committee and the Avocado Administrative Committee have shared certain costs (staff, office space, and equipment) for economy and efficiency. Each Committee's share of these costs was based upon the amount of work and time devoted to their particular programs. In April 2001, the Lime Administrative Committee voted to suspend its regulations, including assessment collection. They will not need an administrative staff, office space, or equipment during the suspension period. Therefore, the Avocado Administrative Committee must assume increased costs. The increased assessment is needed to generate more assessment funds to cover the increased expenses, and to reduce the amount of reserve funds the avocado committee would have to use to pay those expenses. Without the assessment rate increase, the avocado committee would have to use $26,582 of its operating reserve to cover the estimated expenses. With the increase, the avocado committee would only have to use $17,082 of its operating reserve to cover expenses.

The major expenditures recommended by the Committee for the 2002–03 year include $76,800 for salaries, $39,850 for local & national enforcement, $20,000 for research, $19,499 for insurance and bonds, and $17,958 for employee benefits. Budgeted expenses for these items in 2001–02 were $60,000, $45,615, $17,000, $14,336, and $15,180, respectively.

The assessment rate recommended by the Committee was derived by dividing anticipated expense by expected shipments of Florida avocados. Avocado shipments for the year are estimated at 950,000 bushels which should provide $190,000 in assessment income. Income derived from handler assessments, along with interest income and funds from the Committee's authorized reserve, would be adequate to cover budgeted expenses. Funds in the reserve (currently $96,633) would be kept within the maximum permitted by the order (approximately three fiscal periods' expenses).

The proposed assessment rate would continue in effect indefinitely unless modified, suspended, or terminated by USDA upon recommendation and information submitted by the Committee or other available information.

Although this assessment rate would be in effect for an indefinite period, the Committee would continue to meet prior to or during each fiscal period to recommend a budget of expenses and consider recommendations for modification of the assessment rate. The dates and times of Committee meetings are available from the Committee or USDA. Committee meetings are open to the public and interested persons may express their views at these meetings. USDA would evaluate Committee recommendations and other available information to determine whether modification of the assessment rate is needed. Further rulemaking would be undertaken as necessary. The Committee's 2002–03 budget and those for subsequent fiscal periods would be reviewed and, as appropriate, approved by USDA.

Initial Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities. Accordingly, AMS has prepared this initial regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 150 producers or avocados in the production area and approximately 33 handlers subject to regulation under the marketing order. Small agricultural producers are defined by the Small Business Administration (13 CFR 121.201) as those having annual receipts less than $750,000, and small agricultural service firms are defined as those whose annual receipts are less than $5,000,000.

According to the Florida Agricultural Statistics Service, the average f.o.b. price for fresh avocados during the 2000–01 season was $14.60 per 55-pound bushel container or equivalent for all domestic shipments and total shipments were 1,005,000 bushels. Using these prices, virtually all avocado handlers could be considered small businesses under the SBA definition. The majority of Florida avocado handlers and producers may be classified as small entities.

This rule would increase the assessment rate established for the Committee and collected from handlers for the 2002–03 and subsequent fiscal periods from $0.19 per 55-pound bushel container or equivalent to $0.20 per 55-pound bushel container or equivalent of avocados. The Committee unanimously recommended 2002–03 expenditures of $211,082 and an assessment rate of $0.20 per 55-pound bushel container. The proposed assessment rate of $0.20 is $0.01 higher than the 2001–02 rate. The quantity of assessable avocados for the 2002–03 season is estimated at 950,000. Thus, the $0.20 rate should provide $190,000 in assessment income. Income derived from handler assessments, along with interest income and funds from the Committee's authorized reserve, would be adequate to cover budgeted expenses.

The major expenditures recommended by the Committee for the 2002–03 fiscal year include $76,800 for salaries, $39,850 for local & national enforcement, $20,000 for research, $19,499 for insurance and bonds, and $17,958 for employee benefits. Budgeted expenses for these items in 2001–02 were $60,000, $45,615, $17,000, $14,336, and $15,180, respectively.

The Florida Lime Administrative Committee and the Avocado Administrative Committee shared certain costs (staff, office space, and equipment) for economy and efficiency. Each Committee's share of these costs

VOL
67
ISS
51
MR
15
2002
UMI

was based upon the amount of work and time devoted to their particular programs. In April 2001, the Lime Administrative Committee voted to suspend its regulations, including assessment collection. They will not need an administrative staff, office space, or equipment during the suspension period. Therefore, the Avocado Administrative Committee must assume increased costs. The increased assessment is needed to cover the increased costs and to keep its operating reserve at an acceptable level.

The Committee reviewed and unanimously recommended 2002–03 expenditures of $211,082 which included increases in administrative and office salaries, and research programs. Prior to arriving at this budget, the Committee considered information from various sources, such as the Committee's Budget Subcommittee. These groups discussed alternative expenditure levels. The assessment rate of $0.20 per 55-pound bushel container of assessable avocados was then determined by dividing the total recommended budget by the quantity of assessable avocados, estimated at 950,000 55-pound bushel containers or equivalents for the 2002–03 fiscal year. This is approximately $21,000 below the anticipated expenses, which the Committee determined to be acceptable.

A review of historical information and preliminary information pertaining to the upcoming fiscal year indicates that the average grower price for the 2002–03 season could range between $10.00 and $60.00 per 55-pound bushel container or equivalent of avocados. Therefore, the estimated assessment revenue fro the 2002–03 fiscal year as a percentage of total grower revenue could range between .3 and 2 percent.

This action would increase the assessment obligation imposed on handlers. While assessments impose some additional costs on handlers, the costs are minimal and uniform on all handlers. Some of the additional costs may be passed on to producers. However, these costs would be offset by the benefits derived by the operation of the marketing order. In addition, the Committee's meeting was widely publicized throughout the Florida avocado industry and all interested persons were invited to attend the meeting and participate in Committee deliberations on all issues. Like all Committee meetings, the January 9, 2002, meeting was a public meeting and all entities, both large and small, were able to express views on this issue. Finally, interested persons are invited to submit information on the regulatory and informational impacts of this action on small businesses.

This proposed rule would impose no additional reporting or recordkeeping requirements on either small or large Florida avocado handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies.

USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: *http://www.ams.usda.gov/fv/moab.html*. Any questions about the compliance guide should be sent to Jay Guerber at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

A 30-day comment period is provided to allow interested persons to respond to this proposed rule. Thirty days is deemed appropriate because: (1) The 2002–03 fiscal period begins on April 1, 2002, and the marketing order requires that the rate of assessment for each fiscal period apply to all assessable avocados handled during such fiscal period; (2) the Committee needs to have sufficient funds to pay its expenses which are incurred on a continuous basis; and (3) handlers are aware of this action which was unanimously recommended by the Committee at a public meeting and is similar to other assessment rate actions issued in past year.

List of Subjects in 7 CFR Part 915

Avocados, Marketing agreements, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 915 is proposed to be amended as follows:

PART 915—AVOCADOS GROWN IN SOUTH FLORIDA

1. The authority citation for 7 CFR part 915 continues to read as follows:

Authority: 7 U.S.C. 601–674.

2. Section 915.235 is revised to read as follows:

§ 915.235 Assessment rate.

On and after April 1, 2002, an assessment rate of $0.20 per 55-pound container or equivalent is established for avocados grown in South Florida.

Dated: March 11, 2002.

A.J. Yates,

Administrator, Agricultural Marketing Service.

7 CFR Part 930

[Docket No. FV02–930–1 PR]

Tart Cherries Grown in the States of Michigan, et al.; Final Free and Restricted Percentages for the 2001–2002 Crop Year for Tart Cherries

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposal invites comments on the establishment of final free and restricted percentages for the 2001–2002 crop year. The percentages are 59 percent free and 41 percent restricted and would establish the proportion of cherries from the 2001 crop which may be handled in commercial outlets. The percentages are intended to stabilize supplies and prices, and strengthen market conditions and were recommended by the Cherry Industry Administrative Board (Board), the body which locally administers the marketing order. The marketing order regulates the handling of tart cherries grown in the States of Michigan, New York, Pennsylvania, Oregon, Utah, Washington, and Wisconsin.

DATES: Comments must be received by April 1, 2002.

ADDRESSES: Interested persons are invited to submit written comments concerning this action. Comments must be sent to the Docket Clerk, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW Stop 0237, Washington, DC 20250–0237; Fax: (202) 720–8938, or E-mail: *moab.docketclerk@usda.gov*. All comments should reference the docket number and the date and page number of this issue of the **Federal Register** and will be made available for public inspection in the Office of the Docket Clerk during regular business hours or can be viewed at: *http://www.ams/usda.gov/fv/moab/html*.

FOR FURTHER INFORMATION CONTACT: Patricia A. Petrella or Kenneth G. Johnson, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, Suite 2A04, Unit 155, 4700 River Road, Riverdale, MD 20737, telephone: (301) 734–5243, or Fax: (301) 734–5275; or George Kelhart, Technical Advisor, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW Stop 0237, Washington, DC 20250–0237; telephone: (202) 720–2491, or Fax: (202) 720–8938.

Small businesses may request information on complying with this regulation, or obtain a guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue SW Stop 0237, Washington, DC 20250–0237; telephone: (202) 720–2491, Fax: (202) 720–8938, or E-mail: *Jay.Guerber@usda.gov*.

SUPPLEMENTARY INFORMATION: This proposal is issued under Marketing agreement and Order No. 930 (7 CFR part 930), regulating the handling of tart cherries produced in the States of Michigan, New York, Pennsylvania, Oregon, Utah, Washington, and Wisconsin, hereinafter referred to as the "order." The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

The Department of Agriculture (USDA) is issuing this rule in conformance with Executive Order 12866.

This proposal has been reviewed under Executive Order 12988, Civil Justice Reform. Under the marketing order provisions now in effect, final free and restricted percentages may be established for tart cherries handled by handlers during the crop year. This rule would establish final free and restricted percentages for tart cherries for the 2001–2002 crop year, beginning July 1, 2001, through June 30, 2002. This rule would not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under § 608c(15)(A) of the Act, any handler subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempt therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing, USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction in equity to review USDA's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

The order prescribes procedures for computing an optimum supply and preliminary and final percentages that establish the amount of tart cherries that can be marketed throughout the season. The regulations apply to all handlers of tart cherries that are in the regulated districts. Tart cherries in the free percentage category may be shipped immediately to any market, while restricted percentage tart cherries must be held by handlers in a primary or secondary reserve, or be diverted in accordance with § 930.59 of the order and § 930.159 of the regulations, or used for exempt purposes (and obtaining diversion credit) under § 930.62 of the order and § 930.162 of the regulations. The regulated Districts for this season are: District one—Northern Michigan; District two—Central Michigan; District three—Southwest Michigan; District four—New York; and District eight—Washington. Districts five, six, seven, and nine (Oregon, Utah, Pennsylvania, and Wisconsin, respectively), would not be regulated for the 2001–2002 season.

The order prescribes under § 930.52 that, upon adoption of the order, those districts to be regulated shall be those districts in which the average annual production of cherries over the prior three years has exceeded 15 million pounds. A district not meeting the 15 million-pound requirement shall not be regulated in such crop year. Because this requirement was not met in the districts of Oregon, Pennsylvania, and Wisconsin, handlers in those districts would not be subject to volume regulation during the 2001–2002 crop year. Section 930.52 also prescribes that any district producing a crop which is less than 50 percent of the average annual processed production in that district in the previous five years would be exempt from any volume regulation if, in that year, a restricted percentage is established. Because Utah's production is less than the 50 percent of the previous 5-year production average, handlers in Utah also would not be subject to volume regulation during the 2001–2002 crop year. Production from District four (New York) was not regulated last crop year, but, as mentioned above, will be regulated in 2001–2002. This would be the first year of regulation for District eight (Washington), since the order was promulgated.

Demand for tart cherries at the farm level is derived from the demand for tart cherry products at retail. Demand for tart cherries and tart cherry products tends to be relatively stable from year to year. The supply of tart cherries, by contrast, varies greatly from crop year to crop year. The magnitude of annual fluctuations in tart cherry supplies are one of the most pronounced for any agricultural commodity in the United States. In addition, since tart cherries are processed either into canned or frozen products, they can be stored and carried over from crop year to crop year. This creates substantial coordination and marketing problems. The supply and demand for tart cherries is rarely balanced. The primary purpose of setting free and restricted percentages is to balance supply with demand and reduce large surpluses that may occur.

Section 930.50(a) of the order describes procedures for computing an optimum supply for each crop year. The Board must meet on or about July 1 of each crop year, to review sales data, inventory data, current crop forecasts and market conditions in order to establish an optimum supply level for the crop year. The optimum supply volume is calculated as 100 percent of the average sales of the prior three years to which is added a desirable carryout inventory not to exceed 20 million pounds or such other amount as may be established with the approval of the Secretary. The optimum supply represents the desirable volume of tart cherries that should be available for sale in the coming crop year.

The order also provides that on or about July 1 of each crop year, the Board is required to establish preliminary free and restricted percentages. These percentages are computed by deducting the actual carryin inventory from the optimum supply figure (adjusted to raw product equivalent—the actual weight of cherries handled to process into cherry products) and subtracting that figure from the current year's USDA crop forecast. If the resulting number is positive, this represents the estimated over-production, which would be the restricted percentage tonnage. The restricted percentage tonnage is then divided by the sum of the USDA crop forecast for the regulated districts to obtain percentages for the regulated districts. The Board is required to establish a preliminary restricted percentage equal to the quotient, rounded to the nearest whole number, with the complement being the preliminary free tonnage percentage. If the tonnage requirements for the year are more than the USDA crop forecast, the Board is required to establish a

VOL
67
ISS
51
MR
15
2002
UMI

preliminary free tonnage percentage of 100 percent and a preliminary restricted percentage of zero. The Board must announce the preliminary percentages in accordance with paragraph (h) of § 930.50.

The Board met on June 21, 2001, and computed, for the 2001–2002 crop year, an optimum supply of 219 million pounds. The Board recommended that the desirable carryout figure be zero pounds. Desirable carryout is the amount of fruit required to be carried into the succeeding crop year and is set by the Board after considering market circumstances and needs. This figure can range from zero to a maximum of 20 million pounds. The Board calculated preliminary free and restricted percentages as follows: The USDA estimate of the crop was 356 million pounds; a 33 million pound carryin added to that estimate results in a total available supply of 389 million pounds. The carryin figure reflects the amount of cherries that handlers actually have in inventory. Subtracting the optimum supply of 219 million pounds from the total estimated available supply results in a surplus of 170 million pounds of tart cherries. An adjustment for changed economic conditions of 50 million pounds was subtracted from the surplus, pursuant to § 930.50 of the order. This adjustment is discussed later in this document. After the adjustment, the resulting total surplus is 120 million pounds of tart cherries. The surplus was divided by the production in the regulated districts (338 million pounds) and resulted in a restricted percentage of 36 percent for the 2001–2002 crop year. The free percentage was 64 percent (100 percent minus 36 percent). The Board unanimously established these percentages and announced them to the industry as required by the order.

The preliminary percentages were based on the USDA production estimate and the following supply and demand information available at the June meeting for the 2001–2002 year:

	Millions of pounds
Optimum Supply Formula:	
(1) Average sales of the prior three years	219
(2) Plus desirable carryout	0
(3) Optimum supply calculated by the Board at the June meeting	219
Preliminary Percentages:	
(4) USDA crop estimate	356
(5) Plus carryin held by handlers as of July 1, 2000	33
(6) Total available supply for current crop year	389
(7) Surplus (item 6 minus item 3)	170
(8) Economic adjustment to surplus	50
(9) Adjusted surplus (item 7 minus item 8)	120
(10) USDA crop estimate for regulated districts	338

Percentages	Free	Restricted
(11) Preliminary percentages (item 9 divided by item 10 × 100 equals restricted percentage; 100 minus restricted percentage equals free percentage)	64	36

Between July 1 and September 15 of each crop year, the Board may modify the preliminary free and restricted percentages by announcing interim free and restricted percentages to adjust to the actual pack occurring in the industry.

On September 17, 2001, the Board conducted a telephone meeting and voted unanimously to establish interim percentages since the September 13, 2001, meeting was postponed until October due to the tragic events on September 11, 2001. The Board recommended an interim free percentage of 57 percent and an interim restrictive percentage of 43 percent. These percentages were based on the actual production for the 2001–2002 crop year of 366 million pounds, and more up-to-date sales and carryin inventory amounts.

Section 930.50(d) of the order requires the Board to meet no later than September 15 to recommend final free and restricted percentages to the Secretary for approval. Because of the events of September 11, 2001, and subsequent flight delays, the Board met on October 12, 2001, and recommended final free and restricted percentages of 59 percent and 41 percent, respectively. At that time, the Board had available actual production, sales, and carryin inventory amounts to review and made adjustments to the interim percentages.

The Secretary establishes final free and restricted percentages through the informal rulemaking process. These percentages would make available the tart cherries necessary to achieve the optimum supply figure.calculated by the Board. The difference between any final free percentage designated by the Secretary and 100 percent is the final restricted percentage.

The Board used an updated optimum supply figure in determining the final free and restricted percentages. The revised optimum supply is 217 million pounds, instead of 219 million pounds used in June. The 3-year average sales figure computed in June included an estimate of June 2001 sales because actual June sales were not yet available. The 3-year average sales figure used in the final calculations reflects actual sales for each month of the 3-year period.

The actual production reported by the Board was 366 million pounds, which is a 10 million pound increase from the USDA crop estimate of 356 million pounds. The increase in production was due to higher yields in the major producing States (Michigan, New York, Washington). For 2001–2002, production in the regulated districts totaled 336 million pounds, 2 million pounds less than the USDA estimate of 338 million pounds.

A 39 million pound carryin (actual carryin as opposed to the 33 million pounds originally estimated in June) was added to the Board's reported production of 366 million pounds, yielding a total available supply for the current crop year of 405 million pounds. The optimum supply of 217 million pounds was subtracted from the total available supply which resulted in a 188 million pound surplus. An adjustment of 50 million pounds for changed economic conditions was subtracted from the surplus, pursuant to § 930.50 of the order. This adjustment is discussed later in this document. After the adjustment, the resulting total surplus is 138 million pounds of tart cherries. The total surplus of 138 million pounds is divided by the 336 million-pound volume of tart cherries produced in the regulated districts. This results in a 41 percent restricted percentage and a corresponding 59 percent free percentage for the regulated districts.

The final percentages are based on the Board's reported production figures and the following supply and demand information available in October for the 2001–2002 crop year:

	Millions of pounds
Optimum Supply Formula:	
(1) Average sales of the prior three years	217
(2) Plus desirable carryout	0
(3) Optimum supply calculated by the Board at the October meeting	217
Final Percentages:	
(4) Board reported production	366
(5) Plus carryin held by handlers as of July 1, 2001	39
(6) Tonnage available for current crop year	405
(7) Surplus (item 6 minus item 3)	188
(8) Economic adjustment to surplus	50
(9) Adjusted surplus (item 7 minus 8)	138
(10) Production in regulated districts	336

Percentages	Free	Restricted
(11) Final Percentages (item 9 divided by item 10 × 100 equals restricted percentage; 100 minus restricted percentage equals free percentage)	59	41

As previously mentioned, the Board recommended an economic adjustment of 50 million pounds in computing both the preliminary and final percentages for the 2001–2002 crop year. This is authorized under § 930.50. These provisions provide that in its deliberations of volume regulation recommendations, the Board consider, among other things, the expected demand conditions for cherries in different market segments and an analysis of economic factors having a bearing on the marketing of cherries. Based on these considerations, the Board may modify its marketing policy calculations to reflect changes in economic conditions. The Board recommended the adjustment to reflect the impact of USDA surplus removal purchases might have on the sales component of the optimum supply formula.

Purchases by USDA and other government agencies are part of the average sales history for the industry. In recent years, USDA and other government purchases of tart cherry products have averaged about 17 million pounds and these have been factored into the optimum supply formula. In 2000–2001, USDA announced the acceptance of bids for a large surplus removal purchase. The amount of the purchases is expected to total 50 million pounds and be delivered during the 2001–2002 crop year. The Board discussed how this purchase should be accounted for in the optimum supply formula. The Board decided on a full 50-million pound economic adjustment because it results in a smaller restricted percentage than with no adjustment. With the adjustment, the restricted percentage is 41 percent. Without the adjustment, the restricted percentage would have been 56 percent.

By recommending this marketing policy modification, the Board believes that fewer cherries would have to be diverted and more cherries would be available to meet market needs. This modification is intended to further facilitate and encourage market expansion. It is also expected to benefit growers who receive higher payments for free tonnage cherries.

In May 2001, reserve release provisions were added to the administrative rules and regulations in § 930.154. The provisions provide that if USDA or any other governmental agency initiates an invitation to purchase product for surplus removal (as a non-entitlement purchase), the Board shall release a like quantity of cherries from the reserve pool to each handler who has a proportionate share in the reserve. These provisions were not effective prior to the initiation of the invitation to bid on USDA's planned 50 million pound surplus removal purchase. Therefore, reserve cherries could not be released from the inventory reserve pursuant to § 930.154 and the cherries had to be supplied from free tonnage, not reserve tonnage. Consequently, the Board recommended the economic adjustment of 50 million pounds to account for the free tonnage cherries delivered from the 2001–2002 crop to satisfy the purchase. If an invitation to bid on a surplus removal purchase is initiated by USDA or another government agency during the 2001–2002 crop year, or subsequent season, a like quantity of reserve tonnage would be released under § 930.154 and no economic adjustment would be necessary to account for those cherries. The Board believes that such releases will equitably spread the benefit of such purchases throughout the industry because all handlers regulated under the order, and not just those handlers who successfully bid and sold product to USDA or other government agencies, will benefit from the surplus removal of tart cherry purchases.

The Department's "Guidelines for Fruit, Vegetable, and Specialty Crop Marketing Orders" specify that 110 percent of recent years' sales should be made available to primary markets each season before recommendations for volume regulation are approved. This goal would be met by the establishment of a preliminary percentage which releases 100 percent of the optimum supply and the additional release of tart cherries provided under § 930.50(g). This release of tonnage, equal to 10 percent of the average sales of the prior three years sales, is made available to handlers each season. The Board recommended that such release should be made available to handlers the first week of December and the first week of May. Handlers can decide how much of the 10 percent release they would like to receive during the December and May release dates. Once released, such cherries are released for free use by such handler. Approximately 22 million

VOL
67
ISS
51
MR
15
2002
UMI

pounds would be made available to handlers this season in accordance with Department Guidelines. This release would be made available to every handler and released to such handler in proportion to its percentage of the total regulated crop handled. If a handler does not take his/her proportionate amount, such amount shall remain in the inventory reserve.

The Regulatory Flexibility Act and Effects on Small Businesses

The Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities and has prepared this initial regulatory flexibility analysis. The Regulatory Flexibility Act (RFA) would allow AMS to certify that regulations do not have a significant economic impact on a substantial number of small entities.

However, as a matter of general policy, AMS' Fruit and Vegetable Programs (Programs) no longer opt for such certification, but rather perform regulatory flexibility analyses for any rulemaking that would generate the interest of a significant number of small entities. Performing such analyses shifts the Programs' efforts from determining whether regulatory flexibility analyses are required to the consideration of regulatory options and economic or regulatory impacts.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 40 handlers of tart cherries who are subject to regulation under the tart cherry marketing order and approximately 900 producers of tart cherries in the regulated area. Small agricultural service firms, which includes handlers, have been defined by the Small Business Administration (13 CFR 121.201) as those having annual receipts of less than $5,000,000, and small agricultural producers are defined as those having annual receipts of less than $750,000. A majority of the producers and handlers are considered small entities under SBA's standards.

Board and subcommittee meetings are widely publicized in advance and are held in a location central to the production area. The meetings are open to all industry members (including small business entities) and other interested persons who are encouraged to participate in the deliberations and voice their opinions on topics under discussion. Thus, Board recommendations can be considered to represent the interests of small business entities in the industry.

The principal demand for tart cherries is in the form of processed products. Tart cherries are dried, frozen, canned, juiced, and pureed. During the period 1995/96 through 1999/00, approximately 91 percent of the U.S. tart cherry crop, or 280.5 million pounds, was processed annually. Of the 280.5 million pounds of tart cherries processed, 62 percent was frozen, 29 percent was canned, and 9 percent was utilized for juice.

Based on National Agricultural Statistics Service data, acreage in the United States devoted to tart cherry production has been trending downward. In the ten-year period, 1987/88 through 1997/98, the tart cherry area decreased from 50,050 acres, to less than 40,000 acres. In 1999/00, approximately 90 percent of domestic tart cherry acreage was located in four States: Michigan, New York, Utah and Wisconsin. Michigan leads the nation in tart cherry acreage with 70 percent of the total. Michigan produces about 75 percent of the U.S. tart cherry crop each year. In 1999/00, tart cherry acreage in Michigan decreased to 28,100 acres from 28,400 acres the previous year.

The 2001 crop is the second largest ever harvested in the United States at 366.3 million pounds. The largest crop occurred in 1995 with production in the regulated districts reaching a record 395.6 pounds. The price per pound received by tart cherry growers ranged from a low of 7.3 cents in 1987 to a high of 46.4 cents in 1991. These problems of wide supply and price fluctuations in the tart cherry industry are national in scope and impact. Growers testified during the order promulgation process that the prices they received often did not come close to covering the costs of production. They also testified that production costs for most growers range between 20 and 22 cents per pound, which is well above average prices received during the 1993–1995 seasons.

The industry demonstrated a need for an order during the promulgation process of the marketing order because large variations in annual tart cherry supplies tend to lead to fluctuations in prices and disorderly marketing. As a result of these fluctuations in supply and price, growers realize less income. The industry chose a volume control marketing order to even out these wide variations in supply and improve returns to growers. During the promulgation process, proponents testified that small growers and processors would have the most to gain from implementation of a marketing order because many such growers and handlers had been going out of business due to low tart cherry prices. They also testified that, since an order would help increase grower returns, this should increase the buffer between business success and failure because small growers and handlers tend to be less capitalized than larger growers and handlers.

Aggregate demand for tart cherries and tart cherry products tends to be relatively stable from year-to-year. Similarly, prices at the retail level show minimal variation. Consumer prices in grocery stores, and particularly in food service markets, largely do not reflect fluctuations in cherry supplies. Retail demand is assumed to be highly inelastic which indicates that price reductions do not result in large increases in the quantity demanded. Most tart cherries are sold to food service outlets and to consumers as pie filling; frozen cherries are sold as an ingredient to manufacturers of pies and cherry desserts. Juice and dried cherries are expanding market outlets for tart cherries.

Demand for tart cherries at the farm level is derived from the demand for tart cherry products at retail. In general, the farm-level demand for a commodity consists of the demand at retail or food service outlets minus per-unit processing and distribution costs incurred in transforming the raw farm commodity into a product available to consumers. These costs comprise what is known as the "marketing margin."

The supply of tart cherries, by contrast, varies greatly. The magnitude of annual fluctuations in tart cherry supplies are one of the most pronounced for any agricultural commodity in the United States. In addition, since tart cherries are processed either into cans or frozen, they can be stored and carried over from year-to-year. This creates substantial coordination and marketing problems. The supply and demand for tart cherries is rarely in equilibrium. As a result, grower prices fluctuate widely, reflecting the large swings in annual supplies.

In an effort to stabilize prices, the tart cherry industry uses the volume control mechanisms under the authority of the Federal marketing order. This authority allows the industry to set free and restricted percentages. These restricted percentages are only applied to states or districts with a 3-year average of production greater than 15 million pounds. Currently, only the three districts in Michigan, New York, and Washington are subject to restricted percentages.

The primary purpose of setting restricted percentages is an attempt to bring supply and demand into balance. If the primary market is over-supplied with cherries, grower prices decline substantially.

The tart cherry sector uses an industry-wide storage program as a supplemental coordinating mechanism under the Federal marketing order. The primary purpose of the storage program is to warehouse supplies in large crop years in order to supplement supplies in short crop years. The storage approach is feasible because the increase in price—when moving from a large crop to a short crop year—more than offsets the cost for storage, interest, and handling of the stored cherries.

The price that growers' receive for their crop is largely determined by the total production volume and carryin inventories. The Federal marketing order permits the industry to exercise supply control provisions, which allow for the establishment of free and restricted percentages for the primary market, and a storage program. The establishment of restricted percentages impacts the production to be marketed in the primary market, while the storage program has an impact on the volume of unsold inventories.

The volume control mechanism used by the cherry industry results in decreased shipments to primary markets. Without volume control the primary markets (domestic) would likely be over-supplied, resulting in low grower prices.

To assess the impact that volume control has on the prices growers receive for their product, an econometric model has been developed. The model provides a way to see what impacts volume control may have on grower prices. The three districts in Michigan, New York and Washington are the only restricted areas for this crop year and their combined total production is 336 million pounds. A 41 percent restriction means 198 million pounds is available to be shipped to primary markets from these three states. Production levels of 2 million pounds for Oregon, 4 million pounds for Pennsylvania, 12 million pounds for Utah, and 13 million pounds for Wisconsin results in an additional 31 million pounds available for primary market shipments.

In addition, USDA requires a 10 percent release from reserves as a market growth factor. This results in an additional 22 million pounds being available for the primary market. The 198 million pounds from Michigan, New York and Washington, the 31 million pounds from the other producing states, and the 22 million pound release gives a total of 251 million pounds being available for the primary markets.

The econometric model is used to estimate grower prices with and without regulation. Without the volume controls, the estimated grower price would be approximately $0.10 per pound. With volume controls, the estimated grower price would increase to approximately $0.15 per pound.

The use of volume controls is estimated to have a positive impact on grower's total revenues. Without regulation, growers' total revenues from processed cherries are estimated to be $36.6 million in 2001/02. In this scenario, production is 366 million pounds and price, without regulation, is estimated to be $0.10 per pound. With regulation, growers' revenues from processed cherries are estimated to be $46.5 million. In this scenario, 251 million pounds are available for the primary markets with an estimated price of $0.15 per pound. Over the past several seasons, growers received approximately $0.10 cents for restricted (diverted) cherries.

The results of econometric analysis are subject to some level of uncertainty. As long as grower prices are greater than $0.11 per pound, then growers' are better off with the regulation. With a price of $0.11 per pound, the estimated revenues under no regulation would be similar to the revenues with a 41 percent restricted regulation.

It is concluded that the 41 percent volume control would not unduly burden producers, particularly smaller growers. The 41 percent restriction is only applied to the growers in Michigan, New York, and Washington. The growers in the other 4 regulated states will benefit from this restriction. Michigan, New York, and Washington produced over 91 percent of the tart cherry crop during the 2001/02 crop year.

Recent grower prices have been as high as $0.21 per pound. At current production levels, the cost of production is reported to be $0.25 per pound. Thus, the estimated $0.15 per pound received by growers remains below the cost of production. The use of volume controls is believed to have little or no effect on consumer prices and will not result in fewer retail sales or sales to food service outlets.

Without the use of volume controls, the industry could be expected to continue to build large amounts of unwanted inventories. These inventories have a depressing effect on grower prices. The econometric model shows for every 1 million-pound increase in carryin inventories, a decrease in grower prices of $0.0029 per pound occurs. The use of volume controls allows the industry to supply the primary markets while avoiding the disastrous results of over-supplying these markets. In addition, through volume control, the industry has an additional supply of cherries that can be used to develop secondary markets such as exports and the development of new products.

In discussing the possibility of marketing percentages for the 2001–2002 crop year, the Board considered the following factors contained in the marketing policy: (1) The estimated total production of tart cherries; (2) the estimated size of the crop to be handled; (3) the expected general quality of such cherry production; (4) the expected carryover as of July 1 of canned and frozen cherries and other cherry products; (5) the expected demand conditions for cherries in different market segments; (6) supplies of competing commodities; (7) an analysis of economic factors having a bearing on the marketing of cherries; (8) the estimated tonnage held by handlers in primary or secondary inventory reserves; and (9) any estimated release of primary or secondary inventory reserve cherries during the crop year.

The Board's review of the factors resulted in the computation and announcement in October 2001 of the restricted percentages proposed in this rule (59 percent free and 41 percent restricted).

A positive factor for the cherry industry this year is the unusually large USDA purchases of cherries during this crop year. These USDA sales include a significant amount of frozen cherries and large quantities of dried cherries.

One alternative to this action would be not to have volume regulation this season. Board members stated that no volume regulation would be detrimental to the tart cherry industry due to the size of the 2001–2002 crop. Returns to growers would not cover their costs of production for this season which might cause some to go out of business.

As mentioned earlier, the Department's "Guidelines for Fruit, Vegetable, and Specialty Crop Marketing Orders" specify that 110 percent of recent years' sales should be made available to primary markets each season before recommendations for volume regulation are approved. The quantity available under this rule is 110

VOL
67
ISS
51
MR
15
2002
UMI

percent of the quantity shipped in the prior three years.

The free and restricted percentages proposed to be established by this rule release the optimum supply and apply uniformly to all regulated handlers in the industry, regardless of size. There are no known additional costs incurred by small handlers that are not incurred by large handlers. The stabilizing effects of the percentages impact all handlers positively by helping them maintain and expand markets, despite seasonal supply fluctuations. Likewise, price stability positively impacts all producers by allowing them to better anticipate the revenues their tart cherries will generate.

The Department has not identified any relevant Federal rules that duplicate, overlap, or conflict with this regulation.

While the benefits resulting from this rulemaking are difficult to quantify, the stabilizing effects of the volume regulations impact both small and large handlers positively by helping them maintain markets even though tart cherry supplies fluctuate widely from season to season.

In compliance with Office of Management and Budget (OMB) regulations (5 CFR part 1320) which implement the Paperwork Reduction Act of 1995 (Pub. L. 104–13), the information collection and recordkeeping requirements have been previously approved by OMB and assigned OMB Number 0581–0177.

There are some reporting, recordkeeping, and other compliance requirements under the marketing order. The reporting and recordkeeping burdens are necessary for compliance purposes and for developing statistical data for maintenance of the program. The forms require information which is readily available from handler records and which can be provided without data processing equipment or trained statistical staff. As with other, similar marketing order programs, reports and forms are periodically studied to reduce or eliminate duplicate information collection burdens by industry and public sector agencies. This rule does not change those requirements.

A 15-day comment period is provided to allow interested persons to respond to this proposal. Fifteen days is deemed appropriate because this rule needs to be in place as soon as possible to achieve its intended purpose of making the optimum supply quantity computed by the Board available to handlers marketing 2001–2002 crop year cherries. All written comments timely received will be considered before a final determination is made on this matter.

List of Subjects in 7 CFR Part 930

Marketing agreements, Reporting and recordkeeping requirements, Tart cherries.

For the reasons set forth in the preamble, 7 CFR Part 930 is proposed to be amended as follows:

PART 930—TART CHERRIES GROWN IN THE STATES OF MICHIGAN, NEW YORK, PENNSYLVANIA, OREGON, UTAH, WASHINGTON, AND WISCONSIN

1. The authority citation for 7 CFR part 930 continues to read as follows:

Authority: 7 U.S.C. 601–674.

2. Section 930.253 is added to read as follows:

Note: This section will not appear in the annual Code of Federal Regulations.

§ 930.253 Final free and restricted percentages for the 2001–2002 crop year.

The final percentages for tart cherries handled by handlers during the crop year beginning on July 1, 2001, which shall be free and restricted, respectively, are designated as follows: Free percentage, 59 percent and restricted percentage, 41 percent.

Dated: March 11, 2002.

A.J. Yates,

Administrator, Agricultural Marketing Service.

BILLING CODE 3410–02–P

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 930

[Docket No. FV02–930–2 PR]

Tart Cherries Grown in the States of Michigan, et al.; Increased Assessment Rates

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This rule would increase the assessment rate for cherries that are utilized in the production of tart cherry products other than juice, juice concentrate, or puree from $0.0012 to $0.00175 per pound. It also would increase the assessment rate for cherries utilized for juice, juice concentrate, or puree from $0.0006 to $0.000875 per pound. Both assessment rates were recommended by the Cherry Industry Administrative Board (Board) under Marketing Order No. 930 for the 2001–2002 and subsequent fiscal periods. The Board is responsible for local administration of the marketing order which regulates the handling of tart cherries grown in the production area. Authorization to assess tart cherry handlers enables the Board to incur expenses that are reasonable and necessary to administer the program. The fiscal period began July 1 and ends June 30. The assessment rates would remain in effect indefinitely unless modified, suspended, or terminated.

DATES: Comments must be received by April 1, 2002.

ADDRESSES: Interested persons are invited to submit written comments concerning this action. Comments must be sent to the Docket Clerk, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW STOP 0237, Washington, DC 20250–0237; Fax: (202) 720–8938, or E-mail: *moabdocket.clerk@usda.gov*. All comments should reference the docket number and the date and page number of this issue of the **Federal Register** and will be made available for public inspection in the Office of the Docket Clerk during regular business hours or can be viewed at: *http://www.ams/usda.gov/fv/moab.html*.

FOR FURTHER INFORMATION CONTACT: Patricia A. Petrella or Kenneth G. Johnson, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, Suite 2A04, Unit 155, 4700 River Road, Riverdale, MD 20737, telephone: (301) 734–5243, or Fax: (301) 734–5275; or George Kelhart, Technical Advisor, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW STOP 0237, Washington, DC 20250–0237; telephone: (202) 720–2491, or Fax: (202) 720–8938.

Small businesses may request information on complying with this regulation by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW STOP 0237, Washington, DC 20250–0237; telephone: (202) 720–2491, Fax: (202) 720–8938, or E-mail: *Jay.Guerber@usda.gov*.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement and Order No. 930 (7 CFR part 930), regulating the handling of tart cherries grown in the States of Michigan, New York, Pennsylvania, Oregon, Utah, Washington, and Wisconsin, hereinafter referred to as the "order." The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

The Department of Agriculture (USDA) is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. Under the marketing order now in effect, tart cherry handlers are subject to assessments. Funds to administer the order are derived from such assessments. It is intended that the assessment rates as issued herein would be applicable to all assessable tart cherries beginning July 1, 2001, and continue until amended, suspended, or terminated. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This rule would increase the assessment rate established for the Board for the 2001–2002 and subsequent fiscal periods for cherries that are utilized in the production of tart cherry products other than juice, juice concentrate, or puree from $0.0012 to $0.00175 per pound of cherries. The assessment rate for cherries utilized for juice, juice concentrate, or puree would be increased from $0.0006 to $0.000875 per pound.

The tart cherry marketing order provides authority for the Board, with the approval of USDA, to formulate an annual budget of expenses and collect assessments from handlers to administer the program. The members of the Board are producers and handlers of tart cherries. They are familiar with the Board's needs and with the costs for goods and services in their local area and are thus in a position to formulate an appropriate budget and assessment rates. The assessment rates are formulated and discussed in a public meeting. Thus, all directly affected persons have an opportunity to participate and provide input.

For the 2000–2001 fiscal period, the Board recommended, and the Department approved, assessment rates that would continue in effect from fiscal period to fiscal period unless modified, suspended, or terminated by the USDA upon recommendation and information submitted by the Board or other information available to USDA.

Section 930.42(a) of the order authorizes a reserve sufficient to cover one year's operating expenses. The increased rates are expected to generate enough income to meet the Board's operating expenses in 2001–2002.

The Board met on January 25, 2001, and unanimously recommended 2001–2002 expenditures of $442,500. The Board also recommended an assessment rate of $0.00175 per pound of tart cherries utilized in the production of tart cherry products other than juice, juice concentrate and puree products and an assessment rate of $0.000875 per pound for juice, juice concentrate and puree products. In comparison, last year's budgeted expenditures were $455,000. The recommended assessment rates of $0.00175 and $0.000875 are higher than the current rates of $0.0012 and $0.0006, respectively. The Board recommended increased assessment rates to generate larger revenue to meet its expenses and keep its reserves at an acceptable level.

The order provides that when an assessment rate based on the number of pounds of tart cherries handled is established, it should provide for differences in relative market values for various cherry products. The discussion of this provision in the order's promulgation record indicates that proponents testified that cherries utilized in high value products such as frozen, canned, or dried cherries should be assessed one rate while cherries used to make low value products such as juice concentrate or puree should be assessed at one-half that rate.

The major expenditures recommended by the Board for the 2001–2002 fiscal period include $80,000 for meetings, $100,000 for compliance, $185,000 for personnel, $75,000 for office expenses, and $2,500 for industry educational efforts. Budgeted expenses for those items in 2000–2001 were $75,000 for meetings, $120,000 for compliance, $175,000 for personnel, $80,000 for office expenses, and $5,000 for industry educational efforts, respectively.

In deriving the recommended assessment rates, the Board determined assessable tart cherry production for the fiscal period at 260 million pounds. It further estimated that about 245 million pounds of the assessable poundage would be utilized in the production of high-valued products, like frozen, canned, or dried cherries, and that about 15 million pounds would be utilized in the production of low-valued products, like juice, juice concentrate, or puree. Potential assessment income from the high valued products would be approximately $428,750 (245 million pounds × $0.00175 per pound). The potential income from tart cherries utilized for juice, juice concentrate, or puree would be $13,125 (15 million pounds × $0.000875 per pound). Therefore, total assessment income for 2001–2002 is estimated at $441,875. This amount plus adequate funds in the reserve and interest income would be adequate to cover budgeted expenses. Funds in the reserve (approximately $250,000) would be kept within the approximately six months' operating expenses as recommended by the Board consistent with § 930.42(a).

The assessment rates established in this rule would continue in effect indefinitely unless modified, suspended, or terminated by USDA upon recommendation and other information submitted by the Board or other available information.

Although the assessment rates are effective for an indefinite period, the Board will continue to meet prior to or during each fiscal period to recommend a budget of expenses and consider recommendations for modification of the assessment rates. The dates and times of Board meetings are available from the Board or the USDA. Board meetings are open to the public and interested persons may express their views at these meetings. USDA would evaluate Board recommendations and other available information to determine whether modifications of the assessment rates are needed. Further rulemaking would be undertaken as necessary. The Board's 2001–2002 budget and those for subsequent fiscal periods would be reviewed and, as appropriate, approved by the USDA.

The Regulatory Flexibility Act and Effects on Small Businesses

The Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities and has prepared this initial regulatory flexibility analysis. The Regulatory Flexibility Act (RFA) allows AMS to certify that regulations do not have a significant economic impact on a substantial number of small entities. However, as a matter of general policy,

VOL
67
ISS
51
MR
15
2002
UMI

AMS's Fruit and Vegetable Programs (Programs) no longer opts for such certification, but rather performs regulatory flexibility analyses for any rulemaking that would generate the interest of a significant number of small entities. Performing such analyses shifts the Programs' efforts from determining whether regulatory flexibility analyses are required to the consideration of regulatory options and economic or regulatory impacts.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 40 handlers of tart cherries who are subject to regulation under the order and approximately 900 producers of tart cherries in the regulated area. Small agricultural service firms have been defined by the Small Business Administration (13 CFR 121.201) as those having annual receipts less than $5,000,000, and small agricultural producers are those whose annual receipts are less than $750,000. A majority of the tart cherry handlers and producers may be classified as small entities.

The Board unanimously recommended 2001–2002 expenditures of $442,500 and assessment rate increases from $0.0012 to $0.00175 per pound for cherries that are utilized in the production of tart cherry products other than juice, juice concentrate, or puree, and from $0.0006 to $0.000875 per pound for cherries utilized for juice, juice concentrate, or puree.

This rule would increase the assessment rate established for the Board and collected from handlers for the 2001–2002 and subsequent fiscal periods for cherries that are utilized in the production of tart cherry products other than juice, juice concentrate, or puree from $0.0012 to $0.00175 per pound, and the assessment rate for cherries utilized for juice, juice concentrate, or puree from $0.0006 to $0.000875 per pound. The Board unanimously recommended 2001–2002 expenditures of $442,500. The quantity of assessable tart cherries expected to be produced during the 2001–2002 crop year is estimated at 260 million pounds. Assessment income, based on this crop, along with interest income and reserves, would be adequate to cover budgeted expenses.

The major expenditures recommended by the Board for the 2001–2002 fiscal period include $80,000 for meetings, $100,000 for compliance, $185,000 for personnel, $75,000 for office expenses, and $2,500 for industry educational efforts. Budgeted expenses for those items in 2000–2001 were $75,000 for meetings, $120,000 for compliance, $175,000 for personnel, $80,000 for office expenses, and $5,000 for industry educational efforts, respectively.

The Board discussed the alternative of continuing the existing assessment rates, but concluded that would cause the amount in the operating reserve to be reduced to an unacceptable level.

The principal demand for tart cherries is in the form of processed products. Tart cherries are dried, frozen, canned, juiced, and pureed. Data from the National Agricultural Statistics Service (NASS) states that during the period 1995/96 through 1999/00, approximately 91 percent of the U.S. tart cherry crop, or 280.5 million pounds, was processed annually. Of the 280.5 million pounds of tart cherries processed, 62 percent was frozen, 29 percent was canned, and 9 percent was utilized for juice.

Based on NASS data, acreage in the United States devoted to tart cherry production has been trending downward. In the ten-year period, 1987/88 through 1997/98, the tart cherry area decreased from 50,050 acres, to less than 40,000 acres. In 1999/00, approximately 90 percent of domestic tart cherry acreage was located in four States: Michigan, New York, Utah and Wisconsin. Michigan leads the nation in tart cherry acreage with 70 percent of the total. Michigan produces about 75 percent of the U.S. tart cherry crop each year. In 1999/00, tart cherry acreage in Michigan decreased to 28,100 acres from 28,400 acres the previous year.

In deriving the recommended assessment rates, the Board estimated assessable tart cherry production for the fiscal period at 260 million pounds. It further estimated that about 245 million pounds of the assessable poundage would be utilized in the production of high-valued products, like frozen, canned, or dried cherries, and that about 15 million pounds would be utilized in the production of low-valued products, like juice, juice concentrate, or puree. Potential assessment income from the high valued products would be approximately $428,750 (245 million pounds × $0.00175 per pound). The potential income from the tart cherries utilized for juice, juice concentrate, or puree would be $13,125 (15 million pounds × $0.000875 per pound). Therefore, total assessment income for 2001–2002 is estimated at $441,875. This amount plus adequate funds in the reserve and interest income should be adequate to cover budgeted expenses. Funds in the reserve (approximately $250,000) will be kept within the approximately six months' operational expenses as recommended by the Board which would be consistent with the order (§ 930.42(a)).

This action would increase the assessment obligation imposed on handlers. Assessments are applied uniformly on all handlers, and some of the costs may be passed on to producers. However, the assessment rate increases the burden on handlers, and may increase the burden on producers. The Board's meeting was widely publicized throughout the tart cherry industry and all interested persons were invited to attend the meeting and participate in Board deliberations on all issues. Like all Board meetings, the January 25, 2001, meeting was a public meeting and all entities, both large and small, were able to express views on this issue. Finally, interested persons are invited to submit information on the regulatory and informational impacts of this action on small businesses.

This action would impose no additional reporting or recordkeeping requirements on either small or large tart cherry handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies.

USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: *http://www.ams.usda.gov/fv/moab.html*. Any questions about the compliance guide should be sent to Jay Guerber at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

A 15-day comment period is provided to allow interested persons to respond to this proposed rule. Fifteen days is deemed appropriate because: (1) The 2001–2002 fiscal period began on July 1, 2001, and the marketing order requires that the rate of assessment for each fiscal period apply to all assessable tart cherries handled during such fiscal period; (2) the Board needs to have sufficient funds to pay its expenses which are incurred on a continuous basis; and (3) handlers are aware of this action which was unanimously recommended by the Board at a public meeting and is similar to other assessment rate actions issued in past years.

List of Subjects in 7 CFR Part 930

Marketing agreements, Reporting and recordkeeping requirements, Tart cherries.

For the reasons set forth in the preamble, 7 CFR part 930 is proposed to be amended as follows:

PART 930—TART CHERRIES GROWN IN THE STATES OF MICHIGAN, NEW YORK, PENNSYLVANIA, OREGON, UTAH, WASHINGTON, AND WISCONSIN

1. The authority citation for 7 CFR part 930 continues to read as follows:

Authority: 7 U.S.C. 601–674.

2. Section 930.200 is revised to read as follows:

§ 930.200 Handler assessment rate.

On and after the effective date of this rule, the assessment rate imposed on handlers shall be $0.00175 per pound of cherries handled for tart cherries grown in the production area and utilized in the production of tart cherry products other than juice, juice concentrate, or puree. The assessment rate for juice, juice concentrate, and puree products shall be $0.000875 per pound.

Dated: March 11, 2002.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 993

[Docket No. FV02–993–1 PR]

Dried Prunes Produced in California; Undersized Regulation for the 2002–03 Crop Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This rule invites comments on changes to the undersized regulation for dried prunes received by handlers from producers and dehydrators under Marketing Order No. 993 for the 2002–03 crop year. The marketing order regulates the handling of dried prunes produced in California and is administered locally by the Prune Marketing Committee (Committee). This rule would remove the smallest, least desirable of the marketable size dried prunes produced in California from human consumption outlets and allow handlers to dispose of the undersized prunes in such outlets as livestock feed. The Committee estimated that this rule would reduce the excess of dried prunes by approximately 3,800 tons while leaving sufficient prunes to fulfill foreign and domestic trade demand.

DATES: Comments received by April 15, 2002, will be considered prior to issuance of a final rule.

ADDRESSES: Interested persons are invited to submit written comments concerning this rule. Comments must be sent to the Docket Clerk, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW STOP 0237, Washington, DC 20250–0237; Fax: (202) 720–8938, or E-mail: *moab.docketclerk@usda.gov*. All comments should reference the docket number and the date and page number of this issue of the **Federal Register** and will be made available for public inspection in the Office of the Docket Clerk during regular business hours, or can be viewed at: *http://www.ams.usda.gov/fv/moab.html*.

FOR FURTHER INFORMATION CONTACT: Richard P. Van Diest, Marketing Specialist, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 2202 Monterey Street, suite 102B, Fresno, California 93721; telephone: (559) 487–5901, Fax: (559) 487–5906; or George Kelhart, Technical Advisor, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW STOP 0237, Washington, DC 20250–0237; telephone: (202) 720–2491, Fax: (202) 720–8938.

Small businesses may request information on complying with this regulation by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, P.O. Box 96456, room 2525–S, Washington, DC 20090–6456; telephone: (202) 720–2491, Fax: (202) 720–8938, or E-mail: *Jay.Guerber@usda.gov*.

SUPPLEMENTARY INFORMATION: This proposal is issued under Marketing Agreement and Order No. 993, both as amended (7 CFR part 993), regulating the handling of dried prunes produced in California, hereinafter referred to as the "order." The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

The Department of Agriculture (Department) is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is not intended to have retroactive effect. This proposal will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This proposal invites comments on changes to the undersized regulation in § 993.49(c) of the prune marketing order for the 2002–03 crop year for inventory management. The regulation removes prunes passing through specified screen openings. For French prunes, the screen opening would be increased from $^{23}/_{32}$ to $^{24}/_{32}$ of an inch in diameter; and for non-French prunes, the opening would be increased from $^{28}/_{32}$ to $^{30}/_{32}$ of an inch in diameter. This rule would remove the smallest, least desirable of the marketable size dried prunes produced in California from human consumption outlets. This rule would be in effect from August 1, 2002, through July 31, 2003, and was unanimously recommended by the Committee at a November 29, 2001, meeting.

Authority for Undersized Regulations for Inventory Management

Section 993.19b of the prune marketing order defines undersized prunes as prunes which pass freely through a round opening of a specified diameter.

Section 993.49(c) of the prune marketing order establishes an undersized regulation of $^{23}/_{32}$ of an inch for French prunes and $^{26}/_{32}$ of an inch for non-French prunes. These diameter openings have been in effect for quality control purposes. Section 993.49(c) also

VOL
67
ISS
51
MR
15
2002
UMI

provides that the USDA upon a recommendation of the Committee may establish larger openings for undersized dried prunes whenever it is determined that supply conditions for a crop year warrant such regulation.

Section 993.50(g) states in part: "No handler shall ship or otherwise dispose of, for human consumption, the quantity of prunes determined by the inspection service pursuant to § 993.49(c) to be undersized prunes." * * * Pursuant to § 993.52 minimum standards, pack specifications, including the openings prescribed in § 993.49(c), may be modified by the USDA on the basis of a recommendation of the Committee or other information.

Pursuant to the authority in § 993.52 of the order, § 993.400 modifies the undersized prune openings prescribed in § 993.49(c) to permit openings of 23/32 or 24/32 of an inch for French prunes and 28/32 or 30/32 of an inch for non-French prunes.

History of Undersized Regulations Used for Inventory Management

During the 1974–75 and 1977–78 crop years, the undersized prune regulation was established by USDA at 23/32 of an inch in diameter for French prunes and 28/32 of an inch in diameter for non-French prunes. These diameter openings were established in §§ 993.401 and 993.404, respectively (39 FR 32733, September 11, 1974; and 42 FR 49802, September 28, 1977). In addition, the Committee recommended and the Department established volume regulation percentages during the 1974–75 crop year with an undersized regulation at the aforementioned 23/32 and 28/32 inch diameter screen sizes. During the 1975–76 and 1976–77 crop years, the undersized prune regulation was established at 24/32 of an inch for French prunes and 30/32 of an inch for non-French prunes. These diameter openings were established in §§ 993.402 and 993.403 respectively (40 FR 42530, September 15 1975; and 41 FR 37306, September 3, 1976). The prune industry had an excess supply of prunes—particularly small size prunes. Rather than recommending volume regulation percentages for the 1975–76, 1976–77, and 1977–78 crop years, the Committee recommended the establishment of an undersized prune regulation applicable to all prunes received by handlers from producers and dehydrators during each of those crop years.

The objective of the undersized prune regulations during each of those crop years was to preclude the use of small prunes in manufactured prune products such as juice and concentrate. Handlers could not market undersized prunes for human consumption, but could dispose of them in nonhuman outlets such as livestock feed.

With these experiences as a basis, the marketing order was amended on August 1, 1982, establishing the continuing quality-related regulation for undersized French and non-French prunes under § 993.49(c). That regulation has removed from the marketable supply those prunes which are not desirable for use in prune products.

As in the 1970's, the prune industry is currently experiencing an excess supply of prunes, including the smaller sizes. During the 1998–99 crop year, an undersized prune regulation was established at 24/32 of an inch for French prunes, and 30/32 of an inch for non-French prunes. These diameter openings were established in § 993.405 (63 FR 20058, April 23, 1998). With larger than desired carryin inventories and a 1999–2000 prune crop of about 172,000 natural condition tons, the Committee unanimously recommended continuing with an undersized prune regulation at 24/32 of an inch in diameter for French prunes and 30/32 of an inch in diameter for non-French prunes. These diameter openings were established in § 993.406 (64 FR 23759, May 4, 1999) and made effective from August 1, 1999, through July 31, 2000. Because carryin inventories were larger than desired and the 2000–01 prune crop was expected to be about 203,000 natural condition tons, the Committee unanimously recommended continuing with an undersized prune regulation at 24/32 of an inch in diameter for French prunes and 30/32 of an inch in diameter for non-French prunes. These diameter openings were established in § 993.407 (65 FR 29945, May 10, 2000) and made effective from August 1, 2000, through July 31, 2001. Because supplies were expected to remain excessive in 2001–02, the Committee again unanimously recommended continuing with an undersized prune regulation at 24/32 of an inch in diameter for French prunes and 30/32 of an inch in diameter for non-French prunes. These diameter openings were established in § 993.408 (66 FR 30642, June 7, 2001) and made effective from August 1, 2001, through July 31, 2002.

For the 1998–99 crop year, the carryin inventory level reached a record high of 126,485 natural conditions tons. Excessive inventories tend to dampen producer returns, and cause weak marketing conditions. The carryin for the 1999–2000 crop year was reduced to 59,944 natural condition tons. This reduction was due to the low level of salable production in 1998–99 (about 102,521 natural condition tons and 50 percent of a normal size crop) and the undersized prune regulation. The carryin for the 2000–01 crop increased to 65,131 natural condition tons. This increase was due to a larger crop of about 178,000 natural condition tons and reduced shipments during the 1999–2000 crop year. The carryin for the 2001–02 crop increased to 100,829 natural condition tons. This increase was due to a larger crop size of about 219,000 natural condition tons and a modest increase in shipments during the 2000–01 crop year. According to the Committee, the desired inventory level to keep trade distribution channels full while awaiting the new crop has ranged between 35,353 and 42,071 natural condition tons since the 1996–97 crop year while the actual inventory has ranged between 59,944 and 126,485 natural condition tons since that year. The desired inventory level for early season shipments fluctuates from year-to-year depending on market conditions.

At its meeting on November 29, 2001, the Committee unanimously recommended continuing an undersized prune regulation at 24/32 of an inch in diameter for French prunes and 30/32 of an inch in diameter for non-French prunes during the 2002–03 crop year for supply management purposes. This regulation would be in effect from August 1, 2002, through July 31, 2003.

The Committee estimated that there would be an excess of about 15,422 natural condition tons of dried prunes as of July 31, 2002. This proposed rule would continue to remove small-sized prunes from human consumption channels, consistent with the undersized prune regulation that was implemented for the 1998–99, 1999–2000, 2000–01, and 2001–02 crop years. It is estimated that approximately 3,800 natural condition tons of small prunes would be removed from human consumption channels during the 2002–03 crop year. This would leave sufficient prunes to fill domestic and foreign trade demand during the 2002–03 crop year, and provide an adequate carryout on July 31, 2003, for early season shipments until the new crop is available for shipment. According to the Committee, the desired inventory level to keep trade distribution channels full while awaiting the 2002–03 crop is about 41,000 natural condition tons.

In its deliberations, the Committee reviewed statistics reflecting: (1) A worldwide prune demand which has been relatively stable at about 260,000 tons; (2) a worldwide oversupply that is expected to continue growing this century (estimated at 317,628 natural condition tons by the year 2006); (3) a continuing oversupply situation in California caused by increased production from increased plantings and higher yields per acre (between the 1990–91 and 2000–01 crop years, the yields ranged from 1.2 to 2.6 versus a 10-year average of 2.1 tons per acre); (4) California's continued excess inventory situation; and (5) extremely low producer prices. The production of these small sizes ranged from 1,335 to 8,778 natural condition tons during the 1990–91 through the 1999–2000 crop years. The Committee concluded that it has to continue utilizing all available supply management techniques to accelerate the return to a balanced supply/demand situation in the interest of the California dried prune industry. There already have been efforts to reduce burdensome supplies. Through an industry-funded tree removal program that was initiated in the fall of 2001, about 3,500 bearing acres of prune plum trees were removed. The Committee also recommended removal of prune plum trees through a USDA funded program, wherein growers would be encouraged to remove up to 20,000 bearing acres of prune plum trees. A proposed rule with request for comments was published by USDA in the December 17, 2001, **Federal Register** (66 FR 64918). The proposed changes to the undersized regulation for the 2002–03 crop year and the expected removal of prune plum trees are intended to bring supplies in line with market needs.

Despite these supply management efforts, the industry's oversupply situation may continue over the next few years due to new prune plantings in recent years with higher yields per acre. These plantings have a higher tree density per acre than the older prune plantings. During the 1990–91 crop year, the non-bearing acreage totaled 5,900 acres; but by 1998–99, the non-bearing acreage had quadrupled to more than 26,000 acres. The non-bearing acreage has subsequently been reduced to 15,000 acres during the 2000–01 crop year. The 1996–97 through 2000–01 yields have ranged from 1.2 to 2.6 tons per acre. Over the last 10 years, the average was 2.1 tons per acre.

The 2001–02 dried prune crop is expected to be 139,000 natural condition tons. The Committee recently estimated that another large crop of about 200,000 natural condition tons could be expected for the 2002–03 crop year, because of new bearing acreage coming into production and high yields.

The 1997–98 crop year producer prices for the 24/32 of an inch in diameter French prunes have been about $40–$50 per ton, about $260–$270 per ton below the cost of production. During the 2001–02 crop year, feedlot prices are expected to be about $20 to $40 per ton for the 24/32 of an inch in diameter French prunes, which is about $270–$290 per ton below the cost of production. The lower producer prices are expected to continue until the prune supply and demand come more closely into alignment.

The intent of this proposal is to remove small sizes which have limited economic value, help reduce excess prune inventories, and to improve producer returns. Average producer returns currently are below the cost of production and the proposal would assist in enhancing returns.

The 1998–99, 1999–2000, 2000–01, and 2001–02 undersized prune rules of 24/32 of an inch for French prunes and 30/32 of an inch for non-French prunes have expedited the reduction of small prune inventories, but more needs to be done to bring supplies into balance with market demand. The excess inventory on July 31, 2001, was 100,829 natural condition tons, and only about 3,800 natural condition tons of dried prunes are expected to be removed from the 2001–02 marketable supply by the current undersized regulation. The Committee believes that the same undersized regulation also should be implemented during the 2002–03 crop year to continue reducing the inventories of small prunes, to help reduce the expected large 2002–03 prune crop, and more quickly bring supplies in line with demand. Attainment of this goal would benefit all of the producers and handlers of California prunes.

The recommended decision of June 1, 1981 (46 FR 29271) regarding undersized prunes states that the undersized prune regulation at the 23/32 and 28/32 inch diameter size openings would be continuous for the purposes of quality control even in above parity situations. Congress intended marketing orders to foster income equity for agricultural producers with non-agricultural producers, and used parity as a means of comparison. Parity compares agricultural producer prices against those for non-agricultural producers during the early 1900's, when income for agricultural producers and non-agricultural producers were generally thought to be fair. It further states that any change (i.e. increase) in the size of those openings would not be for the purpose of establishing a new quality-related minimum. Larger openings would only be applicable when supply conditions warranted the regulation of a larger quantity of prunes as undersized prunes. Thus, any regulation prescribing openings larger than those in § 993.49(c) should not be implemented when the grower average price is expected to be above parity. The season average price received by prune growers ranged from 39 percent to 62 percent of parity during the 1994 through 1999 seasons. As discussed later, the average grower price for prunes during the 2002–03 crop year is not expected to be above parity, and implementation of this more restrictive undersized regulation would be appropriate in reference to parity.

Section 8e of the Act requires that when certain domestically produced commodities, including prunes, are regulated under a Federal marketing order, imports of that commodity must meet the same or comparable grade, size, quality, or maturity requirements for the domestically produced commodity. This action would not impact the dried prune import regulation because the action would affect inventory management, not quality control. The smaller diameter openings of 23/32 of an inch for French prunes and 28/32 of an inch for non-French prunes were implemented to improve product quality. The recommended increases to 24/32 of an inch in diameter for French prunes and 30/32 of an inch in diameter for non-French prunes are for purposes of inventory management. Therefore, the increased diameters would not be applied to imported prunes.

Initial Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities. Accordingly, AMS has prepared this initial regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 1,205 producers of dried prunes in the production area and approximately 24 handlers subject to regulation under the marketing order. Small agricultural producers are defined by the Small Business Administration (13 CFR 121.201) as those having annual receipts of less than $750,000, and small agricultural service firms are defined as

VOL
67
ISS
51
MR
15
2002
UMI

those whose annual receipts are less than $5,000,000.

An updated industry profile shows that 9 out of 24 handlers (37.5 percent) shipped over $5,000,000 worth of dried prunes and could be considered large handlers by the Small Business Administration. Fifteen of the 24 handlers (62.5 percent) shipped under $5,000,000 worth of prunes and could be considered small handlers. An estimated 32 producers, or less than 3 percent of the 1,205 total producers, would be considered large growers with annual incomes over $750,000. The majority of handlers and producers of California dried prunes may be classified as small entities.

As recommended by the Committee, this proposed rule would establish an undersized prune regulation of 24/32 of an inch in diameter for French prunes and 30/32 of an inch in diameter for non-French prunes for the 2002–03 crop year for inventory management. This change in regulation would result in more of the smaller-sized prunes being classified as undersized prunes and is expected to benefit producers, handlers, and consumers. The larger screen openings currently in place for 2001–02 are the same as proposed for 2002–2003 and are expected to remove only 3,806 tons of dried prunes from the excess marketable supply. Implementation of the larger openings in 2002–03 is expected to remove approximately 3,800 tons from the marketable production.

The Committee estimates carryout inventories at July 31, 2002, to be 56,195 tons. This is 15,422 tons greater than desirable carryout inventories. This amount of inventory reflects a serious supply-demand imbalance in the industry. In addition, grower prices are reported at an average of $763 per ton for the 2001–02 crop year. This compares to $845 per ton for the 2000–01 season, or a decrease of 9.7 percent. The $763 average grower price is substantially below total cost of production of $1,724 per ton and the total variable cost of production of $985 estimated for 2001–2002, meaning that most producers may not be earning sufficient returns to cover fixed costs. Some producers will continue to operate in the short run as long as prices are above variable costs, but others will begin to cease production in the longer run if prices do not recover to levels exceeding the total cost of production.

A tree removal program funded by the industry and a USDA-funded program are in various stages of implementation. If these programs are successful in removing 20,000 bearing acres from production, marketable production will be reduced. Even with these tree removal programs, total available supply is estimated at 242,195 tons for the 2002–03 crop year (marketable production estimated at 186,000 tons and 56,195 tons of carryin inventories). Total demand is estimated at 167,591 tons, resulting in carryout inventories of 74,604 tons. With this large estimated crop size, inventories will increase and remain in excess of the industry's desired inventory of 40,000 tons.

Inventories of this magnitude have a significant depressing impact on grower payments. Growers do not receive payments until inventories are completely sold. The costs of maintaining these inventories are deducted from grower payments.

This action would result in an additional 3,800 tons being removed from the total available supply. An econometric model shows that this proposed rule would strengthen growers' prices modestly by $11 per ton. This price is still expected to be less than the cost of production for 2002–2003, estimated at $1,032 per ton.

Because the benefits and costs of the proposed action would be directly proportional to the quantity of 24/32 screen French prunes and 30/32 screen non-French prunes produced or handled, small businesses should not be disproportionately affected by the proposal. While variation in sugar content, prune density, and dry-away ratio vary from county to county, they also vary from orchard to orchard and season to season. In the major producing areas of the Sacramento and San Joaquin Valleys (which account for over 99 percent of the State's production), the prunes produced are homogeneous enough that the proposal should not be viewed as inequitable by large and small producers in any area of the State.

The quantity of small prunes in a lot is not dependent on whether a producer or handler is small or large; but is primarily dependent on cultural practices, soil composition, and water costs. The cost to minimize the quantity of small prunes is similar for small and large entities. The anticipated benefits of this rule are not expected to disproportionately impact small handlers or producers. The only additional costs on producers and handlers expected from the increased openings would be the disposal of additional tonnage (now estimated to be about 3,800 tons) to non-human consumption outlets. These costs are expected to be minimal and would be offset by the benefits derived by the elimination of some of the excess supply of small-sized prunes.

At the November 29, 2001, meeting, the Committee discussed the financial impact of this change on handlers and producers. Handler and producers receive higher returns for the larger size prunes. Prunes eliminated through the implementation of this rule have very little value. As mentioned earlier, the current situation for producers is quite bleak with producers losing about $270–$290 on every ton of small-sized prunes delivered to handlers. During the 2002–03 crop year, the feedlot prices for 24/32 screen French prunes are expected to be about $20 to $40 per ton. This price is similar to the $20–$40 price received during the 2001–02 crop year. The cost of drying a ton of such prunes is $260 per ton at a 4 to 1 dry-away ratio, transportation is at least $20 per ton, and the producer assessment paid to the California Prune Board (a body which administers the State marketing order for promotion) is $30 per ton for a total cost of about $310 per ton. This equates to a loss of about $270–$290 per ton for every ton of 24/32 screen French prunes produced and delivered to handlers.

Utilizing data provided by the Committee, USDA has evaluated the impact of the proposed undersized regulation change upon producers and handlers in the industry. The analysis shows that a reduction in the marketable production and handler inventories could result in higher season-average prices, which would benefit all producers. The removal of the smallest, least desirable of the marketable dried prunes produced in California from human consumption outlets would eliminate an estimated 3,800 tons of small-sized dried prunes during the 2002–03 crop year from the marketplace. This would help lessen the negative marketing and pricing effects resulting from the excess inventory situation facing the industry. California prune handlers reported that they held 100,829 tons of natural condition prunes on July 31, 2001, the end of the 2000–01 crop year. The 100,829 ton year-end inventory is larger than what is desired for early season shipments by the prune industry. The desired inventory level is based on an average 12-week supply to keep trade distribution channels full while awaiting new crop. Currently, it is about 41,000 natural condition tons. This leaves a 2001–02 inventory surplus of about 60,000 tons. The undersized regulation would help reduce the surplus, but the anticipated large 2002–03 prune crop is expected to continue the supply imbalance.

As the marketable dried prune production and surplus prune inventories are reduced through this proposal, and producers continue to implement improved cultural and

thinning practices to produce larger-sized prunes, continued improvement in producer returns is expected.

For the 1991–92 through the 1999–2000 crop years, the season average price received by the producers ranged from a high of $1,140 per ton to a low of $764 per ton during the 1998–99 crop year. The season average price received by producers during that 9-year period ranged from 39 percent to 68 percent of parity. Based on available data and estimates of prices, production, and other economic factors, the season average producer price for 2001–02 season is expected to be about the same as the 2000–01 season average producer price of $809 per ton, or about 36 percent of parity.

The Committee discussed alternatives to this change, including making no changes to the undersized prune regulation and allowing market dynamics to foster prune inventory adjustments through lower prices on the smaller prunes. While reduced grower prices for small prunes are expected to contribute toward a slow reduction in dried prune inventories, the Committee believed that the undersized rule change is needed to expedite that reduction. The Committee also considered the potential impact of tree removals through the industry-funded program which removed about 3,500 acres, and the proposed tree removal program to be funded through USDA (California Prune/Plum Diversion Program), but concluded that these efforts alone were not likely to reduce the oversupply of small dried prunes sufficiently. With the excess tonnage of dried prunes, the Committee also considered establishing a reserve pool and diversion program to reduce the oversupply situation during the 2001–02 crop year. This alternative was not widely supported for a number of reasons. Reserve pools for prunes have historically been implemented "across the board" as far as sizes are concerned. While there is an exchange provision that allows handlers to remove larger prunes from the pool by replacing them with smaller prunes and the value difference in cash, this would be a comparatively cumbersome, expensive-to-administer alternative to changing the undersized rule as proposed. A third alternative discussed was to advance to a 25/32 screen undersized regulation for French prunes. However, handlers expressed concern that this would reduce the amount of manufacturing prunes (approximately 6,000 tons) available for the manufacture of prune juice and concentrate. This would increase the prices of these products.

Section 8e of the Act requires that when certain domestically produced commodities, including prunes, are regulated under a Federal marketing order, imports of that commodity must meet the same or comparable grade, size, quality, or maturity requirements as the domestically produced commodity. This action does not impact the dried prune import regulation because the action to be implemented is for inventory management, not quality control purposes. The smaller diameter openings of 23/32 of an inch for French prunes and 28/32 of an inch for non-French prunes were implemented for the purpose of improving product quality. The recommended increases to 24/32 of an inch in diameter for French prunes and 30/32 of an inch in diameter for non-French prunes are for purposes of inventory management. Therefore, the increased diameters would not be applied to imported prunes.

This action would not impose any additional reporting or recordkeeping requirements on either small or large California dried prune handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies.

The Department has not identified any relevant Federal rules that duplicate, overlap or conflict with this proposed rule.

In addition, the Committee's meeting was widely publicized throughout the prune industry and all interested persons were invited to attend the meeting and participate in Committee deliberations on all issues. Like all Committee meetings, the November 29, 2001, meeting was a public meeting and all entities, both large and small, were able to express views on this issue. The Committee itself is composed of twenty-two members. Seven are handlers, fourteen are producers, and one is a public member. Finally, interested persons are invited to submit information on the regulatory and informational impacts of this action on small businesses.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: *http://www.ams.usda.gov/fv/moab.html*. Any questions about the compliance guide should be sent to Jay Guerber at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

The Committee requested a comment period through April 15, 2002, to allow interested persons to respond to this proposal. This longer comment period is needed to give the Committee more time to observe the bloom period during the spring and industry shipment trends during the year and allow sufficient time to comment to the Department concerning any changes that are deemed appropriate. All written comments timely received will be considered before a final determination is made on this matter.

List of Subjects in 7 CFR Part 993

Marketing agreements, Plums, Prunes, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 993 is proposed to be amended as follows:

PART 993—DRIED PRUNES PRODUCED IN CALIFORNIA

1. The authority citation for 7 CFR part 993 continues to read as follows:

Authority: 7 U.S.C. 601–674.

Note: This section will not appear in the Code of Federal Regulations.

2. A new § 993.409 is added to read as follows:

§ 993.409 Undersized prune regulation for the 2002–03 crop year.

Pursuant to §§ 993.49(c) and 993.52, an undersized prune regulation for the 2002–03 crop year is hereby established. Undersized prunes are prunes which pass through openings as follows: for French prunes, 24/32 of an inch in diameter; for non-French prunes, 30/32 of an inch in diameter.

Dated: March 11, 2002.

A.J. Yates,

Administrator, Agriculture Marketing Service.

BILLING CODE 3410–02–P

NUCLEAR REGULATORY COMMISSION

10 CFR Part 72

RIN 3150–AG94

List of Approved Spent Fuel Storage Casks: NAC–MPC Revision

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is proposing to amend its regulations revising the NAC International Multi-Purpose Canister (NAC–MPC) cask system listing within the "List of Approved Spent Fuel Storage Casks" to include Amendment 2 to Certificate of Compliance (CoC)

VOL
67
ISS
51
MR
15
2002
UMI

Number 1025. This amendment would allow for modification of the design of the cask system to accommodate a new type of fuel. The NAC–MPC system component modifications would include increased length of the fuel basket and canister, transfer cask, and vertical concrete cask. Changes would also include a redesigned fuel basket to accommodate 26 fuel assemblies, with an alternate 24-fuel assembly configuration and increased transfer cask radial shielding. The CoC would be revised in its entirety to include a reference to the new type of fuel and a revised format. The Technical Specifications (TS) would also be revised in their entirety to include specifications for the new type of fuel, new operational limits, and to incorporate a revised format for the TS.

DATES: Comments on the proposed rule must be received on or before April 15, 2002.

ADDRESSES: Submit comments to: Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attn: Rulemakings and Adjudications Staff.

Deliver comments to 11555 Rockville Pike, Rockville, MD, between 7:30 a.m. and 4:15 p.m. on Federal workdays.

Certain documents related to this rulemaking, as well as all public comments received on this rulemaking, may be viewed and downloaded electronically via the NRC's rulemaking Web site at *http://ruleforum.llnl.gov*. You may also provide comments via this website by uploading comments as files (any format) if your web browser supports that function. For information about the interactive rulemaking site, contact Ms. Carol Gallagher, (301) 415–5905; e-mail *CAG@nrc.gov*.

Certain documents related to this rule, including comments received by the NRC, may be examined at the NRC Public Document Room, 11555 Rockville Pike, Rockville, MD. For more information, contact the NRC Public Document Room (PDR) Reference staff at 1–800–397–4209, 301–415–4737 or by e-mail to *pdr@nrc.gov*.

Documents created or received at the NRC after November 1, 1999, are also available electronically at the NRC's Public Electronic Reading Room on the Internet at *http://www.nrc.gov/reading-rm/adams.html*. From this site, the public can gain entry into the NRC's Agencywide Documents Access and Management System (ADAMS), which provides text and image files of NRC's public documents. An electronic copy of the proposed Certificate of Compliance (CoC) and preliminary safety evaluation report (SER) can be found under ADAMS Accession No. ML013480571. If you do not have access to ADAMS or if their problems in accessing the documents located in ADAMS, contact the NRC PDR Reference staff at 1–800–397–4209, 301–415–4737or by e-mail to *pdr@nrc.gov*.

FOR FURTHER INFORMATION CONTACT: Roger W. Broseus, telephone (301) 415–7608, e-mail, *RWB@nrc.gov* of the Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION: For additional information see the direct final rule published in the final rules section of this **Federal Register**.

Procedural Background

This rule is limited to the changes contained in Amendment 2 to CoC No. 1025 and does not include other aspects of the NAC–MPC cask system design. The NRC is using the "direct final rule procedure" to issue this amendment because it represents a limited and routine change to an existing CoC that is expected to be noncontroversial. Adequate protection of public health and safety continues to be ensured.

Because NRC considers this action noncontroversial and routine, the proposed rule is being published concurrently as a direct final rule. The direct final rule will become effective on May 29, 2002. However, if the NRC receives significant adverse comments by April 15, 2002, then the NRC will publish a document that withdraws this action and will address the comments received in response to the proposed amendments published elsewhere in this issue of the **Federal Register**. A significant adverse comment is a comment where the commenter explains why the rule would be inappropriate, including challenges to the rule's underlying premise or approach, or would be ineffective or unacceptable without a change. A comment is adverse and significant if:

(1) The comment opposes the rule and provides a reason sufficient to require a substantive response in a notice-and-comment process. For example, in a substantive response:

(a) The comment causes the NRC staff to reevaluate (or reconsider) its position or conduct additional analysis;

(b) The comment raises an issue serious enough to warrant a substantive response to clarify or complete the record; or

(c) The comment raises a relevant issue that was not previously addressed or considered by the NRC staff.

(2) The comment proposes a change or an addition to the rule, and it is apparent that the rule would be ineffective or unacceptable without incorporation of the change or addition.

(3) The comment causes the NRC staff to make a change (other than editorial) to the CoC or TS.

These comments will be addressed in a subsequent final rule. The NRC will not initiate a second comment period on this action.

List of Subjects in 10 CFR Part 72

Administrative practice and procedure, Criminal penalties, Manpower training programs, Nuclear materials, Occupational safety and health, Penalties, Radiation protection, Reporting and recordkeeping requirements, Security measures, Spent fuel, Whistleblowing.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended; the Energy Reorganization Act of 1974, as amended; and 5 U.S.C. 553, the NRC is proposing to adopt the following amendments to 10 CFR part 72.

PART 72—LICENSING REQUIREMENTS FOR THE INDEPENDENT STORAGE OF SPENT NUCLEAR FUEL AND HIGH-LEVEL RADIOACTIVE WASTE

1. The authority citation for Part 72 continues to read as follows:

Authority: Secs. 51, 53, 57, 62, 63, 65, 69, 81, 161, 182, 183, 184, 186, 187, 189, 68 Stat. 929, 930, 932, 933, 934, 935, 948, 953, 954, 955, as amended, sec. 234, 83 Stat. 444, as amended (42 U.S.C. 2071, 2073, 2077, 2092, 2093, 2095, 2099, 2111, 2201, 2232, 2233, 2234, 2236, 2237, 2238, 2282); sec. 274, Pub. L. 86–373, 73 Stat. 688, as amended (42 U.S.C. 2021); sec. 201, as amended, 202, 206, 88 Stat. 1242, as amended, 1244, 1246 (42 U.S.C. 5841, 5842, 5846); Pub. L. 95–601, sec. 10, 92 Stat. 2951 as amended by Pub. L. 102–486, sec. 7902, 106 Stat. 3123 (42 U.S.C. 5851); sec. 102, Pub. L. 91–190, 83 Stat. 853 (42 U.S.C. 4332); secs. 131, 132, 133, 135, 137, 141, Pub. L. 97–425, 96 Stat. 2229, 2230, 2232, 2241, sec. 148, Pub. L. 100–203, 101 Stat. 1330–235 (42 U.S.C. 10151, 10152, 10153, 10155, 10157, 10161, 10168).

Section 72.44(g) also issued under secs. 142(b) and 148(c), (d), Pub. L. 100–203, 101 Stat. 1330–232, 1330–236 (42 U.S.C. 10162(b), 10168(c),(d)). Section 72.46 also issued under sec. 189, 68 Stat. 955 (42 U.S.C. 2239); sec. 134, Pub. L. 97–425, 96 Stat. 2230 (42 U.S.C. 10154). Section 72.96(d) also issued under sec. 145(g), Pub. L. 100–203, 101 Stat. 1330–235 (42 U.S.C. 10165(g)). Subpart J also issued under secs. 2(2), 2(15), 2(19), 117(a), 141(h), Pub. L. 97–425, 96 Stat. 2202, 2203, 2204, 2222, 2244, (42 U.S.C. 10101, 10137(a), 10161(h)). Subparts K and L are also issued under sec. 133, 98 Stat. 2230 (42 U.S.C. 10153) and sec. 218(a), 96 Stat. 2252 (42 U.S.C. 10198).

2. In § 72.214, Certificate of Compliance 1025 is revised to read as follows:

§ 72.214 List of approved spent fuel storage casks.

* * * * *

Certificate Number: 1025.

Initial Certificate Effective Date: April 10, 2000.

Amendment Number 1 Effective Date: November 13, 2001.

Amendment Number 2 Effective Date: May 29, 2002.

SAR Submitted by: NAC International.

SAR Title: Final Safety Analysis Report for the NAC-Multipurpose Canister System (NAC-MPC System).

Docket Number: 72–1025.

Certificate Expiration Date: April 10, 2020.

Model Number: NAC–MPC.

BILLING CODE 7590–01–P

DEPARTMENT OF JUSTICE

28 CFR Part 16

[AAG/A Order No. 259–2002]

Privacy Act of 1974; Implementation

AGENCY: Department of Justice.

ACTION: Proposed rule.

SUMMARY: The Department of Justice, Bureau of Prisons, proposes to exempt a Privacy Act system of records from the following subsections of the Privacy Act: (e)(1) and (e)(5). This system of records is the "Inmate Trust Fund Accounts and Commissary Record System" (JUSTICE/BOP–006), as modified and described in today's notice section of the **Federal Register**. This system continues to be exempted from the subsections of the Privacy Act as previously promulgated.

The additional exemptions are necessary to preclude the compromise of institution security; to ensure the safety of inmates, Bureau personnel and the public; to protect third party privacy; to protect law enforcement and investigatory information; and/or to otherwise ensure the effective performance of the Bureau's law enforcement functions.

DATES: Submit any comments by May 14, 2002.

ADDRESSES: Address all comments to Mary Cahill, Management and Planning Staff, Justice Management Division, Department of Justice, Washington, DC 20530 (1400 National Place Building).

FOR FURTHER INFORMATION CONTACT: Mary Cahill (202) 307–1823.

This order relates to individuals rather than small business entities. Nevertheless, pursuant to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601–612, this order will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 28 CFR Part 16

Administrative practices and procedure, Freedom of Information Act, Government in the Sunshine Act, and Privacy Act.

Pursuant to the authority vested in the Attorney General by 5 U.S.C. 552a and delegated to me by Attorney General Order No. 793–78, it is proposed to amend 28 CFR part 16 as follows:

1. The authority for Part 16 continues to read as follows:

Authority: 5 U.S.C. 301, 552, 552a, 552b(g) and 553; 18 U.S.C. 4203(a)(1); 28 U.S.C. 509, 510, 534, 31 U.S.C. 3717 and 9701.

2. Section is amended by adding paragraphs (l) and (m) to read as follows:

§ 16.97 Exemption of Federal Bureau of Prisons Systems—limited access.

* * * * *

(l) The following system of records is exempted pursuant to 5 U.S.C. 552a(j) from subsections (e)(1) and (e)(5): Bureau of Prisons Inmate Trust Fund Accounts and Commissary Record System, (JUSTICE/BOP–006).

(m) These exemptions apply only to the extent that information in these systems is subject to exemption pursuant to 5 U.S.C. 552a(j). Where compliance would not appear to interfere with or adversely affect the law enforcement process, and/or where it may be appropriate to permit individuals to contest the accuracy of the information collected, e.g. public source materials, or those supplied by third parties, the applicable exemption may be waived, either partially or totally, by the Bureau. Exemptions from the particular subsections are justified for the following reasons:

(1) From subsection (e)(1) to the extent that the Bureau may collect information that may be relevant to the law enforcement operations of other agencies. In the interests of overall, effective law enforcement, such information should be retained and made available to those agencies with relevant responsibilities.

(2) From subsection (e)(5) because in the collection and maintenance of information for law enforcement purposes, it is impossible to determine in advance what information is accurate, relevant, timely and complete. Data which may seem unrelated, irrelevant or incomplete when collected may take on added meaning or significance as an investigation progresses or with the passage of time, and could be relevant to future law enforcement decisions. In addition, amendment of the records may interfere with law enforcement operations and would impose an impossible administrative burden by requiring that law enforcement information be continuously reexamined, even where the information may have been collected from the record subject or other criminal justice agencies. The restrictions of subsection (e)(5) would restrict and delay trained correctional managers from timely exercising their judgment in managing the inmate population and providing for the safety and security of the prisons and the public.

Dated: February 28, 2002.

Robert F. Diegelman,

Acting Assistant Attorney General for Administration.

the effective performance of the Bureau's law enforcement functions.

DATES: Submit any comments by May 14, 2002.

ADDRESSES: Address all comments to Mary Cahill, Management and Planning Staff, Justice Management Division, Department of Justice, Washington, DC 20530 (1400 National Place Building).

FOR FURTHER INFORMATION CONTACT: Mary Cahill, (202) 307–1823.

This order relates to individuals rather than small business entities. Nevertheless, pursuant to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601–612, this order will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 28 CFR Part 16

Administrative practices and procedure, Freedom of Information Act, Government in the Sunshine Act, and Privacy Act.

Pursuant to the authority vested in the Attorney General by 5 U.S.C. 552a and delegated to me by Attorney General Order No. 793–78, it is proposed to amend 28 CFR part 16 as follows:

1. The authority for part 16 continues to read as follows:

Authority: 5 U.S.C. 301, 552, 552a, 552b(g) and 553; 18 U.S.C. 4203(a)(1); 28 U.S.C. 509, 510, 534; 31 U.S.C. 3717 and 9701.

2. Section 16.97 is amended by adding paragraphs (n) and (o) to read as follows:

§ 16.97 Exemption of Federal Bureau of Prisons Systems—limited access

* * * * *

(n) The following system of records is exempted pursuant to 5 U.S.C. 552a(j) from subsections (e)(1) and (e)(5): Bureau of Prisons Inmate Physical and Mental Health Records System, (JUSTICE/BOP–007).

(o) These exemptions apply only to the extent that information in this system is subject to exemption pursuant to 5 U.S.C. 552a(j). Where compliance would not appear to interfere with or adversely affect the law enforcement process, and/or where it may be appropriate to permit individuals to contest the accuracy of the information collected, e.g. public source materials, or those supplied by third parties, the applicable exemption may be waived, either partially or totally, by the Bureau. Exemptions from the particular subsections are justified for the following reasons:

(1) From subsection (e)(1) to the extent that the Bureau may collect information that may be relevant to the law enforcement operations of other agencies. In the interests of overall, effective law enforcement, such information should be retained and made available to those agencies with relevant responsibilities.

(2) From subsection (e)(5) because in the collection and maintenance of information for law enforcement purposes, it is impossible to determine in advance what information is accurate, relevant, timely and complete. Data which may seem unrelated, irrelevant or incomplete when collected may take on added meaning or significance during the course of an investigation or with the passage of time, and could be relevant to future law enforcement decisions. In addition, because many of these records come from sources outside the Bureau of Prisons, it is administratively impossible for them and the Bureau to ensure compliance with this provision. The restrictions of subsection (e)(5) would restrict and delay trained correctional managers from timely exercising their judgment in managing the inmate population and providing for the health care of the inmates and the safety and security of the prisons and the public.

Dated February 22, 2002.

Robert F. Diegelman,

Acting Assistant Attorney General for Administration.

BILLING CODE 4410–05–P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

36 CFR Part 1275

RIN 3095–AB07

Nixon Presidential Materials; Reproduction

AGENCY: National Archives and Records Administration (NARA).

ACTION: Proposed rule.

SUMMARY: NARA is proposing to modify the regulations for obtaining copies of the Nixon White House tape recordings which are in NARA custody. First, NARA is now allowing the public to obtain copies of all Nixon White House tape recordings after they are officially released to the public. Previously, NARA only permitted the public to obtain selected tape recordings. Second, the ban on self-service copying of these tapes is lifted. These changes reflect modifications in the 1996 Nixon Tapes Settlement Agreement that became effective April 1, 2001. These regulations apply to the public.

DATES: Comments are due by May 14, 2002.

ADDRESSES: Comments must be sent to Regulation Comments Desk (NPOL), Room 4100, Policy and Communications Staff, National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740–6001. They may be faxed to 301–713–7270. You may also comment via email to comments@nara.gov. See the **SUPPLEMENTARY INFORMATION** for details.

FOR FURTHER INFORMATION CONTACT: Kim Richardson at telephone number 301–713–7360, ext. 240, or fax number 301–713–7270.

SUPPLEMENTARY INFORMATION: NARA is updating the regulations affecting research use of the Nixon Presidential Materials in NARA custody to reflect a change in the 1996 Nixon Tapes Settlement Agreement. NARA is amending § 1275.64, § 1275.66, and Appendix A of the regulations.

- The proposed § 1275.64 includes a provision allowing for the reproduction of tape recordings opened to the public. Effective April 20, 2001, the Nixon estate agreed to allow NARA to make available for sale and copying all tape recordings of conversations from the Nixon presidency that have been previously opened. Prior to April 20, 2001, NARA only permitted the public to obtain copies of selected tape recordings through a vendor. Self-service copying was not permitted. These changes to the negotiated Nixon Tapes Settlement Agreement are not applicable to tapes that have not yet been released.
- The proposed § 1275.66 is expanded to include tape recordings. This change allows the self-service copying of tape recordings.
- The proposed introductory paragraph to Appendix A—Settlement Agreement, waives paragraph 11 of the Agreement. The rule in paragraph 11 states that the public has to wait until January 1, 2003, to copy tapes not made publicly available before April 12, 1996. This rule is no longer applicable.

Please submit email comments within the body of your email message or attach comments as an ASCII file avoiding the use of special characters and any form of encryption. Please also include "Attn: 3095–AB07 and your name and return address in your Internet message. If you do not receive a confirmation that we have received your email message, contact the Regulation Comment Desk at 301–713–7360, ext. 226.

This proposed rule is a significant regulatory action for the purposes of Executive Order 12866 and has been reviewed by the Office of Management and Budget. As required by the Regulatory Flexibility Act, I certify that this rule will not have a significant impact on a substantial number of small entities. This regulation does not have any federalism implications.

List of Subjects in 36 CFR Part 1275

Archives and records.

For the reasons set forth in the preamble, NARA proposes to amend part 1275 of title 36, Code of Federal Regulations, as follows:

PART 1275—PRESERVATION AND PROTECTION OF AND ACCESS TO THE PRESIDENTIAL HISTORICAL MATERIALS OF THE NIXON ADMINISTRATION

1. The authority citation for part 1275 is revised to read as follows:

Authority: 44 U.S.C. 2104, 2111 note.

2. Amend § 1275.64 by revising paragraph (d) to read as follows:

§ 1275.64 Reproduction of tape recordings of Presidential conversations.

* * * * *

(d) The reproduction for members of the public of the reference copies of the available tape recordings described in paragraph (a) of this section will be permitted as follows: Copies of tape recordings will be made available following the public release of the tape segments contemplated in § 1275.42(a). Effective as of April 20, 2001, NARA will allow members of the public to obtain copies of all tapes that have been made available to the public by that date and that subsequently become available as they are released. Such copying will be controlled by NARA or its designated contractor. The fees for the reproduction of the tape recordings under this section shall be those prescribed in the schedule set forth in part 1258 of this chapter.

* * * * *

3. Amend § 1275.66 by revising paragraph (a) to read as follows:

§ 1275.66 Reproduction and authentication of other materials.

(a) Copying of materials, including tape recordings described in § 1275.64, may be done by NARA, by a contractor designated by NARA, or by researchers using self-service copiers or copying equipment.

* * * * *

4. Amend Appendix A to Part 1275—Settlement Agreement, by revising the introductory paragraph to read as follows:

Appendix A to Part 1275—Settlement Agreement

Settlement Agreement filed April 12, 1996, in Stanley I. Kutler and Public Citizen v. John W. Carlin, Archivist of the United States, and William E. Griffin and John H. Taylor, Co-executors of Richard M. Nixon's Estate, Civil Action No. 92–0662–NHJ (D.D.C.) (Johnson, J.). By letter dated April 17, 2001, NARA and the Nixon estate agreed to waive paragraph 11 of this Settlement Agreement, such that the delay on public copying until January 1, 2003, of tapes not made publicly available before April 12, 1996, shall no longer apply. This change is reflected in 36 CFR 1275.64.

* * * * *

Dated: February 8, 2002.

John W. Carlin,

Archivist of the United States.

[FR Doc. 02–6190 Filed 3–14–02; 8:45 am]

BILLING CODE 7515–01–U

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[CA072–FOA, FRL–7158–1]

Proposed Finding of Failure To Attain; State of California, San Joaquin Valley Nonattainment Area

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is today proposing to find that the San Joaquin Valley did not attain the 24-hour and annual particulate matter (PM–10) National Ambient Air Quality Standards (NAAQS) by the deadline mandated in the Clean Air Act (CAA), December 31, 2001. This proposed finding is based on monitored air quality data for the PM–10 NAAQS from 1999 through September 2001.

If EPA finalizes, after public notice and comment, the failure to attain finding, the San Joaquin Valley must submit by December 31, 2002, plan provisions that provide for attainment of the PM–10 air quality standards and that achieve percent annual reductions in PM–10 or PM–10 precursor emissions as required by CAA section 189(d).

DATES: Comments on the proposed action must be received on or before April 15, 2002.

ADDRESSES: Comments may be mailed to: Celia Bloomfield, Planning Office, (AIR–2), Air Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901; or to *bloomfield.celia@epd.gov*.

A copy of this proposed rule and related information are available in the air programs section of EPA Region 9's Web site, *http://www.epa.gov/region09/air*. The docket for this rulemaking is available for inspection during normal business hours at EPA Region 9, Planning Office, Air Division, 17th Floor, 75 Hawthorne Street, San Francisco, California 94105. A reasonable fee may be charged for copying parts of the docket. Please call (415) 947–4148 for assistance.

FOR FURTHER INFORMATION CONTACT: Celia Bloomfield (415) 947–4148, Planning Office (AIR–2), Air Division, EPA Region 9, 75 Hawthorne Street, San Francisco, CA 94105, *bloomfield.celia@epa.gov*.

SUPPLEMENTARY INFORMATION:

I. Background

On July 1, 1987 EPA revised the health-based national ambient air quality standards (NAAQS) (52 FR 24672), replacing standards for total suspended particulates with new standards applying only to particulate matter up to 10 microns in diameter (PM–10). At that time, EPA established two PM–10 standards. The annual PM–10 standard is attained when the expected annual arithmetic average of the 24-hour samples for a period of one year does not exceed 50 micrograms per cubic meter (ug/m^3). The 24-hour PM–10 standard of 150 ug/m^3 is attained if samples taken for 24-hour periods have no more than one expected exceedance per year, averaged over 3 years. See 40 CFR 50.6 and 40 CFR part 50, Appendix K.

Breathing particulate matter can cause significant health effects, including an increase in respiratory illness and premature death.

The San Joaquin Valley, which is made up of 8 counties (Stockton County, Stanislaus County, Merced County, Madera County, Fresno County, Kings County, Tulare County, and Kern County), has had a PM–10 problem for more than a decade. The area violates both the 24-hour and annual PM–10 standards. Exceedances are recorded throughout the Valley but tend to peek in the fall and winter. (See Tables 1 and 2 below in Section II.B). The violations are caused by both primary particulates (dust) and secondary particulates (other pollutants that react in the atmosphere to form particulate matter).

On the date of enactment of the 1990 Clean Air Act Amendments (CAA or Act), PM–10 areas, including the San Joaquin Valley planning area, meeting the qualifications of section 107(d)(4)(B) of the amended Act, were designated nonattainment by operation of law. See 56 FR 11101 (March 15, 1991). EPA

codified the boundaries of the San Joaquin Valley PM–10 nonattainment area at 40 CFR 81.305.

Once an area is designated nonattainment for PM–10, section 188 of the CAA outlines the process for classifying the area and establishing the area's attainment deadline. In accordance with section 188(a), at the time of designation, all PM–10 nonattainment areas, including the San Joaquin Valley, were initially classified as moderate.

Section 188(b)(1) of the Act provides that moderate areas can subsequently be reclassified as serious before the applicable moderate area attainment date if at any time EPA determines that the area cannot "practicably" attain the PM–10 NAAQS by the moderate area attainment deadline, December 31, 1994. On January 8, 1993 (58 FR 3334, 3337), EPA made such a determination and reclassified the San Joaquin Valley nonattainment area as serious. As a serious PM–10 nonattainment area, the San Joaquin Valley acquired a new attainment deadline of December 31, 2001 (CAA section 188(c)(2)).

II. Proposed Finding of Failure To Attain

A. Clean Air Act Requirements for Attainment Findings

EPA has the responsibility, pursuant to sections 179(c) and 188(b)(2) of the Act, of determining within 6 months of the applicable attainment date (i.e., June 30, 2002), whether the San Joaquin Valley PM–10 nonattainment area has attained the annual and 24-hour NAAQS. Section 179(c)(1) of the Act provides that these determinations are to be based upon an area's "air quality as of the attainment date," and section 188(b)(2) is consistent with this requirement. EPA determines whether an area's air quality is meeting the PM–10 NAAQS based upon air quality data gathered at monitoring sites in the nonattainment area and entered into EPA's Aerometric Information Retrieval System (AIRS). These data are reviewed to determine the area's air quality status in accordance with EPA regulations at 40 CFR part 50, appendix K.

Pursuant to appendix K, attainment of the annual PM–10 NAAQS is achieved when the expected annual arithmetic mean PM–10 concentration is less than or equal to the level of the standard (50 $\mu g/m^3$). Attainment of the 24-hour PM–10 NAAQS is achieved when the expected number of exceedances of the 24-hour NAAQS (150 $\mu g/m^3$) per year at each monitoring site is less than or equal to one. A total of three consecutive years of clean air quality data is generally necessary to show attainment of the annual and 24-hour standards for PM–10. A complete year of air quality data, as referred to in 40 CFR part 50, appendix K, is comprised of all four calendar quarters with each quarter containing data from at least 75 percent of the scheduled sampling days.

B. Ambient Air Monitoring Data

1. Annual PM–10 Standard

According to data currently in AIRS, three monitoring sites in the San Joaquin Valley are in violation of the annual PM–10 NAAQS. These data cover the period 1999 through September 30, 2001. While the nonattainment status of the Corcoran and Visalia monitors could still be affected by end of year data, even under the best case scenario (using values of 0.0 $\mu g/m^3$ for the sampling days in the last quarter of 2001), the Bakersfield Golden State Highway site would still register an annual arithmetic mean of 53 $\mu g/m^3$, which violates the annual NAAQS.[1]

TABLE 1.—SAN JOAQUIN VALLEY MONITORING SITES THAT VIOLATE THE ANNUAL PM_{10} NAAQS (1999–2001 *)

Site name	3 year annual mean ** $\mu g/m^3$
Bakersfield—Golden State	*** 58
Corcoran	51
Visalia	51

* 2001 data available through September 30, 2001.

** The annual mean reported here is based on data through September 30, 2001. The actual 3 year mean could change based on a complete data set for calendar year 2001.

*** 3rd quarter 2001 data do not meet EPA data completeness requirements.

2. 24-Hour PM–10 Standard

According to 40 CFR part 50, the 24-hour PM–10 NAAQS is attained when the expected number of days per calendar year with a 24-hour average above 150 $\mu g/m^3$ is equal to or less than one. In the simplest case, the number of expected exceedances at a site is determined by recording the number exceedances in each calendar year and then averaging them over the past three calendar years. This means that if a monitoring site has four or more observed or estimated exceedances in a three-year period then it is in violation of the 24-hour PM–10 NAAQS. Generally, if PM–10 sampling is scheduled less than every day, EPA requires the adjustment of observed exceedances to account for incomplete sampling. The method for adjusting the observed exceedances is described in 40 CFR part 50, appendix K, § 3.1.

In spite of the lack of data for the fourth quarter in 2001, there are ten monitoring sites in the San Joaquin Valley that are in violation of the 24-hour PM–10 NAAQS. The following table shows the number of estimated exceedances at the 10 sites after adjusting for incomplete sampling. All of the sites listed in Table 2 operate on a one in six day schedule. Table 2 lists the number of days over the standard in all three years as well as the three-year average. For each of these sites, the average number of exceedance days per year over the three-year period 1999–2001 exceeds one.

TABLE 2.—24-HOUR PM–10 AIR QUALITY IN THE SAN JOAQUIN VALLEY NONATTAINMENT AREA (1999–2001) *

III. Summary of Proposed Action

A. Proposed Finding of Failure to Attain

EPA is proposing a finding that the San Joaquin Valley did not attain the annual or 24-hour PM–10 NAAQS by the December 31, 2001 attainment deadline as discussed above in Section II.

B. SIP Consequences

Under section 189(d) of the Act, serious PM–10 nonattainment areas that fail to attain are required to submit within 12 months of the applicable attainment date, "plan revisions which provide for attainment of the PM–10 air quality standards and, from the date of such submission until attainment, for an annual reduction in PM–10 or PM–10 precursor emissions within the area of not less than 5 percent of the amount of such emissions as reported in the most recent inventory prepared for such area." Since the applicable attainment date was December 31, 2001, the deadline for the 5 percent plan will be December 31, 2002 if EPA's proposed finding of failure to attain is finalized.

IV. Administrative Requirements

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this proposed action is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. For this reason, this proposed action is also not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001). This proposed action in and of itself establishes no new requirements, it merely notes that the air quality in the San Joaquin Valley did not meet the federal health standards for PM–10 by the CAA deadline. Accordingly, the Administrator certifies that this proposed rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this proposed rule does not in and of itself establish new requirements, EPA believes that it is questionable whether a requirement to submit a SIP revision constitutes a federal mandate. The obligation for a State to revise its SIP arises out of sections 110(a), 179(d), and 189(d) of the CAA and is not legally enforceable by a court of law, and at most is a condition for continued receipt of highway funds. Therefore, it is possible to view an action requiring such a submittal as not creating any enforceable duty within the meaning of section 421(5)(9a)(I) of UMRA (2 U.S.C. 658(a)(I)). Even if it did, the duty could be viewed as falling within the exception for the condition of Federal assistance under section 421(5)(a)(i)(I) of UMRA (2 U.S.C. 658(5)(a)(i)(I)). Therefore, today's proposed action does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4).

This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). This action also does not have Federalism implications because it does not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This action does not in and of itself create any new requirements and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. This proposed rule also is not subject to Executive Order 13045, "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997), because it is not economically significant. Because this proposed finding of failure to attain is a factual determination based on air quality considerations, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. This proposed rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 70

[CT–066–7223; A–1–FRL–7158–3]

Full Approval of Operating Permit Program; State of Connecticut

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: On August 13, 2001, EPA proposed to approve changes that the State of Connecticut made to its operating permit program that addressed issues identified in EPA's interim approval action in 1997. Today, EPA is proposing to approve all other changes the state has made to its operating permit program regulations since EPA granted interim approval on March 24, 1997. With the combination of the August 2001 proposal and this proposal, EPA is proposing to fully approve Connecticut's entire title V program. Even though the earlier proposal was limited to the program changes necessary to address interim approval issues, EPA received several comments on Connecticut's title V program that went beyond the interim approval issues. In a future rulemaking document, EPA will address all comments we receive as a result of this document, as well as any comments that we have already received on Connecticut's program that concern the state's title V program. Connecticut's operating permit program was created to meet the federal Clean Air Act directive that states develop, and submit to EPA, programs for issuing operating permits to all major stationary sources of air pollution and to certain other sources within the state's jurisdiction.

DATES: Comments on this notice must be received on or before April 15, 2002.

ADDRESSES: Comments may be mailed to Donald Dahl, Air Permits Program Unit, Office of Ecosystem Protection (mail code CAP) U.S. Environmental Protection Agency, EPA—New England, One Congress Street, Suite 1100, Boston, MA 02114–2023. Copies of the state submittal and other supporting documentation relevant to this action are available for public inspection during normal business hours, by appointment at the above address.

FOR FURTHER INFORMATION CONTACT: Donald Dahl at (617) 918–1657.

SUPPLEMENTARY INFORMATION:

I. Why Was Connecticut Required To Develop an Operating Permit Program?

Title V of the Clean Air Act ("the Act") as amended (42 U.S.C. 7401 *et seq.* and sections 7661–7661e), requires all states to develop an operating permit program and submit it to EPA for approval. EPA has promulgated rules that define the minimum elements of an approvable state operating permit program and the corresponding standards and procedures by which EPA will approve, oversee, and withdraw approval of state operating permit programs. See 57 FR 32250 (July 21, 1992). These rules are codified at 40 Code of Federal Regulations (CFR) part 70 (part 70). Title V directs states to develop programs for issuing operating permits to all major stationary sources and to certain other sources. The Act directs states to submit their operating permit programs to EPA by November 15, 1993, and requires that EPA act to approve or disapprove each program within one year after receiving the submittal. The EPA's program review occurs pursuant to section 502 of the Act (42 U.S.C. 7661a) and the part 70 regulations, which together outline criteria for approval or disapproval.

Where a program substantially, but not fully, meets the requirements of part 70, EPA may grant the program interim approval. EPA granted the State of Connecticut final interim approval of its program on March 24, 1997 (see 62 FR 13830) and the program became effective on April 23, 1997.

II. In 1995, What Did Connecticut Submit To Meet the Title V Requirements?

The Governor of Connecticut submitted a Title V operating permit program for the State of Connecticut on September 28, 1995. In addition to regulations (section 22a–174–33 of the Department of Environmental Protection Regulations), the program submittal included a legal opinion from the Attorney General of Connecticut stating that the laws of the state provide adequate legal authority to carry out all aspects of the program, and a description of how the state would implement the program. The submittal additionally contained evidence of proper adoption of the program regulations, application and permit forms, and a permit fee demonstration. This program, including the operating permit regulations, substantially met the requirements of part 70.

III. What Was EPA's Action on Connecticut's 1995 Submittal and How Did Connecticut Respond?

EPA granted interim approval to Connecticut's submittal on March 24, 1997. In the notice granting interim approval, EPA stated that there were several areas of Connecticut's program regulations that would need to be amended in order for EPA to grant full approval of the state's program. EPA worked closely with the state to develop all of the rule changes necessary to address EPA's interim approval issues. Connecticut proposed for public comment regulatory amendments that addressed EPA's interim approval issues on July 17, 2001. Based on the state's proposal, EPA in parallel proposed to approve those amendments because they addressed the interim approval issues. EPA's August 13, 2001 (66 FR 42496) proposal discussed those interim approval issues and the state's proposed regulations to address them, and this notice will not repeat that discussion. EPA notes, however, that Connecticut did adopt final regulations addressing the interim approval issues that were consistent with the changes EPA proposed to approve, and EPA continues to propose to approve these elements of the state's program for the reasons stated in our August 2001 proposal.

IV. In 2002, What Did Connecticut Submit To Revise Its Title V Permit Program?

On January 11, 2002, Connecticut submitted regulatory amendments to its title V operating permit program. The amendments to the state's regulations not only addressed the interim approval issues, but included changes to the balance of the state's program, largely designed to clarify the program requirements EPA had already approved in 1997. EPA has reviewed the remaining amendments, which the state made throughout portions of R.C.S.A. sections 22a–174–1 (the general definitions for DEP's air regulations), 22a–174–2a (air permitting procedural requirements), and 22a–174–33 (title V operating permit program requirements). Aside from minor alterations throughout these sections to clarify the operation of the title V program, the most important changes Connecticut has made include a major restructuring of the permit processing and modification requirements, which moves those provisions from section 33 to section 2a. In addition, to clarify its rules, in several areas the state incorporated by reference important sections of part 70. We propose that these changes meet title V permit program requirements, and that Connecticut's program should be fully approved under part 70. (This notice will generally simply cite to the section in part 70 for references to 40 CFR part 70 and will cite to the relevant section in Connecticut's air pollution control regulations for references to R.C.S.A. 22a–174.)

V. Explanation of Certain Provisions in Connecticut's Regulatory Amendments To Its Title V Program

EPA believes that the following amendments to Connecticut's Title V program merit detailed discussion in light of Title V, part 70, and Connecticut law.

1. Section 22a–174–2a(f)(2)(D) in Connecticut's rule provides that the state can use its "permit revision" process not only to increase the frequency of monitoring, but also to add "additional monitoring" to the permit. EPA has consulted with DEP concerning the meaning of this provision, and the Department agrees that the plain reading of this language is that it allows DEP to add monitoring in addition to the monitoring already provided for in the permit using what is equivalent to EPA's administrative amendment process in § 70.7(d). Importantly, DEP confirms that this provision may not be used to change or in any way alter any existing monitoring requirements already provided for in the permit terms and conditions. Furthermore, DEP agrees that any monitoring added using this provision would be "additional" in the sense that it is in addition to any monitoring that is already required to be in the permit under the Act, its applicable requirements, and part 70. Therefore, this provision cannot be used to add monitoring necessary to meet the monitoring requirements of an applicable requirement, of § 70.6(a)(3)(B) regarding periodic monitoring, or of § 70.6(c)(1) regarding monitoring sufficient to assure compliance with the permit. Essentially, monitoring added under section 22a–174–2a(f)(2)(D) will be above and beyond what is required in the Act where DEP concludes that such data would be useful. An example of the kind of use DEP expects to make of this provision would be: a municipal waste combustor has a permit with sufficient periodic monitoring consistent with applicable requirements, but the state and source agree that they want to try a novel and experimental continuous emissions monitor to track hazardous VOC emissions. Section 22a–174–2a(f)(2)(D) would allow DEP to authorize installation of the CEM expeditiously to try it out without any permit shield.

This provision does not correspond exactly to the types of administrative amendments already provided for in § 70.7(d)(1). But § 70.7(d)(1)(vi) allows EPA to approve other types of permit changes that can be processed as administrative amendments, provided EPA determines that the change is similar to the changes specifically listed in § 70.7(d)(1)(i)–(iv). EPA is proposing to use this authority to approve the ability for Connecticut to add "additional monitoring" to a title V permit, beyond the monitoring already provided for in the permit, using the state's "permit revision" process in section 22a–174–2a(f)(2)(D). EPA is relying on the fact that an existing permit will already contain monitoring which the public and EPA have had an opportunity to review and which must be consistent with the applicable requirements and Part 70's monitoring requirements. See sections 22a–174–33(j)(1)(K) and (L). Additionally, DEP cannot use this provision to affect monitoring that is required under the Act. EPA believes this type of change is similar to the type of changes listed in §§ 70.7(d)(1)(i)–(v) because it will not alter the requirements or stringency of the existing permit, it will generally increase the rigor of the compliance requirements in the permit, and it cannot affect monitoring requirements mandated under the Act. This very limited authority is similar to the concept of increasing the frequency of monitoring under § 70.7(d)(1)(iii), which allows monitoring to be adjusted in a way that will tend to increase its rigor and will not undercut the monitoring required to meet the Act's requirements. Therefore, EPA proposes to approve section 22a–174–2a(f)(2)(D) pursuant to § 70.7(d)(1)(vi) because it is similar in kind to types of changes in §§ 70.7(d)(1)(i)–(v).

2. Section 22a–174–2a(d)(4)(C) of Connecticut's regulations specifically requires the equivalent of a significant permit modification procedure under § 70.7(e)(4) (a "non-minor modification" as denominated in section 22a–174–2a(d)) to "relax the form or type of or any reduction in the frequency of any monitoring, reporting or recordkeeping required by the title V permit." This provision is not identical to the requirement in § 70.7(e)(4) that "every significant change in existing monitoring" must undergo the significant permit modification procedure. It could be unclear, for example, how one must process a significant change in monitoring that has an indeterminate effect on the rigor of the permit, i.e. which may or may not "relax" the monitoring. Nonetheless, EPA interprets section 2a to mean that all significant monitoring changes must go through the "non-minor modification" process, and Connecticut agrees with EPA's interpretation.

Section 22a–174–2a(e)(2)(B), a provision of Connecticut's "minor permit modification" regulations, excludes any significant change to monitoring from the minor permit modification track, by way of incorporating the exclusions in EPA's rule, including § 70.7(e)(2)(i)(A)(2). It is equally clear that significant changes in monitoring do not qualify for the administrative amendment track, or a "permit revision" under section 22a–174–2a(f) of Connecticut's rule. Pursuant to section 22a–174–2a(d)(4)(D), any change that does not qualify under the other permit modification tracks must be made using significant modification procedures under the "non-minor modification" track of 22a–174–2a(d). Therefore, section 22a–174–2a handles significant changes in monitoring consistent with § 70.7(e)(4).

3. Connecticut's provision for administrative permit amendments, or "permit revisions" under section 22a–174–2a(f), includes "a fuel conversion described in section 22a–174–3a(a)(A)(iv) or (v)" in the list of changes that can be made administratively. Section 22a–174–2a(f)(2)(G). [1] This cross reference is to a provision in the state's revised new source review program that exempts from preconstruction permitting certain limited conversions from oil to natural gas or from residual oil to distillate oil. While it is expected that these conversions to cleaner fuels will generally result in beneficial emissions reductions, on the face of the regulation this exemption allows for actual emissions increases of up to fifteen tons per year. As a result, it is difficult to reconcile the terms of this fuel conversion provision with the sort of administrative amendment changes provided for in § 70.7(d)(1), which are designed to have no emissions impact. However, another provision of Connecticut's regulations, section 22a–174–2a(e)(2), requires these fuel conversions to undergo a minor permit modification. Specifically, section 22a–174–2a(e)(2)(A) allows only those changes covered by "2a(f)(2)(A) through (F), inclusive" to avoid a minor permit modification, with no reference to section 2a(f)(2)(G). Therefore, the fuel conversions provided for in section 22a–174–2a(f)(2)(G) are captured as minor permit amendments, not administrative amendments, which is consistent with §§ 70.7(d) and (e)(2).

4. Connecticut's definition of "applicable requirements" at section 22a–174–33(a)(2) does not include a

[1] It appears that the cross reference is probably intended to read "section 22a–174–3a(a)(A)(iii) or (iv)."

VOL
67
ISS
51
MR
15
2002
UMI

reference to the national ambient air quality standards as they would apply to temporary sources, as provided for in § 70.2. See "applicable requirement," clause (12). Connecticut's program is nevertheless consistent with part 70 and the Act because the state does not permit temporary sources under its section 33 regulation. Section 504(e) of the Act allows, but does not require, states to issue a single permit authorizing emissions from similar operations at multiple temporary locations. Connecticut has chosen not to implement this provision. Section 22a–174–33(c)(1) requires that "every Title V source" apply for a permit. Section 22a–174–33(a)(10) defines a Title V source to be at a "premises." Section 22a–174–1(88) defines "premises" to be the "grouping of all stationary sources *at any one location*" (emphasis added). Having required a source to receive a section 33 permit for any one location, Connecticut lacks the authority to permit temporary sources at multiple locations pursuant to section 504(e) of the Act. Accordingly, Connecticut is not required to address ambient standards as an applicable requirement under section 22a–174–33 for temporary sources at multiple locations.

5. Section 22a–174–33(j)(1)(I) is the provision in Connecticut's program designed to implement § 70.6(a)(1)(iii) of EPA's regulation, providing for a title V permit to establish alternative emission limits to the extent allowed in the underlying implementation plan. The previous version of Connecticut's regulation provided for the title V permit to address "allowable alternative emission limits," which was consistent on its face with the requirement that these alternative limits must be allowed in the underlying applicable requirement. The new version of this section provides for the permit to address "alternative emission limits or means of compliance *allowed by the Commissioner*" (emphasis added). This new formulation creates the unintended implication that Connecticut is providing the Commissioner with broad discretion to use the title V permit to fashion alternative limits, even where they are not provided for in the underlying implementation plan. Connecticut did not intend this language change to create such discretion, and the surrounding provisions in section 22a–174–33 make this clear. Section 22a–174–33(j)(1)(H) requires each permit to impose the terms of each applicable requirement to each emission unit, and section 22a–174–33(j)(1)(J) requires all alternative operating scenarios to meet all applicable requirements. Nothing in section 22a–174–33(j)(1)(I) waives these requirements that a permit must impose the applicable requirements, and Connecticut agrees that alternative emission limits addressed under 22a–174–33(j)(1)(I) must be allowed under the applicable requirements. Therefore, this section is consistent with § 70.6(a)(1)(iii).

6. In section 22a–174–2a(f)(2)(F) the state incorporates § 70.7(d)(1)(v) which allows Connecticut to add the terms of a new source review permit to the title V permit using the state's permit revision (or administrative amendment) track if the new source review permit program meets procedural requirements substantially equivalent to §§ 70.7 and 70.8 and permit content requirements substantially equivalent to § 70.6. Connecticut's new source review program does not currently meet the requirements of §§ 70.6, 70.7 and 70.8. Therefore, the state cannot incorporate new source review permits into a title V permit using its permit revision track. EPA understands that section 22a–174–2a(f)(2)(F) is essentially a place-holder that would allow the state to bring a new source review permit onto the title V permit administratively in the event Connecticut augments its new source review regulation to incorporate the relevant part 70 procedural and substantive requirements. Connecticut agrees with this understanding and with the limitation on its authority under section 22a–174–2a(f)(2)(F).

VI. Proposed Action and Opportunity to Comment

EPA is proposing to approve the balance of the changes Connecticut has made to its title V operating permit program, along with those changes already discussed in our August 2001 notice. Interested members of the public may comment on those changes, as described above. Note that most of the comments EPA received in response to our August 2001 proposal concerning the interim approval issues included comments addressing the entirety of Connecticut's title V program changes. EPA will be responding to all those comments when we take final action on the August 2001 proposal and this proposal. The public need not resubmit comments already made in response to our August 2001 proposal.

In particular, EPA solicits comments from the State of Connecticut. In this proposal, EPA has interpreted various Connecticut regulations in a manner that EPA believes to be most consistent with the Act and part 70. If Connecticut disagrees with or wishes to support EPA's interpretations, EPA encourages the state to comment during the public comment period so that EPA may respond when we take final action on this proposal and the August 2001 proposal.

VII. Administrative Requirements

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001). This action merely approves state law as meeting federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule approves pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4). This rule also does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified in Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it merely approves a state rule implementing a federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. This rule also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is not economically significant.

In reviewing permit program submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. In this context, in the absence of a prior existing requirement for the state to use voluntary consensus standards (VCS), EPA has no clear authority to disapprove a permit program submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a permit program submission, to use VCS in place of a program submission that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. As required by section 3 of Executive Order 12988 (61 FR 4729, February 7, 1996), in issuing this rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct. EPA has complied with Executive Order 12630 (53 FR 8859, March 15, 1988) by examining the takings implications of the rule in accordance with the "Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings" issued under the executive order. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*)

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 261

[FRL–7153–7]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste; Proposed Exclusion

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule and request for comment.

SUMMARY: The Environmental Protection Agency (EPA or Agency) today is proposing to grant a petition submitted by the United States Department of Energy Savannah River Operations Office (DOE–SR) to exclude (or "delist") certain hazardous wastes from the lists of hazardous wastes under the Resource Conservation and Recovery Act (RCRA). DOE–SR generated the petitioned waste by treating wastes from various activities at the Savannah River Site (SRS). The petitioned waste meets the definitions of listed RCRA hazardous wastes F006 and F028. DOE–SR petitioned EPA to grant a one-time, generator-specific delisting for its F006 and F028 waste, because DOE–SR believes that its waste does not meet the criteria for which theses types of wastes were listed. The waste is a radioactive mixed waste (RMW) because it is both a RCRA hazardous waste and a radioactive waste. EPA reviewed all of the waste-specific information provided by DOE–SR, performed calculations, and determined that the waste, which has a low level of radioactivity, could be disposed in a landfill for low-level radioactive waste without harming human health and the environment. The petition is for a one-time delisting, because the petitioned waste has been generated, will be completely disposed of at one time, and will not be generated again. Today's proposed rule proposes to grant DOE–SR's petition to delist its F006 and F028 waste, and requests public comment on the proposed decision. If the proposed delisting becomes a final delisting, DOE–SR's petitioned waste will no longer be classified as F006 and F028, and will not be subject to regulation as a hazardous waste under Subtitle C of RCRA. The waste will still be subject to the Atomic Energy Act and local, State, and Federal regulations for low-level radioactive solid wastes that are not RCRA hazardous wastes.

DATES: EPA is requesting public comments on this proposed decision. Comments will be accepted until April 29, 2002. Comments postmarked after the close of the comment period will be stamped "late." These "late" comments may not be considered in formulating a final decision.

Any person may request a hearing on this proposed decision by filing a request with Richard D. Green, Director of the Waste Management Division, EPA, Region 4, whose address appears below, by April 1, 2002. The request must contain the information prescribed in 40 CFR 260.20(d).

ADDRESSES: Send two copies of your comments to Jewell Grubbs, Chief, RCRA Enforcement and Compliance Branch, U.S. Environmental Protection Agency, Region 4, Sam Nunn Atlanta Federal Center, 61 Forsyth Street, Atlanta, Georgia 30303. Send one copy to Myra C. Reece, Director, South Carolina Department of Health and Environmental Control, Lower Savannah District Environmental Quality Control, 218 Beaufort Street, N.E., Aiken, South Caolina 29801, and one copy to Shelly Sherritt, Bureau of Land and Waste Management, South Carolina Department of Health and Environmental Control, 2600 Bull Street, Columbia, South Carolina 29201. Identify your comments at the top with this regulatory docket number: R4–01–02–DOESRSP. Comments may also be submitted by e-mail to *sophianopoulos.judy@epa.gov*. If files are attached, please identify the format.

Requests for a hearing should be addressed to Richard D. Green, Director, Waste Management Division, U.S. Environmental Protection Agency, Region 4, Sam Nunn Atlanta Federal Center, 61 Forsyth Street, SW., Atlanta, Georgia 30303.

The RCRA regulatory docket for this proposed rule is located at the EPA Library, U.S. Environmental Protection Agency, Region 4, Sam Nunn Atlanta Federal Center, 61 Forsyth Street, Atlanta, Georgia 30303, and is available for viewing from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding Federal holidays. The docket contains the petition, all information submitted by the petitioner, and all information used by EPA to evaluate the petition.

The public may copy material from any regulatory docket at no cost for the first 100 pages, and at a cost of $0.15 per page for additional copies.

Copies of the petition are available during normal business hours at the following addresses for inspection and copying: U.S. EPA, Region 4, Library, Sam Nunn Atlanta Federal Center, 61 Forsyth Street, S.W., Atlanta, Georgia 30303, (404) 562–8190; South Carolina Department of Health and Environmental Control, Lower Savannah District Environmental Quality Control, 218 Beaufort Street, N.E., Aiken, South Carolina 29801, Myra C. Reece, Director, Phone: (803) 641–7670; and DOE Public Reading Room, Gregg-Graniteville Library, University of South Carolina at Aiken, 171 University Parkway, Aiken, South Carolina 29801, Phone: (803) 641–3465.

The EPA, Region 4, Library is located near the Five Points MARTA station in Atlanta. The Lower Savannah District Environmental Quality Control Office of the South Carolina Department of Health and Environmental Control is located a block north of U.S. Highway 78 on Beaufort Street (State Road 118) which is near the eastern boundary of Aiken. The University of South Carolina at Aiken is located on University Parkway (also State Road 118), on northwest boundary of Aiken, between Interstate Highway 20 and U.S. Highway

FOR FURTHER INFORMATION CONTACT: For general and technical information about this proposed rule, contact Judy Sophianopoulos, South Enforcement and Compliance Section, (Mail Code 4WD–RCRA), RCRA Enforcement and Compliance Branch, U.S. Environmental Protection Agency, Region 4, Sam Nunn Atlanta Federal Center, 61 Forsyth Street, S.W., Atlanta, Georgia 30303, (404) 562–8604, or call, toll free, (800) 241–1754, and leave a message, with your name and phone number, for Ms. Sophianopoulos to return your call.

SUPPLEMENTARY INFORMATION: The contents of today's preamble are listed in the following outline:

I. Background
A. What Laws and Regulations Give EPA the Authority to Delist Wastes?
B. How did EPA Evaluate this Petition?
1. What is the EPACML model that EPA used in the past for determining delisting levels?
2. What is the DRAS that uses the newer EPACMTP model to calculate not only delisting levels, but also to evaluate the effects of the waste on human health and the environment?
3. Why is the EPACMTP an improvement over the EPACML?
4. Where can technical details on the EPACMTP be found?
5. What methods is EPA proposing to use to determine delisting levels for this petitioned waste?
II. Disposition of Delisting Petition
A. Summary of Delisting Petition Submitted by the United States Department of Energy Savannah River Operations Office (DOE–SR), Aiken, South Carolina
B. What Delisting Levels Did EPA Obtain with DRAS and EPACMTP?
C. How Did EPA Use the Multiple Extraction Procedure (MEP) to Evaluate This Delisting Petition?
D. Conclusion
III. Limited Effect of Federal Exclusion Will this Rule Apply in All States?
IV. State Authorization
A Statutory Authority
B. Effect on State Authorization
V. Effective Date
VI. Administrative Assessments
A. Executive Order 12866
B. Regulatory Flexibility Act (RFA) as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), 5 USC 601 *et. seq.*
C. Unfunded Mandates Reform Act
D. Federalism—Applicability of Executive Order 13132

F. Executive Order 13045: Protection of Children from Environmental Risks and Safety Risks
G. National Technology Transfer Advancement Act of 1995
H. Executive Order 12898
I. Executive Order 13211 (Energy Effects)
J. Paperwork Reduction Act

I. Background

A. What Laws and Regulations Give EPA the Authority To Delist Wastes?

On January 16, 1981, as part of its final and interim final regulations implementing section 3001 of RCRA, EPA published an amended list of hazardous wastes from non-specific and specific sources. This list has been amended several times, and is published in 40 CFR 261.31 and 261.32. These wastes are listed as hazardous because they exhibit one or more of the characteristics of hazardous wastes identified in subpart C of part 261 (i.e., ignitability, corrosivity, reactivity, and toxicity) or meet the criteria for listing contained in Sec. 261.11 (a)(2) or (a)(3).

Individual waste streams may vary, however, depending on raw materials, industrial processes, and other factors. Thus, while a waste that is described in these regulations generally is hazardous, a specific waste from an individual facility meeting the listing description may not be. For this reason, sections 260.20 and 260.22 provide an exclusion procedure, allowing persons to demonstrate that a specific waste from a particular generating facility [1] should not be regulated as a hazardous waste.

To have their wastes excluded, petitioners must show, first, that wastes generated at their facilities do not meet any of the criteria for which the wastes were listed. *See* section 260.22(a) and the background documents for the listed wastes. Second, the Administrator must determine, where he/she has a reasonable basis to believe that factors (including additional constituents) other than those for which the waste was listed could cause the waste to be a hazardous waste, that such factors do not warrant retaining the waste as a hazardous waste. Accordingly, a petitioner also must demonstrate that the waste does not exhibit any of the hazardous waste characteristics (i.e., ignitability, reactivity, corrosivity, and toxicity), and must present sufficient information for the EPA to determine whether the waste contains any other toxicants at hazardous levels. *See* section 260.22(a), 42 U.S.C. 6921(f), and the background documents for the listed wastes. Although wastes which are "delisted" (i.e., excluded) have been evaluated to determine whether or not they exhibit any of the characteristics of hazardous waste, generators remain obligated under RCRA to determine whether or not their wastes continue to be nonhazardous based on the hazardous waste characteristics (i.e., characteristics which may be promulgated subsequent to a delisting decision.)

In addition, residues from the treatment, storage, or disposal of listed hazardous wastes and mixtures containing listed hazardous wastes are also considered hazardous wastes. *See* Section 261.3(a)(2)(iv) and (c)(2)(i), referred to as the "mixture" and "derived-from" rules, respectively. Such wastes are also eligible for exclusion and remain hazardous wastes until excluded. On December 6, 1991, the U.S. Court of Appeals for the District of Columbia vacated the "mixture/derived-from" rules and remanded them to the EPA on procedural grounds. Shell Oil Co. v. EPA, 950 F.2d 741 (D.C. Cir. 1991). On March 3, 1992, EPA reinstated the mixture and derived-from rules, and solicited comments on other ways to regulate waste mixtures and residues (57 FR 7628). These rules became final on October 30, 1992 (57 FR 49278), and should be consulted for more information regarding waste mixtures and solid wastes derived from treatment, storage, or disposal of a hazardous waste. On May 16, 2001, EPA amended the mixture and derived-from rules for certain types of wastes (66 FR 27218 and 66 FR 27266). The mixture and derived-from rules are codified in 40 CFR 261.3, paragraphs (a)(2)(iv) and (c)(2)(i). EPA plans to address all waste mixtures and residues when the final portion of the Hazardous Waste Identification Rule (HWIR) is promulgated.

On October 10, 1995, the Administrator delegated to the Regional Administrators the authority to evaluate and approve or deny petitions submitted in accordance with sections 260.20 and 260.22, by generators within their Regions (National Delegation of Authority 8–19), in States not yet authorized to administer a delisting program in lieu of the Federal program. On March 11, 1996, the Regional Administrator of EPA, Region 4, redelegated delisting authority to the Director of the Waste Management Division (Regional Delegation of Authority 8–19).

[1] Although no one produces hazardous waste intentionally, many industrial processes result in the production of hazardous waste, as well as useful products and services. A "generating facility" is a facility in which hazardous waste is produced, and a "generator" is a person who produces hazardous waste or causes hazardous waste to be produced at a particular place. Please see 40 CFR 260.10 for regulatory definitions of "generator," "facility," "person," and other terms related to hazardous waste, and 40 CFR part 262 for regulatory requirements for generators.

B. How Did EPA Evaluate This Petition?

This petition requests a delisting for a hazardous waste listed as F006 and F028. In making the initial delisting determination, EPA evaluated the petitioned waste against the listing criteria and factors cited in Section 261.11 (a)(2) and (a)(3). Based on this review, the EPA agrees with the petitioner that the waste is nonhazardous with respect to the original listing criteria. (If EPA had found, based on this review, that the waste remained hazardous based on the factors for which the waste was originally listed, EPA would have proposed to deny the petition.) EPA then evaluated the waste with respect to other factors or criteria to assess whether there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous. *See* section 260.22(a) and (d). The EPA considered whether the waste is acutely toxic, and considered the toxicity of the constituents, the concentration of the constituents in the waste, their tendency to migrate and to bioaccumulate, their persistence in the environment once released from the waste, plausible and specific types of management of the petitioned waste, the quantities of waste generated, and waste variability.

1. What Is the EPACML Model That EPA Used in the Past for Determining Delisting Levels?

In the past, EPA used the EPA Composite Model for Landfills (EPACML) fate and transport model, modified for delisting, as one approach for determining the delisting levels for petitioned waste. *See* 56 FR 32993–33012, July 18, 1991, for details on the use of the EPACML model to determine the concentrations of constituents in a waste that will not result in groundwater contamination. With the EPACML approach, as used in the past, EPA calculated a delisting level for each hazardous constituent by using the maximum estimated waste volume to determine a Dilution Attenuation Factor (DAF) from a table of waste volumes and DAFs previously calculated by the EPACML model, as modified for delisting. *See* 56 FR 32993–33012, July 18, 1991. The maximum estimated waste volume is the maximum number of cubic yards of petitioned waste to be disposed of each year. The delisting level for each constituent was equal to the DAF multiplied by the maximum contaminant level (MCL) which the Safe Drinking Water Act allows for that constituent in drinking water. The delisting level is a concentration in the waste leachate that will not cause the MCL to be exceeded in groundwater underneath a landfill where the waste is disposed. This method of calculating delisting levels resulted in conservative levels that were protective of groundwater, because the model did not assume that the landfill had the controls required of Subtitle D landfills. A Subtitle D landfill is a landfill subject to RCRA Subtitle D nonhazardous waste regulations, and to State and local nonhazardous waste regulations.

2. What Is the DRAS That Uses the Newer EPACMTP Model To Calculate Not Only Delisting Levels, But Also To Evaluate the Effects of the Waste on Human Health and the Environment?

The EPA is proposing to use the Delisting Risk Assessment Software (DRAS),[2] developed by EPA, Region 6, to evaluate this delisting petition. The DRAS uses a newer model, called the EPA Composite Model for Leachate Migration with Transformation Products (EPACMTP). The EPACMTP improves on the EPACML model in several ways. EPA is proposing to use the DRAS to calculate delisting levels and to evaluate the impact of DOE–SR's petitioned waste on human health and the environment. Delisting levels are the maximum allowable concentrations for hazardous constituents in the waste, so that disposal in a landfill will not harm human health and the environment by contaminating groundwater, surface water, or air.

Today's proposal provides background information on the mechanics of the DRAS, and the use of the DRAS in delisting decision-making. Please see the EPA, Region 6, *RCRA Delisting Technical Support Document* (RDTSD) for a complete discussion of the DRAS calculation methods. The RDTSD, and **Federal Register**, 65 FR 75637–75651, December 4, 2000, and 65 FR 58015–58031, September 27, 2000, are the sources of the DRAS information presented in today's preamble, and are included in the RCRA regulatory docket for this proposed rule.

The DRAS performs a risk assessment for petitioned wastes that are disposed of in the two waste management units of concern: surface impoundments for liquid wastes and landfills for non-liquid wastes. DOE–SR's petitioned waste is solid, not liquid, and will be disposed in a landfill; therefore, only the application of DRAS to landfills will be discussed in this preamble.

DRAS calculates releases from solid-phase wastes in a landfill, with the following assumptions: (1) The wastes are disposed in a Subtitle D landfill and covered with a 2-foot-thick native soil layer; (2) the landfill is unlined or effectively unlined due to a liner that will eventually completely fail. The two parameters used to characterize landfills are (1) area and (2) depth (the thickness of the waste layer). Data to characterize landfills were obtained from a nationwide survey of industrial Subtitle D landfills.[3] Parameters and assumptions used to estimate infiltration of leachate from a landfill are provided in the *EPACMTP Background Document and User's Guide*, Office of Solid Waste, U. S. EPA. Washington, D.C., September 1996.

DRAS uses the EPACMTP model to simulate the fate and transport of dissolved contaminants from a point of release at the base of a landfill, through the unsaturated zone and underlying groundwater, to a receptor well at an arbitrary downstream location in the aquifer (the rock formation in which the groundwater is located). DRAS evaluates, with the EPACMTP model, the groundwater exposure concentrations at the receptor well that result from the chemical release and transport from the landfill (*Application of EPACMTP to Region 6 Delisting Program: Development of Waste Volume-Specific Dilution Attenuation Factors*, U. S. EPA, August 1996). For the purpose of delisting determinations, receptor well concentrations for both carcinogens and non-carcinogens from finite-source degraders and non-degraders are determined with this model. Delisted waste is a finite source, because in a finite period of time, the waste's constituents will leach and move out of the landfill. If EPA makes a final decision to delist DOE–SR's F006 and F028 waste, DOE–SR must meet the delisting levels and dispose of the waste

[2] For more information on DRAS and EPACMTP, please see 65 FR 75637–75651, December 4, 2000 and 65 FR 58015–58031, September 27, 2000. The December 4, 2000 **Federal Register** discusses the key enhancements of the EPACMTP and the details are provided in the background documents to the proposed 1995 Hazardous Waste Identification Rule (HWIR) (60 FR 66344, December 21, 1995). The background documents are available through the RCRA HWIR FR proposal docket (60 FR 66344, December 21, 1995). URL addresses for Region 6 delisting guidance and software are the following:

1. Delisting Guidance Manual http://www.epa.gov/earth1r6/6pd/rcra_c/pd-o/dlistpdf.htm
2. Delisting Risk Assessment Software (DRAS) http://www.epa.gov/earth1r6/6pd/rcra_c/pd-o/dras.htm
3. DRAS Technical Support Document (DTSD) http://www.epa.gov/earth1r6/6pd/rcra_c/pd-o/dtsd.htm
4. DRAS Users Guide http://www.epa.gov/earth1r6/6pd/rcra_c/pd-o/uguide.pdf

Region 6 has made them available to the public, free of charge.

[3] *Notionwide Survey of Industrial Subtitle D Landfills*, Westat, 1987.

VOL 67 ISS 51 MR 15 2002 UMI

in a Subtitle D landfill, because EPA determined the delisting levels based on a landfill model. Because of its radioactivity, DOE–SR's waste when delisted must be disposed in a low-level radioactive landfill in accordance with the Atomic Energy Act.

3. Why Is the EPACMTP an Improvement Over the EPACML?

The EPACMTP includes three major categories of improvements over the EPACML. The improvements include:

1—Incorporation of additional fate and transport processes (e.g., degradation of chemical constituents; fate and transport of metals);
2—Use of enhanced flow and transport equations (e.g., for calculating transport in three dimensions); and
3—Revision of the Monte Carlo methodology (e.g., to allow use of site-specific, waste-specific data) (*EPACMTP Background Document and User's Guide*, Office of Solid Waste, U. S. EPA, Washington, D.C., September 1996).

A summary of the key enhancements which have been implemented in the EPACMTP is presented here and the details are provided in the background documents to the proposed 1995 Hazardous Waste Identification Rule (HWIR) (60 FR 66344, December 21, 1995). The background documents are available through the RCRA HWIR **Federal Register** proposal docket (60 FR 66344, December 21, 1995). For more information, please contact Judy Sophianopoulos, South Enforcement and Compliance Section, (Mail Code 4WD–RCRA), RCRA Enforcement and Compliance Branch, U.S. Environmental Protection Agency, Region 4, Sam Nunn Atlanta Federal Center, 61 Forsyth Street, SW., Atlanta, Georgia 30303, (404) 562–8604, or call, toll free, (800) 241–1754, and leave a message, with your name and phone number, for Ms. Sophianopoulos to return your call. You may also contact her by e-mail: *sophianopoulos.judy@epa.gov*.

The EPACML accounts for: one-dimensional steady and uniform advective flow; contaminant dispersion in the longitudinal, lateral, and vertical directions; and sorption. However, advances in groundwater fate and transport have been made in recent years and EPA proposes and requests public comment on the use of the EPACMTP, which is a more advanced groundwater fate and transport model, for this RCRA delisting.

The EPACML was limited to conditions of uniform groundwater flow. It could not handle accurately the conditions of significant groundwater mounding and non-uniform groundwater flow due to a high rate of infiltration from the waste disposal units. These conditions increase the transverse horizontal, as well as the vertical, spreading of a contaminant plume.

The EPACMTP model overcomes the deficiencies of the EPACML in the following way: The subsurface as modeled with the EPACMTP consists of an unsaturated zone beneath a landfill and a saturated zone, the underlying water table aquifer. Contaminants move vertically downward through the unsaturated zone to the water table. The EPACMTP simulates one-dimensional, vertically downward flow and transport of contaminants in the unsaturated zone, as well as two-dimensional or three-dimensional groundwater flow and contaminant transport in the underlying saturated zone. The EPACML used a saturated zone module that was based on a Gaussian distribution of the concentration of a chemical constituent in the saturated zone. The module also used an approximation to account for the initial mixing of the contaminant entering at the water table (saturated zone) underneath the waste unit. The module accounting for initial mixing in the EPACML could lead to unrealistic groundwater concentrations.

The enhanced EPACMTP model incorporates a direct linkage between the unsaturated zone and saturated zone modules which overcomes these limitations of the EPACML. The following mechanisms affecting contaminant migration are accounted for in the EPACMTP model: transport by advection and dispersion, retardation resulting from reversible linear or nonlinear equilibrium sorption on the soil and aquifer solid phase, and biochemical degradation processes. The EPACML did not account for biochemical degradation; and did not account for sorption as accurately as the EPACMTP.

The EPACMTP consists of four major components:

1—A module that performs one-dimensional analytical and numerical solutions for water flow and contaminant transport in the unsaturated zone beneath a waste management unit;
2—A numerical module for steady-state groundwater flow subject to recharge from the unsaturated zone;
3—A module of analytical and numerical solutions for contaminant transport in the saturated zone; and
4—A Monte Carlo module for assessing the effect of the uncertainty resulting from variations in model parameters on predicted receptor well concentrations.

4. Where Can Technical Details on the EPACMTP Be Found?

For more information on DRAS and EPACMTP, please see 65 FR 75637–75651, December 4, 2000; 65 FR 58015–58031, September 27, 2000; and 66 FR 9781–9798, February 12, 2001. The December 4, 2000 **Federal Register** discusses the key enhancements of the EPACMTP and the details are provided in the background documents to the proposed 1995 Hazardous Waste Identification Rule (HWIR) (60 FR 66344, December 21, 1995). The background documents are available through the RCRA HWIR FR proposal docket (60 FR 66344, December 21, 1995). A summary of DRAS is presented in 66 FR 9781–9798, February 12, 2001. Footnote 2 in Preamble Section I.B.2. above lists the URL addresses for Region 6 guidance on DRAS.

5. What Methods Is EPA Proposing To Use To Determine Delisting Levels for This Petitioned Waste?

DOE–SR submitted to the EPA analytical data from its Savannah River Site (SRS) in Aiken, South Carolina. The petitioned waste consists of treated F006 and F027 waste from the M–Area of SRS, where nuclear reactor components were produced. The M–Area waste was treated by vitrification and DOE–SR petitioned EPA to delist the vitrified waste treatment residue, classified as F006 and F028, because it was derived from the treatment of F006 and F027 waste. DOE–SR's petitioned waste also included a small volume of non-vitrified waste treatment residue consisting of cementitious treatability samples (EPA Hazardous Waste No. F006). DOE–SR's delisting petition is based on analytical results for untreated waste, laboratory scale treatability studies, pilot scale testing, and testing of the vitrified waste from the full-scale vitrification unit. A summary of analytical data is presented in Table 2 of section II below, with analytical details in the Table footnotes.

After reviewing the analytical data and information on processes and vitrification feed materials that DOE–SR submitted in the delisting petition, EPA developed a list of constituents of concern and calculated delisting levels and risks using DRAS and EPACMTP DAFs as described above. EPA requests public comment on this proposed method of calculating delisting levels and risks for DOE–SR's petitioned waste.

EPA also requests comment on three additional methods of evaluating DOE–SR's delisting petition and determining delisting levels: (1) Use of the Multiple Extraction Procedure (MEP), SW–846 Method 1320,[4] to evaluate the long-term resistance of the waste to leaching in a landfill; (2) comparing total concentrations of constituents in the waste to the results obtained by DRAS for total concentrations; and (3) comparing concentrations of constituents in the waste and waste leachate to the Land Disposal Restrictions (LDR) Universal Treatment Standards (UTS) levels in 40 CFR 268.48. The UTS levels for DOE–SR's constituents of concern are the following:

Arsenic: 5.0 mg/l TCLP; *Barium:* 21 mg/l TCLP; *Beryllium:* 1.22 mg/l TCLP;
Cadmium: 0.11 mg/l TCLP; *Chromium:* 0.60 mg/l TCLP; *Lead:* 0.75 mg/l TCLP;
Nickel: 11 mg/l TCLP; *Silver:* 0.14 mg/l TCLP; and *Acetonitrile:* 38 mg/kg.

The EPA provides notice and an opportunity for comment before granting or denying a final exclusion. Thus, a final decision will not be made until all timely public comments (including those at public hearings, if any) on today's proposal are addressed.

II. Disposition of Delisting Petition

A. Summary of Delisting Petition Submitted by the United States Department of Energy Savannah River Operations Office (DOE–SR), Aiken, South Carolina

DOE–SR is seeking a delisting for vitrified radioactive mixed waste (RMW) generated at the Savannah River Site (SRS) in Aiken, South Carolina. The petitioned waste meets the listing definitions of F006 and F028 in Section 261.31 [5] and was generated by vitrification treatment of F006 and F027 [6] waste from the SRS M-Area where nuclear reactor components were produced. The petitioned waste also includes a small volume of non-vitrified waste which consists of cementitious treatability samples (EPA Hazardous Waste No. F006).

DOE–SR petitioned EPA, Region 4, in September 1996 and submitted revised petitions in September 1998 and September 2000, to exclude this F006 and F028 waste, on a one-time, generator-specific basis, from the lists of hazardous wastes in 40 CFR part 261, subpart D.

The hazardous constituents of concern [7] for which F006 was listed are cadmium, hexavalent chromium, nickel, and cyanide (complexed). F028 was listed for tetra-, penta-, and hexachlorodibenzo-*p*-dioxins; tetra-, penta-, and hexachlorodibenzofurans; tri-, tetra-, and pentachlorophenols and their chlorophenoxy derivative acids, esters, ethers, amine and other salts. DOE–SR petitioned the EPA to exclude its F028 waste (generated from thermal treatment of F027 waste) and F006 waste because DOE–SR believes that the petitioned waste does not meet the criteria for which the waste was listed. DOE–SR claims that its F006 and F028 waste will not be hazardous because the constituents of concern for which F006 and F028 are listed are either not present or present only at such low concentrations that the waste does not meet the criteria in Section 261.11(a)(3) for listing a waste as hazardous. DOE–SR also believes that this waste will not be hazardous for any other reason (i.e., there will be no additional constituents or factors that could cause the waste to be hazardous [8]). Review of this petition included consideration of the original listing criteria, as well as the additional factors required by the Hazardous and Solid Waste Amendments (HSWA) of 1984. See section 222 of HSWA, 42 U.S.C. 6921(f), and 40 CFR 260.22(d)(2)–(4). Today's proposal to grant this petition for delisting is the result of the EPA's evaluation of DOE–SR's petition.

In support of its petition, DOE–SR submitted: (1) Descriptions [9] of the waste streams that contributed to the petitioned waste, the areas where the contributing waste streams were generated, and the vitrification treatment process that generated the petitioned waste; (2) Material Safety Data Sheets (MSDSs) for all chemicals used in processes that generated the waste streams from which the petitioned waste was derived and the vitrification process that generated the petitioned waste; (3) the total volume of petitioned waste generated; (4) results of analysis of untreated waste and the petitioned waste for all constituents in Appendix VIII of 40 CFR part 261 or Appendix IX of part 264; (5) results of the analysis of leachate obtained by means of the Toxicity Characteristic Leaching Procedure ((TCLP), SW–846 Method 1311), from the petitioned waste and historical results obtained by the Extraction Procedure Toxicity leaching method ((EPTox), SW–846 Method 1310); (6) results of the determinations for the hazardous characteristics of ignitability, corrosivity, and reactivity, in these wastes; and (7) results of the MEP analysis of the petitioned waste.

The SRS vitrification unit treated all of the M-Area waste streams from October 1996 through March 22, 1999, pursuant to the Land Disposal Restrictions—Federal Facility Compliance Agreement (LDR–FFCA) of March 13, 1991, between EPA and DOE. Forty-four batches, a total of 2,960 metric tons, of M-Area waste streams were treated.[10] The LDR–FFCA required that the treatment residue meet LDR treatment standards. The petitioned waste is this treatment residue and, except for a small volume of cementitious treatability samples is the glass that formed after cooling and shaping molten glass made from the M-Area waste streams and glass-making additives. The vitrification unit, called the Vendor Treatment Facility (VTF) Melter, was an electric joule-heated glass melter, with a capacity of 5 to 6 tons per day, which maintained the molten glass at 1150°C for an average of 4 to 5 days. The total amount of vitrified waste generated was 538 cubic yards, classified as F006 and F028 because it was derived from F006 and F027 M-Area waste streams. Table 1 presents a summary of the M-Area waste streams and their generation dates.

In addition to the vitrified waste, the DOE–SR requested the delisting of a small volume of cementitious treatability samples (EPA Hazardous

[4] "SW–846" means EPA Publication SW–846, "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods." Methods in this publication are referred to in today's proposed rule as "SW–846," followed by the appropriate method number.

[5] F006: "Wastewater treatment sludges from electroplating operations except from the following processes: (1) Sulfuric acid anodizing of aluminum; (2) tin plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel; (4) aluminum or zinc-aluminum plating on carbon steel; and (6) chemical etching and milling of aluminum."

F028: "Residues resulting from the incineration or thermal treatment of soil contaminated with EPA Hazardous Waste Nos. F020, F021, F023, F026, and F027."

[6] F027: "Discarded unused formulations containing tri-, tetra-, or pentachlorophenol or discarded unused formulations containing compounds derived from these chlorophenols. (This listing does not include formulations containing Hexachlorophene synthesized from prepurified 2,4,5-tri-chlorophenol as the sole component.)"

[7] The hazardous constituents of concern for every listed waste are in *Appendix VII to Part 261—Basis for Listing Hazardous Waste.*

[8] Note that the waste remains subject to the Atomic Energy Act because of its radioactivity.

[9] Detailed descriptions may be found in the DOE–SR's Approved Site Treatment Plan (1996), developed pursuant to the Federal Facility Compliance Act of 1992.

[10] The RCRA Docket, R4–01–02–DOESRSP, for today's proposed rule contains the letter, dated June 15, 1999, to David E. Wilson from J. V. Odum, which documents the treatment of the petitioned waste to LDR treatment standards.

Waste No. F006). These samples were generated during treatability studies on stabilization conducted by the Savannah River Technology Center (between 1988–1991), and amounted to a total of 24 gallons (approximately 0.12 cubic yards). Analytical data were presented in the delisting petition which indicated that concentrations of hazardous constituents in these cementitious treatability samples were well below levels of concern. DOE–SR reported that these treatability samples might have been size reduced and vitrified in the VTF melter, but VTF operations personnel were concerned that the size reduced samples might not dissolve in the molten glass, and might plug the discharge ports. Therefore, the 0.12 cubic yard of cementitious treatability samples was not vitrified, but was included in the delisting petition (Section 2.1.5.2) as a separate waste stream in addition to the 538 cubic yards of vitrified M-Area wastes.

TABLE 1.—M-AREA WASTE STREAMS OF SAVANNAH RIVER SITE, AIKEN, SOUTH CAROLINA

Stream name	Stream designation in site treatment plan	EPA hazardous waste number (waste code) for listed waste	Dates generated
Plating Line Sludge from Supernate Treatment.	W–004	F006	June 1990–Apr. 1995.
Mark 15 Filter Cake	W–005	F006	Apr. 1983–July 1983.
Sludge Treatability Samples (glass and cementitious).	W–029	F006	1988–1994.
Uranium/Chromium Solution	W–031	Not listed, but hazardous by characteristic	1990–1992.
High Nickel Plating Line Sludge	W–037	F006	June 1985–Sept. 1988.
Plating Line Sump Material	W–038	Not listed, but hazardous by characteristic	Oct. 1988.
Nickel Plating Line	W–039	Not listed, but hazardous by characteristic	Feb. 1992.
Soils from Spill Remediation and Sampling Programs.	W–048	Not listed, but hazardous by characteristic	1983–1985.
Uranium/Lead Solution	W–054	Not listed, but hazardous by characteristic	1986–1988.
Soils from Chemicals, Metals, and Pesticides Pits Excavation.	W–082	F027	1984.
Dilute Effluent Treatment Facility (DETF) Filtercake from VTF off-gas condensate.	Not Applicable	F006	1996–1999.

Table 1B below summarizes the hazardous constituents and their concentrations in DOE–SR's petitioned waste.

TABLE 1B.—SAVANNAH RIVER SITE, AIKEN, SOUTH CAROLINA: PROFILE OF VITRIFIED M-AREA WASTE

Parameters[1]	1 2	2 10	3 15	4 21	5 26	6 33	7 39	8 44	Maximum[3]	Mean	Standard deviation	Coefficient of variation (%)

Notes to Table 1B:
[1] Parameters are the chemicals or properties analyzed.
[2] The first set of results for each chemical shows the concentrations determined by total analysis of the samples in milligrams of chemical per kilogram of waste (mg/kg) for metals and micrograms per kilogram (µg/kg) for organics. "Total analysis" means analysis of unextracted waste. The second set of results for each chemical shows the concentrations determined by analysis of the TCLP extracts of the samples in milligrams of chemical per liter of TCLP extract of the waste (mg/L). The TCLP results are in the row where the name of the chemical is followed by "—TCLP." U = Not detected above the method detection limit, which is the value preceding the U. J = Detected at a concentration greater than the detection limit but less than the reporting limit.—= not analyzed. The metals, antimony, mercury, selenium, and thallium were not detected by total analysis of samples and are not included in the table in order to save space. Acetonitrile was the only organic compound detected and is the only organic compound included in the table. Acetonitrile was not detected above the laboratory reporting limit. Columns 2 through 9 in the table heading contain sample identification numbers. The samples were composite samples for total analysis and grab samples for TCLP from one or more of the VTF batches associated with the composite sample. The top numbers in Columns 2 through 9 are composite sample numbers and the bottom numbers are TCLP grab sample numbers that identify a VTF batch number that was grab-sampled for TCLP. Sampling and analysis details are in Sections 4 and 5 of the petition.

[3] The last four columns contain a statistical analysis of the analytical results. Max. = maximum concentration found; Mean. = mean or average concentration found = sum of concentrations divided by the number of samples; S.D.= standard deviation = the square root of [(sum of squares of the differences between each measured concentration and the mean) divided by (the number of samples minus 1)]; C.V. = coefficient of variation, expressed as a percent = 100 times the standard deviation divided by the mean concentration. Statistical analyses were performed only if the parameter was detected in more than one sample. If a chemical was not detected in any of the samples, NA (not applicable) was written in the last three columns. Detection limits reported by the laboratory were used in the statistical calculations when chemicals were not detected (U) in some of the samples. This is a conservative assumption, which is likely to result in overestimation of the mean concentration.

EPA concluded after reviewing DOE–SR's waste management and waste history information that no other hazardous constituents, other than those tested for, are likely to be present in DOE–SR's petitioned waste. In addition, on the basis of test results and other information provided by DOE–SR, pursuant to section 260.22, EPA concluded that the petitioned waste will not exhibit any of the characteristics of ignitability, corrosivity, or reactivity. See Sections 261.21, 261.22, and 261.23, respectively.

During its evaluation of DOE–SR's petition, EPA also considered the potential impact of the petitioned waste on media other than groundwater. With regard to airborne dispersal of waste, EPA evaluated the potential hazards resulting from airborne exposure to waste contaminants from the petitioned waste using an air dispersion model for releases from a landfill. The results of this evaluation indicated that there is no substantial present or potential hazard to human health from airborne exposure to constituents from DOE–SR's petitioned waste. (A description of EPA's assessment of the potential impact of airborne dispersal of DOE–SR's petitioned waste is presented in the RCRA public docket for today's proposed rule.)

EPA evaluated the potential impact of the petitioned waste on surface water resulting from storm water runoff from a landfill containing the petitioned waste, and found that the waste would not present a threat to human health or the environment. (See the docket for today's proposed rule for a description of this analysis). In addition, EPA believes that containment structures at low-level radioactive waste landfills can effectively control runoff. DOE–SR plans to dispose the petitioned waste at the bottom of a 30 foot deep burial trench, so it does not anticipate that runoff from rainwater will directly contact the disposed waste. EPA also believes that, in general, leachate derived from the waste will not directly enter a surface water body without first traveling through the saturated subsurface where dilution of hazardous constituents may occur. Transported contaminants would be further diluted in the receiving water body. Compliance with Atomic Energy Act requirements would minimize significant releases to surface water from erosion of undissolved particulates in runoff.

B. What Delisting Levels Did EPA Obtain With DRAS and EPACMTP?

Delisting levels and risk levels calculated by DRAS, using the EPACMTP model, are presented in Table 2 below. DRAS found that the major pathway for human exposure to this waste is groundwater ingestion, and calculated delisting and risk levels based on that pathway. The input values required by DRAS were the chemical constituents in DOE–SR's petitioned waste; their maximum reported concentrations in the TCLP extract of the waste and in the unextracted waste (Values in Table 1B, Preamble Section II.A.); the maximum one-time volume to be land-disposed (538 cubic yards); the desired risk level, which was chosen to be no worse than 10^{-6} for carcinogens; and a hazard quotient of no greater than 1 for non-carcinogens. The carcinogenic constituents in the waste are arsenic, beryllium, and cadmium. Beryllium and cadmium also have non-carcinogenic toxic effects. Allowable concentrations in the TCLP leachate of the waste, as calculated by DRAS, are higher than the Toxicity Characteristic (TC) levels for all TC constituents except arsenic. Therefore, the delisting levels for all TC constituents except arsenic are capped at the TC regulatory level. The maximum TCLP concentrations found by DOE–SRS for the petitioned waste are all well below the TC levels and are also below the Universal Treatment Standards (UTS) of the Land Disposal Restrictions (LDR). All total concentrations reported for the unextracted petitioned waste are also many orders of magnitude below the DRAS-calculated total levels. The maximum reported total concentrations for DOE–SR's petitioned waste were all below the following levels (mg/kg): Arsenic-10; Barium-200; Beryllium-10; Cadmium-10; Chromium-500; Lead-200; Nickel-10,000; Silver-20; Acetonitrile-1.0, and Fluoride-1.0

TABLE 2:—DELISTING AND RISK LEVELS CALCULATED BY DRAS WITH EPACMTP MODEL FOR SRS PETITIONED WASTE

Constituent	Delisting level (mg/l TCLP)	DAF	DRAS-calculated risk for maximum concentration of carcinogen in waste	DRAS-calculated Hazard quotient for maximum concentration of non-carcinogen in waste
Arsenic	0.0649	1,330	3.47×10^{-7}	
Barium	5,070*; 3,860 Based on MCL	1,930		566×10^{-6}.
Beryllium (Carcinogenic Effect)	Not Enough Information: Effect Based on Inhalation 28.8 Based on MCL.	7.21×10^{3}	2.13×10^{-11}	
Beryllium (Non-Carcinogenic Effect).	541 28.8 Based on MCL	7.21×10^{3}		2.16×10^{-6}.
Cadmium (Carcinogenic Effect)	Not Enough Information: Effect Based on Inhalation; 10.4 Based on MCL.	2,080	4.17×10^{-15}	
Cadmium (Non-Carcinogenic Effect).	39* 10.4 Based on MCL	2,080		1.15×10^{-4}.
Chromium (Hexavalent; Carcinogenic Effect).	Not Enough Information: Effect Based on Inhalation; 107 Based on MCL.	1,070	5.30×10^{-12}	
Chromium (Not Hexavalent; Non-Carcinogenic Effect).	1.50×10^{7}*, 2.67×10^{4} Based on MCL.	2.67×10^{5}		5.48×10^{-7}.

TABLE 2:—DELISTING AND RISK LEVELS CALCULATED BY DRAS WITH EPACMTP MODEL FOR SRS PETITIONED WASTE—Continued

Constituent	Delisting level (mg/l TCLP)	DAF	DRAS-calculated risk for maximum concentration of carcinogen in waste	DRAS-calculated Hazard quotient for maximum concentration of non-carcinogen in waste
Lead	5,200*	3.46×10^{5}		Not Enough Information: There is No Reference Dose for Lead.
Nickel	1,960	2,610		5.64×10^{-4}.
Silver	266*	1420		3.71×10^{-5}.
Fluoride	Not Enough Information; 4,990 Based on MCL.	1,250		Not Enough Information.
Acetonitrile	847	1,320		6.00×10^{-7}.
total Hazard Quotient for All Waste Constituents.				1.09×10^{-3}.
Total Carcinogenic Risk for the Waste (due to Arsenic, Beryllium, Cadmium, and Hexavalent Chromium)).			3.48×10^{-7}	

*These levels are all greater than the Toxicity Characteristic (TC) regulatory level in 40 CFR 261.24. A waste cannot be delisted if it exhibits a hazardous characteristic; therefore, the delisting level for each of these constituents could not be greater than the TC level of 100 for Barium; 1.0 for Cadmium; 5.0 for Chromium; 5.0 for Lead; and 5.0 for Silver. MCL = Maximum Contaminant Level of National Primary Drinking Water Standards.

C. How Did EPA Use the Multiple Extraction Procedure (MEP) To Evaluate This Delisting Petition?

EPA developed the MEP test (SW–846 Method 1320) to help predict the long-term resistance to leaching of stabilized wastes, which are wastes that have been treated to reduce the leachability of hazardous constituents. The MEP consists of a TCLP extraction of a sample followed by nine sequential extractions of the same sample, using a synthetic acid rain extraction fluid (prepared by adding a 60/40 weight mixture of sulfuric acid and nitric acid to distilled deionized water until the pH is 3.0 ± 0.2). The synthetic acid rain extraction fluid was developed to determine the effect of "natural" acid rain on a hazardous waste inappropriately disposed, i.e., directly exposed to rainfall. The standard TCLP extraction fluid was developed to simulate the leaching of a hazardous waste disposed in a landfill, with the simulated extractant having a pH of 4.93. During the MEP test, the original sample which is subjected to the nine sequential extractions consists of the solid phase remaining after, and separated from, the initial TCLP extract. EPA designed the MEP to simulate multiple washings of percolating rainfall in the field, and estimates that these synthetic acid rain extractions would simulate approximately 1,000 years of rainfall. (See 47 *FR* 52687, Nov. 22, 1982.) 1982.) DOE–SR modified the MEP procedure for the petitioned waste by using the TCLP extraction fluid with pH = 4.93 for all the extractions, instead of using the synthetic acid rain for the nine extractions following the initial TCLP extraction. DOE–SR believed that the TCLP would represent more accurately the long term leaching from the SRS low-level radioactive waste landfill in which the waste would not be exposed to direct rainfall leaching. Table 3 below presents the results of analysis of modified MEP extracts.

The modified MEP data in Table 3 indicate that the petitioned waste would be expected to leach metals at low and decreasing concentrations for a period of at least 100 years, and much less than 10 per cent of the total amount of metal in the waste would leach during this time period.[11] The average life of a landfill is approximately 20 years. (See 56 *FR* 32993, July 18, 1991; and 56 *FR* 67197, Dec. 30, 1991.)

TABLE 3.—MULTIPLE EXTRACTION PROCEDURE (MODIFIED SW–846 METHOD 1320) RESULTS FOR DOE–SR'S PETITIONED WASTE

Extract No.	Nickel (Ni) concentration (mg/l TCLP)
1 (Initial TCLP)	0.46
2 (First TCLP extraction of the modified MEP)	0.33
3	0.34
4	0.29
5	0.32
6	0.30
7	0.31
8	0.31
9	0.33
10 (Ninth TCLP extraction of the modified MEP)	0.33

[11] This estimate is based on the following calculation for nickel: % nickel leached out over more than 100 years=100×(total number of milligrams of nickel in all of the 2-liter sample MEP extracts)÷the number of milligrams of nickel in the 100-gram sample that was extracted by the MEP: $100 \times 2 \times (0.46 + 0.33 + 0.34 + 0.29 + 0.32 + 0.30 + 0.31 + 0.31 + 0.33 + 0.33) \div 954 = 100 \times 6.64 \div 954 = 0.70\%$.

D. Conclusion

After reviewing DOE-SR's processes, the EPA concludes that (1) no hazardous constituents of concern are likely to be present in DOE-SR's waste at levels that would harm human health and the environment; and (2) the petitioned waste does not exhibit any of the characteristics of ignitability, corrosivity, or reactivity. See 40 CFR 261.21, 261.22, and 261.23, respectively.

EPA believes that DOE-SR's petitioned waste will not harm human health and the environment when disposed in a low-level radioactive waste landfill.

EPA proposes to exclude DOE-SR's petitioned waste from being listed as F006 and F028, based on descriptions of waste management and waste history, evaluation of the results of waste sample analysis, and on the requirement that DOE-SR's petitioned waste must be disposed in accordance with the Atomic Energy Act. If the proposed rule becomes effective, the exclusion will be valid if the petitioner disposes of the waste in a low-level radioactive waste landfill in accordance with the Atomic Energy Act, as required by the amended Table 1 of Appendix IX of 40 CFR part 261. If the proposed rule becomes final and EPA approves the disposal method, the petitioned waste would not be subject to regulation under 40 CFR parts 262 through 268 and the permitting standards of 40 CFR part 270. Although management of the waste covered by this petition would, upon final promulgation, be relieved from Subtitle C jurisdiction, the waste would remain a solid waste under RCRA and a low-level radioactive waste under the Atomic Energy Act. As such, the waste must be handled in accordance with all applicable Federal, State, and local solid waste management and low-level radioactive waste regulations. Pursuant to RCRA section 3007, EPA may also sample and analyze the waste to verify reported analytical data.

III. Limited Effect of Federal Exclusion

Will This Rule Apply in All States?

This proposed rule, if promulgated, would be issued under the Federal (RCRA) delisting program. States, however, are allowed to impose their own, non-RCRA regulatory requirements that are more stringent than EPA's, pursuant to section 3009 of RCRA. These more stringent requirements may include a provision which prohibits a Federally issued exclusion from taking effect in the States. Because a petitioner's waste may be regulated under a dual system (i.e., both Federal and State programs), petitioners are urged to contact State regulatory authorities to determine the current status of their wastes under the State laws. Furthermore, some States are authorized to administer a delisting program in lieu of the Federal program, i.e., to make their own delisting decisions. Therefore, this proposed exclusion, if promulgated, would not apply in those authorized States. If the petitioned waste will be transported to any State with delisting authorization, SRS must obtain delisting authorization from that State before the waste may be managed as nonhazardous in that State.

IV. State Authorization

A. Statutory Authority

Under section 3006 of RCRA, EPA may authorize qualified States to administer the RCRA hazardous waste program within the State. See 40 CFR part 271 for the overall standards and requirements for authorization. Following authorization, the State requirements authorized by EPA apply in lieu of equivalent Federal requirements and become Federally enforceable as requirements of RCRA. EPA maintains independent authority to bring enforcement actions under RCRA sections 3007, 3008, 3013, and 7003. Authorized States also have independent authority to bring enforcement actions under State law. A State may receive authorization by following the approval process described under 40 CFR 271.

After a State receives initial authorization, new Federal requirements promulgated under RCRA authority existing prior to the 1984 Hazardous and Solid Waste Amendments (HSWA) do not apply in that State until the State adopts and receives authorization for equivalent State requirements. The State must adopt such requirements to maintain authorization.

In contrast, under RCRA section 3006(g) (42 U.S.C. 6926(g)), new Federal requirements and prohibitions imposed pursuant to HSWA provisions take effect in authorized States at the same time that they take effect in unauthorized States. Although authorized States are still required to update their hazardous waste programs to remain equivalent to the Federal program, EPA carries out HSWA requirements and prohibitions in authorized States, including the issuance of new permits implementing those requirements, until EPA authorizes the State to do so. Authorized States are required to modify their programs only when EPA promulgates Federal requirements that are more stringent or broader in scope than existing Federal requirements. RCRA section 3009 allows the States to impose standards more stringent than those in the Federal program. See also 40 CFR 271.1(i). Therefore, authorized States are not required to adopt Federal regulations, both HSWA and non-HSWA, that are considered less stringent.

B. Effect on State Authorization

Today's proposal would be promulgated pursuant to HSWA authority, and contains provisions that are less stringent than the current Federal program. The proposed exclusion for DOE–SR's petitioned waste would be less stringent. Consequently, States would not be required to adopt the proposed exclusion, if it becomes final, as a condition of authorization of their hazardous waste programs.

V. Effective Date

This rule, if made final, will become effective immediately upon final publication. The Hazardous and Solid Waste Amendments of 1984 amended section 3010 of RCRA to allow rules to become effective in less than six months when the regulated community does not need the six-month period to come into compliance. That is the case here, because this rule, if finalized, would reduce the existing requirements for the petitioner. In light of the unnecessary hardship and expense that would be imposed on this petitioner by an effective date six months after publication and the fact that a six-month deadline is not necessary to achieve the purpose of section 3010, EPA believes that this exclusion should be effective immediately upon final publication. These reasons also provide a basis for making this rule effective immediately, upon final publication, under the Administrative Procedure Act, pursuant to 5 U.S.C. 553(d).

VI. Administrative Assessments

A. Executive Order 12866

Under Executive Order 12866, (58 FR 51735 (October 4, 1993)) the Agency must determine whether a regulatory action is "significant" and therefore subject to OMB review and the requirements of the Executive Order. The Order defines "significant regulatory action" as one that is likely to result in a rule that may: (1) Have an annual effect on the economy of $100 million or more or adversely affect, in a material way, the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) create serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients; or (4) raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

OMB has exempted this proposed rule from the requirement for OMB review under section (6) of Executive Order 12866. This proposed rule is not a "significant regulatory action," because it applies to a single facility.

B. Regulatory Flexibility Act (RFA), as Amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), 5 USC 601 et seq.

The RFA generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act or any other statute unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small organizations, and small governmental jurisdictions.

For purposes of assessing the impacts of today's rule on small entities, small entity is defined as: (1) A small business; (2) a small governmental jurisdiction that is a government of a city, county, town, school district or special district with a population of less than 50,000; and (3) a small organization that is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.

After considering the economic impacts of today's proposed rule on small entities, I certify that this action will not have a significant economic impact on a substantial number of small entities. In determining whether a rule has a significant economic impact on a substantial number of small entities, the impact of concern is any significant *adverse* economic impact on small entities, since the primary purpose of the regulatory flexibility analyses is to identify and address regulatory alternatives "which minimize any significant economic impact of the proposed rule on small entities." 5 U.S.C. Sections 603 and 604. Thus, an agency may certify that a rule will not have a significant economic impact on a substantial number of small entities if the rule relieves regulatory burden, or otherwise has a positive economic effect on all of the small entities subject to the rule. This proposed rule is de-regulatory in nature, and, if promulgated, will not have an adverse economic impact on any small entities since its effect would be to reduce the overall costs of EPA's hazardous waste regulations and would be limited to one facility.

Accordingly, I hereby certify that this proposed regulation, if promulgated, will not have a significant economic impact on a substantial number of small entities. This regulation, therefore, does not require a regulatory flexibility analysis. We continue to be interested in the potential impacts of the proposed rule on small entities and welcome comments on issues related to such impacts.

C. Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal Agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under section 202 of the UMRA, EPA must prepare a written analysis, including a cost-benefit analysis, for proposed and final rules with "Federal mandates" that may result in expenditures to State, local, and tribal governments, in the aggregate, or to the private sector, of $100 million or more in any one year. If a written statement is needed, section 205 of the UMRA generally requires EPA to identify and consider a reasonable number of regulatory alternatives. Under section 205, EPA must adopt the least costly, most cost-effective or least burdensome alternative that achieves the objectives of the rule, unless the Administrator publishes with the final rule an explanation why that alternative was not adopted. The provisions of section 205 do not apply when they are inconsistent with applicable law.

Today's proposed rule contains no Federal mandates (under the regulatory provisions of Title II of UMRA) for State, local, or tribal governments or the private sector. This is because today's proposed rule is de-regulatory and imposes no enforceable duty on any State, local or tribal governments or the private sector. Thus, today's rule is not subject to the requirements of sections 202, 204 and 205 of UMRA.

Before EPA establishes any regulatory requirements that may significantly or uniquely affect small governments, including tribal governments, it must have developed under section 203 of UMRA a small government agency plan. The plan must provide for notifying potentially affected small governments, enabling officials of affected small governments to have meaningful and timely input in the development of EPA regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising small governments on compliance with the regulatory requirements. EPA has determined that this rule will not significantly or uniquely affect small governments. This is because today's proposed rule is de-regulatory and imposes no enforceable duty on any State, local or tribal governments or the private sector. Today's rule is not, therefore, subject to the requirements of section 203 of UMRA.

D. Paperwork Reduction Act

This action does not impose an information collection burden under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 et. seq. There are no information collection requirements for this proposed rule that require an ICR. Furthermore, only one facility is affected by this proposal. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information. An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15.

Information collection and record-keeping requirements associated with this proposed rule have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act and have been assigned OMB Control Number 2050–0053.

E. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

Executive Order 13175, entitled "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 6, 2000), requires EPA to develop an accountable process to ensure "meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications." "Policies that have tribal implications" is defined in the Executive Order to include regulations that have "substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and the Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes."

This proposed rule does not have tribal implications. It will not have substantial direct effects on tribal governments, on the relationship between the Federal government and Indian tribes, as specified in Executive Order 13175. This is because today's proposed rule is de-regulatory and imposes no enforceable duty on any State, local or tribal governments or the private sector. Thus, Executive Order 13175 does not apply to this rule.

In the spirit of Executive Order 13175, and consistent with EPA policy to promote communications between EPA and tribal governments, EPA specifically solicits additional comment on this proposed rule from tribal officials.

F. Executive Order 13045: Protection of Children From Environmental Risks and Safety Risks

The Executive Order 13045, entitled "Protection of Children from Environmental Health Risks and Safety Risks (62 *FR* 19885, April 23, 1997) applies to any rule that EPA determines (1) is "economically significant" as defined under Executive Order 12866, and (2) the environmental health or safety risk addressed by the rule has a disproportionate effect on children. If the regulatory action meets both criteria, the Agency must evaluate the environmental health or safety effects of the planned rule on children; and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives. This proposed rule is not subject to the Executive Order because it is not economically significant as defined in E.O. 12866, and because the Agency does not have reason to believe the environmental health or safety risks addressed by this action present a disproportionate risk to children. The public is invited to submit or identify peer-reviewed studies and data, of which the agency may not be aware.

G. National Technology Transfer and Advancement Act of 1995

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 ("NTTAA"), Public Law No. 104–113, section 12(d) (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. The NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards.

This proposed rulemaking involves environmental monitoring or measurement. Consistent with the Agency's Performance Based measurement System ("PBMS"), EPA proposes not to require the use of specific, prescribed analytical methods, except when required by regulation in 40 CFR parts 260 through 270. Rather the Agency plans to allow the use of any method that meets the prescribed performance criteria. The PBMS approach is intended to be more flexible and cost-effective for the regulated community; it is also intended to encourage innovation in analytical technology and improved data quality. EPA is not precluding the use of any method, whether it constitutes a voluntary consensus standard or not, as long as it meets the performance criteria specified.

EPA welcomes comments on this aspect of the proposed rulemaking and, specifically, invites the public to identify potentially-applicable voluntary consensus standards and to explain why such standards should be used in this regulation.

H. Executive Order 12898

EPA is committed to addressing environmental justice concerns and is assuming a leadership role in environmental justice initiatives to enhance environmental quality for all populations in the United States. The Agency's goals are to ensure that no segment of the population, regardless of race, color, national origin, or income bears disproportionately high and adverse human health or environmental impacts as a result of EPA's policies, programs, and activities, and that all people live in safe and healthful environments. In response to Executive Order 12898 and to concerns voiced by many groups outside the Agency, EPA's Office of Solid Waste and Emergency Response formed an Environmental Justice Task Force to analyze the array of environmental justice issues specific to waste programs and to develop an overall strategy to identify and address these issues (OSWER Directive No. 9200.3–17).

Today's proposed rule pertains to treated waste at a single facility. EPA does not believe this petitioned waste would pose a risk to any community, whether minority, low-income, middle-income, non-minority, or affluent. The petitioned waste, if excluded from regulation as a hazardous waste under RCRA, must comply with the Atomic Energy Act and all federal, state, and local solid waste regulations. Therefore, this proposed rule is not expected to cause any disproportionately high and adverse impacts to minority or low-income communities versus non-minority or affluent communities.

We encourage all stakeholders including members of the environmental justice community and members of the regulated community to provide comments or further information related to potential environmental justice concerns or impacts, including information and data on facilities that have evaluated potential ecological and human health impacts (taking into account subsistence patterns and sensitive populations) to minority or low-income communities.

I. Executive Order 13211 (Energy Effects)

This proposal is not a "significant energy action" as defined in Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 Fed. Reg. 28355 (May 22, 2001)) because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy. We have concluded that this proposal will not have any adverse energy effects. It is a de-regulatory proposal that will affect a single facility.

J. Federalism—Applicability of Executive Order 13132

Executive Order 13132, entitled "Federalism" (64 FR 43255, August 10, 1999), requires EPA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications." "Policies that have federalism implications" is defined in the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government."

Today's proposed rule is de-regulatory and imposes no enforceable duty on any State, local or tribal governments or the private sector.

In the spirit of Executive Order 13132, and consistent with EPA policy to promote communications between EPA and State and local governments, EPA specifically solicits comment on this proposed rule from State and local officials.

This action does not have federalism implication. It will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the

VOL
67

2002
UMI

distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, because it affects only one facility.

List of Subjects in 40 CFR Part 261

Environmental protection, Hazardous waste, Recycling, Reporting and recordkeeping requirements.

Authority: Sec. 3001(f) RCRA, 42 U.S.C. 6921(f).

Dated: February 27, 2002.

Jewell Harper,

Acting Director, Waste Management Division.

For the reasons set out in the preamble, 40 CFR part 261 is proposed to be amended as follows:

PART 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

1. The authority citation for part 261 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6921, 6922, and 6938.

2. In Table 1 of appendix IX, part 261 add the following wastestream in alphabetical order by facility to read as follows:

Appendix IX—Wastes Excluded Under Secs. 260.20 and 260.22.

TABLE 1.—WASTES EXCLUDED FROM NON-SPECIFIC SOURCES

Facility	Address	Waste description
.	.	.
Savannah River Site (SRS)	Aiken, South Carolina	Vitrified waste (EPA Hazardous Waste Nos. F006 South and F028) that the United States Department of Energy Savannah River Operations Office (DOE–SR) generated by treating the following waste streams from the M-Area of the Savannah River Site (SRS) in Aiken, South Carolina, as designated in the SRS Site Treatment Plan: W–004, Plating Line Sludge from Supernate Treatment; W–995, Mark 15 Filter Cake; W–029, Sludge Treatability Samples (glass and cementitious); W–031, Uranium/Chromium Solution; W–037, High Nickel Plating Line Sludge; W–038, Plating Line Sump Material; W–039, Nickel Plating Line Solution; W–048, Soils from Spill Remediation and Sampling Programs; W–054, Uranium/Lead Solution; W–082, Soils from Chemicals, Metals, and Pesticides Pits Excavation; and Dilute Effluent Treatment Facility (DETF) Filtercake (no Site Treatment Plan code). This is a one-time exclusion for 538 cubic yards of waste (hereinafter referred to as "DOE–SR Vitrified Waste") that was generated from 1996 through 1999 and 0.12 cubic yard of cementitious treatability samples (hereinafter referred to as "CTS") generated from 1988 through 1991 (EPA Hazardous Waste No. F006). The one-time exclusion for these wastes is contingent on their being disposed in a low-level radioactive waste landfill, in accordance with the Atomic Energy Act, after [insert date of final rule.] DOE–SR has demonstrated that concentrations of toxic constituents in the DOE–SR Vitrified Waste and CTS do not exceed the following levels. (1) *TCLP Concentrations:* All leachable concentrations for these metals did not exceed the Land Disposal Restrictions (LDR) Universal Treatment Standards (UTS): (mg/l TCLP): Arsenic-5.0; Barium-21; Beryllium-1.22; Cadmium-0.11; Chromium-0.60; Lead-0.75; Nickel-11; and Silver-0.14. In addition, none of the metals in the DOE–SR Vitrified Waste exceeded the allowable delisting levels of the EPA, Region 6 Delisting Risk Assessment Software (DRAS): (mg/l TCLP): Arsenic-0.0649; Barium-100.0; Beryllium-0.40; Cadmium-1.0; Chromium-5.0; Lead-5.0; Nickel-10.0; and Silver-5.0. These metal concentrations were measured in the waste leachate obtained by the method specified in 40 CFR 261.24. *Total Concentrations in Unextracted Waste:* The total concentrations in the DOE–SR Vitrified Waste, not the waste leachate, did not exceed the following levels (mg/kg): Arsenic-10; Barium-200; Beryllium-10; Cadmium-10; Chromium-500; Lead- 200; Nickel-10,000; Silver-20; Acetonitrile-1.0, which is below the LDR UTS of 38 mg/kg; and Fluoride-1.0

TABLE 1.—WASTES EXCLUDED FROM NON-SPECIFIC SOURCES—Continued

Facility	Address	Waste description
		(2) *Data Records:* Records of analytical data for the petitioned waste must be maintained by DOE–SR for a minimum of three years, and must be furnished upon request by EPA or the State of South Carolina, and made available for inspection. Failure to maintain the required records for the specified time will be considered by EPA, at its discretion, sufficient basis to revoke the exclusion to the extent directed by EPA. All data must be maintained with a signed copy of the certification statement in 40 CFR 260.22(i)(12). (3) *Reopener Language:* (A) If, at any time after disposal of the delisted waste, DOE–SR possesses or is otherwise made aware of any environmental data (including but not limited to leachate data or groundwater monitoring data) or any other data relevant to the delisted waste indicating that any constituent is identified at a level higher than the delisting level allowed by EPA in granting the petition, DOE–SR must report the data, in writing, to EPA within 10 days of first possessing or being made aware of that data. (B) Based on the information described in paragraph (3)(A) and any other information received from any source, EPA will make a preliminary determination as to whether the reported information requires that EPA take action to protect human health or the environment. Further action may include suspending or revoking the exclusion, or other appropriate response necessary to protect human health and the environment. (C) If EPA determines that the reported information does require Agency action, EPA will notify the facility. The notice shall include a statement of the proposed action and a statement providing DOE–SR with an opportunity to present information as to why the proposed action is not necessary. DOE–SR shall have 10 days from the date of EPA's notice to present such information.(E) Following the receipt of information from DOE–SR, as described in paragraph (3)(D), or if no such information is received within 10 days, EPA will issue a final written determination describing the Agency actions that are necessary to protect human health or the environment, given the information received in accordance with paragraphs (3)(A) or (3)(B). Any required action described in EPA's determination shall become effective immediately, unless EPA provides otherwise. (4) *Notification Requirements:* DOE–SR must provide a one-time written notification to any State Regulatory Agency in a State to which or through which the delisted waste described above will be transported, at least 60 days prior to the commencement of such activities. Failure to provide such a notification will result in a violation of the delisting conditions and a possible revocation of the decision to delist.

Federal Register
Vol. 67, No. 51
Friday, March 15, 2002

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

March 11, 2002.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments regarding (a) whether the collection of information is necessary for proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Washington, DC 20503 *and* to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250–7602. Comments regarding these information collections are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling (202) 720–6746.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Farm Service Agency

Title: 7 CFR Part 1951–L, Servicing Cases Where Unauthorized Loan or Other Assistance are Received.

OMB Control Number: 0560–0160.

Summary of Collection: The Farm Service Agency (FSA) farm loan programs are administered under the provisions of the Consolidated Farm and Rural Development Act (CONACT) [P.L. 87–128). Occasionally, FSA encounters cases where unauthorized assistance was received by a borrower. This assistance may be a loan where the recipient did not meet the eligibility requirements set forth in program regulations or where the borrower qualified for loan assistance but a subsidized interest was charged on the loan, resulting in receipt of unauthorized interest subsidy benefits. The assistance may also be loan servicing where a borrower received an excessive write down or write-off of their debt. The information collected under the provisions of this regulation is provided on a voluntary basis by the borrower, although failure to cooperate to correct loan accounts may result in liquidation of the loan.

Need and Use of the Information: The information collected by FSA will primarily be financial data such as amount of income, farm operating expenses, crop yields, etc. The borrower will provide written records or other information to refute FSA's findings when it is determined through audit or by other means that a borrower has received financial assistance to which he or she was not entitled. If the borrower is unsuccessful in having the FSA change its determination of unauthorized assistance, the borrower may appeal the FSA decision. Otherwise, the unauthorized loan recipient may pay the loan in full, apply for a loan under a different program, convey the loan security to the government, enter into an accelerated repayment agreement, or sell the security in lieu of forced liquidation.

Description of Respondents: Farms, Individuals or household; Business or other for-profit.

Number of Respondents: 200.

Frequency of Responses: Reporting; On occasion; Annually.

Total Burden Hours: 800.

Farm Service Agency

Title: Request for Aerial Photography.

OMB Control Number: 0560–0176.

Summary of Collection. The USDA Farm Service Agency (FSA) Aerial Photography Field Office (APFO) has the authority to coordinate aerial photography work in USDA, develop and carry out aerial photography and remote sensing programs and the Agency's aerial photography flying contract programs. Section 387 of the Agriculture Adjustment Act of February 1, 1938, states "The Secretary may furnish reproduction of such aerial or other photographs, mosaics, and maps as have been obtained in connection with the authorized work of the Department of farmers and governmental agencies at the estimated cost of furnishing such reproduction, and to persons other than farmers at such prices (not less than estimated cost of furnishing such reproductions) as the Secretary may determine. The money received from such sales is deposited in the Treasury to the credit of the appropriation charged with the cost of making such reproductions. FSA will collect information using FSA–441 form to collect the necessary customer and photography information needed for the USDA FSA Aerial Photography Field Office to produce and ship the various products ordered from their office.

Need and Use of the Information: FSA will collect information on the name, address, contact name, telephone, fax, e-mail, customer code, agency code, purchase order number, credit card number/exp. date and amount remitted/po amount. Customers have the option of placing orders by mail, fax, telephone, walk-in or floppy disk. Furnishing this information requires the customers to research and prepare their request before submitting it to APFO.

Description of Respondents: Farms; Individuals or household; Business or other for-profit; Not-for-profit institutions; Federal Government; State, Local or Tribal Government.

Number of Respondents: 12,000.

Frequency of Responses: Reporting; Other (when ordering).

Total Burden Hours: 8,000.

Animal and Plant Health Inspection Service

Title: 9 CFR part 94 Importation of Pork from Yucatan and Sonora, Mexico.

OMB Control Number: 0579–0138.

Summary of Collection: Title 21, U.S.C. authorizes sections 111, 114, 114a, 114–1, 115, 120, 121, 125, 126, 134a, 134c, 134f, and 134g of 21 U.S.C. These authorities permit the Secretary to prevent, control and eliminate domestic disease such as brucellosis, as well as, to take actions to prevent and to manage exotic diseases such as classical swine fever. Disease prevention is the most effective method for maintaining a healthy animal population and enhancing the Animal and Plant Health Inspection Service (APHIS) ability to compete in exporting animals and animal products. Veterinary Services, a division within USDA's Animal and Plant Health Inspection Service, is responsible for administering regulations intended to prevent the introduction of animal diseases, such as classical swine fever, into the United States. APHIS will collect information from the foreign meat inspection certificate that accompanies the pork from Yucatan and Sonora to the United States.

Need and Use of the Information: APHIS will collect information to certify that; the pork is from swine slaughtered at Federally inspected slaughter plants and are approved to export to the United States; and the pork has not been in contact with pork from any State in Mexico other than Yucatan or Sonora. Also, the Secretary certificate must show the seal number that appears on the shipping container in which the pork is transported.

Description of Respondents: Farms; Business or other for-profit; Individuals or households; Federal Government; State, Local, or Tribal Government.

Number of Respondents: 10.

Frequency of Responses: Reporting; On occasion.

Total Burden Hours: 40.

Animal and Plant Health Inspection Service

Title: Virus-Serum-Toxin Act and Regulations in 9 CFR, Subchapter E, Parts 101–124.

OMB Control Number: 0579–0013.

Summary of Collection: To fulfill its mission of preventing the importation, preparation, sale, or shipment of harmful veterinary biological products, the Veterinary Biologics Division of USDA's Animal and Plant Health Inspection Service (APHIS) issues licenses to qualified establishments that produce biological products, and issues permits to importers seeking to import such products into the United States. In order to effectively implement the licensing, production, labeling, importation, and other requirements, APHIS employs a number of information gathering tools such as establishment license applications, product license applications, product permit applications, product and test report forms and field study summaries.

Need and Use of the Information: APHIS uses the information collected as a primary basis for the approval or acceptance of issuing licenses or permits to ensure veterinary biological products that are used in the United States are pure, safe, potent, and effective. Also, APHIS uses the information to monitor the serials for purity, safety, potency and efficacy that are produced by licensed manufacturers prior to their release for marketing.

Description of Respondents: Business or other for-profit; State, Local or Tribal Government.

Number of Respondents: 200.

Frequency of Responses: Recordkeeping; Reporting: On occasion.

Total Burden Hours: 51,177.

Animal and Plant Health Inspection Service

Title: Importation of Restricted and Controlled Animal and Poultry Products and Byproducts, Organisms, and Vectors into the U.S.

OMB Control Number: 0579–0015.

Summary of Collection: Title 21, U.S.C. authorizes sections 111, 114, 114a, 114–1, 115, 120, 121, 125, 126, 134a, 134c, 134f, and 134g of 21 U.S.C. which permits the Secretary to prevent, control and eliminate domestic disease such as brucellosis, as well as to take actions to prevent and to manage exotic diseases such as bovine spongiform encephalopathy (BSE) and other foreign diseases. Disease prevention is the most effective method for maintaining a healthy animal population and enhancing the Animal and Plant Health Inspection Service (APHIS) ability to compete in exporting animals and animal products.

Need and Use of the Information: APHIS will collect information to ensure that imported items do not present a disease risk to the livestock and poultry populations of the United States. The information will provide APHIS with critical information concerning the origin and history of the items destined for importation into the United States. Without the information, the United States would be at risk of an exotic disease incursion.

Description of Respondents: Business or other for-profit; Individuals or households; Not for-profit institutions; Federal Government; State, Local, or Tribal Government.

Number of Respondents: 7,098.

Frequency of Responses: Recordkeeping; Reporting; On occasion.

Total Burden Hours: 17,830.

Animal Plant and Health Inspection Service

Title: Swine Health Protection.

OMB Control Number: 0579–0065.

Summary of Collection: Title 21, U.S.C. authorizes the Secretary and the Animal and Plant Health Inspection Service (APHIS) to prevent, control and eliminate domestic diseases, as well as to take actions to prevent and manage exotic disease such as hog cholera, foot-and-mouth disease, and other foreign disease. Disease prevention is the most effective method for maintaining a healthy animal population and enhancing APHIS ability to compete in the world market of animals and the trade of animal products. Garbage is one of the primary media through which numerous infections or communicable diseases of swine are transmitted. The Act and the regulations will allow only operators of garbage treatment facilities, which meet certain specification to utilize garbage for swine feeding. APHIS will use various forms to collect information.

Need and Use of the Information: APHIS collects information from persons desiring to obtain a permit (license) to operate a facility to treat garbage. Prior to issuance of a license, an inspection will be made of the facility by an authorized representative to determine if it meets all requirements of the regulations. Periodic inspections will be made to determine if licenses are meeting the standards for operation of their approved facilities. Upon receipt of the information from the Public Health Officials, the information is used by Federal or State animal health personnel to determine: whether the waste collector is feeding garbage to swine; whether it is being treated; and whether the feeder is licensed or needs to be licensed.

Description of Respondents: Farms; Business or other for profit.

Number of Respondents: 383.

Frequency of Responses: Recordkeeping; Reporting; On occasion.

Total Burden Hours: 584.

Animal Plant and Health Inspection Service

Title: Foreign Animal Disease (Emerging Disease Investigation (FAD/ED) Database).

OMB Control Number: 0579–0071.

Summary of Collection: Title 21 U.S.C. authorizes section 111, 114, 114a, 114–1, 115, 120, 121, 125, 126, 134a, 134c, 134f, and 134g, which permits the Secretary to prevent, control and eliminate domestic diseases, as well as taking actions to prevent and manage

exotic diseases such as foot-and-mouth disease, exotic Newcastle disease, and other foreign diseases. Animal and Plant Health Inspection Service (APHIS) has the responsibility to investigate and eventually control foreign animal disease occurrences. Through its Foreign Animal Disease Surveillance Program, the Emergency Program Staff of Veterinary Services compiles essential epidemiological and diagnostic data that is used to define foreign animal diseases and their risk factors. APHIS collects the information using form VS 12–27.

Need and Use of the Information: APHIS collects information such as the purpose of the diagnostician's visit to the site, the name and address of the owner/manager, the type of operation being investigated, the number of and type of animals on the premises, the number of sick or dead animals, the results of post mortem examinations, and the name of the suspected disease. This information assists APHIS personnel in detecting and eradicating foreign animal disease incursions.

Description of Respondents: Farm; Business or other for profit.

Number of Respondents: 535.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 1,070.

Animal Plant and Health Inspection Service

Title: Environmental Monitoring Form.

OMB Control Number: 0579–0117.

Summary of Collection: The mission of the Animal and Plant Health Inspection Service (APHIS) is to provide leadership in ensuring the health and care of animals and plants, to improve the agricultural productivity and competitiveness, and to contribute to the national economy and the public health. The National Environmental Policy Act (NEPA), 42 U.S.C. 4321 et seq., and the regulations of the Council on Environmental Quality, which implements the procedural aspects of NEPA (40 CFR 1500–1508), requires APHIS to implement environmental monitoring for certain activities conducted for pest and disease, control and eradication programs. APHIS Form 2060, Environmental Monitoring Form, will be used to collect information concerning the effects of pesticide used in sensitive habitats.

Need and Use of the Information: APHIS will collect information on the kind of pesticide used, the date of application, the location and description of where samples are collected, and the environmental conditions at the collection site including wind speed and direction, temperature, humidity, amount of rainfall, and topography. The supporting information contained on the APHIS Form 2060 is vital for interpreting the laboratory test APHIS conducts on collected samples. Also, if a given sample were not accompanied by the form, APHIS would have no way of knowing from which site the sample was taken.

Description of Respondents: Federal Government; Individuals or households; Farms.

Number of Respondents: 150.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 1,500.

Animal Plant and Health Inspection Service

Title: Export Certification, Accreditation of Non-Government Facilities.

OMB Control Number: 0579–0130.

Summary of Collection: The Department of Agriculture is responsible for preventing plant diseases or insect pests form entering the United States, as well as the spread of pests not widely distributed in the United States, and eradicating those imported when feasible. The Plant Quarantine Act and the Federal Pest Act authorizes the Department to carry out this mission. The regulations in 7 CFR part 353 allow non-government facilities (such as commercial laboratories and private inspection services) to be accredited by the Animal and Plant Health Inspection Service (APHIS) to perform specific laboratory testing or phytosanitary inspections that could serve as the basis for issuing Federal or re-export phytosanitary certificates, or export certificates for processed plant products. APHIS provides export certification services to assure other countries that the plants and plant products are free of plant diseases and insect pests.

Need and Use of the Information: APHIS will collect information for applications submitted by operator/owner of a non-government facility seeking accreditation to conduct laboratory testing or phytosanitary inspection. The application should contain the legal name, full address of the facility, the name, address, telephone and fax numbers of the facility's operator, a description of the facility, and a description of the specific laboratory testing or phytosanitary inspection services for which the facility is seeking accreditation. If the activities are not conducted properly, APHIS export certification program would be compromised, causing a disruption in plant and plant product exports that could prove financially damaging to U.S. exporters.

Description of Respondents: business or other for profit.

Number of Respondents: 15.

Frequency of Responses: Reporting: on occasion.

Total Burden Hours: 300.

Food and Nutrition Service

Title: Report of Coupon Issuance & Commodity Distribution for Disaster Relief.

OMB Control Number: 0584–0037.

Summary of Collection: The Emergency Food Stamp Assistance Program is authorized by the Disaster Relief Act of 1970; the Food Stamp Act, as amended; and Part 274 of the Food Stamp Program regulations. The Food and Nutrition Service (FNS) initiated this program in a food stamp project area when all or part of the area had been affected by a disaster. Sections 274.7 and 274.14 of the Food Stamp Program regulations contain requirements that State agencies keep records and submit reports on food stamps issued under disaster procedures "as may from time to time be required by FNS." Food distribution in disaster situation is authorized under Section 32 of the Act of August 24, 1935. Surplus foods are made available by State distributing agencies for relief purposes to victims of natural disaster such as hurricanes, floods, tornadoes, etc. Distribution to these recipients is made primarily through such organizations as the American Red Cross or the Salvation Army. These organizations use surplus foods for both central feeding operations and for distribution to families in homes cut off from normal sources of food supply. Form FNS–292 will be used by State welfare departments to report to FNS the number of households and persons who were certified for Emergency Food Stamp Assistance, and also to report the value of coupons issued to those households.

Need and Use of the Information: FNS will collect information through the use of form FNS–292, which is used by the FNS Administrator, the Food Distribution Division, and the three Food Stamp Program divisions to monitor program activity, assess coverage provided to needy recipients, and to prepare budget requests. If the information were not collected, FNS would be unable to monitor the issuance of food stamp coupons and the distribution of surplus foods during disaster situations.

Description of Respondents: State, Local, or Tribal Government.

Number of Respondents: 55.

Frequency of Responses: Recordkeeping; Reporting; On occasion.

Total Burden Hours: 97.

Food and Nutrition Service

Title: Affidavit of Return or Exchange of Food Coupons.

OMB Control Number: 0584–0052.

Summary of Collection: Section 11(a), of the Food Stamp Act (the Act) requires that the state agencies assume responsibility for the certification of applicant households and for the issuance of coupons and the control and accountability thereof. Records shall be kept to ascertain whether the program is being conducted in compliance with the provisions of this Act and the regulations issued pursuant to this Act. Such records shall be available for inspection and audit at any reasonable time and shall be preserved for not less than 3 years.

Need and Use of the Information: The Food and Nutrition Service (FNS) will collect information on coupons returned or exchanged and provides verification of who returned and received the coupons. FNS will use form FNS–135, Affidavit of Return or Exchange of Food Coupons to collect information.

Description of Respondents: State, Local, or Tribal Government; Individuals or households.

Number of Respondents: 30,000.

Frequency of Responses: Recordkeeping; Reporting; On occasion.

Total Burden Hours: 7,500.

Forest Service

Title: 36 CFR Part 228, Subpart A—Locatable Minerals.

OMB Control Number: 0596–0022.

Summary of Collection: The United States Mining Law of 1982, as amended, governs the prospecting for and appropriation of metallic and most nonmetallic minerals on 192 million acres of National Forest set up by proclamation from the public domain. The law gives individuals the right to search for and extract valuable mineral deposits of locatable minerals and secure title to the lands involved. Recording the claim in the local courthouse and with the appropriate BLM State Office affords protection to the mining claimant from subsequent locators. A mining claimant is entitled to reasonable access to claim for further prospecting, mining or necessary related activities, subject to the other laws and applicable regulations. The Forest Service (FS) will collect information using form FS 2800–5, Plan of Operations for Mining Activities on National Forest System Lands.

Need and Use of the Information: FS will collect information requirements for a Notice of Intent; to identify the area involved; the nature of the proposed operations; the route to the area of operations; and the method of transport. The information requirements for a Plan of Operations includes: the name and legal mailing address of the operators; a description of the type of operations proposed; a description of how it would be conducted; a description of the type and standard of existing/proposed roads/access route; a description of the means of transportation to be used; a description of the period during which the proposed activity will take place; and measures to meet the environmental protection requirements. The information requirements for a cessation of operation include: verification to maintain the structures, equipment and other facilities; expected reopening date; estimate of extended duration of operations; and maintenance of the site, structure, equipment and other facilities during nonoperating periods.

Description of Respondents: Business or other for-profit.

Number of Respondents: 4,208.

Frequency of Responses: Reporting: Other (approved for a given period).

Total Burden Hours: 13,174.

Forest Service

Title: Forest Products Free Use Permit, Forest Products Removal Permit and Cash Receipt, and Forest Products Sale Permit and Cash Receipt.

OMB Control Number: 0596–0085.

Summary of Collection: Individuals or other Federal agencies that wish to remove forest products from the National Forest must request a permit. 16 U.S.C. 551 requires the promulgation of regulations to regulate forest use and prevent destruction of the forests. Regulations at 36 CFR 223.1 and 223.2 govern the sale of forest products such as Christmas trees, pinecones, moss, and mushrooms. Regulations at 36 CFR 223.5–223.13 sets forth conditions under which free use of forest product may be obtained by individuals and organizations. 15 U.S.C. 607 provides that a defense against trespass is that the forest product be removed under the regulations. These statutes and regulations apply to 16 U.S.C. 477, 492, and 607a. Regulations at 36 CFR 216.6 require persons to obtain permits to remove special forest products from National Forest Land. Forest Service Regional offices have been issuing Forest Product Removal Permit for over 20 years. The collection of information is required to determine if the applicant meets the criteria under which free use or sale of forest products is authorized by the regulations and to ensure that the permittee complies with the regulations and terms of the permit. This information is also needed to allow Forest Service (FS) compliance personnel to identify permittees in the field.

Need and Use of the Information: FS will collect the name address and tax identification number from person applying for permits. The information will be used by FS to keep a record of persons buying forest products. The information will also be used to ensure that the permittee has not received product values in excess of the amount allowed by regulation in any one fiscal year. Without the forest product removal program, achieving multiple use management programs such as reducing fire hazard and improving forest health on the National Forest would be impaired.

Description of Respondents: Individuals or households; Business or other for-profit.

Number of Respondents: 18,500.

Frequency of Responses: Recordkeeping, Reporting: On occasion.

Total Burden Hours: 1,365.

Farm Service Agency

Title: Agreement for the use of Proceeds/Release of Chattel Security.

OMB Control Number: 0560–0171.

Summary of Collection: Section 335(f) of the Consolidated Farm and Rural Development Act (CONACT) requires release of normal income security to pay essential household and farm operating expenses of the borrower, until the Farm Service Agency (FSA) accelerates the loans. The FSA agreed in the consent degree to approve a borrower's planned use of proceeds from the disposition of their chattel security, record any changes to planned use, and record the actual disposition of chattel security for the year of operation.

Need and Use of the Information: FSA will collect information on the actual and planned disposition of chattel security through the use of form FSA 1962–I. This form allows for normal income releases as required for payment of essential family living and farm operating expenses, provides the borrower with information on how to report sales of chattels, income received and how to notify agency of any changes to the operation or the use of chattel proceeds. The information collected will come from FSA borrowers who may be individual farmers and farming entities.

Description of Respondents: Farms; Business or other for-profit; Individuals or households.

Number of Respondents: 68,750.

Frequency of Responses: Recordkeeping; Reporting: Annually.
Total Burden Hours: 20,350.

Farm Service Agency

Title: Lamb Meat Adjustment Assistance Program (LMAAP).
OMB Control Number: 0560–0205.
Summary of Collection: The Lamb Meat Adjustment Assistance Program (LMAAP) is administered and implemented under the general direction and supervision of the Farm Service Agency (FSA) through its State and County Committees. Authorizing legislation for LMAAP provides for the re-establishment of farmers' purchasing power by making payments in connection with the normal production of any agricultural commodity for domestic consumption. The objective of the LMAAP is to make direct payments to producers of sheep and lamb operations to help them weather the current economic crisis, as well as, help improve their production efficiencies and the marketability of lamb meat during the 4 year period from July 21, 1999 through July 31, 2003.
Need and Use of the Information: FSA will collect information using form FSA 383 for program year 2–4 for the sheep and lamb operations. The information obtained from the form is needed to verify commodity and producer eligibility and calculate payment amounts. Without the information from the producers, FSA would be unable to administer the program to provide direct payments to the sheep and lamb operations.
Description of Respondents: Farm; Individuals or households; Business or other-for-profit.
Number of Respondents: 60,000.
Frequency of Responses: Reporting: Annually.
Total Burden Hours: 339,240.

Farm Service Agency

Title: General Regulations Governing Loans for 1996 and Subsequent Crops.
OMB Control Number: 0560–0087.
Summary of Collection: The Federal Agriculture Improvement and Reform Act of 1996, authorizes The Farm Service Agency (FSA) to make commodity loans for certain commodities to eligible producers. Producers requesting Commodity Credit Corporation (CCC) commodity loans must meet eligibility requirements that are basic to all commodity loan programs. These requirements that are needed to insure the integrity of the loan program and that only eligible producers receive the benefits of the loan program. FSA will collect information on commodity type, quantity of commodity, storage, location, liens on the commodity, etc., through the use of a variety of forms.
Need and Use of the Information: FSA County Committees are responsible for administration of the CCC loan program. The committees use the information collected to verify eligibility of participants to receive loan benefits and to determine cases of noncompliance with the regulations governing the loan program. Furnishing this data is voluntary; however, without it, assistance under the CCC loan program cannot be provided.
Description of Respondents: Farm.
Number of Respondents: 382,455.
Frequency of Responses: Reporting: On occasion; Annually.
Total Burden Hours: 700,591.

Agricultural Marketing Service

Title: Recordkeeping Requirements for Certified Application of Federally Restricted Use Pesticides (7 CFR part 110).
OMB Control Number: 0581–0164.
Summary of Collection: The Food, Agriculture, Conservation, and Trade (FACT) Act of 1990 (Subtitle H, Sec. 1491) mandates the Department of Agriculture (USDA) in consultation with the Administrator of the Environmental Protection Agency (EPA), "shall require certified applicators of federally restricted use pesticides to maintain records comparable to records maintained by commercial applicators in each state." In addition, USDA and the Administrator of EPA are required under Section 1491(f) of the FACT Act to survey the records, develop and maintain a database so USDA and the Administrator of EPA can prepare and publish annual pesticide use reports, of which copies must be transmitted to Congress. Agricultural Marketing Service (AMS) is charged with administering the Federal Pesticide Recordkeeping Program. AMS requires certified private applicators of federally restricted use pesticides to maintain records of all restricted use pesticide applications for a period of two years.
Need and Use of the Information: AMS will collect information using form STD–8, Pesticide for Recordkeeping Inspection. The form provides information on the brand or product name and the EPA registration number of the federally restricted use pesticide that was applied; the total amount of the federally restricted use pesticide applied; the location, the size of the area treated, the crop, commodity, stored product or site to which a restricted use pesticide was applied; the month, day and year on which the restricted use pesticide application occurred; and the name and certification number of the certified applicator who applied or who supervised the application of the restricted use of pesticide. In order to properly administer the Pesticide Recordkeeping Program, AMS needs to monitor and determine to what extent private applicators are complying with the program's requirements and identify the reasons for non/or partial compliance. AMS has the responsibility to assure records are kept to provide information to be utilized by licensed health care professionals for possible medical treatment. In addition, the stature requires USDA to submit annual reports to Congress pertaining to the use of restricted use pesticides in agricultural production.
Description of Respondents: Farm; Federal Government; State, Local or Tribal Government.
Number of Respondents: 915,780.
Frequency of Responses: Recordkeeping; Reporting: On occasion.
Total Burden Hours: 1,785,041.

Rural Development

Title: 7 CFR 1901–E, Civil Rights Compliance Requirements.
OMB Control Number: 0575–0018.
Summary of Collection: The Rural Development (RD) is required to provide Federal financial assistance through its farmer, housing, and community and business programs on an equal opportunity basis. The laws implemented in 7 CFR 1901–E, require the recipients of Rural Development's Federal financial assistance to collect various types of information by race, color, and national origin.
Need and Use of the Information: RD will use this information to monitor a recipient's compliance with the civil rights laws and to determine whether or not service and benefits are being provided to beneficiaries on an equal opportunity basis. This information is made available to USDA officials, officials of other Federal agencies and to Congress for reporting purposes. Without the required information, RD and its recipient will lack the necessary documentation to demonstrate that their programs are being administered in a nondiscriminatory manner and in full compliance with the civil rights laws.
Description of Respondents: Individuals or households; Not-for-profit institutions; Business or other for-profit; Farms; State, Local or Tribal Government.
Number of Respondents: 19,565.
Frequency of Responses: Reporting: On occasion.
Total Burden Hours: 555,692.

Food and Nutrition Service

Title: Uniform Grant Application for Non-Entitlement Discretionary Grants.
OMB Control Number: 0584–New.
Summary of Collection: The Food and Nutrition Service (FNS) has establish a process for a uniform grant application usable for all of the non-entitlement discretionary grant programs to collect the information from grant applicants needed to evaluate and rank applicants and protect the integrity of the grantee selection process. All FNS discretionary grant programs will be eligible, but not required to use the uniform grant application package. The authorities for these grants vary. The term "grant" in this submission refers only to non-entitlement discretionary grants or cooperative agreements Discretionary grant announcements include a number of information collections, including a "project description" (program narrative), assurances and certifications. The requirements for the program narrative statement are based on the requirements for program narrative statements described in section 1.c(5) of OMB Circular A–102 and OMB A–110.
Need and Use of the Information: As the primary users of the information collected, FNS will review, evaluate and approve application package will include general information and instructions; requirements for the program narrative statement describing how the grant objectives will be reached as well as a description of the budget; the Standard Form (SF 424 series that requests basic information, budget information and assurances) and certifications. Currently, there is no government-wide OMB pre-approved form for the project narrative, although a program narrative is required in existing OMB circulars.
Description of Respondents: State, Local, or Tribal Government; Business or other for-profit; Not for profit institutions.
Number of Respondents: 505.
Frequency of Responses: Reporting: Other (one-time).
Total Burden Hours: 30,000.

Food and Nutrition Service

Title: Consumer Food Guide Pyramid Study.
OMB Control Number: 0584–New.
Summary of Collection: The U.S. Department of Agriculture's Food Guide Pyramid is designed to help all healthy Americans two years of age and older implement the Dietary Guidelines for Americans. The proposed qualitative consumer research will describe consumers' understanding and use of the Food guide Pyramid along with possible barriers to following the Pyramid's guidance. The study involves 18 focus group sessions, 6 with general consumers and 4 each with the elderly, overweight, and food stamp recipients, to explore how consumers understand concepts and messages of the consumer brochure and graphic illustration of the Food Guide Pyramid. The authority to conduct this information collection is found in 7 CFR 2.19(a)(3).
Need and Use of the Information: The Center for Nutrition Policy and promotion (CNPP) will collect information to develop practical and meaningful food and nutrition guidance for Americans to help improve their diets. Information will be collected concerning how the Food Guide Pyramid recommendations and messages are understood and used by consumers to improve their diets, and barriers to their use of the Pyramid. If the information is not collected, USDA's ability to incorporate messages and materials that are practical, meaningful, and relevant for the intended audience in any proposed update of the Food Guide Pyramid will be impaired.
Description of Respondents: Individuals or households.
Number of Respondents: 2,790.
Frequency of Responses: Reporting: Other (one-time).
Total Burden Hours: 1,035.

Forest Service

Title: Small Business Timber Set-Aside Program: Appeal Procedures on Recomputation of Shares.
OMB Control Number: 0596–0141.
Summary of Collection: The Conference Report accompanying the 1997 Omnibus Appropriation Act (Pub L. 104–208) requires that the Forest Service establish a process by which purchasers may appeal decisions concerning recomputations of Small Business Set-aside (SBA) shares or changes in policies impacting the Small Business Timber Sale Set-aside Program.
Need and Use of the Information: the information collected is submitted to a Forest Service Officer to review any appeal of decisions related to recomputations of timber sale share to be set-aside for small business timber purchasers.
Description of Respondents: Business or other for-profit.
Number of Respondents: 40.
Frequency of Responses: Reporting: On occasion.
Total Burden Hours: 320.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Notice of Appointment of Members to the National Agricultural Research, Extension, Education, and Economics Advisory Board

AGENCY: Research, Education, and Economics, USDA.

ACTION: Solicitation for membership.

SUMMARY: In accordance with the Federal Advisory Committee Act, 5 U.S.C. App., the United States Department of Agriculture announces solicitation for nominations to fill 11 vacancies on the National Agricultural Research, Extension, Education, and Economics Advisory Board.

DATES: Deadline for Advisory Board member nominations is June 3, 2002.

SUPPLEMENTARY INFORMATION: Section 802 of the Federal Agricultural Improvement and Reform Act of 1996 (The Farm Bill) authorized the creation of the National Agricultural Research, Extension, Education, and Economics Advisory Board. The Board is composed of 30 members, each representing a specific category related to farming or ranching, food production and processing, forestry research, crop and animal science, land-grant institutions, food retailing and marketing, rural economic development, and natural resource and consumer interest groups, among many others. The Board was first appointed by the Secretary of Agriculture in September 1996 and one-third of the 30 members were appointed for a 1, 2, and 3-year term, respectively. As a result of the staggered appointments, the terms for 10 of the 30 members who represent 10 specific categories will expire September 30, 2002. Nominations for a 3-year appointment for all 10 of the vacant categories are sought.

In addition, the current member of Category U. Food and Fiber Processors, will not be serving out the remainder of his term. Therefore, this slot will be vacant as well and available for a 1-year term nomination. All nominees will be carefully reviewed for their broad expertise, leadership, and relevance to a category. The full 11 slots to be filled are:

Category B. Farm Cooperatives

Category D. Plant Commodity Producers
Category G. National Aquaculture Associations
Category J. National Food Science Organizations
Category L. National Nutritional Science Societies
Category M. 1862 Land-Grant Colleges and Universities
Category R. Scientific Community not closely associated with Agriculture
Category U. Food and Fiber Processors (1-year term)
Category AA. An Agency of USDA lacking Research Capabilities
Category BB. Research Agency of the Federal Government other than USDA
Category DD. National Organization directly concerned with REE

Nominations are being solicited from organizations, associations, societies, councils, federations, groups, and companies that represent a wide variety of food and agricultural interests throughout the country. Nominations for one individual who fits several of the categories listed above, or for more than one person who fits one category will be accepted. In your nomination letter, please indicate the specific membership category for each nominee. Each nominee must fill out a form AD–755, "Advisory Committee Membership Background Information" (which can be obtained from the contact person below or may printed out from the following Web site: *http://www:fs.fed.us*, then search AD–755). All nominees will be vetted before selection. Appointments to the National Agricultural Research, Extension, Education, and Economics Advisory Board will be made by the Secretary of Agriculture. Send nominee's name, resume, and their completed AD–755 to USDA, Office of the Advisory Board, Research, Education, and Economics, 1400 Independence Avenue, SW., Room 344–A, JL Whitten Building, Washington, DC 20250–2255, postmarked no later than June 3, 2002.

FOR FURTHER INFORMATION CONTACT: Deborah Hanfman, Executive Director, National Agricultural Research, Extension, Education, and Economics Advisory Board, 1400 Independence Avenue, SW., Room 344–A, JL Whitten Building, Washington, DC 20250–2255. Telephone: 202–720–3684. Fax: 202–720–6199.

Nominations are open to all individuals without regard to race, color, religion, sex, national origin, age, mental or physical handicap, marital status, or sexual orientation. To ensure that recommendations of the Advisory Board take into account the needs of the diverse groups served by the Department, membership shall include, to the extent practicable, individuals with demonstrated ability to represent minorities, women, and persons with disabilities.

Done at Washington, DC, this 26th day of February 2002.

Joseph J. Jen,

Under Secretary, Research, Education, and Economics, U.S. Department of the Agriculture.

[FR Doc. 02–6208 Filed 3–14–02; 8:45 am]

BILLING CODE 3410–22–P

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Notice of the National Agricultural Research, Extension, Education, and Economics Advisory Board Meeting

AGENCY: Research, Education, and Economics, USDA.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, 5 U.S.C. App., the United States Department of Agriculture announces a meeting of the National Agricultural Research, Extension, Education, and Economics Advisory Board.

SUPPLEMENTARY INFORMATION: The National Agricultural Research, Extension, Education, and Economics Advisory Board, which represents 30 constituent categories, as specified in section 802 of the Federal Agriculture Improvement and Reform Act of 1996 (Pub. L. 104–127), has scheduled a National Agricultural Research, Extension, Education, and Economics Advisory Board general meeting and focus session from March 28, 2002—March 29, 2002. This meeting is entitled, Food and Agriculture Biosecurity: Research and Education Implications. It will be held at the Washington Court Hotel in Washington, DC. Also, a pre-meeting reception with special guest speakers, including the President of the Council of Scientific Society Presidents, Dr. Martin Apple, will be held the evening of Wednesday March 27 from 7–8 p.m. at the same location.

On Thursday, March 28, 2002, the morning session will begin with opening remarks by the Chair of the Advisory Board, Dr. Victor Lechtenberg. Dr. Michael Osterholm, Director of the Center for Infectious Disease Research and Policy, University of Minnesota, will provide the keynote address. The Deputy Secretary of Agriculture, Jim Moseley, has been invited to provide an overview on Food and Agricultural Biosecurity at USDA. Additional remarks on USDA's key research activities will be given by Dr. Joseph Jen, Under Secretary for Research, Education, and Economics. There will also be a panel on "Homeland Security in USDA Agencies," followed by a panel on "Preparedness Plans." A mid-afternoon panel at 3 p.m. will address "Biosecurity Education and Protection for the American Public." The floor will be open to the public, as time permits, prior to the day's adjournment. A buffet reception with be held that evening (Thursday, March 28) from 5:30 p.m.—7:30 p.m. with an invited guest speaker from the Office of Homeland Security.

On Friday, March 29, 2002, the Advisory Board will reconvene with a panel that addresses "Biosecurity in the Food and Agriculture Industries Involved in the Food Supply Chain," and include topics such as grain handling and transportation, meat production, food processing, retail, food service, and fresh produce. Dr. John Marburger, Director of the Office of Science and Technology Policy, Executive Office of the President, has been invited to speak during lunch on high priority research and development issues, interagency collaborations, and public and private sector partnerships with regard to homeland security in food and agriculture. The afternoon panel session focuses on "Research Implications for Biosecurity." Guest speakers at this meeting are representative of the broad food and agriculture stakeholder community across the country. Prior to the wrap up of the meeting and as time permits, the floor will be open for public comments. The Board will discuss in detail findings of this 2-day meeting on Food and Agriculture Biosecurity and begin to develop research and education recommendations that will be tendered as advice to the Secretary of Agriculture. Written comments will be accepted at the USDA Advisory Board Office for public record up to 2 weeks following the Board meeting.

This meeting is open to all individuals without regard to race, color, religion, sex, national origin, age, mental or physical handicap, marital status, or sexual orientation. Should an attendee at this meeting require any special needs, please contact the USDA Research, Education, and Economics Advisory Board Office cited below.

DATES:

March 27 7 p.m. to 8 p.m.—Pre-Meeting Reception with Guest Speaker
March 28 8:30 a.m. to 4:15 p.m.—Focus Session

March 28 4:15 p.m. to 4:30 p.m.—Public Comments and Adjournment for the Day
March 28 5:30 p.m. to 7:30 p.m.—Working Reception with Guest Speaker
March 29 8 a.m. to 12 noon—Advisory Board Meeting and Focus Session
March 29 12 noon to 1:15 p.m.—Working Lunch with Guest Speaker
March 29 1:15 p.m. to 3 p.m.—Focus Session and Discussion
March 29 3 p.m. to 3:45 p.m.—Public Comments, Wrap-up and Recommendations, and Adjournment of Meeting

Place: Washington Court Hotel, 525 New Jersey Avenue, NW, Washington, D.C.; Atrium Ballroom and Executive Room (Receptions Only).

Type of Meeting: Open to the Public.

Comments: The public may file written comments before or up to two weeks after the meeting with the contact person. All statements will become a part of the official records of the National Agricultural Research, Extension, Education, and Economics Advisory Board and will be kept on file for public review in the Office of the Advisory Board; Research, Education, and Economics; U.S. Department of Agriculture; Washington, DC 20250–2255.

FOR FURTHER INFORMATION CONTACT: Deborah Hanfman, Executive Director, National Agricultural Research, Extension, Education, and Economics Advisory Board; Research, Education, and Economics Advisory Board Office; Room 344–A, Jamie L. BILLING CODE 3410–22–P

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

Notice of Request for Extension and Revision of a Currently Approved Information Collection

AGENCIES: Commodity Credit Corporation and Farm Service Agency, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the intent of the Commodity Credit Corporation (CCC), through the Farm Service Agency (FSA), to request an extension and revision of the currently approved information collection for the regulation used in support of the CCC Conservation Reserve Program (CRP). This renewal includes revisions incorporated in the proposed rule, "Cropland Eligibility and Private Sector Technical Assistance," including revisions to amend total burden hours to reflect ongoing CRP activity as authorized by the Federal Agriculture Improvement and Reform Act of 1996, Pub. L. 104–127, and Title XI of the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2001, Pub. L. 106–387.

DATES: Comments on this notice must be received on or before May 14, 2002 to be assured consideration.

FOR FURTHER INFORMATION, AND TO FILE COMMENTS, CONTACT: Comments may be sent to Robert Stephenson, Director, Conservation and Environmental Programs Division, USDA, FSA, CEPD, STOP 0513, 1400 Independence Avenue, SW., Washington, DC 20250–0513, telephone (202) 720–6221; facsimile (202) 720–4619; or e-mail at *crppra@wdc.usda.gov*.

SUPPLEMENTARY INFORMATION:

Title: (7 CFR part 1410) Conservation Reserve Program.

OMB Control Number: 0560–0125.

Expiration Date: October 31, 2002.

Type of Request: Extension and Revision of a Currently Approved Information Collection.

Abstract: The information collected under Office of Management and Budget (OMB) Control Number 0560–0125, as identified above allows FSA to effectively administer the regulations under the CRP. The CRP regulations at 7 CFR part 1410 and formerly at 7 CFR part 704 set forth basic policies, program provisions, and eligibility requirements for owners and operators to enter into and carry out long-term CRP contracts with financial and technical assistance and for making cost-share and annual rental payments under the program. All information collection under 7 CFR part 704 has ceased. This regulation was removed by the final CRP rule published February 19, 1997, which revised 7 CFR part 1410. CRP information collection requirements will continue under 7 CFR part 1410.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 6.7 minutes per respondent.

Respondents: Owners, operators, and other producers on eligible cropland.

Estimated Number of Respondents: 160,000.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden Hours on Respondents: 153,861.

Comments are sought on these requirements including: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. These comments should be sent to the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 and to Robert Stephenson, Director, Conservation and Environmental Programs Division, USDA, FSA, 1400 Independence Avenue, SW., STOP 0513, Washington DC 20250–0513.

Comments will be summarized and included in the request for OMB approval of the information collection. All comments will also become a matter of public record.

Signed at Washington, DC, on January 28, 2002.

James R. Little,

Administrator, Farm Service Agency and Executive Vice President, Commodity Credit Corporation.

Tobacco Marketing Quota Referenda Results: Burley and Flue-Cured Tobaccos, 2001

AGENCY: Farm Service Agency, USDA.

VOL
67
ISS
51
MR
15
2002
UMI

ACTION: Notice of results of marketing quota referenda for burley and flue-cured tobaccos for 2001.

SUMMARY: The Farm Service Agency (FSA) herein announces results of marketing quota referenda held in 2001 for burley and flue-cured tobacco. These referenda were conducted to determine if a sufficient number of voting producers who own or grow these tobaccos wanted national marketing quotas to continue for the three marketing years 2001, 2002 and 2003. A majority of the eligible producers voting in the referenda approved continuation of the national marketing quotas.

FOR FURTHER INFORMATION CONTACT: Ann Wortham, Tobacco and Peanuts Division, (202)720–2715 or at e-mail address *ann_wortham@wdc.usda.gov*.

SUPPLEMENTARY INFORMATION:

Discussion of Notice

In January 2001, the Secretary of Agriculture (the Secretary) announced that national marketing quotas would be in effect for flue-cured tobacco for the three marketing years beginning with 2001, subject to approval by flue-cured producers in a referendum held in accordance with Sec. 312(c) of the Agricultural Adjustment Act of 1938, as amended. The flue-cured tobacco referendum was conducted January 8 through January 12, 2001, and indicated that 97 percent of voting producers favored the quotas.

The Secretary announced in February 2001, that national marketing quotas would be in effect for burley tobacco for the three marketing years beginning with 2001, subject to approval by burley producers in a referendum. The burley marketing quota referendum, held from February 12 through February 16, 2001, indicated that 97.4 percent of the producers who voted favored the quotas.

This notice is to announce the referenda results, as required by 7 CFR part 717.24. The results of each referenda are set forth below.

Notice

Results of the National Marketing Quota Referenda for the 2001 Through 2003 Marketing Years for Flue-Cured and Burley Tobaccos

The following is a summary, by State, of the results of each referendum.

FLUE-CURED

State	Yes	No	Total
Alabama	1	0	1
Florida	133	3	136
Georgia	363	84	447
North Carolina	6,589	160	6,749

DEPARTMENT OF AGRICULTURE

Forest Service

Plumas County Resource Advisory Committee (RAC); Meetings

AGENCY: Forest Service, USDA.

ACTION: Notice of meetings.

SUMMARY: The Plumas County Resource Advisory Committee (RAC) will hold meetings/work sessions on March 15 & 20, in Quincy, California, and another in Portola, CA on April 12. The purpose of the March 15 meeting is to design concept paper review and project evaluation/selection processes. The purpose of the March 20 work session is to answer questions from members of the community interested in submitting projects for funding consideration under the Title 2 provisions of the Secure Rural Schools and Community Self-Determination Act of 2000. The purpose of the April 12 meeting is to review proposed project concept papers and generate comments for project proponents' use.

DATES AND ADDRESSES: The March 15 meeting will take place from 9–3 p.m., in the Mineral Building at the Plumas-Sierra County Fairgrounds, 204 Fairgrounds Road, Quincy, California. The March 20 work session will take place from 7–9 p.m., at the Catholic Church Annex, 176 Lawrence Street, Quincy, CA. The April 12 meeting will take place from 9–3 p.m., at the Williams House, 424 East Sierra Ave (Highway 70), Portola, CA.

FOR FURTHER INFORMATION CONTACT: Lee Anne Schramel Taylor, Forest Coordinator, USDA, Plumas National Forest, P.O. Box 11500/159 Lawrence Street, Quincy, CA 95971; (530) 283–7850; or by E–MAIL *eataylor@fs.fed.us*.

SUPPLEMENTARY INFORMATION: Agenda items for the March 15 meeting include: (1) Review applicable sections of the Secure Rural Schools and Community Self-Determination Act of 2000, regarding project solicitation and approval; and (2) Continue project solicitation/design and selection process; and, (3) Future meeting schedule/logistics/agenda. The meeting is open to the public and individuals may address the Committee at any time, after being recognized by the Chair. The March 20 work session is open to the public. Agenda items for the April 12 meeting include: (1) Review concepts papers and generate comments for project proponents' use; (2) Public Comment; and, (3) Future meetings schedule/logistics/agenda. The meeting is open to the public and individuals may address the Committee in the time provided on the agenda.

Dated: March 8, 2002.

Mark J. Madrid,

Forest Supervisor.

BILLING CODE 3410–11–M

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Additions and Deletions

AGENCY: Committee for Purchase from People Who Are Blind or Severely Disabled.

ACTION: Proposed additions to and deletions from Procurement List.

SUMMARY: The Committee is proposing to add to the Procurement List products and services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and to delete products and services previously furnished by such agencies.

Comments Must Be Received on or Before: April 15, 2002.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Jefferson Plaza 2, Suite 10800, 1421 Jefferson Davis Highway, Arlington, Virginia 22202–3259.

FOR FURTHER INFORMATION CONTACT: Sheryl D. Kennerly (703) 603–7740.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C 47(a) (2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

Additions

If the Committee approves the proposed additions, the entities of the Federal Government identified in this notice for each product and service will be required to procure the products and services listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the products and services to the Government.

2. The action will result in authorizing small entities to furnish the products and services to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-ODay Act (41 U.S.C.46–48c) in connection with the products and services proposed for addition to the Procurement List. Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

The following products and services are proposed for addition to Procurement List for production by the nonprofit agencies listed:

Products

Product/NSN: Holder, Key and Credit Card/ 7510–01–445–9348.
NPA: The Travis Association for the Blind, Austin, Texas.
Contract Activity: Office Supplies & Paper Products Commodity Center, New York, New York.
Product/NSN: Holder, Key and Credit Card/ 7510–01–NIB–0613.
NPA: The Travis Association for the Blind, Austin, Texas.
Contract Activity: Office Supplies & Paper Products Commodity Center, New York, New York.

Services

Service Type/Location: Janitorial/Custodial/ Alton Federal Building, Alton, Illinois.
NPA: Challenge Unlimited, Inc., Alton, Illinois.
Contract Activity: GSA, Public Buildings Service.
Service Type/Location: Janitorial/Grounds Maintenance/Ed Jones Federal Building & U.S. Courthouse, Jackson, Tennessee.
NPA: Madison Haywood Developmental Services, Jackson, Tennessee.
Contract Activity: GSA, Public Buildings Service.
Service Type/Location: Janitorial/Grounds Maintenance/Federal Building & U.S. Post Office, Dyersburg, Tennessee.
NPA: Madison Haywood Developmental Services, Jackson, TN.
Contract Activity: GSA, Public Buildings Service.

Deletions

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the products and services to the Government.

2. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-ODay Act (41 U.S.C.46–48c) in connection with the products and services proposed for deletion from the Procurement List.

The following products and services are proposed for deletion from the Procurement List:

Products

Product/NSN: Hood, Sleeping Bag/8465–00–518–2769.
NPA: North Bay Rehabilitation Services, Inc., Rohnert Park, California.
Contract Activity: Defense Supply Center—Philadelphia, Philadelphia, PA.

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Additions

AGENCY: Committee for Purchase from People Who Are Blind or Severely Disabled.
ACTION: Additions to procurement list.

SUMMARY: This action adds to the Procurement List services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.
EFFECTIVE DATE: April 15, 2002.
ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Jefferson Plaza 2, Suite 10800, 1421 Jefferson Davis Highway, Arlington, Virginia 22202–3259.
FOR FURTHER INFORMATION CONTACT: Sheryl D. Kennerly (703) 603–7740.
SUPPLEMENTARY INFORMATION: On January 25, 2002, the Committee for Purchase From People Who Are Blind or Severely Disabled published notices (66 FR 3683) of proposed additions to the Procurement List. After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the services and impact of the additions on the current or most recent contractors, the Committee has determined that the services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4. I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the services to the Government.
2. The action will not have a severe economic impact on current contractors for the services.
3. The action will result in authorizing small entities to furnish the commodities and services.
4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-ODay Act (41 U.S.C. 46–48c) in connection with the services proposed for addition to the Procurement List.

Accordingly, the following services are added to the Procurement List:

Services

Service Type/Location: Laundry Service/ Naval Air Station, Patuxent River, Maryland.
NPA: Rappahannock Goodwill Industries, Inc., Fredericksburg, Virginia.
Contract Activity: Department of the Navy.
Service Type/Location: Transcription Services/Equal Employment Office (Federal Bureau of Prisons), Washington, DC.
NPA: The Lighthouse of Houston, Houston, Texas.
Contract Activity: Federal Bureau of Prisons Department of Justice.

This action does not affect current contracts awarded prior to the effective date of this addition or options that may be exercised under those contracts.

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List, Proposed Addition; Correction

In the correction document appearing on page 10664, FR Doc. 02–5612, in the issue of March 8, 2002, in the second column the Committee published a notice of proposed addition to the Procurement List of, among other things, Janitorial/Custodial, Ronald Reagan Building, International Trade Center, At the Federal Tenant Spaces Only, Washington, DC. This notice is amended by deleting the reference "International Trade Center". The proposed addition now reads "Janitorial/Custodial, Ronald Reagan Building, at the Federal tenant spaces only, Washington, DC".

DEPARTMENT OF COMMERCE

[I.D. 030802B]

Submission for OMB Review; Comment Request

The Department of Commerce has submitted to the Office of Management and Budget (OMB) for emergency clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).
Title: Survey to Measure Effectiveness of Community-Oriented Policing for ESA Enforcement.
Form Number(s): None.
OMB Approval Number: 0648–0435.
Type of Request: Emergency submission.
Burden Hours: 316.
Number of Respondents: 787.
Average Hours Per Response: 20 minutes for a citizen survey; 45 minutes for a survey of Washington Department of Fish and Wildlife personnel; and 60 minutes for interviews of public officials, key stakeholders, and Washington Department of Fish and Wildlife managers.

Needs and Uses: Community-oriented policing (COP) promotes the use of various resources and policing-community partnerships for developing strategies to identify, analyze, and address community problems at their source. Recognizing the significant role non-traditional enforcement efforts will play in Endangered Species Act enforcement in the Northwest, a measurement tool has been developed to ensure that the performance outcomes of these non-traditional enforcement (COP) efforts are effectively measured. Through this instrument, COP efforts can be evaluated for success and elements essential for achieving successful outcomes in future programs can be identified and quantified. Anadromous species enforcement will be the focus of the survey, and the surveys/interviews will take place in the Walla Walla and Cherry Creek river basins.

Affected Public: Individuals or households, and State, Local, or Tribal Government.
Frequency: One-time.
Respondent's Obligation: Voluntary.
OMB Desk Officer: David Rostker, (202) 395–3897.

Copies of the above information collection proposal can be obtained by calling or writing Madeleine Clayton, Departmental Paperwork Clearance Officer, (202) 482–3129, Department of Commerce, Room 6608, 14th and Constitution Avenue, NW, Washington, DC 20230 (or via the Internet at MClayton@doc.gov).

Written comments and recommendations for the proposed information collection should be sent by April 19, 2002 to David Rostker, OMB Desk Officer, Room 10202, New Executive Office Building, Washington, DC 20503.

Dated: March 7, 2002.
Gwellnar Banks,
Management Analyst, Office of the Chief Information Officer.

Bureau of the Census

[Docket Number 010209034–2035–03]

RIN 0607–XX63

Urban Area Criteria for Census 2000

AGENCY: Bureau of the Census, Department of Commerce.
ACTION: Notice of final program criteria.

SUMMARY: This Notice announces the Bureau of the Census' (Census Bureau's) criteria for defining urban and rural territory based on the results of Census 2000. These criteria replace and supersede the 1990 census criteria for defining urban and rural territory. In establishing these criteria, the Census Bureau took into account the comments received regarding the information published in the **Federal Register** on March 28, 2001 (66 FR 17018) and July 27, 2001 (66 FR 39143), as well as research and investigation conducted by Census Bureau staff. The new criteria appear later in this Notice.
EFFECTIVE DATE: This Notice is effective immediately.
FOR FURTHER INFORMATION CONTACT: Robert Marx, Chief, Geography Division, U.S. Census Bureau, 4700 Silver Hill Road-Stop 7400; Washington, DC 20233–7400, telephone (301) 457–2131, or e-mail at: *ua@geo.census.gov*.
SUPPLEMENTARY INFORMATION: The Census Bureau identifies and tabulates data for the urban and rural populations and their associated areas solely for the presentation and comparison of census statistical data. It does not take into account or attempt to anticipate any nonstatistical uses that may be made of these areas or their associated data, nor does it attempt to meet the requirements of such nonstatistical program uses. Nonetheless, the Census Bureau recognizes that some Federal and state agencies are required by law to use Census Bureau-defined urban and rural classifications for allocating program funds, setting program standards, and implementing aspects of their programs. The agencies that make such nonstatistical uses of the areas and data should be aware that the changes to the urban and rural criteria for Census 2000 might affect the implementation of their programs.

UMI

If a Federal, state, local, or tribal agency voluntarily uses these urban and rural criteria in a nonstatistical program, it is that agency's responsibility to ensure that the results are appropriate for such use. In considering the appropriateness of such nonstatistical program uses, the Census Bureau urges each agency to consider permitting appropriate modifications of the results of implementing the urban and rural criteria specifically for the purposes of its program. When a program permits such modifications, the Census Bureau urges each agency to use descriptive terminology that clearly identifies the different criteria being applied so as to avoid confusion with the Census Bureau's official urban and rural classifications.

This section of the Notice, among other things, provides a brief synopsis of the public comments the Census Bureau received in response to the March 28, 2001 (66 FR 17018) and July 27, 2001 (66 FR 39143) **Federal Register** Notices, and the decisions the Census Bureau made in response to the public comments received.

In addition, the Census Bureau plans to announce the determinations of Census 2000 urban and rural territory in the near future. Federal agencies should begin to use the new urban/rural definitions to tabulate and publish statistics when the determinations are announced.

Executive Order 12866

This Notice has been determined to be not significant for purposes of Executive Order 12866.

Regulatory Flexibility Act

Even though we gave the public prior notice and an opportunity for public comment, we were not required to do so by Title 5, United States Code (U.S.C.), Section 553, or any other law. Therefore, a Regulatory Flexibility Analysis is not required and has not been prepared (5 U.S.C. 603[a]).

Paperwork Reduction Act

This program Notice does not represent a collection of information subject to the requirements of the Paperwork Reduction Act, Title 44, U.S.C., Chapter 35.

Summary of Comments Received in Response to the March 28, 2001 (66 FR 17018) and July 27, 2001 (66 FR 39143) Federal Register Notices

The March 28, 2001 **Federal Register** document provided the proposed criteria and the July 27, 2001 **Federal Register** document provided further clarification. Both Notices requested comment on the Census Bureau's proposed Urban Area Criteria for Census 2000. In response to the two Notices, the Census Bureau received 142 comment letters. Of that number, 81 comments were received from regional planning and nongovernmental organizations, 24 from municipal and county officials, 22 from Members of Congress, 8 from state government officials, 4 from officials of other federal agencies, and 3 from individuals. Many comment letters addressed more than one topic.

Of the 142 letters, 67 offered comments to the proposed criteria for recognizing uninhabitable areas adjacent to bodies of water (floodplains, marshes, and other wetlands); 37 of these dealt specifically with areas not accommodated in the criteria that respondents believed to be uninhabitable. Of these 37 letters, 22 expressed concern about the area that separates Brunswick City and St. Simons Island, Georgia, and 15 dealt with the area in the vicinity of the St. Francis Levee between West Memphis, Arkansas, and Memphis, Tennessee. The majority of the comments concerned the inability of the proposed criteria to define additional types of areas as "uninhabitable" territory. In particular, respondents commented on the inadequacy of the criteria to define intermittently flooded, uninhabited land adjacent to water bodies as uninhabitable, and thus exempted from the distance measurement when attempting to connect qualifying territory. It was recommended that if these additional types of uninhabitable land areas were included in the criteria, important outlying urban territory would qualify for inclusion in urban areas. Not having this territory included in the urban areas would result in a loss of valuable funding. The remaining comments addressed the criteria that allow a 5 mile jump over uninhabitable area, stating that they would benefit large states and urban areas, but not small states and urban areas.

Ten comments expressed concern that there were no provisions in the criteria to include nonresidential urban land uses, such as airports, industrial parks, and large commercial areas, within urban areas. Comments were received from the Lewiston, Idaho-Clarkston, Washington, area (3); the Dallas-Fort Worth, Texas, area (2); the Reno-Sparks, Nevada, area (2); and one comment each was received from the Indianapolis, Indiana; Paducah, Kentucky-Metropolis, Illinois; and Grand Forks, North Dakota-East Grand Forks, Minnesota, areas. The commentors believed the population density criterion of 500 people per square mile (ppsm) was too high and, therefore, would unfairly exclude the surrounding adjacent nonresidential urban land use areas and what they considered the complete extent of their urbanized area. All comments expressed concern about a possible loss of funding or an inability to expend the funding where the community believed it was needed if there were no way to identify and include nonresidential land use as part of the Urban Area Criteria for Census 2000.

Twenty-seven of the comments questioned elimination of the grandfathering criteria; that is, not automatically retaining in the Census 2000 urban definition territory that had been classified as urban based on the 1990 census. Of those commenting, 16 of the 27 comments were concerned with the Bristol, Tennessee-Bristol, Virginia, area and 5 were concerned with the Ventura County and Orange County areas in California. The remaining 6 letters did not cite a specific area; however, all were similar in that they asserted grandfathering should be retained as part of the Urban Area Criteria for Census 2000. It was believed the elimination of this criterion would cause not only a loss in funding, but, more importantly, a loss of urbanized area status.

There were 26 comments expressing concern about eliminating the provision for including whole functioning governments, particularly incorporated cities; towns, villages, and boroughs. Ten of those commenting were especially concerned about the Bristol, Tennessee-Bristol, Virginia, area and one comment was received regarding the Lewiston, Idaho-Clarkston, Washington, area. Although 15 of the 26 responses did not refer to a specific area, all letters dealing with the elimination of the whole-functioning government criterion were in favor of retaining it as part of the Urban Area Criteria for Census 2000. It was believed that by using corporate limits to include whole governmental units in urban definitions, additional nonresidential urban land use would be included in the urban area definitions, thereby alleviating concerns of loss of funding and loss of urbanized area status.

Coupled with elimination of the grandfathering and the whole-functioning government criteria, 18 additional comments specifically expressed concern regarding the loss of urbanized area status; 11 of these additional comments addressed the governments in the Bristol, Tennessee-Bristol, Virginia area. All 18 favored retention of the grandfathering and the whole-functioning government criteria, as all believed their elimination would result in a loss of urbanized area status.

The Census Bureau received 31 comments regarding the splitting and merging of urban areas; 23 of these expressed concern about splitting urban areas in the vicinity of Los Angeles, California, in particular in Ventura County (the Oxnard-Ventura, Simi Valley, and Thousand Oaks areas) and in Orange County. The comments questioned whether smaller urban areas would retain their individual status or be included in the larger Los Angeles urbanized area. The majority of these comments dealt equally with the loss of funding, loss of data, and loss of urbanized area status. There were no comments in favor of merging existing urbanized areas. It was widely held that the splitting of urbanized areas should occur at metropolitan area boundaries.

Twenty-four comments addressed the overall population density criterion, with the majority agreeing that the population density requirement of 500 ppsm was too high and did not allow for the inclusion of nonresidential urban land use areas adjacent to the urbanized area core. Five comments remarked on the density requirements for military installations; all concerned Vandenberg Air Force Base near Lompoc, California, and stated the population density requirement of 500 ppsm was too high and, therefore, would exclude some blocks that are part of the military installation.

There were 11 commenters who remarked about the 2 square mile size limit criterion for census block groups with qualifying density. The majority of commenters believed that the area size limitation should be larger than 2 square miles or that an area threshold should not be used to determine urban area qualification. The consensus among the commenters was that this criterion was arbitrary and, thus, should be removed.

The enclave and indentation criteria generated 11 comments. Those commenters who wanted the criteria to include nonresidential urban land uses in urban areas believed that the 5 square mile size limit for adding enclaves to urban areas was too small. Other commenters remarked that the 3:1 ratio criterion for including indentations favors large urban areas over small urban areas.

There were 19 comments received regarding the jump and hop criteria. The jump and hop criteria are used to include noncontiguous but qualifying territory within an urban area. The criteria are based on the distance of the connection and overall density or population in the qualifying territory. All 19 agreed that the distance for hops and jumps should be increased to better include nonresidential urban land uses in urban areas.

The Census Bureau received one comment requesting the recognition of ferries and other nonroad transport networks as links to discontiguous qualifying areas. It favored the use of ferries and other nonroad connections for hops and jumps, especially in the West, as some transit systems have ferry service across water bodies or lines tunneling through mountains where the alternate road connections may not meet the hop or jump distance criteria.

The Census Bureau's Decisions Regarding Recommendations Received From Comments Concerning Changes to the Urban Area Criteria for Census 2000

This section of the Notice provides information about the Census Bureau's decisions related to the recommendations and comments received. These decisions benefited greatly from the public participation, which served as a reminder that, although identified for purposes of collecting, tabulating, and publishing federal statistics, the urban areas defined through these standards represent areas in which people reside, work, and spend their lives and to which they attach a considerable amount of pride. In arriving at its decisions, the Census Bureau took into account the comments received regarding the information published in the **Federal Register** on March 28, 2001 (66 FR 17018) and July 27, 2001 (66 FR 39143), as well as research and investigation conducted by Census Bureau staff.

I. The Census Bureau presents below its decisions on changes that were incorporated into the Urban Area Criteria for Census 2000 in response to the many comments received.

A. The Census Bureau accepted the recommendations to include criteria that define "uninhabitable" territory along major bodies of water. The Census Bureau is changing the proposed criteria to include selected unpopulated blocks adjacent to a road connection where that road connection crosses a substantial water area. In addition, the Census Bureau is replacing the term uninhabitable with the term "exempted" to more clearly define the territories that are in this category: water bodies, uninhabited census blocks adjacent to bridged water bodies, military installations, national parks, and national monuments.

The original uninhabitable criteria, which were more restrictive than in the past, were limited to bodies of water, military installations, national parks, and national monuments. The intent was to make the delineation process as objective and uniform as possible, and because only these four categories of topography and land use were uniform and complete for the Nation in the Census Bureau's TIGER database, they were the only items that the Census Bureau believed it could use as a basis for evaluation.

The Census Bureau decided to rename "uninhabitable" as "exempted," and to include as exempted those land portions of a hop or jump (defined in Sections II.B. and II.C. of the Urban Area Criteria for Census 2000) where the tabulation blocks on both sides of the road connection have zero population and the road connection crosses at least 1,000 feet of water.

Incorporating this new criterion, which is meant to provide a measurable and objective surrogate to define floodplains and marshlands, will allow the Census Bureau to achieve its goal of being able to apply the criteria uniformly throughout the Nation.

B. The Census Bureau accepted the recommendations to include major airports adjoining or surrounded by qualifying urbanized areas or urban clusters, but the Census Bureau decided not to include commercial or industrial areas.

The Census Bureau decided to include major airports adjoining qualifying urbanized areas (UAs) or urban clusters (UCs) when it was able to obtain a comprehensive database of major airports. The decision was made to include only those airports that, according to 2000 Federal Aviation Administration statistics, had an annual enplanement of at least 10,000 people and, thus, qualified as a primary airport. The research conducted regarding the methodology for determining what boundaries to use for the airports determined that airport inclusion should be by whole census block where at least half the land area of the census block was within the airport.

The Census Bureau believes it is advantageous to include major airports within urban areas because doing so will give a better overall picture of an "urbanized area." Heavily used airports are considered part of the urban fabric of an area and, most importantly, the Census Bureau was able to obtain a single, reliable database source that its staff could use to apply the criteria objectively.

The Census Bureau determined that it could not include industrial or commercial areas on the fringes of UAs or UCs because it could not find a consistent national database that

VOL
67
ISS
51
MR
15
2002
UMI

identifies such areas, as it found for major airports. Thus, the Census Bureau does not have the capability to specifically identify commercial and industrial areas on a uniform and comprehensive basis. The Census Bureau is continuing research to determine some objective and consistent way to address issues involving nonresidential urban land uses for urban area determinations in future censuses.

C. The Census Bureau adopted criteria that would permit the splitting of a UA within the same metropolitan statistical area (MSA) and primary metropolitan statistical area (PMSA), and in counties that are not within an MSA or PMSA, when two areas that each would qualify as a UA have only a point connection or are connected by a hop or a jump.

The Census Bureau determined that it is just as important to recognize the autonomy of areas within a metropolitan area (MA) as it is between two or more MAs. The Census Bureau also determined it would not be realistic to apply the same distance criterion of 3 miles used to split a UA that has qualifying territory in separate MAs as the basis for splitting a UA that is within the same MA or outside any MA. The Census Bureau believes the criteria for splitting a UA within the same MA or outside any MA should be more restrictive to ensure that the splitting is limited to areas that are more likely to be independent and to avoid the splitting of a single large UA into many smaller UAs that are not autonomous.

D. The Census Bureau reevaluated the block population density criterion within a military installation. The Census Bureau revised the final Urban Area Criteria for Census 2000 to treat blocks on a military installation that have a population of 1,000–2,499 the same as blocks that have a population density of 500–999 ppsm. The Census Bureau also decided to treat blocks that have a population of 2,500 or more the same as blocks that have a population density of 1,000 ppsm or greater.

The change in the block density criterion for census blocks within a military installation formally recognizes the special situation that was created in agreement with the Department of Defense regarding the collection and presentation of data about military installations. The block numbering algorithm used by the Census Bureau specified that military installations be identified by using as few block numbers as possible. Blocks that have a large area and significant population were created, but seldom did they meet the minimum criteria for qualification as urban based on population density. Even though the density requirement is consistent, the delineation of military blocks is inconsistent; therefore, the 500 ppsm requirement is being waived for blocks on military installations. To apply these new criteria to other blocks would not be appropriate because the Census Bureau used consistent criteria to define the blocks in areas where external agreements for processing were not a factor.

E. The Census Bureau modified the methodology for the indentation criteria from the 3:1 linear ratio measurement to a 4:1 area ratio measurement; it also clarified the criteria.

The decision to change from the linear ratio of measurement to an area ratio, or "circle method," of measurement was based on the results of research by Census Bureau staff. The results of the research showed that the "circle method" gives a constant comparative ratio, whereas the linear measurement method does not. It also is more difficult to use the length-to-area measurement in a computer environment, where one must first determine the values of an indentation and then calculate the ratio. The inability to ensure consistent automated results made the proposed indentation criteria less objective.

II. Recommendations and comments were received from the public regarding other issues, and subsequent research by Census Bureau staff determined that changes to the current criteria for some issues would be detrimental to the goals of the program. The Census Bureau has decided that no changes will be made to accommodate the following issues in the Urban Area Criteria for Census 2000.

A. Grandfathering

The goal for Census 2000 is to bring the urban area criteria back to a single set of rules that allow for application of automated processes that yield consistent results rather than to have the areas defined through a process of accretion over time. The Census Bureau is striving to eliminate any subjectivity in these delineations. This can be done only by reexamining areas that qualified as UAs in earlier censuses due to the implementation of different criteria following each of those censuses, the possibility of misinterpretations of the criteria, and the inevitable mistakes made during clerical delineations of the past. The areas that no longer qualify as UAs likely will qualify as UCs for Census 2000.

B. Developing a Set of Criteria To Include Whole Functioning Governments in Urban Area Definitions

The Census Bureau wants to define a continuum of urban territory created objectively and equitably for the entire Nation. To apply these criteria consistently, the use of governmental unit boundaries and criteria designed to include whole functioning governments must be eliminated. The Census Bureau evaluated the geographic characteristics of municipal corporations and found widespread variation as a result of each state's unique set of annexation and incorporation laws. The Census Bureau believes the lack of consistency among state laws for establishing governmental unit boundaries would result in inconsistency in urban area definitions.

C. Recognition of Ferries and Other Transportation Modes To Link Discontiguous Qualifying Areas

There is no consistent database of ferry connections and other transportation networks; therefore, the Census Bureau cannot apply the limited data available consistently.

D. Size Criteria for Block Groups

The Census Bureau included a maximum block group size criterion to avoid adding large sparsely settled territories to urban areas. Census Bureau staff found a significant reduction in the percentage of individual blocks that have a population density greater than 500 ppsm, and a significant increase in the land area of blocks that have a population density less than 500 ppsm, when the size of a block group exceeded two square miles. Based on this research, and with the allowance in the criteria for inclusion of individual blocks that have qualifying density, the Census Bureau determined that it was not necessary to change the block group size criterion.

E. Changing the Distance Allowable for a Hop

The Census Bureau determined, after further research, to retain the proposed length for a hop at a distance of less than or equal to 0.5 mile. Based on empirical review, allowing a longer distance for a hop resulted in a significant number of areas linking to other urban areas that were not perceived as actually being connected.

F. Changing the Distance Allowable for a Jump

The Census Bureau determined, after further research, to retain the proposed increase in length for a jump at greater than 0.5 mile but no more than 2.5 miles (it was 1.5 miles in 1990). Based on empirical review, allowing a longer distance for a jump resulted in a significant number of areas linking to other urban areas that were not perceived as actually being connected. In the case of longer jumps, many of the connections would be eliminated subsequently because a UA would be split to avoid joining autonomous qualifying UAs.

G. Changing the Population Density Criteria for Block Groups and Blocks

The proposed population density requirement of 500 ppsm will remain unchanged. This change in the population density requirement will allow the Census Bureau to take into account government policies requiring green space between developments, lessen the effect of large census block groups and blocks that contain both a developed and undeveloped portion, and because consistent nonresidential land use information is not available, will help to qualify areas that have mixed land use within the same block group or block.

Urban Area Criteria for Census 2000

The following criteria apply to the 50 states, the District of Columbia, Puerto Rico, American Samoa, Guam, the Northern Mariana Islands, and the Virgin Islands of the United States.

I. Census 2000 Urbanized Area (UA) and Urban Cluster (UC) Definitions

For Census 2000, a UA consists of contiguous,[1] densely settled census block groups (BGs)[2] and census blocks[3] that meet minimum population density requirements, along with adjacent densely settled census blocks that together encompass a population of at least 50,000 people.

For Census 2000, a UC consists of contiguous, densely settled census BGs and census blocks that meet minimum population density requirements, along with adjacent densely settled census blocks that together encompass a population of at least 2,500 people, but fewer than 50,000 people.

All criteria based on land area, population, and population density reflect the information contained in the Census Bureau's Topologically Integrated Geographic Encoding and Referencing (TIGER) database (the Census 2000 TIGER/Line file at the time of initial delineation) and the official Census 2000 redistricting data file (the Public Law 94–171 file at the time of initial delineation).

II. UA and UC Delineation Process Criteria

The following criteria are provided in the sequence in which they are used by the Census Bureau in an automated software program, with limited interactive modifications, to delineate the UAs and UCs. The purpose of providing the criteria in sequence and in technical terms is to ensure that others can develop similar software to replicate the Census Bureau's urban area delineations.

A. The Census Bureau initiates its delineation of a potential urban area by delineating a densely settled "Initial Core." The Initial Core is defined by sequentially including the following qualifying territory:

1. One or more contiguous census BGs that have a total land area less than 2 square miles and a population density of at least 1,000 people per square mile (ppsm)[4]. NOTE: All calculations of population density include only land; the areas of water contained within census BGs and census blocks are not used to calculate population density.

2. If no qualifying census BG exists, one or more contiguous census blocks that have a population density of at least 1,000 ppsm.

3. One or more census BGs that have a land area less than 2 square miles, a population density of at least 500 ppsm, and are contiguous with the BGs identified by criterion II.A.1.

4. One or more contiguous census blocks, each of which has a population density of at least 500 ppsm, and at least one of which is contiguous with the qualifying census BGs or census blocks identified by criterion II.A.1., II.A.2., or II.A.3.

5. Any enclave of contiguous territory that does not meet the criteria above but that is surrounded by census BGs and census blocks that qualify for inclusion in the initial core by criteria II.A.1. through II.A.4., provided the area of the enclave is not greater than 5 square miles.

B. The Census Bureau continues its delineation of a potential urban area by adding, to all initial cores that have a population of 1,000 or more[5], other territory with qualifying density that can be reached using a "hop" connection. That is, from the edge of the initial core, the Census Bureau will define a road connection of no greater than 0.5 mile across land that is not classified as "exempted" territory[6] and that consists of one or more nonqualifying census blocks that connect the initial core to a contiguous area of census BG(s) and/or census blocks(s) that otherwise qualify based on population density and land area.

1. The territory being added to the initial core using a hop connection, which includes the connecting census block(s), census BG(s), and census block(s) that have a population density of at least 500 ppsm, and any enclave blocks within the connecting block(s) or area with qualifying density, must:

a. Have a combined overall population density of at least 500 ppsm, or

b. Have 1,000 or more total population in the qualifying area being added.

2. When adding qualifying territory to the initial core using a hop connection, the Census Bureau tests the five shortest road connections and:

a. Selects the shortest qualifying road connection that does not exceed 0.5 mile across land that is not classified as "exempted" territory, and

b. Selects the connecting block(s) along that road connection that forms the highest overall population density for the entire area (hop blocks plus

[1] Contiguity requires at least one point of intersection.

[2] A census block group is a group of census blocks within a census tract whose numbers begin with the same digit; for example, BG 3 within a census tract includes all census blocks numbered from 3000 to 3999.

[3] A census block is an area normally bounded by visible features, such as streets, streams, and railroads, and by nonvisible features, such as the boundary of an incorporated place, minor civil division (MCD), county, or other Census 2000 tabulation entity.

[4] The Census Bureau, in agreement with the Department of Defense, imposed restrictions on the selection of features that could be used as block boundaries within military reservations. This resulted in census blocks within military reservations that contain populations of 1,000 or greater, but with unusually low population densities caused by these restrictions. In recognition of this situation, for purposes of urban area delineation, the Census Bureau treats blocks on military reservations that have a population of 2,500 or more as having a population density of 1,000 ppsm, even if the actual density is less than 1,000 ppsm, and those that have a population of 1,000 to 2,499 as having a population density of 500 ppsm.

[5] All cores of less than 1,000 population are not selected as the starting point for the delineation of a separate urban area; however, these core areas still are eligible for inclusion in a UA or UC, using subsequent criteria and procedures.

[6] The Census Bureau defines "exempted" territory as areas in which normal residential development is significantly constrained or not possible due to either topographic or land use reasons. Exempted territory is limited to bodies of water, national parks and monuments, military installations, and those segments of a road connection where the populations of the census blocks on both sides of the road are zero and, additionally, the road connection crosses at least 1,000 feet of water. Because the Census Bureau does not have access to or maintain a comprehensive land use database for the entire United States, Puerto Rico, and the Island Areas, only the aforementioned land use types, which are included in or can be derived from the Census Bureau's TIGER database, will be used when identifying exempted territory.

VOL
67

15
2002
UMI

qualifying blocks) being added to the initial core.

3. Territory that is added to the initial core by means of a hop connection becomes part of the adjusted initial core. The Census Bureau then determines if there is additional qualifying territory that can be added to the adjusted initial core. All measurements of distance and contiguity to the core are made from the adjusted initial core, not from the original initial core. The Census Bureau continues to add qualifying territory by means of a hop connection, modifies the adjusted initial core to include the added territory, and continues to add more qualifying territory via a hop connection, until no additional territory qualifies to be added via a hop connection.

C. After completing the process that adds all territory to an initial core that can be added via hop connections, those cores that have a population of 1,500 or more, now termed "interim cores," continue the delineation process by adding qualifying territory via a "jump" connection [7].

The determination of jumps starts with the interim core that has the greatest population and continues in descending order of population size of each interim core. Starting from the edge of the interim core, the Census Bureau identifies a road connection of greater than 0.5 mile and no more than 2.5 miles across land that is not classified as "exempted" territory, and that consists of one or more nonqualifying census blocks that connect the interim core to contiguous qualifying territory based on population density, land area, and connections made using the hop criteria.

1. The territory being added to the interim core using a jump connection, including the connecting census block(s), qualifying census BG(s), and census block(s) that have a population density of at least 500 ppsm, and any enclave blocks within the connecting block(s) or territory with qualifying density, must:

a. Have a combined overall population density of at least 500 ppsm, or

b. Have a population of 1,000 or more in the qualifying territory being added.

2. When adding qualifying territory to the interim core using a jump connection, the Census Bureau tests the five shortest road connections and:

a. Selects the shortest qualifying road connection that does not exceed 2.5 miles across land that is not classified as "exempted," and

b. Selects the connecting block(s) along that road connection that forms the highest overall population density for the entire territory (jump blocks plus qualifying blocks) being added to the interim core.

3. No additional jumps may originate from a qualifying area after the first jump in that direction unless the territory being included as a result of the jump was an interim core with a population of 50,000 or more.

D. After territory has been added to the interim core via jump connections, the Census Bureau again includes additional noncontiguous territory to the adjusted interim core using a hop connection, provided the territory qualifies as defined in the criteria associated with II.B.

E. During all phases in which qualifying territory that is discontiguous to the initial or interim cores is being added to the cores, the Census Bureau adds to the cores any qualifying territory where the hop or jump road connections pass through "exempted" territory.

1. Discontiguous territory is added to the cores using hop or jump connections that cross "exempted" territory, provided that:

a. The road connection is no greater than 5 miles between the core and the qualifying area, and

b. The road connection does not cross more than a total of 2.5 miles of territory not classified as "exempted" (those segments of the road connection where "exempted" territory is not on both sides of the road), and

c. The territory being added meets either the population density criteria or total population criteria specified in Sections II.B.1 and II.C.1.

2. The Census Bureau selects the road connection using the criteria specified in Sections II.B.2 and II.C.2.

3. The Census Bureau considers linkages over exempted territory as a hop connection when the total distance of the road segments, excluding the distance across "exempted" territory, does not exceed 0.5 mile, and as a jump connection when the total distance of the road segments is from 0.5 to 2.5 miles, excluding the distance across "exempted" territory.

F. After all territory has been added to the interim core via jump and hop connections, the Census Bureau adds whole tabulation blocks that approximate the territory of major airports, provided at least one of the blocks that represent the airport is included within or contiguous with the interim core.

G. The Census Bureau then adds to the interim cores territory that constitutes enclaves, provided that:

1. The territory is contiguous, surrounded only by land, and consists of census BGs and census blocks that qualify for inclusion in the interim core, and

a. The area of the enclave is not greater than 5 square miles, or

b. All area of the enclave is more than a straight-line distance of 2.5 miles from a land block that is not part of the interim core, or

2. The territory is contiguous, surrounded by both land consisting of census BGs and census blocks that qualify for inclusion in the interim core, and water, and the linear contiguity of the enclave to the land that is within the interim core is greater than the linear contiguity of the enclave to the water.

H. The Census Bureau then inspects the interim cores and, where necessary, splits the interim cores into separate interim cores for purposes of identifying individual urban areas, following the criteria specified in Section III.

I. Upon completing the separation of interim cores, the Census Bureau completes the delineation of urban areas by identifying and adding territory that qualifies as "indentations."

1. The Census Bureau examines and qualifies only those potential indentation areas that are within the same interim core, not between separate interim cores.

2. Starting from the outermost part of the potential indentation, the Census Bureau will define a "closure qualification line," defined as a straight line no more than 1 mile in length, that extends from one point along the edge of the interim core across area that is not within the interim core to another point along the edge of the interim core, with both points on land.

3. The Census Bureau then determines if there are any tabulation blocks that have at least 75 percent of their area within the territory formed between the closure qualification line and the interim core.

4. If there are no blocks that have 75 percent or more of their area within that territory, the potential indentation does not qualify to be added to the interim core.

5. If there are any blocks that have 75 percent or more of their area within the territory formed between the closure qualification line and the interim core, the total area of those blocks that meet or exceed the 75-percent criterion is compared to the area of a circle, the diameter of which is the length of the closure qualification line.

6. Those territories under review that have at least four times the area of the circle qualify as an indentation, and the Census Bureau will add the entire area of all those blocks to the interim core.

7. If the collective area of the indentation blocks is less than four times the area of the circle, the Census Bureau defines a different closure qualification line, if possible, and continues the testing and qualification of the potential indentation until it determines if the potential indentation qualifies or fails.

J. As a result of the urban area delineation process, an incorporated place [8] or census designated place (CDP) [9] may be partially within and partially outside an urban area. Any place that is split by an urban area boundary is referred to as an extended place.

III. Splitting UAs

The Census Bureau uses the definition of metropolitan areas (MAs), which include metropolitan statistical areas (MSAs), consolidated metropolitan statistical areas (CMSAs), and primary metropolitan statistical areas (PMSAs), in effect for Census 2000 (those MAs established by the Office of Management and Budget on June 30, 1999) to determine when to define separate contiguous UAs. (Note: UCs are never split to recognize MA boundaries.) After delineating the boundary of each UA, the Census Bureau will examine the relationship between that UA and any MSA, CMSA, or PMSA, using the following criteria to determine if the UA should be split and, if so, where the boundary should be located between the resulting separate UAs.

A. UA Split Criteria When There Are Separate MAs

The Census Bureau splits an initial UA that contains at least 50,000 people in two or more separate MAs when the following conditions exist:

1. The UA has at least 50,000 people in each of at least two different MSAs or PMSAs, and the distance along which their areas are contiguous is less than 3 miles. The split will occur at a location near the MSA or PMSA boundary along which their area of contiguity is less than 3 miles.

2. The UA has at least 50,000 people in each of at least two different CMSAs, and the distance along which their areas are contiguous is less than 3 miles. The split will occur at the CMSA boundary.

B. UA Split Criteria Within the Same MA or County

The Census Bureau splits an initial UA within the same MA, or within a county that is not in an MA, when the following conditions exist:

1. The only connection linking or causing contiguity between areas, each of which has an initial core population of at least 50,000, includes either a hop or jump connection, or

2. The connection between areas, each of which has an initial core population of at least 50,000, is not greater than a point-to-point connection.

In both cases, the split will occur at the point-to-point connection, or at both ends of the hop or jump connection that initially linked the areas into a single UA.

IV. Urban Area Title Criteria

A. For those urban areas that contain an incorporated place that has at least 2,500 people in the urban area:

1. The urban area title includes the name of the incorporated place with the most population within the urban area.

2. As many as two additional incorporated place names may be part of the urban area title, provided that:

a. The incorporated place's urban area population exceeds 250,000 people, or

b. The incorporated place has both an urban area population of at least 2,500, and its urban area population includes at least 2/3 of the population in the most populous incorporated place in the urban area.

B. If the urban area does not contain an incorporated place that has at least 2,500 people in the urban area, the urban area title includes the single entity name [10] that occurs first from the following list:

1. The nonmilitary CDP having the largest population in the urban area, provided its population in the urban area is at least 2,500.

2. The incorporated place having the largest population in the urban area.

3. The nonmilitary CDP having the largest population in the urban area.

4. The military CDP having the largest population in the urban area.

5. The governmental MCD [11] having the largest population in the urban area.

6. A local name recognized for the area by the United States Geological Survey's Geographic Names Information System, with preference given to post office names recognized by the United States Postal Service (USPS).

C. The criterion for the sequence of place names in the urban area title consists of the qualifying names in descending order of their official population in the urban area. (If two or more entities that qualify to have their names included in the urban area title have exactly the same population, the total population of each is used to determine the sequence of names; or, if no population data are available, as in Section IV.B.6., the entity names will be listed alphabetically.)

D. The urban area title will include the USPS abbreviation of the name of each state or statistically equivalent entity into which the urban area extends.

1. The order of the state names is the same as the order of the related place names in the urban area title.

2. For urban areas that extend into a state(s) in which no incorporated place, CDP, or MCD name is part of the urban area title, the name(s) of this state(s) is included in the urban area title after the name of the state(s) that includes a place or MCD having its name in the urban area title, in descending order of the state's Census 2000 population within the urban area.

E. If a single place or MCD qualifies as the title of more than one urban area, the largest urban area will use the name of the place or MCD. The smaller urban area will have a title consisting of the place or MCD name and a compass directional (North, South, East, or West) as the smaller urban area relates in direction to the larger urban area. For example, if Allenville is used to title the largest urban area, a smaller urban area also using Allenville in the title that lies south of the larger urban area is titled Allenville South.

F. If any title of an urban area duplicates the title of another urban area within the same state, or uses the name of an incorporated place, CDP, or MCD that is duplicated within a state, the name of the county that has most of the population of the largest place or MCD is appended, in parentheses, after the

[7] All adjusted initial cores of less than 1,500 population are not selected to continue the delineation of a separate urban area; however, these core areas still are eligible for inclusion in an urban area using subsequent criteria and procedures.

[8] An incorporated place is a governmental unit designated as a city, town (except in New England and Wisconsin), village, city and borough, municipality, or borough (except in New York and Alaska); the term also includes all consolidated cities.

[9] A CDP is a statistical equivalent of an incorporated place and represents a locally defined named area. CDPs are called communidades and zonas urbanas in Puerto Rico.

[10] If two or three of the entities being considered for an urban area title have exactly the same population in the urban area, the title will include both (or all three) entity names in the title. If four or more entities being considered for an urban area title have exactly the same population, the total population of each entity (as oppose to its urban population) will determine the three names to be included in the title.

[11] An MCD is a legal subdivision of a county or statistically equivalent entity. Governmental MCDs exist in Connecticut, Illinois, Indiana, Kansas, Maine, Massachusetts, Michigan, Minnesota, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Pennsylvania, Rhode Island, South Dakota, Vermont, and Wisconsin.

VOL
67
ISS
51
MR
15
2002
UMI

duplicate place or MCD name for each urban area. If there is no incorporated place, CDP, or MCD name in the urban area title, the name of the county having the greatest population residing in the urban area will be appended to the title. For example, Springfield (Ames County), OH, and Springfield (Jefferson County), OH.

V. Urban Area Code Criteria

The Census Bureau assigns a 5-digit numeric code to each urban area. The code is based on a national alphabetic sequence of all urban area names, and is sequenced by state code or state and county code when urban area names are duplicated.

VI. Urban Area Central Place Criteria

The Census Bureau identifies one or more central places for each urban area (if an incorporated place or CDP exists within the urban area) using the following criteria:

A. Any incorporated place or CDP that has its name in the title of the urban area, and

B. Any other incorporated place or CDP that has a population of 50,000 or more within the urban area.

VII. Urban and Rural Classification

The Census Bureau classifies as urban all population and territory within the boundaries of urban areas.[12] Conversely, the Census Bureau classifies as rural all population and territory that are not within any urban area.

The Census Bureau does not attempt to classify all bodies of water as being either urban or rural. Those bodies of water that appear in the Census Bureau's TIGER database as area features are included in urban areas only if the water body is included in a land BG or census block classified as urban, or if the water body serves as a connection when performing a hop or a jump. The urban and rural classification is not definitive for other bodies of water because the Census Bureau's definition is not intended to limit other classifications of urban and rural when applied to water area.

Dated: February 27, 2002.

William G. Barron, Jr.,

Acting Director, Bureau of the Census.

[FR Doc. 02–6186 Filed 3–14–02; 8:45 am]

BILLING CODE 3510–07–P

[12] The Census Bureau's TIGER database is a centerline file; that is, the line representing each feature (such as a road or a stream that has a very small area) follows the center line of the feature. This criterion is not intended to preclude other application from including the entire area of a feature that the Census Bureau has used as the boundary between urban and rural territory as being either entirely urban or entirely rural.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–867]

Notice of Amended Final Determination of Sales at Less Than Fair Value: Certain Automotive Replacement Glass Windshields from the People's Republic of China

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Amended Final Determination of Sales at Less Than Fair Value.

EFFECTIVE DATE: March 15, 2002.

FOR FURTHER INFORMATION CONTACT: Stephen Bailey, Brandon Farlander, and Robert Bolling, AD/CVD Enforcement Group III, Office 9, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, DC 20230; telephone: (202) 482–1102, (202) 482–0182, and (202) 482–3434, respectively.

The Applicable Statute and Regulations

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended ("the Act"), are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act ("URAA"). In addition, unless otherwise indicated, all citations to the Department's regulations are to the regulations codified at 19 C.F.R. Part 351 (2001).

Amendment of Final Determination

On February 4, 2002, the Department of Commerce ("the Department") issued its final determination and found that ARG windshields from the People's Republic of China ("PRC") are being, or are likely to be, sold in the United States at less than fair value ("LTFV"), as provided in section 735(a) of the Tariff Act. See Final Determination of Sales at Less Than Fair Value: Certain Automotive Replacement Glass Windshields from the People's Republic of China, 67 FR 6482 (February 12, 2002) (Final Determination).

On February 14, 2002, respondents Fuyao Glass Industry Group Company, Ltd. ("FYG") and Xinyi Automotive Glass (Shenzhen) Co., Ltd. ("Xinyi"), and Petitioners timely filed ministerial error allegations, pursuant to 19 CFR 351.224(c)(2). On February 19, 2002, respondent FYG and Petitioners timely filed rebuttal comments on the alleged ministerial errors.

The Department is amending the Final Determination in the antidumping investigation of ARG windshields from the PRC for FYG, Xinyi, Shenzhen Benxun Auto–Glass Co., Ltd. ("Benxun"), Changchun Pilkington Safety Glass Co., Ltd. ("Changchun"), Guilin Pilkington Safety Glass Co., Ltd. ("Guilin"), Wuhan Yaohua Pilkington Safety Glass Co., Ltd. ("Wuhan"), and TCG International ("TCGI").

Scope of the Investigation

As addressed in the final determination, interested parties requested that the Department clarify whether automotive replacement glass windshields ("ARG") windshields for buses, farm and heavy machinery are included in the scope of this investigation. Based on the information received, we clarified that ARG windshields for buses, farm and heavy machinery are included in the scope of this investigation. For further discussion, please see the Issues and Decision Memorandum for the Scope Clarification for the Antidumping Duty Investigation of Automotive Replacement Glass Windshields from the People's Republic of China: July 1, 2000 through December 31, 2001 from Edward C. Yang, Director, Office 9 to Joseph A. Spetrini, Deputy Assistant Secretary, AD/CVD Enforcement Group III, dated January 24, 2002.

The products covered by this investigation are ARG windshields, and parts thereof, whether clear or tinted, whether coated or not, and whether or not they include antennas, ceramics, mirror buttons or VIN notches, and whether or not they are encapsulated. ARG windshields are laminated safety glass (i.e., two layers of (typically float) glass with a sheet of clear or tinted plastic in between (usually polyvinyl butyral)), which are produced and sold for use by automotive glass installation shops to replace windshields in automotive vehicles (e.g., passenger cars, light trucks, vans, sport utility vehicles, etc.) that are cracked, broken or otherwise damaged.

ARG windshields subject to this investigation are currently classifiable under subheading 7007.21.10.10 of the Harmonized Tariff Schedules of the United States (HTSUS). Specifically excluded from the scope of this investigation are laminated automotive windshields sold for use in original assembly of vehicles. While HTSUS subheadings are provided for convenience and Customs purposes, our written description of the scope of this investigation is dispositive.

Ministerial Error

A ministerial error is defined in section 351.224(f) of our regulations as

"an error in addition, subtraction, or other arithmetic function, clerical error resulting from inaccurate copying, duplication, or the like, and any other similar type of unintentional error which the Secretary considers ministerial." Section 351.224(e) of our regulations provides that we "will analyze any comments received and, if appropriate . . . correct any ministerial error by amending the final determination. . . ." After reviewing interested parties' allegations we have determined, in accordance with 19 CFR 351.224, that the Final Determination includes ministerial errors discussed below.

FYG's Allegation of Ministerial Errors

Updated Market Economy Prices

Comment 1: FYG alleges that the Department made a ministerial error by using outdated market price values for ink, silver and mirror buttons and using a surrogate value for solder-even though FYG reported market economy purchases of solder. FYG maintains that the Department failed to apply the updated market economy values for these inputs, as reported in FYG's November 16, 2001 submission.

Petitioners did not provide rebuttal comments.

Department's Position: We agree with FYG. Following the Preliminary Determination, FYG provided updated market economy values to the Department which the Department inadvertently failed to use for the Final Determination. It is the Department's practice to use the most updated factor value information available. For the amended final determination, we used updated market economy prices for the inputs ink, silver, mirror buttons and solder. See Analysis Memo for the Amended Final Determination of Automotive Replacement Glass ("ARG") Windshields from the People's Republic of China: Xinyi Automobile Glass (Shenzhen) Co., Ltd. ("Xinyi") and Fuyao Glass Industry Group Co., Ltd. ("FYG") (Amended Final Analysis Memo) from Brandon Farlander and Stephen Bailey to Robert Bolling dated March 6, 2002.

Xinyi's Allegations of Ministerial Errors

Incorrect Margin Calculation Results

Comment 2: Xinyi argues that it calculated a margin using all relevant documents provided by the Department issued for the Final Determination and that the margin Xinyi calculated is fifty–five one–hundredths of a percent lower than the margin calculation generated by the Department. Xinyi argues that the final margin should be 3.15 percent as compared to 3.70 percent as calculated by the Department in its Final Determination.

Petitioners argue that Xinyi's ministerial error submission does not fulfill the conditions necessary for correction of ministerial errors contained in section 351.224 of the regulations. Petitioners argue that Xinyi did not identify any error of omission or commission in its request, which is required according to section 351.224(4)(d). Petitioners argue that it is Xinyi's responsibility, and not the Department's, to identify any errors in the Final Determination.

Department's Position: We disagree with Xinyi. Xinyi has not alleged an error, specific or otherwise, by the Department in the Department's calculation of Xinyi's margin that would fall within the meaning of 19 CFR 351.224(f). Xinyi argues that, because it obtained different margin results then those calculated by the Department, the Department's margin calculations must contain clerical errors. Xinyi has provided no official record evidence that the Department has made a clerical error in Xinyi's margin calculation program or has Xinyi provided an appropriate correction pursuant to the requirements of 19 CFR 351.224(d).

Aberrational Indian Import Statistics Data

Comment 3: Xinyi argues that the Department incorrectly included aberrational Indian Import Statistics data for colored float glass imports from the United Arab Emirates in September 2000, aberrational values for colored float glass imports from Belgium in September and December 2000, and aberrational values for colored float glass imports from Taiwan in August and December 2000. Xinyi argues that the import data from these countries and the values for the specific months listed above are aberrationally high when compared to the average colored float glass surrogate value calculated by the Department.

Petitioners argue that Xinyi's claims that certain Indian Import Statistics data are aberrationally high is a new substantive methodological argument. Petitioners contend that this new argument is subject to comment and rebuttal by interested parties to the investigation and to the final determination by the Department. Additionally, Petitioners argue that Xinyi had ample opportunities to argue that there were aberrations in the Indian Import Statistics data, but did not do so.

Department Position: We disagree with Xinyi that this is a ministerial error. The Department included Indian imports from Belgium, Taiwan, and the United Arab Emirates as set forth in Attachment 4 of the Factor Valuation Memorandum for the Preliminary Determination. This remained unchanged for the Final Determination. Therefore, the allegation is not a ministerial error pursuant to 19 CFR 351.224(f).

Petitioner's Allegations of Ministerial Errors for FYG

Colored Float Glass Surrogate Value from the Indian Import Statistics

Comment 4: Petitioners allege that the Department made a ministerial error by failing to apply the Indian surrogate value used for colored float glass, exclusive of Thailand and Korea. Citing to the Department's Factors of Production Valuation Memorandum for the Final Determination (Factor Value Memo), Petitioners argue that the Department determined in the Final Determination to exclude Thai and Korean prices for all inputs in its surrogate value calculations and also in determining market economy purchases. Petitioners maintain that the Department's failure to apply the revised Indian surrogate value for the colored float glass resulted in an understatement of the value of a certain type of windshield. Because the type of windshield is business proprietary information, see the Amended Final Analysis Memo for a further discussion of this issue.

FYG points out that the windshield in question is comprised of two types of float glass. FYG argues, therefore, that Petitioners' methodology of using a weighted–average of only one value for the windshield is distortive.

Department's Position: We agree with Petitioners. In the Final Determination, the value of colored float glass, the second pane of glass used for the windshield in question, was derived by the Department using FYG's market economy purchases. However, the Department inadvertently failed to exclude market economy purchases from Thailand and Korea from FYG's market economy purchases of colored float glass. As the Department stated in Comment 1 of the final Issues and Decision Memorandum, it would disregard prices that the Department has reason to believe or suspect are distorted by subsidies, including FYG's market economy purchases from Thailand and Korea. See Final Determination, 67 FR 6482 (February 12, 2002) and accompanying Issues and Decision Memorandum at Comment 1. When market economy purchases of colored float glass from Thailand and

VOL 67 ISS 51 MR 15 2002 UMI

Korea are excluded, the Department must then use Indian Import Statistics to value colored float glass because FYG did not purchase colored float glass from other market economy countries. Therefore, for the amended final determination, we will use the Indian surrogate value for colored glass less purchases of Thai and Korean float glass. See Amended Final Analysis Memo.

International Freight Container Rate

Comment 5: Petitioners argue that the Department erred in the Final Determination in its calculation of ocean freight by using a freight rate for a 20–foot container instead of a freight rate for a 40–foot container, which is the container size used by FYG in transporting subject merchandise. Citing to the Factor Value Memo, Petitioners maintain that the Department rejected, in part, FYG's methodology for freight and used a freight rate provided by the Federal Maritime Commission. Petitioners contend that the Department used a basic freight rate for a 20–foot shipping container, to which was added a fuel surcharge and destination delivery charge. Petitioners assert that their October 29, 2001 Surrogate Values Submission provided evidence on the record to value a 40–foot shipping container. Petitioners further contend that the Department should either: (1) match the particular ocean rate to the closest port of entry for each shipment; or (2) apply an average of the ocean rates for all ports through which the non–market economy ("NME") shipments entered for which surrogate ocean freight is being assigned.

FYG agrees with Petitioners that the Department incorrectly used a 20–foot container rate when the Department should have used a 40–foot container rate to value ocean shipping. However, FYG argues that Petitioners' suggested ocean freight value was rejected by the Department for the final determination. FYG suggests that the Department use the actual freight rates paid for the ocean segment of the overall transportation charge, which are reported in Exhibit 19–A of FYG's verification report. See Memorandum from Stephen Bailey, Sarah Ellerman, case analysts and Emily Lawson, Office of Chief Counsel through James C. Doyle, Program Manager to the File: Verification of Sales and Factors of FYG in the Antidumping Duty Investigation of Automotive Replacement Glass Windshields from the People's Republic of China (FYG Verification Report) dated December 19, 2001, Exhibit19–A. FYG also suggests the Department convert the 20–foot container charge to a 40–foot container charge by using a conversion rate presented in their October 29, 2001 submission.

Department's Position: The Department agrees that this is a ministerial error. In our analysis memorandum for FYG, the Department stated that it would value shipping containers based on a length of 40 feet but instead valued it on a 20–foot container rate. See Analysis for the Final Determination of Automotive Replacement Glass Windshields ("ARG") from the People's Republic of China: Fuyao Glass Industry Group Co., Ltd., ("FYG") (February 1, 2002) (FYG's Final Analysis Memo). In order for the Department to correct this error (i.e., obtain a 40–foot shipping container base rate), we must adjust the 20–foot base container rate to reflect a 40–foot base container rate. In this instance, we are using information provided by FYG to convert a 20–foot base container rate to a 40–foot base container rate to determine a surrogate value for ocean freight. By reviewing a contract between FYG and a market economy shipper, reviewed at verification, and using information provided by FYG in its October 29, 2001 submission, the Department determined that the rate charged for a 40–foot container is 33 percent higher than the rate charged for a 20–foot container. See FYG Verification Report, Exhibit 19–A. The Department has multiplied this conversion rate, 1.33, by the charge for a 20 foot container to arrive at a charge for a 40 foot container. See Amended Final Analysis Memo. FYG's methodology allows the Department to continue to use information from the Federal Maritime Commission, as used in the Final Determination. The Department did not use Petitioners' proposed correction or FYG's other proposed correction because both change the ocean freight methodology used by the Department in the Final Determination.

Wholesale Price Index Base for Domestic Inland Insurance

Comment 6: Petitioners allege that the Department made a ministerial error by using a 1992 Wholesale Price Index ("WPI") base for data collected from the period November 1991 through April 1992 in calculating an average value in Indian rupees per metric ton value for domestic inland insurance, as opposed to using a WPI that corresponds to the period for the Indian surrogate value, which is November 1991 through April 1992. Citing the Department's Notice of Amended Preliminary Antidumping Duty Determination of Sales at Less Than Fair Value: Automotive Replacement Glass Windshields From the People's Republic of China, 66 FR 53776 (October 24, 2001) (Amended Preliminary Determination), Petitioners argue that the Department stated that it considered this a methodological error at the preliminary determination and would consider this error for the final determination. Additionally, Petitioners contend that the Department did not address this issue in the Final Determination. Furthermore, Petitioners assert that they provided International Financial Statistics ("IFS") for the period November 1991 through April 1992 in their September 24, 2001 submission which contain all relevant IFS data necessary for the Department to calculate an accurate WPI for the period in question. Petitioners also argue that the WPI for the period November 1991 through April 1992 should be adjusted to account for the re–basing of the Indian WPI, which occurred in June 1994 and June 1999.

FYG argues that Petitioners' allegation is not a ministerial error but a methodological argument. Also, FYG also asserts that Petitioners' methodology for determining the correct inflation rate is flawed because it incorrectly adjusts the WPI to account for re–basing. FYG also argues that the correct inflation rate adjustment that it calculated results in basically the same rate used by the Department in the Final Determination.

Department's Position: We agree with Petitioners. The Department intended to correct this error in the Final Determination. See Amended Preliminary Determination at 53778. However, we inadvertently failed to make this correction in the Final Determination. Therefore, the Department is using the Indian WPI for the period November 1991 through April 1992 from IFS data. Additionally, the Department has adjusted the WPI to account for the re–basing which occurred in June 1994, by multiplying the WPI for the period November 1991 through April 1992 by 0.70, which is the percentage change in the WPI between May 1994 and August 1994. The Department has also adjusted the WPI to account for the re–basing which occurred in June 1999, by multiplying the WPI by 0.61, which is the percentage change in the WPI between May 1999 and August 1999. See Amended Final Analysis Memo.

Weight Conversion for Other Scrap Glass

Comment 7: Petitioners argue that the Department made a ministerial error by inadvertently converting a value to a kilogram basis that was already being consumed on a kilogram basis. Citing to FYG's Verification Report at 14, Petitioners allege that FYG reported that "Other Scrap Glass" was reported on a kilogram basis, not in square meters as the Department assumed.

FYG argues that the Department was correct in converting a kilogram value into a meters squared value because FYG's reported consumption rate for the "Other Scrap Glass" offset was in meters squared.

Department's Position: We disagree with Petitioners. The Department verified that FYG reported that "the big pieces of scrap generated from the cutting process . . . is sold on a square meter basis." See FYG Verification Report at 14. Therefore, for the final determination, the Department calculated a surrogate value for "Other Scrap Glass" by multiplying the Indian surrogate value, which is reported in kilograms, by a kilograms–to–square–meter conversion rate which is based on the amount of kilograms in a square meter of glass. See FYG's Final Analysis Memo, dated February 1, 2002.

Petitioner's Allegations of Ministerial Errors for Xinyi

Plastic Adhesives Surrogate Value from the Indian Import Statistics

Comment 8: Petitioners allege that the Department made a ministerial error by deducting the value and quantity of Switzerland's exports of plastic adhesives (rather than Thailand's value and quantity of exports) to India from the Indian Import Statistics.

Xinyi did not provide rebuttal comments.

Department's Position: We agree with Petitioners. The Department intended to deduct, from Indian Import Statistics, imports of plastic adhesives from Thailand, but instead deducted imports of plastic adhesives from Switzerland. As the Department stated in Comment 1 of the Issues and Decision Memo, we will disregard prices that we have reason to believe or suspect are distorted by subsidies, including the values from Thailand and Korea. Therefore, for the amended final determination, we will deduct Thailand's exports of plastic adhesives (rather than Switzerland's exports) to India from the Indian Import Statistics in our surrogate value calculation for plastic adhesives. See Amended Final Analysis Memo.

Petitioner's Allegations of Ministerial Errors for FYG and Xinyi

Adhesive Sheets (Tape) Calculation Error

Comment 9: Petitioners allege that the Department made a ministerial error by including two minus signs when deducting Korean imports of adhesive sheets (tape) from the quantity and value of Indian Import Statistics. Petitioners argue that this error resulted in an understatement of the value of adhesive sheets (tape).

FYG agrees with Petitioners that the Department incorrectly included a double minus sign in its calculation sheet which resulted in counting the Indian imports of Korean adhesive sheets (tape) twice in the surrogate value calculation. However, FYG argues that the per unit surrogate value provided by the Petitioners is not correct.

Department's Position: We agree with Petitioners and FYG that this is a ministerial error. The Department intended to deduct, from Indian Import Statistics, imports of adhesive sheets from Korea. However, the Department double counted imports of adhesive sheets from Korea by inadvertently including two minus signs in the calculation sheet, which resulted in Korean imports being added twice instead of being deducted. As stated in Comment 8, the Department intended to disregard prices from Korea. The Department agrees with FYG that Petitioners' per unit surrogate value, while properly deducting Korean imports of adhesive sheets from Indian Import Statistics, is incorrect due to addition errors. Therefore, for the amended final determination, we will remove one minus sign in the calculation sheet for Korean exports of adhesive sheets (tape) to correct for this error. See Amended Final Analysis Memo.

Amended Final Determination

In accordance with 19 CFR 351.224(e), we are amending the final determination of the antidumping duty investigation of ARG from the PRC to reflect the correction of the above–cited ministerial errors. The revised final weighted–average dumping margins are as follows:

Exporter/Manufacturer	Original Weighted Average Margin Percent for Final	Revised Weighted Average Margin Percent
FYG	9.67	11.80
Xinyi	3.70	3.71
Benxun	8.22	9.84
Changchun	8.22	9.84
Guilin	8.22	9.84
Wuhan	8.22	9.84
TCGI	8.22	9.84
China–Wide	124.50	124.50

Suspension of Liquidation

In accordance with section 735(c)(1)(B) of the Act, we are directing the United States Customs Service ("Customs") to continue suspending liquidation on all imports of the subject merchandise from the PRC. Customs shall require a cash deposit or the posting of a bond equal to the weighted–average amount by which normal value exceeds the export price as indicated in the chart above. These suspension–of–liquidation instructions will remain in effect until further notice.

International Trade Commission Notification

In accordance with section 735(d) of the Act, we have notified the International Trade Commission of our amended final determination.

This determination is issued and published in accordance with sections 735(d) and 777(i)(1) of the Act.

March 6, 2002.

Faryar Shirzad,

Assistant Secretary for Import Administration.

Notice of Postponement of Preliminary Antidumping Duty Determinations: Carbon and Certain Alloy Steel Wire Rod From Brazil, Canada, Germany, Indonesia, Mexico, Moldova, Trinidad and Tobago, and Ukraine

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: March 15, 2002.

FOR FURTHER INFORMATION CONTACT: Charles Riggle (Brazil, Canada, Mexico, and Trinidad and Tobago), Robert James (Germany), Donna Kinsella (Indonesia), Dana Mermelstein (Moldova), and James Doyle (Ukraine) at (202) 482–0650, (202) 482–0649, (202) 482–0194, (202) 482–1391, and (202) 482–0159, respectively, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230.

Postponement of Preliminary Determinations

The Department of Commerce (the Department) is postponing further the preliminary determinations in the antidumping duty investigations of Carbon and Certain Alloy Steel Wire Rod From Brazil, Canada, Germany, Indonesia, Mexico, Moldova, Trinidad and Tobago, and Ukraine.

The deadline for issuing the preliminary determinations in these investigations is now April 2, 2002.

On January 22, 2002, the Department postponed the deadline for issuing the preliminary determinations in these investigations by 30 days (i.e., until March 13, 2002). See Notice of Postponement of Preliminary Antidumping Duty Determinations: Carbon and Certain Alloy Steel Wire Rod From Brazil, Canada, Germany, Indonesia, Mexico, Moldova, Trinidad and Tobago, and Ukraine, 67 FR 3877 (January, 28, 2002). On March 4, 2002, Co-Steel Raritan, Inc., GS Industries, Keystone Consolidated Industries, Inc., and North Star Steel Texas, Inc. (collectively, petitioners), requested an additional 20–day postponement of the preliminary determinations in these investigations, in accordance with section 351.205(b)(2) of the Department's regulations. Therefore, pursuant to section 733(c)(1)(A) of the Tariff Act of 1930, as amended, and section 351.205(e) of the regulations, and absent any compelling reason to deny the request, the Department is postponing the deadline for issuing these determinations (i.e., until April 2, 2002).

March 7, 2002

Faryar Shirzad,

Assistant Secretary for Import Administration.

Silicon Metal From Brazil: Extension of Time Limit for Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Extension of Time Limit for Preliminary Results of Antidumping Duty Administrative Review.

DATES: March 15, 2002.

FOR FURTHER INFORMATION CONTACT: Maisha Cryor at (202) 482- 5831 or Thomas Futtner at (202) 482–3814, Group II, Office 4, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Ave. NW, Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Time Limits

Statutory Time Limits

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended (the Act), requires the Department of Commerce ("the Department") to make a preliminary determination within 245 days after the last day of the anniversary month of an order for which a review is requested and a final determination within 120 days after the date on which the preliminary determination is published. However, if it is not practicable to complete the review within these time periods, section 751(a)(3)(A) of the Act allows the Department to extend the time limit for the preliminary determination to a maximum of 365 days and for the final determination to 180 days (or 300 days if the Department does not extend the time limit for the preliminary determination) from the date of publication of the preliminary determination.

Background

On August 30, 2001, the Department published a notice of initiation of administrative review of the antidumping duty order on Silicon Metal from Brazil, covering the period July 1, 2000 through June 30, 2001 (66 FR 43570). The preliminary results are currently due no later than April 1, 2002.

Extension of Time Limit for Preliminary Results of Review

We determine that it is not practicable to complete the preliminary results of this review within the original time limit. Therefore, the Department is extending the time limit for completion of the preliminary results until no later than July 31, 2002. See Decision Memorandum from Holly A. Kuga to Bernard Carreau, dated concurrently with this notice, which is on file in the Central Records Unit, Room B–099 of the main Commerce building. We intend to issue the final results no later than 120 days after the publication of the preliminary results notice.

This extension is in accordance with section 751(a)(3)(A) of the Act.

March 7, 2002

Bernard T. Carreau,

Deputy Assistant Secretary for Import Administration, Group II.

(A–401–806)

Stainless Steel Wire Rod From Sweden: Rescission of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of rescission of antidumping duty administrative review.

SUMMARY: On October 26, 2001, in response to a September 28, 2001, request made by Fagersta Stainless AB, a producer/exporter of stainless steel wire rod from Sweden, the Department of Commerce published the initiation of an administrative review of the antidumping duty order on stainless steel wire rod from Sweden, covering the period September 1, 2000 to August 31, 2001. Because Fagersta Stainless AB has withdrawn its request for review, the Department of Commerce is rescinding this review in accordance with 19 CFR 351.213(d)(1).

DATES: March 15, 2002.

FOR FURTHER INFORMATION CONTACT: Terre Keaton, AD/CVD Enforcement, Import Administration, International Trade Administration, U.S. Department ofCommerce, 14th Street & Constitution Avenue, NW, Washington, DC 20230, telephone: (202)482–1280.

SUPPLEMENTARY INFORMATION: Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 ("the Act") by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department of Commerce's ("the Department's") regulations refer to 19 CFR part 351 (2001).

Background

On September 15, 1998, the Department published an antidumping duty order onstainless steel wire rod from Sweden (63 FR 49329). On September 28, 2001, Fagersta Stainless AB ("Fagersta"), a producer/exporter of the subject merchandise, requested an administrative review of the antidumping duty order on stainless steel wire rod from Sweden covering the period of September 1, 2000, through August 31, 2000. In accordance with 19 CFR 351.221(c)(1)(i), we published the initiation of the review on October 26, 2001 (66 FR 54195). On February 13, 2002, Fagersta, the sole requester of this review, withdrew its request for review.

Rescission of Review

Pursuant to our regulations, the Department will rescind an administrative review, "if a party that requested the review withdraws the request within 90 days of the date of publication of notice of initiation of the requested review." See 19 CFR 351.213(d)(1). This section further provides that the Secretary may extend this time limit if the Secretary decides that it is reasonable to do so. See 19 CFR 351.213(d)(1). Although the interested party's withdrawal of its request for review was not within the 90–day time limit, there were no objections to the withdrawal from the petitioner, and the Department has no compelling reason to deny the request. (See February 25, 2002, Memorandum to the File.) As a result, we are rescinding this administrative review. The Department will issue appropriate assessment instructions to the Customs Service.

This notice also serves as a reminder to parties subject to administrative protective order ("APO") of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

This determination is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Tariff Act of 1930, as amended.

March 7, 2002

Richard W. Moreland,

Deputy Assistant Secretary for Import Administration.

Inquiry Into the Status of the Russian Federation as a Non-Market Economy Country Under the U.S. Antidumping and Countervailing Duty Laws: Notice of Hearing

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of hearing.

EFFECTIVE DATE: March 15, 2002.

FOR FURTHER INFORMATION CONTACT: Becky Erkul or Jim Nunno, Office of Policy, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482–1277 or (202) 482–0783.

SUMMARY: The Department of Commerce is holding a public hearing to solicit views on the issue of the status of the Russian Federation as a non-market economy country under the antidumping and countervailing duty laws. The hearing will be held at 9 a.m. on March 27, 2002, in Room 3407 at the Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Hearing presentations should be limited to no more than ten minutes to allow for possible questions from the Chair and the panel. Additional time for oral presentations may be granted as time and the number of participants permit. Parties wishing to testify orally at the hearing must provide written notification of their intention, and indicate the amount of time they will need to make their presentation, no later than 5 p.m., March 22, 2002, to Faryar Shirzad, Assistant Secretary for Import Administration; Subject: Public Hearings on Inquiry into the Status of the Russian Federation as a Non-Market Economy Country under the Antidumping and Countervailing Duty Laws; Room 1870, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC. The notification should include (1) the name of the person presenting the testimony, their address and telephone number; (2) the organization or company they are representing, if appropriate; and (3) if applicable, any request for an extension of the time limitation on the oral presentation. In addition, please send a copy of this notification via facsimile to Becky Erkul at (202) 482–2308.

Dated: March 11, 2002.

Faryar Shirzad,

Assistant Secretary for Import Administration.

RIN 0648–XA74

NOAA Ocean Exploration Initiative; Correction

AGENCY: Office of Ocean Exploration, National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Technical Amendment to the Notice from NOAA's Ocean Exploration Program for FY 2002: Announcement to Solicit Proposals.

SUMMARY: NOAA amends the notice regarding the NOAA Office of Ocean Exploration (OE) proposal solicitation published in the **Federal Register** on September 4, 2001. The amendment will modify the language regarding the number of reviews required for OE's independent peer mail review process. This action is being taken due to the receipt of an insufficient number of responses from pre-selected peer reviewers.

FOR FURTHER INFORMATION CONTACT: Margot Bohan, NOAA Office of Ocean Exploration, Bldg.SSMC3, 1315 East-West Highway, Silver Spring, MD 20901, (301) 713–9444 ext. 155, *margot.bohan@noaa.gov.*

published a notice on September 4, 2001, describing the Ocean Exploration Program and soliciting proposals in support of its mission (66 FR 46260). The program description, funding guidance, submission procedures, evaluation criteria, selection process, and background are in that notice and are not repeated here. The original notice's independent peer mail review procedure defined a requirement for receipt of 3 mail-in reviews before panel review. This requirement is beyond the agency's control and ability to attain within the time available to commence the 2002 field season. The Office hereby revises the mail-in review requirements (page 46262, column 3, section XII, first sentence) to read as follows: "Proposals will be evaluated by an independent peer mail review, i.e., each proposal will be reviewed, by *at least two* qualified scientific and/or technical peers * * *".

Applications under this solicitation will be subjected to both a mail review and a panel review.

Program authority: 33 U.S.C. 883d; (CFDA No. 11.460)—Special Oceanic and Atmospheric Projects.

Louisa Koch,

Deputy Assistant Administrator, Office of Oceanic and Atmospheric Research, National Oceanic and Atmospheric Administration.

North Pacific Fishery Management Council Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notification of public meeting.

SUMMARY: NMFS and the NPFMC will hold a workshop March 25—26, 2002, to discuss effects of fishing on habitat, mitigation tools and fishery descriptions. The NPFMC will hold an essential fish habitat (EFH) committee meeting on March 27, 2002.

DATES: The workshop will be on Monday, March 25, 2002, from 1 p.m. to 5 p.m. and from 8 a.m. to 5 p.m. on Tuesday, March 26, 2002. The EFH committee will meet from 8 a.m. to 5 p.m. on Wednesday, March 27, 2002.

ADDRESSES: The workshop and committee meeting will be in Seattle, WA, in Building 9, at the National Oceanic and Atmospheric Administration, Western Regional Center, 7600 Sand Point Way, N.E.

Questions should be addressed to NMFS, Habitat Conservation Division, ATTN: Cindy Hartmann, 709 West 9th, Suite 801, P.O. Box 21668, Juneau, AK 99802–1668.

FOR FURTHER INFORMATION CONTACT: Cindy Hartmann, NMFS, (907) 586–7585, e-mail: Cindy.Hartmann@noaa.gov; or Cathy Coon, NPFMC, (907) 271–2809, e-mail: Cathy.Coon@noaa.gov. To facilitate security clearance at the NOAA facility the public is requested to contact Cindy by March 22, 2002.

SUPPLEMENTARY INFORMATION:

Background

The focus of the workshop will be a discussion of the effects of fishing on EFH including the following: (1) A discussion of the criteria on what is a minimal and what is a temporary impact on EFH; (2) Review of the scientific studies on gear impacts pertinent to Alaska fisheries; (3) Discussion of a set of tools for mitigating adverse impacts and to what situations they apply; (4) Description of Alaska fisheries. The discussion of criteria for a minimal and temporary impact, review of scientific studies on gear impacts pertinent to Alaska fisheries and an initial discussion of mitigation tools and to what situations they apply is planned for Monday afternoon. On Tuesday, participants will break into four workgroups to revise fishery descriptions, discuss potential adverse effects of their specific fisheries and discuss mitigation tools and their application to their fisheries.

For further information about the EFH supplemental environmental impact statement (SEIS), see the notice of intent to prepare an SEIS published in the Proposed Rules section of the **Federal Register** (66 FR 30396, June 6, 2001). For further information on the preliminary alternative approaches for the designation of EFH and habitat areas of particular concern (HAPC) see 67 FR 1325, January 10, 2002.

On March 27, 2002, the EFH Committee meets to: review fishery descriptions; discuss potential mitigation tools from each subgroup and any other group products; develop committee recommendations for the April NPFMC meeting; and plan for future EFH Committee tasks and meetings.

The NPFMC EFH committee was formally established by the NPFMC's acting executive director in May 2001. The committee was established in response to the need to prepare an SEIS for the EFH fishery management plan amendments. The function of the committee is to serve as a steering committee in facilitating input to NMFS on the SEIS for EFH submitted by the industry, conservation community, Council, and general public and the involvement of the NPFMC in the SEIS. The Committee will work to provide input as appropriate, and submit periodic updates to the Council on the environmental impact statement for EFH. Further information on the EFH Committee can be found on the NPFMC web site at: http://www.fakr.noaa.gov/npfmc/Committees/EFH/efh.htm.

Although other issues not contained in this agenda may come before the Committee for discussion, those issues may not be the subject of formal action during the meeting. Action will be restricted to those issues specifically identified in this notice.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Cindy Hartmann, (907) 586–7235, at least 5 working days prior to the meeting date.

Dated: March 11, 2002.

Richard W. Surdi,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[I.D. 030802A]

Endangered Species; Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Receipt of an application for a research and enhancement permit (1368).

SUMMARY: Notice is hereby given of the following action regarding permits for takes of endangered and threatened species for the purposes of scientific research and/or enhancement under the Endangered Species Act (ESA): NMFS has received an application for a research/enhancement permit from Dr. John Hunter, of the NMFS Southwest Fisheries Science Center of the (SFSC).

DATES: Comments or requests for a public hearing on any of the new applications or modification requests must be received at the appropriate address or fax number no later than 5 p.m. eastern standard time on April 15, 2002.

ADDRESSES: Written comments on the new application should be sent to the appropriate office as indicated below. Comments may also be sent via fax to the number indicated for the application. Comments will not be accepted if submitted via e-mail or the Internet. The application and related documents are available for review in the indicated office, by appointment:

Permits, Conservation and Education Division, F/PR1, 1315 East West Highway, Silver Spring, MD 20910 (phone:301–713–2289, fax: 301–713–0376).

FOR FURTHER INFORMATION CONTACT: Lillian Becker, Silver Spring, MD (phone: 301–713–2319, fax: 301–713–0376, e-mail: Lillian.Becker@noaa.gov).

SUPPLEMENTARY INFORMATION:

Authority

Issuance of permits and permit modifications, as required by the Endangered Species Act of 1973 (16 U.S.C. 1531–1543) (ESA), is based on a finding that such permits/modifications: (1) are applied for in good faith; (2) would not operate to the disadvantage of the listed species which are the subject of the permits; and (3) are consistent with the purposes and policies set forth in section 2 of the ESA. Scientific research and/or enhancement permits are issued under section 10 (a)(1)(A) of the ESA. Authority to take listed species is subject to conditions set forth in the permits. Permits and modifications are issued in accordance with and are subject to the ESA and NMFS regulations governing listed fish and wildlife permits (50 CFR parts 222–226).

Those individuals requesting a hearing on an application listed in this notice should set out the specific reasons why a hearing on that application would be appropriate (see **ADDRESSES**). The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in the permit action summaries are those of the applicant and do not necessarily reflect the views of NMFS.

Species Covered in This Notice

The following species are covered in this notice:

Mollusks

Endangered White Abalone (*Haliotis sorenseni*)

Application 1368

The applicant proposes to breed and reintroduce white abalone in southern California. The applicant wants to collect up to 50 white abalone per year for five years in order to breed, grow out and reintroduce the progeny to the wild. Wild abalone will be collected using ROVs and divers. The animals will be transported to the laboratory and induced to spawn using H_2O_2 or the thermal shock method. The progeny will be grown to 15–100mm before introduction. Precautions will be taken to avoid disease and inbreeding.

Dated: March 11, 2002.

Ann Terbush,

Chief, Permits, Conservation, and Education Division, Office of Protected Resources, National Marine Fisheries Service.

Marine Mammals; File No. 751–1614–00

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Issuance of permit.

SUMMARY: Notice is hereby given that the Ocean Alliance/Whale Conservation Institute, 191 Weston Road, Lincoln, Massachusetts 01773 [Dr. Celine Godard, Principal Investigator] has been issued a permit to take 13 species of odontocete whale and eight species of baleen whale for purposes of scientific research.

ADDRESSES: See **SUPPLEMENTARY INFORMATION.**

FOR FURTHER INFORMATION CONTACT: Tammy Adams or Ruth Johnson, (301) 713–2289.

SUPPLEMENTARY INFORMATION: On June 8, 2001, notice was published in the **Federal Register** (66 FR 30885) that a request for a scientific research permit to take 13 species of odontocete whale and eight species of baleen whale for purposes of scientific research had been submitted by the above-named organization. The requested permit has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226).

Issuance of this permit, as required by the ESA, was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of the endangered species which is the subject of this permit, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Documents may be reviewed in the following locations:

Fisheries off West Coast States and in the Western Pacific; Western Pacific Crustacean Fisheries; 2002 Bank-specific Harvest Guidelines

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notification of no harvest guideline for crustaceans.

SUMMARY: NMFS announces that annual harvest guidelines for the commercial lobster fishery in the Northwestern Hawaiian Islands (NWHI) will not be issued for the year 2002.

ADDRESSES: Copies of background material pertaining to this action, which is identical to the action taken in 2001, may be obtained from Dr. Charles Karnella, Administrator, NMFS, Pacific Islands Area Office, 1601 Kapiolani Blvd., Suite 1110, Honolulu, HI 96814.

FOR FURTHER INFORMATION CONTACT: Alvin Katekaru at 808–973–2937.

SUPPLEMENTARY INFORMATION: Under the Fishery Management Plan for the Crustacean Fisheries of the Western Pacific Region, 50 CFR 660.50(b)(2), NMFS is required to publish the harvest guidelines for lobster Permit Area 1 around the NWHI. Although the lobster stock is not overfished, the NWHI lobster fishery has been closed since 2000: (a) as a precautionary measure to prevent overfishing of the lobster resources; (b) in compliance with an order of the U.S. District Court for the District of Hawaii to keep the crustacean fisheries closed until an environmental impact statement and a biological opinion have been prepared for the crustacean fisheries in the western Pacific region; and (c) consistent with Executive Orders 13178 and 13196, issued in December 2000 and January 2001, respectively, that appear to close indefinitely the NWHI crustacean fishery.

NMFS announces that it will not be publishing any harvest guideline for this fishery for the year 2002 and no harvest of NWHI lobster resources will be allowed. NMFS intends to conduct biological research on the status of NWHI lobster resources and to examine the resulting data for indications as to the appropriate direction for future fishery management actions.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 7, 2002.

Bruce C. Morehead,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–S

DEPARTMENT OF DEFENSE

Office of the Secretary

Notice of Availability Missile Defense Agency Ground-Based Midcourse Defense Validation Of Operational Concept Environmental Assessment

AGENCY: Missile Defense Agency

ACTION: Notice of availability

SUMMARY: The Missile Defense Agency (MDA) (formerly the Ballistic Missile Defense Organization) announces the availability of the Ground-Based Midcourse Defense (GMD) Validation of Operational Concept (VOC) Environmental Assessment (EA). The EA assesses the potential impacts of construction and test activities at GMD VOC test sites. The proposed action includes construction and operational testing of six ground-based interceptor (GBI) silos and support facilities, In-Flight Interceptor Communication System Data Terminals (IDTs), and Defense Satellite Communication System (DSCS) earth terminals in central Alaska; an IDT and DSCS earth terminal at Eareckson Air Station (AS), Alaska; construction of a missile transfer facility at Eielson Air Force Base (AFB), Alaska; use of the existing COBRA DANE Radar, with upgraded hardware and software and interior modifications, at Eareckson AS; interior modifications and hardware and software upgrades to the Early Warning Radar at Beale AFB, California; and Battle Management, Command and Control [BMC2] nodes at one or more of Peterson AFB, Cheyenne Mountain Complex and Shriever AFB in Colorado, Eareckson AS, Alaska, Beale AFB California, and contractor facilities in Alabama and California.

Fort Greely, Alaska was considered as the preferred alternative for the six GBI silos and support facilities and associated BMC3 including one IDT, one DSCS earth terminal, a BMC2 execution node and installation of terrestrial fiber optic cable. Clear Air Force Station, Alaska is being considered as an alternative location to Fort Greely, Alaska as the GBI silo and support facilities location.

The no-action alternative was also considered. Under the no-action alternative, MDA would not proceed with construction and testing to support validation of the GMD operational concept through ground-based testing. Selection of the no-action alternative would not allow the operationally realistic testing needed to further develop the GMD element of the Midcourse Defense Segment.

Comments: Public comments on the EA must be received by April 13, 2002. Written comments or a request for a copy of the EA should be directed to: U.S. Army Space and Missile Defense Command, ATTN: Mr. David Hasley, SMDC–EN–V, P.O. Box 1500, Huntsville, AL 35807–3801.

As the proposed action includes multiple locations, some of which are under the administrative control of the United States Army and some of which are under the administrative control of the United States Air Force, the MDA has used both Army Regulation 200–2 and Air Force Instruction 32–7061 in preparing the EA and Finding of No Significant Impact (FNSI). An unsigned FNSI will be distributed with the final EA. The FNSI will be signed after a 30-day public review period, and the proposed action could be implemented unless the MDA determines that information presented during the 30-day public review period reveals an unassessed potential for significant impacts on the environment. Interested parties can also review the unsigned FNSI, EA, and referenced NMD Deployment EIS on the internet at: *www.acq.osd.mil/bmdo/bmdolink/html/newrel.html#envir.ANC* or at the following locations:

DELAWARE RIVER BASIN COMMISSION

Notice of Proposed Rulemaking; Proposed Amendments to the Administrative Manual—Rules of Practice and Procedure Concerning Fees Associated With Responses to the Freedom of Information Act Requests

AGENCY: Delaware River Basin Commission.

SUMMARY: The Delaware River Basin Commission (Commission) will hold a public hearing to receive comments on proposed amendments to the agency's *Administrative Manual—Rules of Practice and Procedure* updating the fee schedule associated with Commission responses to Freedom of Information Act (FOIA) requests. The current schedule of fees was promulgated in 1975 and has not been updated since. Over the past quarter of a century, computer technologies have introduced new methods of recording and reproducing information that were not contemplated by the 1975 regulations, and administrative costs have increased. The proposed fee structure reflects current technology and costs. The current fees, at Section 2.8.10 of the *Administrative Manual—Rules of Practice and Procedure*, 18 CFR 401.110, and proposed amendments may be viewed on the Commission's Web site at *http://www.drbc.net.*

DATES: The public hearing will be held on Friday, May 31, 2002, during the Commission's regular business meeting, which will begin at 1:00 p.m. The meeting on May 31 must end by 3:00 p.m., but if necessary, the hearing will continue at the Commission's next scheduled business meeting until all those who wish to testify are afforded an opportunity to do so. Persons wishing to testify are asked to register in advance with the Commission Secretary by phoning 609–883–9500 ext. 203. Written comments will be accepted through the close of the public hearing; however, earlier submittals would be appreciated.

ADDRESSES: The public hearing will be held at Grey Towers National Historic Landmark, 151 Grey Towers Drive, Milford, PA. Directions will be posted on the Commission's Web site at *http://www.drbc.net* by April 1, 2002. Written comments should be addressed to the Commission Secretary at DRBC, P.O. Box 7360, West Trenton, NJ 08628–0360.

FOR FURTHER INFORMATION CONTACT: Please contact Pamela Bush at 609–883–9500 ext. 203 with questions about the proposed amendments or the rulemaking process. Notice also is posted on the Commission's Web site, at *http://www.drbc.net.*

Dated: March 7, 2002.

Pamela M. Bush,

Commission Secretary.

BILLING CODE 6360–01–P

DEPARTMENT OF EDUCATION

[CFDA No. 84.234Q]

Projects With Industry; Notice Inviting Applications for New Awards for Fiscal Year (FY) 2002

Purpose of Program: The Projects With Industry (PWI) program creates and expands job and career opportunities for individuals with disabilities in the competitive labor market by engaging the talent and leadership of private industry as partners in the rehabilitation process. PWI projects identify competitive job and career opportunities and the skills needed to perform those jobs, create practical settings for job readiness and training programs, and provide job placements and career advancement services.

Eligible Applicants: Employers, nonprofit agencies or organizations, designated State units, labor unions, community rehabilitation program providers, trade associations, Indian tribes, tribal organizations, and other agencies or organizations with the capacity to create and expand job and career opportunities for individuals with disabilities.

In order to ensure an equitable distribution of funds among the States as required by statute, grant awards will be made only to organizations that provide job and career opportunities for individuals with disabilities within the State in which the organization is located. Only organizations that have the ability to directly receive the grant and directly carry out the project are eligible to apply.

Only applicants that propose to serve individuals with disabilities in States, portions of States, Indian tribes, or tribal organizations that are currently unserved or underserved by the PWI program may apply.

SUPPLEMENTARY INFORMATION: Funds under this competition will be used to support projects in FY 2002. The Assistant Secretary may consider funding approved applications submitted in FY 2002 to support projects in future years.

The Business Leadership Network (BLN), staffed by the U.S. Department of Labor, works to promote best practices in rehabilitation and to enhance opportunities for workers who are disabled. The BLN currently has programs in 30 States, the District of Columbia, and Puerto Rico. These programs operate independently of each other and focus on meeting the specific needs of the business community and State Government. Through BLNs, participating employers, in partnership with State Governor's Committee representatives and other community services professionals, identify specific hiring requirements of employers so that referral and placement services can be customized to meet those employers' needs. Applicants applying under the PWI program are encouraged to collaborate with their local BLN, if one has been established in the State, in order to expand services and employment opportunities to project participants. We believe that strong working relationships with local BLNs will expand the employer network available to projects and, as a result, increase employment opportunities for individuals with disabilities.

Applications Available: March 15, 2002.

Deadline for Transmittal of Applications: May 31, 2002.

Deadline for Intergovernmental Review: July 30, 2002.

Estimated Available Funds: $17,478,135.

Estimated Range of Awards: $175,000-$250,000.

Estimated Average Size of Awards: $221,200.

Estimated Number of Awards: 79.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 36 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, 86, 97, and 99; and (b) The regulations for this program in 34 CFR part 379.

Note: The regulations in 34 CFR part 79 apply to all applicants except federally recognized Indian tribes.

Note: The regulations in 34 CFR part 86 apply to institutions of higher education only.

Priorities: We are particularly interested in applications that meet one or more of the following invitational priorities.

Invitational Priority 1

Projects should demonstrate effective collaboration with the "One-Stop" service delivery system established under title I of the Workforce Investment Act of 1998, as amended (WIA), to assist individuals with disabilities to secure job skills training and employment opportunities in the competitive labor market. Proposed PWI service delivery models should promote the delivery of services to individuals with disabilities through local "One-Stop" centers. Proposed PWI service delivery models should investigate replicable innovative approaches to effective collaboration with the "One-Stop" service delivery system in placing individuals with disabilities into competitive employment. Applicants who wish to address this invitational priority may get further information about the "One-Stop" service delivery system by calling the Department of Labor (DOL) at (202) 693–2700 or visiting the DOL web site at: *www.dol.gov/dol/allcfr/Title_20/Part_662/toc.htm*

Invitational Priority 2

Projects should demonstrate the use of alternative work settings, such as flexiplace or telecommuting, to assist individuals with disabilities, especially individuals with significant disabilities, to secure job skills training and employment opportunities in the competitive labor market. Projects should investigate replicable innovative approaches in the use of alternative work settings. Projects also should demonstrate how these alternatives may increase the number of individuals with disabilities placed into competitive employment.

Invitational Priority 3

Projects should facilitate the school-to-work transition of students with disabilities. Projects should focus on placing youth with disabilities in employment with clearly defined career-path or career-advancement opportunities, or both. Projects also should investigate replicable innovative approaches that can be used to assist students in transition from school-to-work in obtaining competitive employment.

Invitational Priority 4

Projects should demonstrate how literacy services can assist PWI consumers with low literacy levels to obtain higher earnings in competitive employment. Proposed PWI service delivery models should investigate replicable innovative approaches that can be used to assist individuals to obtain higher quality jobs (e.g., jobs with higher wages and health insurance benefits). Projects should focus on enhancing collaboration between local Adult Education and Family Literacy (AEFL) programs, the primary resource for providing adult basic education (ABE) services, and Vocational Rehabilitation programs. This collaboration should include the provision of training, experience, or appropriate reasonable accommodations to AEFL or ABE programs to assist them in serving individuals with disabilities, particularly individuals with significant disabilities, and working cooperatively to share in the cost of training and placement.

Under 34 CFR 75.105(c)(1) we do not give an application that meets one or more of the invitational priorities a competitive or absolute preference over other applications.

Competitive Preference Priority

We give preference to applications that meet the competitive preference priority in the notice of final competitive preference for this program, published in the **Federal Register** on November 22, 2000 (65 FR 70408). Under 34 CFR 75.105(c)(2)(i) we award up to an additional 10 points to an application that is otherwise eligible for funding under this program. The maximum score under the selection criteria for this program is 100 points; however, we will also use the following competitive preference so that up to an additional 10 points may be earned by an applicant for a total possible score of 110 points.

Up to 10 points may be earned based on the extent to which an application includes effective strategies for employing and advancing in employment qualified individuals with disabilities as project employees in projects awarded under this program. In determining the effectiveness of those strategies, we will consider the applicant's prior success, as described in the application, in employing and advancing in employment qualified individuals with disabilities.

For Applications Contact: Education Publications Center (ED Pubs), P.O. Box 1398, Jessup, MD 20794–1398. Telephone (toll free): 1–877–433–7827. FAX: (301) 470–1244. If you use a telecommunications device for the deaf (TDD), you may call (toll free): 1–877–576–7734.

You may also contact ED Pubs at its Web site: *http://www.ed.gov/pubs/edpubs.html.*

Or you may contact ED Pubs at its e-mail address: *edpubs@inet.ed.gov.*

If you request an application from ED Pubs, be sure to identify this competition as follows: CFDA No. 84.234Q.

Individuals with disabilities may obtain a copy of the application package in an alternative format by contacting the Grants and Contracts Services Team, U.S. Department of Education, 400 Maryland Avenue, SW., room 3317, Switzer Building, Washington, DC 20202–2550. Telephone: (202) 205–8207. If you use a telecommunications device for the deaf (TDD), you may call the Federal Information Relay Service (FIRS) at 1–800–877–8339. However, the Department is not able to reproduce in an alternative format the standard forms included in the application package.

FOR FURTHER INFORMATION CONTACT: Kerrie Brown, Mary Jane Kane, Sonja Turner, or Lois Vaughan, U.S. Department of Education, 400 Maryland Avenue, SW., room 3329, Switzer Building, Washington, DC 20202. Telephone: (202) 401–9707 for Kerrie Brown; (202) 205–8484 for Mary Jane Kane; (202) 205–9396 for Sonja Turner; and (202) 205–8749 for Lois Vaughan. If you use a telecommunications device for the deaf (TDD), you may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

Individuals with disabilities may obtain this notice in an alternative format (e.g., Braille, large print, audiotape, or computer diskette) on request to the contact persons listed in the preceding paragraph.

DEPARTMENT OF EDUCATION

President's Board of Advisors on Historically Black Colleges and Universities Meeting

AGENCY: President's Board of Advisors on Historically Black Colleges and Universities, U.S. Department of Education.

ACTION: Change in notice of meeting time.

SUMMARY: Due to a change in meeting time the President's Board of Advisors on Historically Black Colleges and Universities will now meet on Tuesday, March 19, 2002 from 5:30 p.m. to 7:30 p.m. and Wednesday, March 20, 2002 from 8 a.m. to 3:30 p.m.

This notice also describes the functions of the Board. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act. Individuals who will need accommodations for a disability in order to attend the meeting (*i.e.*, interpreting services, assistive listening devices, materials in alternative format) should notify Beverly Ward at 202–502–7900 by no later than Monday, March 11, 2002.

DATE AND TIME: Tuesday, March 19, 2002 from 5:30 p.m. to 7:30 p.m. and Wednesday, March 20, 2002 from 8 a.m. to 3:30 p.m.

ADDRESSES: The meeting will be held at the Madison Hotel, 15 & M Street, NW., Washington, DC 20005.

FOR FURTHER INFORMATION CONTACT: Ms. Beverly Ward, White House Initiative on Historically Black Colleges and Universities, U.S. Department of Education, 400 Maryland Avenue, SW., Suite 7C103, Washington, DC 20202. Telephone: (202) 401–1311.

SUPPLEMENTARY INFORMATION: The President's Board of Advisors on Historically Black Colleges and Universities was established under Executive Order 13256 of February 12, 2002. The Board was established to advise on federal policies that impact upon Historically Black Colleges and Universities, to advise on strategies to increase participation of Historically Black Colleges and Universities in federally sponsored programs and funding opportunities, and to advise on strategies to increase private sector support for these colleges.

The meeting of the Board is open to the public. The meeting will focus on the status and future of federal agency support for Historically Black Colleges and Universities. Records are kept of all Board procedures and are available for public inspection at the White House Initiative on Historically Black Colleges and Universities located at 1990 K Street, NW., Suite 8099, Washington, DC 20006, from the hours of 8:30 a.m. to 5 p.m.

How May I Obtain Electronic Access to This Document?

You may view this document, as well as all other Department of Education documents published in the **Federal Register**, in text or Adobe Portable Document Format (PDF) on the Internet at the following site: *http://www.ed.gov/legislation/FedRegister.*

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP02–96–000]

Columbia Gas Transmission Corporation; Notice of Application

March 8, 2002.

Take notice that on February 27, 2002, Columbia Gas Transmission Corporation (Columbia), 12801 Fair Lakes Parway, Fairfax, Virginia 22030–0146, filed in Docket No. CP02–96–000 pursuant to Section 7(b) of the Natural Gas Act (NGA), for permission and approval to abandon by sale to Hydrocarbon Generation, Incorporated (Hydrocarbon) natural gas facilities, known as the Sheldon System, located in Wyoming County, New York, as well as the service provided through such facilities. In addition, Columbia requests that the Commission find the abandoned facilities to be gathering and therefore exempt from the Commission's jurisdiction, all as more fully set forth in the application which is on file with the Commission and open to public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance).

Columbia states that on February 20, 2002, Columbia and Hydrocarbon signed a Purchase and Sale Agreement, which provides for the sale of the Sheldon System consisting of 15 miles of pipelines ranging in diameter from 4-inch to 10-inch and appurtenances. The Sheldon System was part of Columbia's former Project Penny facilities, which were developed in the mid 1970's and 1980's for the purpose of accessing production volumes to satisfy the supply needs of Columbia's customers. In Docket No. CP98–569–000, Columbia was given authorization to abandon by sale all but two parts of the Project Penny facilities, one being the Sheldon System and another which has not yet been sold. Columbia states that the Sheldon System is not connected to any part of Columbia's system. Columbia receives the volumes of local production from producers such as Hydrocarbon and the gas that is received is largely consumed by local markets. Any volumes that are not consumed are delivered to National Fuel for delivery to Columbia by displacement.

According to Columbia, the facilities will be sold for a negotiated amount of $50,000. Columbia states that it does not propose the abandonment of service to customers other than those currently served directly from the facilities. Once the facilities are acquired, Hydrocarbon intends to operate the facilities as a natural gas gatherer providing gathering and related services. According to Columbia, Hydrocarbon has agreed to assume any obligation Columbia may have to provide service to customers receiving service through the facilities, on terms and conditions acceptable to both Hydrocarbon and the customers. Therefore, Columbia states that it does not anticipate any material change to, or interruption in, the services currently being provided to customers through the facilities. Columbia states that there are no firm contracts or mainline tap consumers served from the facilities.

Any questions regarding the application should be directed to Fredric J. George, Senior Attorney, Columbia Gas Transmission Corporation, P.O. Box 1273, Charleston, West Virginia 22030–0146 at (304) 357–2359.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before March 29, 2002, file with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

If the Commission decides to set the application for a formal hearing before an Administrative Law Judge, the Commission will issue another notice describing that process. At the end of the Commission's review process, a final Commission order approving or denying a certificate will be issued.

Magalie R. Salas,

Secretary.

[FR Doc. 02–6245 Filed 3–15–02; 8:45 am]

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP02–97–000]

West Texas Gas Inc.; Notice of Application

March 11, 2002.

Take notice that on March 4, 2002, West Texas Gas, Inc. (WTG) filed in Docket No. CP02–97–000 an application, pursuant to Section 3 of the Natural Gas Act (NGA), Section 153, *et seq.*, of the Commission's Regulations, for a Section 3 authorization and the Presidential Permit in order to site, construct, operate, and maintain certain natural gas facilities, all as more fully described below. This filing may be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket #" and follow the instructions (call (202) 208–2222 for assistance).

Specifically, WGT requests authorization to construct, operate, and maintain approximately 400 feet of 8-inch diameter pipeline (border crossing) at the International Boundary near Del Rio, Val Verde County, Texas for the delivery of up to 25,000 MMBtu per day of natural gas to Mexico. The border crossing, situated at the center of the Rio Grande River, will connect on the Mexico side with the pipeline facilities of Gas Natural Industrial, S.A de C. V. (GNI) and, on the U.S. side, with approximately nine miles of 8-inch diameter pipeline and related measurement and regulation equipment to be constructed, which will extend from WGT's existing Del Rio Lateral on its intrastate natural gas transmission system.

Any questions regarding the application should be directed to Richard D. Hatchett, Vice President, West Gas Texas, Inc., 211 North Colorado, Midland, Texas, or at (915) 682–4349.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before April 1, 2002, file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

Interventions, comments, and protests may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

If the Commission decides to set the application for a formal hearing before an Administrative Law Judge, the Commission will issue another notice describing that process. At the end of the Commission's review process, a final Commission order approving or denying a certificate will be issued.

Magalie R. Salas,

Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Fact-Finding Investigation of Potential ManipulationDocket No. PA02–2–000 of Electric and Natural Gas Prices; Notice of Clarification of March 5, 2002 Information Request

March 11, 2002.

On March 5, 2002 (67 FR 11111, March 12, 2002), the Associate Director, Office of Markets, Tariffs and Rates, issued an information request in this proceeding directed to all jurisdictional sellers and all non-jurisdictional sellers in the West. In response to telephone inquiries received by Staff, the Associate Director clarifies that the March 5, 2002, information request does not apply to sales by qualifying facilities. The Associate Director reserves the right to issue information requests to qualifying facilities in the future in this proceeding.

Magalie R. Salas,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EG02–100–000, et al.]

Choctaw Gas Generation, LLC, et al.; Electric Rate and Corporate Regulation Filings

March 8, 2002.

Take notice that the following filings have been made with the Commission. Any comments should be submitted in accordance with Standard Paragraph E at the end of this notice.

1. Choctaw Gas Generation, LLC

[Docket No. EG02–100–000]

Take notice that on March 5, 2002, Choctaw Gas Generation, LLC (Applicant), having its principal place of business at 1177 West Loop South, Suite 900, Houston, Texas 77027, filed with the Federal Energy Regulatory Commission (Commission) an application for determination of exempt wholesale generator status pursuant to Part 365 of the Commission's regulations.

Applicant states that it will own and operate a 700 MW generating facility near the city of Choctaw, Mississippi, consisting of two natural gas-fired combined-cycle combustion turbine generator units and a steam turbine generator, having a total nominal output of 700 MW. *Comment Date*: March 29, 2002.

2. Mirant Oregon, LLC

[Docket No. EG02–101–000]

Take notice that on March 6, 2002, Mirant Oregon, LLC (Mirant Oregon) filed with the Federal Energy Regulatory Commission (Commission) an application for determination of exempt wholesale generator status pursuant to Part 365 of the Commission's regulations.

Mirant Oregon proposes to own an indirect, 50 percent undivided interest in a 280 MW generating facility located in Morrow County, Oregon (Facility). All output from Mirant Oregon's interest in the Facility will be sold by Mirant Oregon exclusively at wholesale. All requisite state consent has been obtained and is reflected in Oregon Public Utility Commission Order Nos. 00–115 and 00–214 attached to the application. *Comment Date*: March 29, 2002.

3. System Energy Resources, Inc.

[Docket No. ER95–1042–006]

Take notice that on March 1, 2002, Entergy Services, Inc. (Entergy Services) as agent for System Energy Resources, Inc. (SERI), submitted for filing its response to the January 30, 2002 letter in the above-referenced docket number ER95–1042–005. *Comment Date*: March 21, 2002.

4. American Transmission Company LLC

[Docket Nos. ER01–1107–001]

Take notice that on March 1, 2002, American Transmission Company LLC (ATCLLC) tendered for filing with the Federal Energy Regulatory Commission's (Commission) January 30, 2002 letter Order an executed Revised Network Operating Agreement and an executed Second Revised Network Integration Service Agreement between ATCLLC and Dairyland Power Cooperative.

ATCLLC requests an effective date of February 13, 2002. *Comment Date*: March 21, 2002.

5. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–438–001]

Take notice that on February 28, 2002, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) tendered for filing, pursuant to the Order of the Federal Energy Regulatory Commission (Commission) in Midwest Independent Transmission System Operator Inc., 98 FERC ¶ 61,051 (2002), Section 205 of the Federal Power Act (FPA), 16 USC 824d (2000) and Section 385.205 of the Commission's regulations, 18 CFR 385.205 (2001), revisions to Attachment M (Losses) of the Midwest ISO Open Access Transmission Tariff (OATT), FERC Electric Tariff, First Revised Volume No. 1.

The Midwest ISO has requested an effective date of March 1, 2002.

Midwest ISO has electronically served a copy of this filing, with attachments, upon all Midwest ISO Members, Member representatives of Transmission Owners and Non-Transmission Owners, the Midwest ISO Advisory Committee participants, Policy Subcommittee participants, as well as all state commissions within the region. In addition, the filing has been electronically posted on the Midwest ISO's Web site at *www.midwestiso.org* under the heading "Filings to FERC" for other interested parties in this matter. The Midwest ISO will provide hard copies to any interested parties upon request. *Comment Date*: March 21, 2002.

6. Conectiv Bethlehem, Inc.

[Docket No. ER02–453–002]

Take notice that Conectiv Bethlehem, Inc., on March 4, 2002, tendered for filing with the Federal Energy Regulatory Commission (Commission) a revised page of CBI's Market-Based Rate Tariff, FERC Electric Tariff, Original Volume No. 1, to comply with a letter order issued by the Commission on January 31, 2002 in the above-captioned proceeding. *Comment Date*: March 25, 2002.

7. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–489–001]

Take notice that on March 4, 2001, the Midwest Independent Transmission System Operator, Inc. (the Midwest ISO) tendered for filing revised pages to its Open Access Transmission Tariff (OATT), FERC Electric Tariff, Original Volume No. 1, pursuant to the Commission's Order in Midwest Independent Transmission System Operator, Inc., 98 FERC ¶ 61,087 (2002).

Pursuant to the requirements set forth in 18 CFR 385.2010 (2001), the Midwest ISO has served a copy of its compliance filing on each person whose name is listed on the official service list maintained by the Secretary in this proceeding. In addition, the Midwest ISO has electronically served a copy of this filing, with attachments, upon all Midwest ISO Members, Member representatives of Transmission Owners and Non-Transmission Owners, the Midwest ISO Advisory Committee participants, Policy Subcommittee participants, as well as all state commissions within the region. Finally, the Midwest ISO has electronically posted its filing on the Midwest ISO's Web site at *www.midwestiso.org* under the heading "Filings to FERC" for other interested parties in this matter. The Midwest ISO will provide hard copies to any interested parties upon request. *Comment Date*: March 25, 2002.

8. Michigan Electric Transmission Company

[Docket No. ER02–562–001]

Take notice that on March 4, 2002, Michigan Electric Transmission Company (METC) tendered for filing the following tariff sheets as part of its FERC Electric Tariff, Original Volume No. 1 in compliance with the February 1, 2002 order issued in this proceeding: Sub Second Revised Sheet No 140 and Substitute Original Sheet Nos. 140A and 140B.

The sheets are to be effective as of December 13, 2001. Copies of the filing were served upon those on the official service list in this proceeding. *Comment Date*: March 25, 2002.

9. Southern Company Services, Inc.

[Docket No. ER02–1210–000]

Take notice that on March 1, 2002, Southern Company Services, Inc. (SCS), acting on behalf of Alabama Power Company, Georgia Power Company, Gulf Power Company, Mississippi Power Company, and Savannah Electric and Power Company (collectively Southern Companies), filed one (1) agreement for network integration transmission service between Southern Companies and Generation Energy Marketing, a department of SCS, as agent for Mississippi Power Company, under the Open Access Transmission Tariff of Southern Companies (FERC Electric Tariff, Fourth Revised Volume No. 5). Under this agreement, power will be delivered to the East Mississippi Electric Power Association's DENA Enterprise Delivery Point. This agreement is being filed in conjunction with a power sale by SCS, as agent for Mississippi Power Company, to the East Mississippi Electric Power Association under Southern Companies' Market-Based Rate Power Sales Tariff. *Comment Date*: March 22, 2002.

10. Exelon Generation Company, LLC

[Docket No. ER02–1211–000]

Take notice that on March 1, 2002, Exelon Generation Company, LLC (Exelon Generation), submitted for filing a power sales service agreement between Exelon Generation and Duke Energy Trading & Marketing, LLC under Exelon Generation's wholesale power sales tariff, FERC Electric Tariff Original Volume No. 2 *Comment Date*: March 22, 2002.

11. Carolina Power & Light Company

[Docket No. ER02–1212–000]

Take notice that on March 1, 2002, Carolina Power & Light Company (CP&L) tendered for filing an executed Facility Interconnection and Operating Agreement (Interconnection Agreement) between CP&L and Cogentrix Eastern Carolina, LLC (Cogentrix). The Interconnection Agreement provides for the interconnection of Cogentrix's generating facility with CP&L's transmission system.

CP&L respectfully requests that the Interconnection Agreement become effective on February 4, 2002. Copies of the filing were served upon the North Carolina Utilities Commission and the attached List of Recipients. *Comment Date*: March 22, 2002.

12. Mirant Energy Trading, L.L.C.

[Docket No. ER02–1213–000]

Take notice that on March 1, 2002, Mirant Energy Trading, L.L.C. (MET) tendered for filing an application for an order accepting its FERC Electric Tariff No. 1, granting certain blanket approvals, including the authority to sell electricity at market-base rates, and waiving certain regulations of the Commission. MET requested expedited Commission consideration. MET requested that its Rate Schedule No. 1 become effective upon the earlier of the date the Commission authorizes market-based rate authority, or March 31, 2002. MET also filed its FERC Electric Tariff No. 1. *Comment Date*: March 22, 2002.

13. Invenergy Energy Marketing LLC

[Docket No. ER02–1214–000]

Take notice that on March 1, 2002, Invenergy Energy Marketing LLC (Invenergy Marketing) tendered for filing an application for waivers and blanket approvals under various regulations of the Commission and for an order accepting its Rate Schedule FERC No. 1, Original Volume No. 1. Invenergy Marketing proposes that its Rate Schedule FERC No. 1, Original Volume No. 1 become effective upon issuance of a Commission order accepting the rate schedule for filing.

Invenergy Marketing intends to sell energy, capacity, replacement reserves, and certain ancillary services in the wholesale power market at market-based rates, and on such terms and conditions to be mutually agreed to with the purchasing party. Invenergy Marketing also seeks authority to reassign transmission capacity and to resell Firm Transmission Rights. *Comment Date*: March 22, 2002.

14. American Electric Power Service Corporation

[Docket No. ER02–1215–000]

Take notice that on March 1, 2002 American Electric Power Service Corporation tendered for filing, on behalf of its affiliated companies including Central Power and Light Company and West Texas Utilities Company, (collectively, AEP), an Interim Qualified Scheduling Entity Service Agreement (Agreement).

AEP requests that the Agreement be made effective on March 3, 2002. Copies of the filing have been served on the party to the Agreement as well as on the Public Utility Commission of Texas. *Comment Date*: March 22, 2002.

15. American Electric Power Service Corporation

[Docket No. ER02–1216–000]

Take notice that on March 1, 2002 American Electric Power Service Corporation tendered for filing, on behalf of its affiliated companies including Central Power and Light Company and West Texas Utilities Company, (collectively, AEP), seven Interim Qualified Scheduling Entity Service Agreements (Agreements).

AEP requests that the Agreements be made effective on March 3, 2002. Copies of the filing have been served on the parties to the Agreements as well as on the Public Utility Commission of Texas. *Comment Date*: March 22, 2002.

16. Valero Refining Company—California

[Docket No. ER02–1217–000]

Take notice that on March 1, 2002, Valero Refining Company—California (Valero) petitioned the Federal Energy Regulatory Commission (Commission) for acceptance of Valero rate Schedule FERC No. 1; the granting of certain blanket approvals, including the authority to sell electricity at market-based rates; and the waiver of certain Commission regulations.

Valero will construct and operate a natural gas fired, combined-cycle electric generation facility. The electric output of the facility will be used for onsite purposes, with periodic excess electric energy to be sold at wholesale. Valero is an indirect, wholly owned subsidiary of Valero Energy Corporation, a Delaware corporation. *Comment Date*: March 22, 2002.

17. Duke Energy Corporation

[Docket No. ER02–1218–000]

Take notice that on March 1, 2002, Duke Energy Corporation filed a Third Revised Service Agreement No. 53 to Duke's FERC Electric Tariff Second Revised Volumn No. 4

Comment Date: March 22, 2002.

18. Bangor Hydro-Electric Company

[Docket No. ER02–1219–000]

Take notice that on March 1, 2002, Bangor Hydro-Electric Company (BHE) tendered for filing an Operation and Maintenance Agreement between BHE, Great Northern Paper, Inc. (GNP), and Great Lakes Power, Inc. (GLPI).

Copies of this filing were sent to GNP, GLPI, Maclaren Energy, Inc., the Maine Public Utilities Commission, and the Maine Public Advocate.

Comment Date: March 22, 2002.

19. Central Maine Power Company

[Docket No. ER02–1220–000]

Take notice that on March 4, 2002 Central Maine Power Company (CMP) tendered for filing the Executed Interconnection Agreement by and between CMP and Wight Brook Hydro, designated as FERC Electric Tariff, Fifth Revised, Volume No. 3, Service Agreement No. 143.

Comment Date: March 25, 2002.

20. Central Maine Power Company

[Docket No. ER02–1221–000]

Take notice that on March 4, 2002, Central Maine Power Company (CMP) tendered for filing the Executed Interconnection Agreement by and between CMP and Gardner Brook Hydro, designated as FERC Electric Tariff, Fifth Revised, Volume No. 3, Service Agreement No. 144.

Comment Date: March 25, 2002.

21. Central Maine Power Company

[Docket No. ER02–1222–000]

Take notice that on March 4, 2002, Central Maine Power Company (CMP) tendered for filing the Executed Interconnection Agreement by and between CMP and Stony Brook Hydro, designated as FERC Electric Tariff, Fifth Revised, Volume No. 3, Service Agreement No. 142.

Comment Date: March 25, 2002.

22. Central Maine Power Company

[Docket No. ER02–1223–000]

Take notice that on March 4, 2002 , Central Maine Power Company (CMP) tendered for filing unexecuted Local Network Operating Agreements (LNOAs) and unexecuted service agreements for Local Network Transmission Service (LNSA) entered into with four retail customers: Miller Hydro Group; Topsham Hydro Partners; United American Hydro, L.P.; and CHI Operations, Inc.—Mechanic Falls Hydro. Service will be provided pursuant to CMP's Open Access Transmission Tariff, designated rate schedule CMP—FERC Electric Tariff, Fifth Revised Volume No. 3, under the following Service Agreement Numbers:

Miller Hydro Group LNSA—Service Agreement No. 145
Miller Hydro Group LNOA—Service Agreement No. 146
United American Hydro LNSA—Service Agreement No. 147
United American Hydro LNOA—Service Agreement No. 148
CHI Operations, Inc. LNSA—Service Agreement No. 149
CHI Operations Inc. LNOA—Service Agreement No. 150
Topsham Hydro LNSA—Service Agreement No. 151
Topsham Hydro LNOA—Service Agreement No. 152.

Comment Date: March 25, 2002.

23. California Independent System Operator Corporation

[Docket No. ER02–1224–000]

Take notice that on March 4, 2002, the California Independent System Operator Corporation, (ISO) tendered for filing with the Federal Energy Regulatory Commission (Commission) a Participating Generator Agreement between the ISO and Delta Energy Center, LLC for acceptance by the Commission.

The ISO states that this filing has been served on Delta Energy Center, LLC and the California Public Utilities Commission. The ISO is requesting waiver of the 60-day notice requirement to allow the Participating Generator Agreement to be made effective February 8, 2002.

Comment Date: March 25, 2002.

24. California Independent System Operator Corporation

[Docket No. ER02–1225–000]

Take notice that on March 4, 2002, the California Independent System Operator Corporation (ISO) tendered for filing with the Federal Energy Regulatory Commission (Commission) a Scheduling Coordinator Agreement between the ISO and TransAlta Energy Marketing (U.S.) Inc., for acceptance by the Commission.

The ISO states that this filing has been served on TransAlta Energy Marketing (U.S.) Inc. and the California Public Utilities Commission. The ISO is requesting waiver of the 60-day notice requirement to allow the Participating Generator Agreement to be made effective February 8, 2002.

Comment Date: March 25, 2002.

25. California Independent System Operator Corporation

[Docket No. ER02–1226–000]

Take notice that on March 4, 2002,the California Independent System Operator Corporation, (ISO) tendered for filing with the Federal Energy Regulatory Commission (Commission) a Meter Service Agreement for ISO Metered Entities between the ISO and Delta Energy Center, LLC for acceptance by the Commission.

The ISO states that this filing has been served on Delta Energy Center, LLC and the California Public Utilities Commission. The ISO is requesting waiver of the 60-day notice requirement to allow the Meter Service Agreement for ISO Metered Entities to be made effective February 8, 2002.

Comment Date: March 25, 2002.

26. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1227–000]

Take notice that on March 4, 2002, pursuant to Section 205 of the Federal Power Act and Section 35.13 of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by Ameren Energy Marketing Company.

A copy of this filing was sent to Ameren Energy Marketing Company.

Comment Date: March 25, 2002.

27. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1228–000]

Take notice that on March 4, 2002, pursuant to Section 205 of the Federal Power Act and Section 35.13 of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by CMS MS&T Michigan L.L.C.

A copy of this filing was sent to CMS MS&T Michigan L.L.C.

Comment Date: March 25, 2002.

28. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1229–000]

Take notice that on March 4, 2002, pursuant to Section 205 of the Federal Power Act and Section 35.13 of the Federal Energy Regulatory Commission's (Commission)

Regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by Kansas City Power & Light Company.

A copy of this filing was sent to Kansas City Power & Light Company.

Comment Date: March 25, 2002.

29. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1230–000]

Take notice that on March 4, 2002, pursuant to Section 205 of the Federal Power Act and Section 35.13 of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by NRG Power Marketing Inc.

A copy of this filing was sent to NRG Power Marketing Inc.

Comment Date: March 25, 2002.

30. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1231–000]

Take notice that on March 4, 2002, pursuant to Section 205 of the Federal Power Act and Section 35.13 of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by Public Service Company of Colorado-Marketing.

A copy of this filing was sent to Public Service Company of Colorado-Marketing.

Comment Date: March 25, 2002.

31. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1232–000]

Take notice that on March 4, 2002, pursuant to section 205 of the Federal Power Act and section 35.13 of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by Southwestern Public Service Company-Marketing.

A copy of this filing was sent to Southwestern Public Service Company-Marketing.

Comment Date: March 25, 2002.

32. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER02–1233–000]

Take notice that on March 4, 2002, pursuant to section 205 of the Federal Power Act and section 35.13 of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 35.13, the Midwest Independent Transmission System Operator, Inc. (Midwest ISO) submitted for filing a Service Agreements for the transmission service requested by Wolverine Power Supply Cooperative, Inc.

A copy of this filing was sent to Wolverine Power Supply Cooperative, Inc.

Comment Date: March 25, 2002.

33. Pinnacle West Capital Corporation

[Docket No.ER02–1234–000]

Take notice that on March 4, 2002, Pinnacle West Capital Corporation (PWCC) tendered for filing a Service Agreement, Rate Schedule FERC No. 9 under PWCC's Rate Schedule FERC No. 1 for service to Central Arizona Water Conservation District (CAW).

A copy of this filing has been served on CAW.

Comment Date: March 25, 2002.

34. Central Illinois Light Company

[Docket No. ER02–1235–000]

Take notice that on March 4, 2002,Central Illinois Light Company (CILCO), tendered for filing with the Commission a Service Agreement with Corn Belt Energy Corporation under its Market Rate Power Sales Tariff.

CILCO requested an effective date of April 1, 2002. Copies of the filing were served on the affected customer and the Illinois Commerce Commission.

Comment Date: March 25, 2002.

35. Illinois Power Company

[Docket No. ER02–1236–000]

Take notice that on March 4, 2002, Illinois Power Company (Illinois Power), filed with the Federal Energy Regulatory Commission (Commission) a Notice of Termination, effective at 11:59 p.m., January 15, 2002, of the Firm Short-Term Point to Point Transmission Service Agreement and the Non-Firm Point to Point Transmission Service Agreement, entered into by Illinois Power and The Legacy Energy Group, LLC, each dated May 16, 2001 and effective on June 1, 2001, as Original Service Agreement Nos. 304 and 310, respectively, under FERC Electric Tariff Third Revised Volume 8 of Illinois Power.

Illinois Power states that the termination has been requested by the customer and agreed to by Illinois Power. Illinois Power further states that a copy of the Notice of Termination has been mailed to the customer.

Comment Date: March 25, 2002.

Standard Paragraph

E. Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

Magalie R. Salas,

Secretary.

g. *Filed pursuant to:* Federal Power Act, 16 USC 791(a)–825(r).

h. *Applicant Contact:* Paul C. Rizzo, Paul C. Rizzo Associates, Inc., 105 Mall Boulevard, Monroeville, Pennsylvania 15146, (412) 856–9700.

i. *FERC Contact:* Regina Saizan, (202) 219–2673.

j. *Deadline for filing motions to intervene, protests, and comments:* 60 days from the issuance date of this notice.

All documents (original and eight copies) should be filed with: Magalie R. Salas, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426. Comments, protests, and interventions may be filed electronically via the internet in lieu of paper. See, 18 CFR 385.2001 (a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

Please include the project number (P–12146–000) on any comments, protests, or motions filed.

The Commission's Rules of Practice and Procedure require all interveners filing a document with the Commission to serve a copy of that document on each person in the official service list for the project. Further, if an intervener files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Project:* The proposed project would consist of: (1) A proposed rockfill dike impounding a proposed 100-acre upper reservoir, (2) a proposed upper concrete intake structure, (3) a proposed 125-foot-high, 1,000-foot-long earthen dam impounding a proposed 77-acre lower reservoir, (4) a proposed lower concrete intake structure, (5) three proposed eight-foot-diameter steel penstocks approximately 5,000 feet long, (6) a proposed powerhouse containing three pump turbines having a total installed capacity of 60 MW, (7) a proposed 1.5-mile-long, 66 kV transmission line, and (8) appurtenant facilities. The project would have an annual generation of 178.8 Gwh.

l. Copies of this filing are on file with the Commission and are available for public inspection. This filing may be viewed on the Commission's Web site at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions ((202) 208–2222 for assistance). A copy is also available for inspection and reproduction at the address in item h above. Comments, protests, and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

m. Preliminary Permit—Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application. A competing preliminary permit application must conform with 18 CFR 4.30(b) and 4.36.

n. Preliminary Permit—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before a specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application. A competing license application must conform with 18 CFR 4.30(b) and 4.36.

o. Notice of Intent—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, and must include an unequivocal statement of intent to submit if such an application may be filed, either a preliminary permit application or a development application (specify which type of application). A notice of intent must be served on the applicant (s) named in this public notice.

p. Proposed Scope of Studies under Permit—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit would be 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies, the Applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

q. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

r. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. An additional copy must be sent to Director, Division of Hydropower Administration and Compliance, Federal Energy Regulatory Commission, at the above-mentioned address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

s. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Magalie R. Salas,

Secretary.

Notice of Application for Amendment of License and Soliciting Comments, Motions To Intervene, and Protests

March 8, 2002.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection. A mailing error has occurred; therefore, this notice is being reissued and the deadline for filing is extended.

a. *Application Type:* Amendment of License.

b. *Project No.:* 4204–024.

c. *Date Filed:* August 8, 2001.

d. *Applicant:* City of Batesville (City).

e. *Name of Project:* White River Lock and Dam No. 1 Hydroelectric Project.

f. *Location:* The project is located on the White River, in the Town of Batesville, Independence County, Arkansas.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Donald H. Clarke, Law Offices of GKRSE, 1500 K Street NW, Suite 330, Washington, DC 20005. Telephone (202) 408–5400, or e-mail address: *dhclarke@GKRSE-law.com.*

i. *FERC Contact:* Any questions on this notice should be addressed to Janet Hutzel at (202) 208–2271, or e-mail address: *janet.hutzel@ferc.fed.us.*

j. *Deadline for filing comments, motions to intervene, and protests:* 30 days from the issuance date of this notice.

k. This notice was issued January 29, 2002, with a comment date of February 28, 2002, and is being reissued with an extended deadline for filing.

All documents (original and eight copies) should be filed with: Magalie R.Salas, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426. Please include the project number (P–4204–024) on any comments or motions filed.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

Comments, motions to intervene, and protests may be filed electronically via the Internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site, *http://www.ferc.gov*, under the "e-Filing" link.

l. *Description of Amendment:* The license, issued February 28, 1986, authorizes a transmission line route whereby the as yet unconstructed transmission line would interconnect with Arkansas Power and Light (now Entergy). The City of Batesville now intends to interconnect with a Southwestern Power Administration (SWPA) transmission line. The City thus proposes to (1) change the route for the unconstructed transmission line and (2) build a substation on an existing Southwestern Power Administration (SWPA) right-of-way.

The proposed 25 kV transmission line would extend along the north side of the White River westward 9.6 miles from Lock and Dam No. 1 to the proposed substation. Underground transmission line is proposed for the first 3000 ft from Lock and Dam No. 1, while the remaining line would use single pole structures.

The proposed substation would be located approximately two miles east of White River Lock and Dam No. 2 (Project No. 4660), on the north side of the White River. The 100 ft by 150 ft substation would step-up the voltage from 25 kV to 161 kV, and have a transformer rating of 17.5 kV.

SWPA is a cooperating agency in the processing of the license amendment.

m. A copy of the application is on file with the Commission and is available for public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link—select "Docket #" and follow the instructions (call 202–208–2222 for assistance). A copy is also available for inspection and reproduction at the address in item h above.

n. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

Any filings must bear in all capital letters the title "COMMENTS," "PROTEST," or "MOTION TO INTERVENE," as applicable, and the Project Number (No. 4204–024) of the particular application to which the filing refers. A copy of any motion to intervene must also be served upon each representative of the City of Batesville specified in item h, above.

Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representative listed in item h, above.

Magalie R. Salas,

Secretary.

Electricity Market Design and Structure (RTO Cost Benefit Analysis Report); Notice of Technical Conference on Results of RTO Cost Benefit Report

March 8, 2002.

The Federal Energy Regulatory Commission (Commission) is planning to hold a technical conference at its Washington, DC, headquarters on March 25, 2002 to allow the public and all interested participants an opportunity to ask questions about the results of its RTO Cost Benefit Report. This technical conference is in additional to the regional teleconferences announced in our March 1, 2002 notice. The technical conference will be held from 10:00 am-2:00 pm EST in the Commission's Meeting Room. All previously scheduled regional teleconferences for industry and the public will still be held on March 18 and 19, 2002 .

Like the regional technical teleconferences, the March 25th technical conference is designed to assist participants in understanding the results of the RTO Cost Benefit Report and not to discuss the merits of the Commission's RTO policy. The Commission believes that this conference and the regional teleconferences will assist the participants in preparing comments on the report which are due April 9, 2002. Reply comments are still due April 23, 2002.

No telephone communication bridge will provided at this meeting. The technical conference will be transcribed

and the transcript will be placed in appropriate and related dockets. Copies of the transcripts will be available from Ace-Federal Reporters (800–336–6646 or 202–347–3700) at cost and will be available on the Commission's web site 10 days after receipt from Ace-Federal Reporters.

For further information, please contact either: William Meroney at 202–208–1069 or William.meroney@ferc.gov, Charles Whitmore at 202–208–1256 or Charles.whitmore@ferc.gov, Federal Energy Regulatory Commission, 888 N. Capitol Street, NE., Washington, DC 20426.

Magalie R. Salas,

Secretary.
